ENGINEERS WIN TWO WRESTLING CHAMPIONSHIPS

Rock Hereford and Norwood Are
New 158 and 135 Lb.
Champions

HEREFORD WINS ONE FALL

Engineers Take Meet With 18
Points—Harvard and
Brown Defeated

Technology's wrestling team ended its season in a highly successful manner when it won the New England Intercollegiate Championship Meet at Providence last Friday and Saturday. Technology defeated Harvard and Brown the score being M. I. T. 18, Harvard 16, and Brown 10. As the score indicates the victory was by the closest of margins and is attributed to the skillful handling of the team by Coach Burns and Trainer "Doc" Johnson. Harvard had previously defeated the Engineers in mid-season by a score of 22-3 so the come-back of the Institute team is significant. Seven individual championships were established.

Harvard has three of the new champions while the Beavers and the Bruins have two apiece. Hereford and Norwood bring the laurels to the Engineers in the 158 lb. and 135 lb. respectively; Goldberg, Stromes, and Captain Karelitz doing the same for the Crimson; and Eckstein and Captain Spellman turning the trick for Brown.

Fall Goes to Hereford
All the bouts in the finals but that of Rock Hereford's were decision matches. Rock defeated Smith of Brown with a half-scissors and double arm hold and took five minutes to get his opponent on the mat.

Norwood got his decision over Malmud of Harvard. In the 125 lb. division, Tuttle of the Engineers lost to Stromes of Harvard while Coyle wrestling in the 116 lb. class met the same fate at the hands of Goldberg. Tryon, the Engineers last representative in the finals was defeated by Captain Spellman of Brown.

Harvard Strong From Start
The Crimson team gave indications of their strength from the very beginning, and at the end of the preliminary bouts on Friday only two Harvard wrestlers had been eliminated.

DECLINATION SHOWN IN REGISTRATION FIGURES

Registration For All Colleges In
Country Also Falls

Registration figures for the third term are not yet complete but Registrar MacKinnon estimates that they will total about 2700. This is less than the figures for last year but this is explained by the fact that the college registration of the country is now in a declining period. At the Institute the normal drop in registration during the year is about six per cent. That is, about six per cent of the men registered for the first term usually drop out by the third. This year the registration has decreased more than the normal, keeping in line with the general trend by dropping a little over seven per cent.

Figures given out by the Bureau of Education show that the registration in colleges was about eight per cent less in 1922-23 than in 1921-22 and registration at the Institute showed a corresponding drop. Figures for 1923-24 have not yet been published but judging from the Institute registration they will again show a drop. Last year for the third term the Institute registration was 2930, about 230 more than the total anticipated for this term.

Miss That Fine!

If you do not secure approved registration card and student address card from your registration officer before 3:30 o'clock today you will be fined \$5.

If you do not exhibit approved registration card and exchange address card for class roll cards at Bursar's Office before 4 o'clock today you will be fined \$5.

Annual Robbery Staged At Coop During Holiday

\$1800 Loss Sustained—Dividends
Will Not Suffer Due to
Theft Insurance

For the sixth time in eight years burglars, last Friday, broke into and robbed the Technology Branch of the Harvard Co-operative Society on Massachusetts Avenue. The burglary occurred between 1:30 and two o'clock in the morning, the thieves jimmying a side door and rushing the merchandise out to an awaiting automobile. They left no clues behind and to date have not been traced.

The night officer passed the store at 1:30 o'clock and found everything all right. At ten minutes of two a resident of Buxley Hall was disturbed by an unusual noise and going to a window saw a light and an automobile at the side door of the Coop. He believed there were four men in the party doing the job. One man was at the wheel of the machine, one in a racoon coat was a guard for the party, and two were rushing merchandise out of the store.

He immediately phoned for the police but had considerable trouble get-

CORPORATION XV COMPLETES TOUR

Party Entertained at Many of
the Plants Visited
During Trip

Leaving South Station last Wednesday at midnight, 35 members of Corporation XV left for Bridgeport, Connecticut, on their annual spring tour. In Bridgeport the next morning their pullman was placed on the siding and the party departed for the Bullard Tool Works where they spent the day being shown all of the various processes in the manufacture of the Multi-automatic machines which are made there. At noon they were the guests of the company at luncheon.

Friday morning the Corporation was the guest of the Bridgeport Brass Works, being shown through their plant and later given a luncheon before their departure at noon for New York. After arriving in New York about 3 o'clock in the afternoon the party proceeded to Lord and Taylor's Department Store where they were given talks by different members of the firm.

Visit Hell Gate
That night at the Tech Club the party was given a dinner at which Professor E. H. Schell and Dr. D. R. Dewey were present. Early next morning the group met in the lobby of the Hotel Commodore, where they stayed during the trip, after which they left for the J. W. Thompson, National Advertising agency where the advertising

DR. SEERLEY TO SPEAK HERE ON SEX EDUCATION

T. C. A. Gives Technology Chance
to Hear Popular Sex
Psychologist

HERE THREE YEARS AGO

Dr. F. N. Seerley, Dean of the Y. M. C. A. College of Springfield, is to give the series of lectures sponsored once each year by the Technology Christian Association. In 1921, Dr. Seerley delivered three lectures at the Institute. The lectures will be on the subject of "Sex Factors In Human Life." Dr. Seerley's aim is to tell his listeners how to make life fit to pass on to the next generation. To this end he has lectured all over the country to many gatherings of all sorts of people and has been well received. Each year, Dr. Seerley devotes a certain amount of time to giving lectures at various colleges and for this purpose the Springfield College grants him a release from his duties there. W. M. Ross of the T. C. A. said, "Technology is most fortunate in having succeeded in securing the services of this much sought after speaker."

Three Allied Subjects

The series of lectures is to begin on Wednesday, March 26, and will continue Thursday and Friday. The lectures will be held in room 10-250 at four o'clock on each of the three days unless this hall is found to be too small. In that case the lectures will be given in the main hall of Walker. When Dr. Seerley spoke here three years ago, the large hall in building 10 was filled far beyond its capacity. Over seven hundred men were in the room.

The first lecture of the series will be on "The Psychology of Sex," the second will be on "Manhood" and the third on "Womanhood." Dean H. P. Talbot '85, will introduce Dr. Seerley on the first day. Dr. Morse the head of the Medical Department, will preside on Thursday and President S. W. Stratton has consented to officiate at the last lecture.

Dr. Seerley is an old football man and played against Harvard and Yale when he was a student. He has been lecturing to students for over thirty years. During the Great War, he had full charge of the Sex Education work of the American Forces.

Following a trip of Dr. Seerley's through many southern colleges "The Southerner" published the following statement:

"Seldom, if ever, has a man, visiting the colleges of the Southwest, so quickly won his way into the respect and the friendship of student bodies and faculties. From Missouri to Texas not a word has come to the Field officer but of utter commendation. The secret perhaps lies in the fact that Dr. Seerley treats sex not as something vulgar and bad, but as a great constructive force which properly conceived and used aligns man most closely with the eternally creative heart of God."

TECH SHOW SCORES SECOND NEW YORK SUCCESS BEFORE LARGE ALUMNI AUDIENCE

Technology-Wellesley Holiday Wedding

A college romance, which commenced on the golf links at Wellesley, became known last week when the marriage of Miss Marion Coville, Sophomore at Wellesley, and Alfred Bailey, a Senior at the Institute, was announced. The couple abandoned their studies a few hours March 11 and went to Marlboro where they were married by the Rev. Brian Roberts, D. D., of the Episcopal Church.

Despite the secrecy surrounding the marriage, as far as college friends of both the bride and groom were concerned, it was announced that it was not an elopement, since the marriage was sanctioned by the families of both.

Mrs. Bailey will continue with her studies at Wellesley while her husband is completing his course at the Institute. They will reside at Wellesley for the remainder of the college year.

DEBATING TEAM MEETS SYRACUSE

Question Of Immigration Laws
Is To Be Discussed
Here Tonight

Whether or not the present immigration laws should be re-enacted will be the resolution discussed tonight in room 10-250 at 8, when the Technology Debating Team meets the Syracuse team. Last night the visitors argued on the same subject with Boston University. Syracuse, who last year defeated Oxford University, is known to be one of the strongest debating teams in the east, so the contest promises to be very interesting.

Although the subject of immigration is not popularly discussed, it is considered one of the most important questions of the present time. So far there has been no desirable agreement reached either in Congress, or among the people, and as the present immigration law expires on June 30, of this year it must either be re-enacted or replaced by some other law during the present session of Congress. The Institute team will argue in favor of retaining the present laws.

The four men on the Technology team are, H. Shore '24; T. E. Moodie '24; A. M. Kallet '24; and G. Neitlich '24. The Syracuse team consists of, S. Bernstein; J. S. Young; D. Levene; and G. S. Wainwright. The judges selected are, J. W. Spring and J. H. Powell, two Boston attorneys; and B. W. Guernsey from the Old Colony Trust Company.

PERFORMANCES ON ROAD ALL RECEIVE GLOWING TRIBUTES

"Spooky Blues" Is Song Hit of
"The Hidden Idol"—Other
Numbers Good

(Special to THE TECH)

Waldorf Astoria, New York, March 18, 1924.—Before a large gathering of alumni and undergraduates "The Hidden Idol," Tech Show's annual production scored for that activity its second New York success which if the crowd attending was any indication was even greater than that scored last year by "The Sun Temple." A good audience was present for the matinee, but an even greater audience assembled to see the curtain rise on the evening performance of the show.

Whiting Good Comedian
W. F. McCormack '26 as Mrs. Summerwell scored the greatest individual success as his singing was a clever imitation of a woman's. All of his songs took well. J. L. Clifford '25 as Phil Wainwright, the moving picture director and Richard Whiting '26 as Buster Brown. Pal of Phil's took the parts of hero and comedian. Whiting was especially good. He was even better than last year.

D. A. Shepard '26 and Raymond Mancha '26 with their banjo act were repeatedly called back to amuse the audience. They were especially well received at the Northampton performance for Smith's College.

Four Devils Good
"Spooky Blues" was the greatest song hit this year. It has a tune that can be easily carried and one which was quickly learned at Smith. The management is relying on this to prove the biggest success at the performance during Junior Week. The ballet was

JOINT CONCERT WITH DARTMOUTH MARCH 29

Tickets To Be on Sale in Main
Lobby Today

Tickets for the joint concert of the Dartmouth Musical Club and the Combined Musical Clubs of Technology will be on sale in the Main Lobby each day from 9 to 2 starting today. As there are a limited number of tickets the management stresses the need of buying tickets early. Only 1000 are to be sold and Dartmouth men will take a large percentage of these. The Alumni of Technology, the Boston Dartmouth Club, and the Dartmouth Alumni Association are each taking 150 tickets.

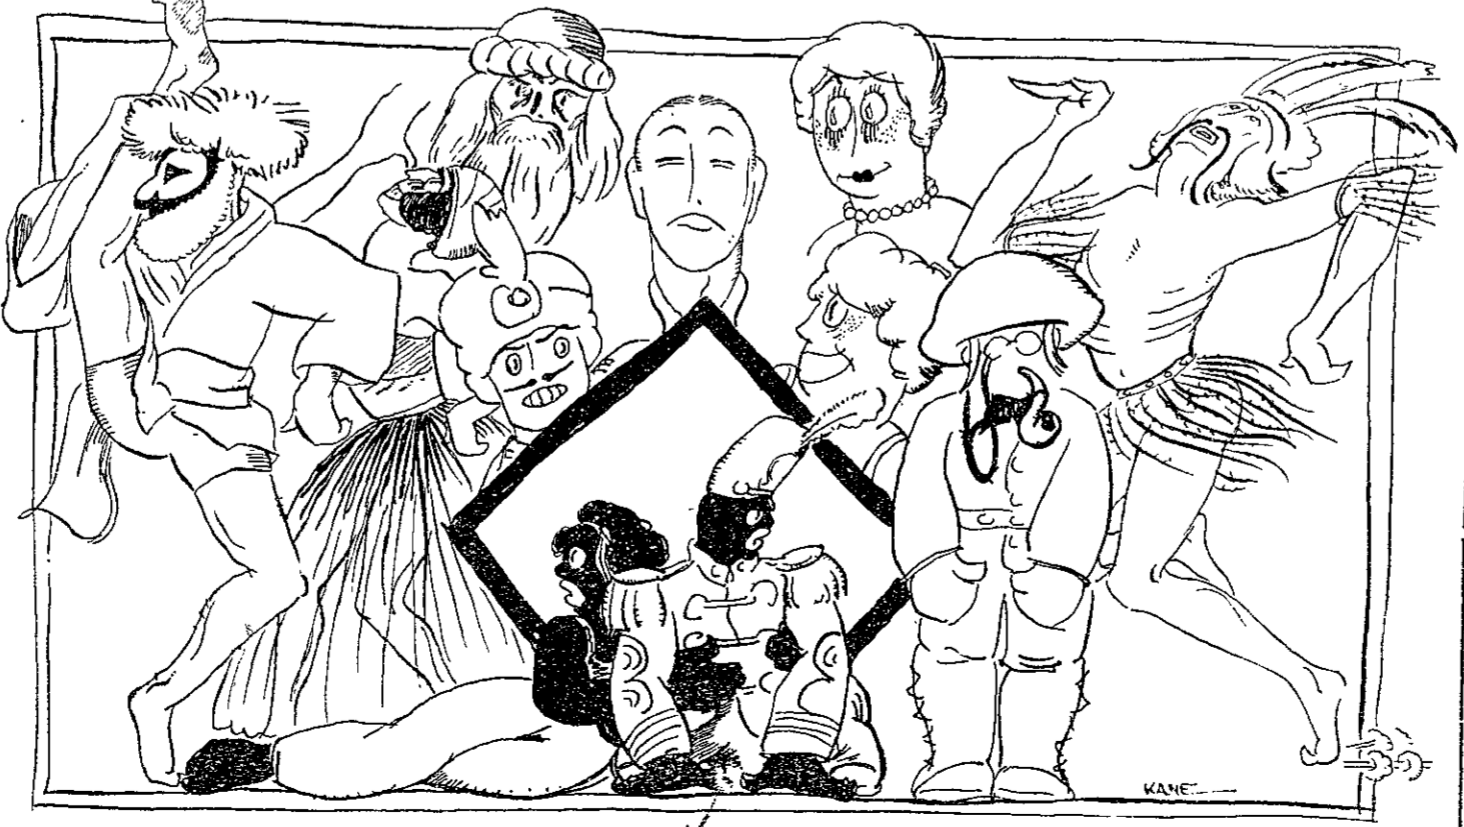

The joint concert will be held at Hotel Somerset, Saturday evening, March 29, from 8 to 12. The dance orchestras of the two organizations will supply the music for the dancing which will follow the concert. The admission is \$5 a couple while stag tickets will be sold at the door for \$2.50

HOOVER DEMANDS HUMANISM FOR ENGINEERS

"WE had better reduce the volume of science and applied science we are pouring into our young men in order to make room for some stimulation of their public relationships, some realization of their public obligations," said Herbert Hoover in a recent address before the American Engineering Council.

Thus an engineer and one of Technology's most eminent graduates indicts the staid, hardshell technical man and the training that creates this attitude. In deploring the hermit-like tendencies of the engineer, Mr. Hoover was not seeking an arraignment of technical schools; he was pointing out the narrowness of the prevalent conception in the technical profession that an engineer must keep himself free from participation in public service.

To accomplish this contribution the engineer needs more humanism, more stimulation to think along sociological lines, and a broader insight into the value of human relationships. With the intensity of a technical education to cope with, it is somewhat natural for him to drop out of the trend of human affairs and to lose a true prospective of public service.

ON RECORDS

ANOTHER term has gone. Another record, good or bad, has sped homeward to fond parents. Some of us have been able to write home with pride. Far too many have indited long letters to the god Alibi.

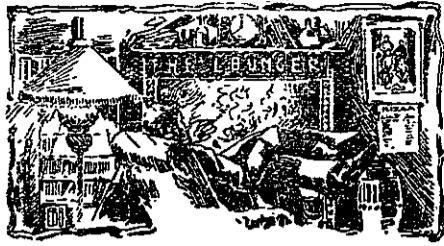

Many have been called to a premature ending of their career at the Institute. Numerous others will have to work hard to avoid the same fate. But the great majority can start on the last term of the year with a feeling of reasonable assurance.

It is to be feared that the Faculty come in for their share of student censure at this time. But in no way can they be called responsible. Rather should they be censured if they let pass those whose work is of a doubtful quality.

The Institute is supposed to graduate engineers. If we would be engineers it will take work, hard and continuous work. So let us buckle down and go to it. A good record does must to alleviate an earlier one.

OUR CHAMPIONS

TECHNOLOGY may well be proud of its wrestling team. Working conscientiously through the year, with little or no support from the Undergraduates, it has surpassed all contestants for the New England Championship.

Technology the beautiful, with mud and water blessed: what a wealth of sticky sediments are expressed by this phrase! The Lounger thrills with true artistic pleasure as he recalls his pleasant walk from bulding eight across the magnificent lawns to Walker.

The Lounger feels that some comment is necessary concerning a worthless organization that has made its appearance down at Rogers. The Sons of Sampson, with the avowed purpose of fostering hirsute ornaments, including all forms of organic stubble and shaggy bristles on chins, upper lips, and other visible places, is proving itself a menace to Technology's reputation for handsome men.

Now the Lounger contends that anything which detracts from the pulchritude of Tech men is detrimental to the Institute and deserves the K. O. of Institute Executive Committee (the other committeemen don't seem to count).

The majority of the Sons, darling boys they are, are proving themselves totally unable to sprout a hirsute exhibit of real proportions, and this un-Samsonlike inability is having a demoralizing effect on the remainder of the students by tending to disprove the common theory of Tech Men and Harvard boys.

It is the Lounger's personal opinion that the whole affair is a thinly veiled skeptics society whose members realize that they have an extremely bad crop of stubble, yet they are pyrrhonic enough to try to disprove the fact. All in all the affair is a ridiculous flubbing, and something should be done to re-civilize the members and to destroy the insidious psychological effect it is having amongst Technology circles.

"THE FAITHFUL HEART" AT ST. JAMES THEATRE

"The Faithful Heart" which opened at the St. James this week proved to be a very interesting performance. From the beginning of the show to the end, there was not a place in which the play seemed to lag, but it held the interest of the audience all through.

The story opens with a prologue, the scene of which is laid in the Reindeer Hotel outside of Southampton docks, England, in 1899. Waverly Ango, ship's officer in the Mercantile Marine, had made the acquaintance of Blacky, a niece of Miss Gatterscombe, who owned the hotel.

The story is taken up twenty years later. The scene of Act I is in the private office of Ango who had become a Colonel in the British army. Having fallen in love with Diana Oughterson, a wealthy society leader, he was discussing his future with Gilbert Oughterson and Edgar Rachman, cousins of Diana.

"Towering Masses"

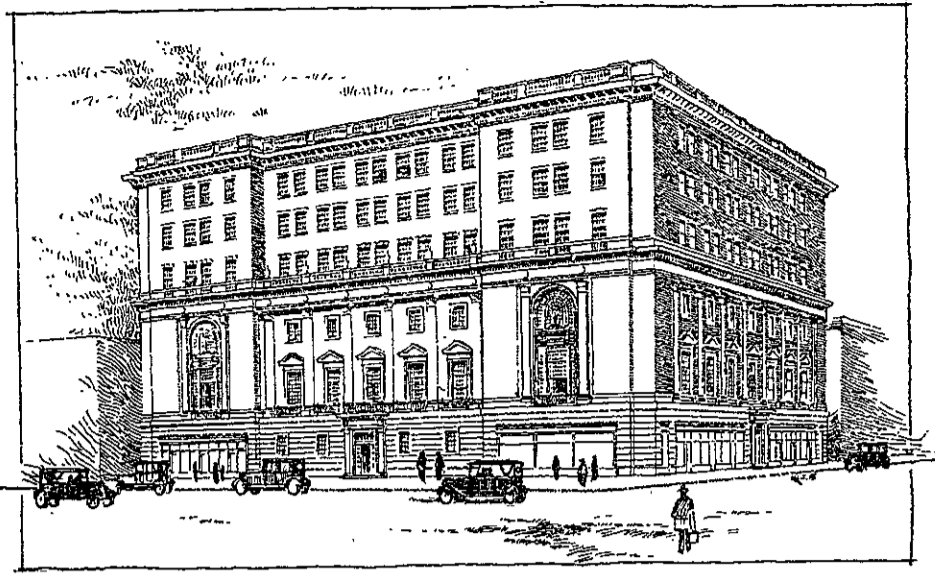

The Garment Center Buildings New York City WALTER M. MASON, Architect Drawn by Hugh Ferriss

HERE the new architecture expresses itself in great vigorous masses which climb upward into the sky with a pyramidal profile—gigantic, irregular, arresting. An earlier, conventional building on the near corner is overshadowed, engulfed in towering masses of the newer building which are prophetic of an architecture of the future which is vividly stimulating to the imagination.

Certainly modern invention—modern engineering skill and organization, will prove more than equal to the demands of the architecture of the future.

OTIS ELEVATOR COMPANY Offices in all Principal Cities of the World

New University Club Will Offer Excellent Facilities

With every facility for the comfort and enjoyment of its members, the New University Club building of Boston will be built on the corner of Trinity Place and Stuart Street at a cost of two million dollars. Membership is open to men who have attended college two years. Construction will begin in the early summer.

All modern club features will be incorporated in the building which has been designed to fill a long felt need among the college men of Boston, especially among the younger classes. A distinctive feature will be the sport facilities for squash, raquet, swimming, tennis courts, bowling, and billiards.

An auditorium, Turkish baths, several floors of sleeping rooms, a commodious library, large dining room, private dining rooms, and a ladies' dining room are among other features provided for in the plans.

Up to the present time, 360 Technology men have applied for membership. After April 1, it will no longer be possible to purchase membership certificates and it will be necessary to pay an initiation fee of \$100. Arrangements have been made whereby Junior members, consisting of men who have attended college for two years and have not been out for more than ten years, pay on a sliding scale determined by the number of years out of college.

For those who have been out three years or less, the annual dues are \$25 and, if application is made before April 1, no initiation fee will be required. In either case, the dues will not start until after the building is completed and ready for occupation.

The purpose of the club is to provide a social center for college men and to develop a broad intercollegiate fellowship. At the same time, the building is planned so that each college group may preserve its own unity and yet create a fraternal spirit, doing jointly what no one group, with very few exceptions, could do individually.

The headquarters of the Executive Committee are at 24 Federal Street and any inquiries may be made there. The club building is to be located in a very accessible part of the city at the head of the new Park Square district. The subway stations are only a few steps away, the theatres are but a few minutes walk, and the New Haven and Boston and Albany Railroad Stations are almost next door.

PHILOSOPHICAL PLAY AT COPLEY THIS WEEK

The Jewett Players are at the Copley this week in the philosophical tragedy, "R. U. R." The play is not so complex that its meaning cannot readily be seen. It is this: if the proletariat, the working class, rise up and destroy the aristocracy, they will soon find that the finer parts of life have been lost and that they are unable to perpetuate over again for themselves. This is portrayed in a rather interesting way. A small group of men discover a method for manufacturing mechanical people who are exactly like humans except that they are unable to perpetuate themselves. They must be built by real people. So many of them are made that they outnumber the humans. One of them, who has a keener perception than the majority, leads them in a revolt against their makers. By virtue of their vast numbers, the mechanical men kill off all but one of the living people. However, the secret of how these mannikins are made has been destroyed. The surviving man tries for years to uncover the lost process with no success. The mechanical people are beginning to die off and it seems that all life will soon come to an end on the earth. At last, the one man notices that two of the machines have actually fallen in love. He realizes that these automans will have children and so perpetuate civilization and with this knowledge, he dies happy.

LYNN FONTANNE WINS APPROVAL AT WILBUR

The Wilbur is opening a new show this week with Lynn Fontanne in the leading role. The play is called "In Love With Love." It is a beautiful comedy, nothing boisterous, but just full of fun all the way through. Lynn Fontanne is superb and simply adorable. She is so sweet, pretty and intriguing, that the whole audience is in love with her too, by the middle of the second act.

This charming young lady falls in love with love and encourages all of her many suitors. Of course, each of these think that he is the only one. This leads to a number of amusing situations. The climax comes when the girl realizes what she has done and then really learns to love a man. He turns out to be a failure, but her love survives the fall and all ends very happily.

Just to see Lynn Fontanne alone is worth much more than the price of admission. The play too, is very good and full of laughs. The keen rivalry among the suitors is exceedingly amusing. One leaves the show with a feeling of huge satisfaction and a certainty that the play has been a success.

ORIGINAL MELACHRINO
"The One Cigarette Sold the World Over"

The Class of 1924

is to be Congratulated on the Adoption of the Endowment Fund Plan of Life Insurance

Beyond the specific purpose of this decision there is a great stimulus to the individual alumni and the substantial friends or former students of M. I. T.

No one can measure accurately the effect of the 1924 action—following a similar plan of the last year's graduating class. Directly and indirectly Technology will unquestionably receive additional gifts, pledges, insurance endowments, etc.—simply because those men nearest to the present M. I. T. are doing their part for constructive future development.

Caring for the future is the fundamental reason for life insurance. For over sixty years the John Hancock organization has emphasized a conservative present appraisal of future value, whether of an individual, corporation, or institution.

Life Insurance adapts itself to many purposes—family protection, business credit, mortgage replacement, institutional endowment, education of children, and income for old age—purposes which the John Hancock is prepared to carry out in every possible way.

Over Sixty years in business. Now insuring over One Billion Eight Hundred and Fifty Million dollars on approximately 3,300,000 lives.

Technology is Overwhelmed In Final Swim

Relay Team Secures Fourth Place And One Point

Technology was forced into the background in the New England Intercollegiate swimming meet held last Friday and Saturday at Hanover when Dartmouth and Brown tied with 32 points each. The Engineers scored one point by obtaining fourth place in relay, Dunn, Richardson, Evans and Taylor making up the team.

In the preliminaries held Friday the relay swam against the strong Dartmouth team in the second heat. The only other Technology representative to score in the prelims was Taylor who came in second in the first heat of the fifty yard dash. Taylor gave a mighty good exhibition of swimming. Jones, Brown's star performer, won and he made a new pool record in doing it. His time was 25 1-5 seconds.

Brown Wins By Relay

With Dartmouth and Brown tied at 32 points apiece, the rules of the Association gave the meet to Brown because the Bruins were victors in the relay. The relay itself was almost a tie between Kidd of Dartmouth and Motter of Williams, and it took a keen eye to catch the swimmer who won second place.

Two New England records went to smash when Lillencrantz of Williams covered the distance in the 100 yard backstroke in 1 minute 12 2-5 seconds, and Bogart of the Green plunged 75 feet in 46 1-5.

After Dartmouth and Brown came Williams with 16 points, Wesleyan with 13, and Technology with one.

Jones Loses 50 yard Dash

In the fifty yard dash Coles and his teammate Jones put up a stiff fight for the honors but Coles won out in the end. But in the 100 yard swim Jones took the laurels with little trouble. Every race was bitterly fought, and in none of the contests was any college supreme.

In the prelims, although Taylor got second in the first heat, he was shut out of the semi-finals. Jones and Cole of the Bruins winning first in each heat of the semi-finals.

The summary:
50-Yard Dash—Won by Coles, Brown; second, Jones, Brown; third, Howard, Wesleyan; fourth, Motter, Williams. Time, 25 1-5s.

220-Yard Swim—Won by Wheeler, Brown; second, Hutchinson, Dartmouth; third, Metzger, Brown; fourth, Lillencrantz, Williams. Time, 2m 34 4-5s.

Fancy Dive—Won by Blunt, Dartmouth; second, Martin, Wesleyan; third, Maxwell, Wesleyan; fourth, Wiley, Dartmouth.

100-Yard Backstroke—Won by Lillencrantz, Williams; second, Algar, Dartmouth; third, Coles, Brown; fourth, Slater, Dartmouth. Time, 1m 12 2-5s (New England Record.)

100-Yard Dash—Won by Jones, Brown; second, Howard, Wesleyan; third, Wheeler, Brown; fourth, Ballantyne, Dartmouth. Time, 57 3-5s.

Plunge—Won by Bogart, Dartmouth second, Jacobson, Wesleyan; third, Smith, Dartmouth; fourth, Shepherd, Williams. Distance, 75ft in 46 1-5s (New England Record.)

100-Yard Breaststroke—Won by Olmstead, Williams; second, Satterfield, Dartmouth; third, Thompson, Dartmouth; fourth, Shepherd, Williams. Time, 1m 13 2-5s.

Relay—Won by Brown (Wheeler, Staples, Coles, Jones); second, Dartmouth (Bolles, Starrett, Ballantyne, Gidde); third, Williams (Healey, Parker, Richardson, Evans, Taylor). Time 1m. 43 2-5s.

Team Score—Dartmouth 32, Brown 32, Williams 16, Wesleyan 13, M. I. T. 1.

TECHNOLOGY REVIEW OUT NEXT WEDNESDAY

The Technology Review, profusely illustrated and concerning Tech Show mostly, will be out one week from today. Among the many other articles will be found one by Edward Hungerford on George Eastman, who is perhaps better known as the mysterious Mr. Smith. A very good account of the Radio Dinner, given in New York on March 7 will also be included in its contents. It was at this dinner that the General Electric Company, Westinghouse Company, and the Radio Corporation of America combined for the main purpose of facilitating the broadcasting of speeches half way around the world.

PROF. SEAVER SPEAKS TO TECHNOLOGY DAMES

At the meeting of the Technology Dames, Monday, in room 10-275, Professor Seaver gave a lecture on wood engraving, illustrating his talk with numerous stereopticon slides. He also had one original carving by Timothy Cole which he passed around among the audience. Following the lecture a fainty tea was served in the Emma Rogers Room in commemoration of St. Patrick's Day.

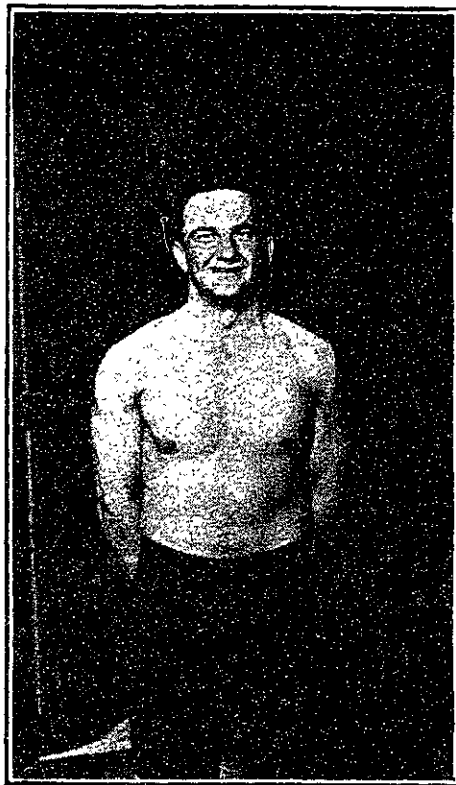

ENGINEER MATMEN WIN TWO CHAMPIONSHIPS

(Continued from Page 1)

Coyle won his match in the prelims, getting a decision over Brooks of Brown. Norwood had a tough job on his hands to get a win from Peters and it took two overtime periods before he secured a decision in 2 minutes 30 seconds.

Rock won his bout in 3 min. 40 secs. by throwing Hill of Harvard with a single scissors and half nelson. In the 175 lb. class Captain Greer of Technology lost a decision to Hayne.

Captain of New England Champions

M. M. Greer

For the first time the New England Association held second team matches for a trophy. Brown won with Harvard and Technology trailing.

The summary:
115-pound class—Goldberg, Harvard, defeated Coyle, M. I. T., by decision.

125-pound class—Stormes, Harvard, defeated Tuttle, M. I. T., by decision.

135-pound class—Norwood, M. I. T., defeated Malmud, Harvard, by decision.

145-pound class—Capt. Karelitz, Harvard, defeated Salzberger, Brown, by decision.

158-pound class—Hereford, M. I. T., threw Smith, Brown, with a half-scissors and double arm hold. Time—5 minutes.

Unlimited class—Capt. Spellman Brown, defeated Tryon, M. I. T., by decision.

BEAVER CREW OUT ON RIVER FOR FIRST TIME

Varsity Show Up Well As Result Of Intensive Training On Machines

RACE NAVY NEXT MONTH

With the ice on the river broken up from the boathouse to up beyond the arsenal, the first varsity took its first spin on the water Monday afternoon. Yesterday all the crews were on the river, from the freshman to the Senior varsity and with all the men in great spirits from the first day in the shells, the outlook for a winning set of Technology crews looked very bright.

Coach Bill Haines has been very anxious to get the men on the water soon so as they may learn to balance the shell properly and get the feel of the boat. For a week now the crews have been on the machines, after the short cessation of practice due to the examinations. Yesterday was the first time that they received their first real workout on the river.

Will Race Navy

The first varsity was the first crew to be on the Charles this year. Harvard has been handicapped from taking the shells out of the boathouse as early as this as the ice still spans the stream around Newell boathouse. With the knowledge of having the jump on Harvard, the men took to the shells yesterday in great shape. Although very ragged in the handling of the oars and keeping the shell on an even keel the crew presented a likely bunch of oarsmen.

Coach Haines was unable to follow the shells as they rowed as the Wolf was launched only yesterday for the first time and was not in shape for use. With the launch in good running condition the task of whipping the crews into shape for their first race with Navy on April 26 will be lightened greatly.

Beaver Passers Have Veterans For Next Year

Basketball Team Ends Successful Season—Will Lose Only Three Men

Although this season's basketball team was anything but successful, the prospects for a good team next year look well with only three members of this year's squad not returning to school this fall. Technology will have a wonderful nucleus around which to build a team next season with a seasoned group of veterans returning to the Institute next year. Johnston, who was elected captain after Stan Cook resigned due to an injury, has been re-elected captain for next year's team.

Starting out early in November to practice for the coming season, with a squad of about 39 men it looked as though the team had a good chance for a successful season. Capt. Cook who the season before was the second highest scorer on the squad was back at his old running guard position. Such veterans as Davidson, Lankton and Eager gave the future a rosy hue.

Cook Resigns

In the first game with Northeastern, the varsity won their one and only game. Stan Cook was unable to play throughout the whole game as he was handicapped by an injury to his knee which he had received while playing basketball at prep school. In the subsequent games he was also very much crippled and was kept from playing his usual strenuous game at guard Technology's defense from then until nearly the close of the season was not very strong. The team lost game after game showing extraordinary spurts of form, at times, and going into slumps at others. The most noteworthy of these spurts was in the game with Stevens Tech on the home floor, the team played the Stevens quintet almost to a standstill, losing out at the last by the bare margin of one point. The two games with Brown were both exciting clashes, in which Technology gave the winners a go for their money. The game at the Hargar was the best of the two—Brown succeeded in only beating the Cardinal and Gray by one basket after a hectic scrap.

Team Shows Well With Vermont Following the Brown games, there were few bright spots on the record of the team. The boys gave everybody a good fight but failed to deliver the

WINTER TRACK TEAM HAD VARIETY OF EXPERIENCES

Dame Fortune Worked For and Against Engineers During Winter Season

The Varsity Track Team, handicapped as it was with hard luck and injury, has made a very fair record for itself during the past season. Starting with an inexperienced team, Coach Connor has built up a combination which has not only given a good account of itself throughout the winter, but bids far to become one of Technology's strong teams by the end of the Spring season. Fight and good-sportsmanship which do not appear on the final score of a meet, also played a large part in the team's conduct.

Passing over the first meet with Harvard, which was a practice affair, the next meet in which the Engineers were slated to appear was the K. of C. games. The relay stood a fine chance of turning in a mighty fast time but for the fall and injury of Doug Jeppe who was at the time leading by about 20 yards. Captain Ambach survived four heats of the 45-yard hurdles and placed second in a very close finish.

Diamond Medals for Relay Team

The Millrose A. C. games which included a relay race with Princeton was the next test for the team. Captain Glen Bateman the Beaver lead-off man, got away to a fine start, and was increasing the gap which separated him from the Princeton runner, when the latter fell and lost so much time recovering that the race was hopelessly lost for the Tigers. Showing a mighty fine spirit of sportsmanship, the team refused to continue the contest, and requested that the race be repeated. Princeton refused to do this and so the diamond medals were awarded to Technology.

The next week in the B. A. A. games at the Arena, Coach Connors men made a splendid showing considering the limited number of Beaver entries and the veteran field of contestants. Marvin Rick running unattached because of the one year eligibility rule, placed third to Johnson, former A. A. U. champion; and Brown ex-intercollegiate miler. The relay team lost to Harvard in a blanket finish of what was one of the fastest races of the year. Captain Russ Ambach, performing in a steady manner, secured fourth in the 45-yard hurdles.

World's Record in Hurdles

At the A. A. U. championships held in Mechanics Hall the Beaver trackmen did especially well in the 600. Bailey, Manion, and Makepeace placing in the preliminary heats, and Peggy Joyce qualifying for the finals. Again Ambach won honors for the Engineers, losing out in a heartbreaking finish in the finals of the hurdles which event was clocked at the remarkable time of 6 seconds flat, equaling the

world's record. The two preliminary heats which the Technology captain won were run off in the excellent time of 6:1. Giff Symonds who up to this meet had been taking things easily on the advice of Doc Connors, made his debut in the 600 and placed second in the semi-finals.

The American Legion meet at Boston was a severe test of the team, but the results justified the policy of concentrating on this meet by not sending any men to the N. Y. A. C. games held several days earlier. Davidson competed in the invitation 600 as unusual honor to be accorded to a college man at this event is almost invariably reserved for athletes of national reputation. The half-mile was won by a handy margin by Leness, a transfer, who is ineligible for the varsity this year. Although this race was almost a farce as far as the close finish which was expected was concerned, the time was very good, a fact which verified Leness' unofficial time of 2:03:1 in the half made a few days before.

Giff Symonds in the Mile

In the I. C. A. A. A. meet in New York the Beaver trackmen made a good showing although they placed no men in the finals. Captain Ambach, unaccustomed to the 75-yard hurdles, ran a fine race and was not eliminated until the semi-finals. His teammate, Emmons Blodgett, survived the semi-finals and was barely beaten out by a fifth place. McArdle, Technology's best bet in the high jump, was out of the running when he failed at 5 ft. 10 in. The three men who tried for second place in this event only made 5 ft. 10 in. The mile went to Verne Booth, Johns Hopkins veteran distance man, in the time of 4:29:3 with such men as McClean of Penn State and Mal Douglas of Yale in the scoring list. In this event Giff Symonds came in a good sixth through a sprint at the end.

Frosh Prospects Poor

The frosh started off their season with poor prospects because of lack of material. Although they were beaten in a closely contested meet with Rindge, they won unexpected firsts in the 1000 yd. run, the high jump, and shot put. The B. A. A. race with Harvard was lost after the lead shifted from one side to the other. Andover which has probably the strongest schoolboy track team in the East made the frosh trail by a large score, although many of the individual races were close. In this meet Gaylord running with a crippled leg secured second in the mile, and Fred Glantzberg, performing in a consistent manner, heaved the shot around 44 feet but was unable to place because of his fouling. In the next meet at Worcester the team showed marked improvement, Glantzberg getting 2nd in the shot with a heave of over 42 feet, the previous Institute record being 41:7:3-4", and Wiebe getting first in the 40-yard dash.

COOP SUSTAINS ANNUAL ROBBERY IN VACATION

(Continued from Page 1)

ting the operator and it was 10 minutes before he was finally connected. A patrol wagon and officers were immediately sent but the thieves had left in the mean time. It is believed that they went up Massachusetts Avenue toward Harvard Square and passed the patrol which was coming down.

Burglars Caught Before

Loot valued at \$1800 was secured but as the Coop carries \$25,000 worth of burglary insurance the loss was wholly covered. The plunder consisted mainly of suits and spring top coats. Some shirts, underwear, briefcases, and jewelry were also taken. Although the store has been robbed seven other times the loss has never been so great. In the other cases the work was done by a "lone wolf" and not by an organized band.

The same officer that was on duty last Friday arrested an 18 year old negro 2 years ago whom he caught about to enter the building. The negro was sentenced for a year. About a year ago last Christmas a man broke one of the side vestibule windows and stole the bulk of a Christmas exhibit on display. This included some cameras and jewelry. A short time later the Boston police arrested a man on suspicion whom they found gazing into a jewelry store window down town. When searched a bundle he had was found to be a brick wrapped in paper and jewelry stolen from the Harvard Coop was found in his possession. He was convicted and sentenced to serve several years.

The burglars this time left no clues and the manager of the Coop expects it will prove very difficult to trace them. The suits and coats all have the Coop label but this can very easily be removed. The jewelry, however, may yield a clue if the thieves attempt to dispose of it. The Harvard Co-operative Society is the only company which sells this jewelry with the Institute seal and it is made to order for them.

Lucy M. Van Cott, Dean of women at the Utah University, was voted the most beautiful woman on the campus in a recent contest. The dean had a plurality of eighty-six over her nearest competitor.

FIGHT FOR PLACES IN RIFLE LEAGUE

Technology and Penn State Are Tied for Fourth League Place

Norwich still continues to lead the Northeastern Rifle League. Last week's returns of the matches firmly put Norwich in the lead as they defeated both Penn State and Harvard, hanging up high marks in both contests. The Engineers by losing to Penn State are now tied with the State riflemen, each team having won five and lost three.

Penn had to set a new mark to beat the Engineers as the record of 1934 was a new high mark until Norwich shot 1938. Norwich has a clear record of eight wins while the University of Penn is second having lost only one contest and that to Norwich.

League Standing

ENGINEERS AND SIGNAL MEN WILL HOLD SMOKER

The Society of American Military Engineers will hold a joint smoker with the Signal Battalion next Tuesday with a view of getting the men of the two units better acquainted with each other. The Signal Corp film entitled "Animated Map of the World War" will be shown and Colonel William Sage of the Engineer Corps will speak. All men in the advanced units are expected to attend and any men who expect to join one of the units later. Sophomores who signed up for either of the units in the recent campaign are especially invited. The meeting will be held in room 5-330 at eight o'clock, Tuesday. There will be smokes and refreshments.

PROF. ROGERS TO GIVE COURSE IN ENGLISH

Professor Rogers has just finished a course in contemporary American literature at the Boston Public Library which he gave in connection with the state department of education. Owing to the success of this course, Professor Rogers will continue his lectures at the library on the subject of contemporary English writers. The course opens today with a lecture at seven thirty. Professor Rogers will begin with Kipling. Then he will discuss Wells, Shaw, Galsworthy, Chesterton, Bennett, Conrad and Barrie. In this way he will be able to cover the field pretty thoroughly. The course is intended as a companion course to the one on American authors which Professor Rogers just finished. These lectures are open to the public.

Ovation Is Given Tech Show At All Its Performances

Four Devils Roundly Applauded
—"Spooky Blues" Makes Hit
With Audiences

(Continued from Page 1)

well received. "The Four Devils" were the outstanding feature of this part of the show.

"Hokum," sung by Whiting, was easily a close rival of "Spooky Blues." Those who saw him perform in New York think that Whiting has the making of a second Frank Gage '23. Hood Worthington '24 as the Temple Dancer scored a success that equalled the one he made last year as Serafina.

(Special to THE TECH)

Northampton, March 16.—Playing before a capacity audience at Northampton consisting mainly of Smith College girls Tech Show secured a success which surpassed that of previous years. As in other performances the Four Devils in the ballet were one of the biggest hits and the song "Spooky Blues" proved a success not to be rivalled by former show songs.

"Hokum" and "Broadway Cabaret" were songs which proved very popular. The chorus was well received and the college girls were amused as usual at the antics of the men in skirts. W. F. McCormack '26 as Mrs. Summerwell, Richard Whiting '26 as Buster Brown and Hood Worthington '24 as Temple Dancer were the hits in the cast.

At Norwich the show also appeared before a capacity house and scored the same success it received at Northampton.

The chorus and ballet and especially the Four Devils were roundly applauded. "Spooky Blues," if the reception the audience gave it is any indication, will prove a song not quickly forgotten. Richard Whiting '26 as Buster Brown, Hood Worthington '24 as Hasahda, and C. H. Topping '26 as Minerva were repeatedly applauded.

(Special to THE TECH)

Norwich, Conn., March 14.—The train bearing Tech Show pulled into Norwich about noon and was greeted by a delegation of Technology Alumni headed by W. H. Collins '90. The trip from Boston was made under rather crowded conditions as all (110 took the trip) were in one Pullman. This, however, did not detract from the enjoyment of a pushball game with two balloons which occurred in the train the way down.

A trip to the hotel and lunch were the first events on the program. The men were free to do as they pleased in the afternoon and the majority attended a matinee at the Palace Theatre, the theatre where they were to play in the evening. A rehearsal was called for at six o'clock.

Costumes Good

Thursday the dress rehearsal was held in Boston and it was found that the chorus was without shoes. A trip was immediately made to a wholesale shoe shop and the necessary footwear obtained. After going through the first act lunch was served and in the afternoon the third and then the second acts were done. In the evening the entire performance was gone through again.

The costumes were considered exceptionally fine, even though a bit burlesque. Minerva's third act harem gown was acclaimed the most magnificent. The weakest spot in the production was the fact that the chorus and principals did not keep time on the songs. Bates, Edwards, Foster, McCov, and the four devils were excellent in the ballet.

CAST

Buster Brown, Pal of Phil—Richard Whiting '26; Bill Wainwright a moving picture director—J. L. Clifford '25; Minerva A. Summerwell, fiancée of Phil—C. H. Topping '26; Mrs. Summerwell wife of professor—W. F. McCormack '26; Prof. Summerwell, a devotee of science—S. F. Hershey '27; Henry, Mrs. Summerwell's servant—C. R. Bayne '24; Hasahda a temple dancer—Hood Worthington '24; Judd, a tramp—D. P. Jenne '25; General Allaghab, of the army of Kookoostan—R. L. Turner, G.; The Rajah of Kookoostan—I. D. business was explained after a trip through the plant.

After this they were conducted through the Grand Central Terminal where the despatching system and interlocking devices were carefully explained. Leaving Grand Central Terminal in busses the party proceeded to the Hell Gate Power Station. Here they were given a dinner after which they were shown through the plant by the company officials.

After the inspection of the Hell Gate Station the party was taken back to the Hotel Commodore in the bus, where they broke up into smaller groups, some of which went to the Tech Club to remain until Tuesday.

BASKETBALL SQUAD WAS UNSUCCESSFUL

(Continued from Page 4)

punch that wins games. Stan Cook who had been unable to play for some time resigned his captaincy, as he believed an active captain would be better than an inactive one. Johnston was elected to fill his place.

The guarding of the team improved considerably as the season progressed, and they held the scores down but failed to score enough themselves in order to win games. New Hampshire State ran away with the team in a game at the Hangar when the team was in a bad slump. The Vermont game was a decided improvement, the Beaver quintet equalling the score of the strong Vermonters in the second half.

At Worcester the team met with unfavorable refereeing when they held the Clark five to two lone baskets but lost by two points, 15 to 13, when Technology was given 29 personal fouls.

As a whole the season is not half so bad as it appears, the team played good basketball at times, and without the slumps of poor form, the quintet would have undoubtedly come through with a much better record.
