

ELMER J. DEANE IS PRESIDENT OF FRESHMAN CLASS

Field Day Tug-of-War Captain
Leads Competitors at
Polls Wednesday

ELECTIONS ARE CLOSE

W. B. Dean, Baker-Carr, and
Weinberg Fill Other
Class Offices

Freshmen may now set their minds at rest as regards the results of the hotly-contested class elections held Wednesday. Elmer J. Deane, of Fall River, Mass., was elected president of the class of 1928. The other successful candidates are as follows: Vice-president, W. B. Dean; secretary, J. L. Baker-Carr; treasurer, Hyman Weinberg; Executive Committee, M. H. Baker, and T. C. Kane; Institute Committee, E. E. Chute and T. S. Wood Jr.

A fine showing was made by the class in coming out to vote. Of the total 576 men in the class, 446 voted, a percentage of 77.5. The use of the new preferential system of voting rather than the Australian Ballot makes it difficult to give the number of votes each candidate received, since it was necessary to count the second, third and even further preferences in order to get a majority for a candidate. In the presidential contest, the votes of the lowest candidate were distributed among the other candidates nine times before Deane obtained a majority, although he had a plurality from the first. The runners-up for the presidency were Richard Goble and J. A. O'Hearn respectively; for vice-president, J. S. Bennett and D. S. Shipley; secretary, James Donovan; treasurer, T. B. Taylor; Executive Committee, Gilbert Hathaway and W. G. Loomis; Institute Committee, M. deF. Seavey and F. W. Sammis.

TECHNOLOGY REVIEW WILL APPEAR TUESDAY

Institute Professors Constitute
Several Articles

Besides the usual departments, the next issue of the Technology Review, to appear Tuesday, will contain articles by Dr. H. W. Tyler '84, Professor C. L. Norton '93, and Frank Bourne '95, also a frontispiece by Professor H. L. Seaver of the English Department.

Dr. Tyler has written an article on experiences to be had in traveling through Latin Europe in a flivver. It is fully illustrated by photographs and by sketches drawn by Professor Seaver. The article by Professor Norton summarizes five years of the Tech plan, presenting a brief history of the means by which the Institute has been able to raise a million and a quarter dollars on its investments, and of the manner in which the Institute has been able to tie up with industries. Mr. Bourne's article is on a summer in Europe. Incidentally Mr. Bourne was arrested while sketching a bridge. The usual departments will have special reference to undergraduate affairs.

DORM DANCE GIVEN IN WALKER TONIGHT

The last Dorm Dance of the term is to be given this evening in the main hall of Walker starting at 8 o'clock. Tickets are on sale from 12 until 2 o'clock today in the main lobby, the price being \$2.00.

Hackett's Hotel Touraine Orchestra of nine pieces will furnish music, and for a specialty act two juvenile dancers will exhibit some of the more unusual dances such as the tango and types of esthetic dancing.

The management has decided to limit the attendance to 200 couples in order not to overcrowd the hall. Those expecting to go are reminded that tickets purchased at the door rather than in the main lobby today will be \$3.00 instead of \$2.00.

Lone Student Favors The Two-Term System

THE TECH has at last received a ballot from a student who approves the two term plan. The last ballot to be received, long after the rest had been counted and the ballot box removed, declared, "I approve the two term plan because the longer term allows a longer uninterrupted period of study."

The reason given on this ballot for approving the new plan was given by several other men as a reason for the old plan. Many of the men thought that a long uninterrupted term such as the second term would be would tend to break down the health of a man so that he would not be able to work well. As for the first term, that would not be uninterrupted, but would mean stopping at Christmas just at the wrong time, soon before examinations.

ANNOUNCE CONTEST FOR CHEMICAL MEN

Professor Moore Offers Prizes
For Models Used for
Organic Course

Professor F. J. Moore of the Chemistry Department has announced that a contest will be opened shortly for the best constructed models of the structure or organic compounds. The competition is open only to men taking the course in Organic Chemistry, and it is expected that prizes will be awarded at the beginning of the second term.

The construction of these models is a required part of the Organic Chemistry course. Professor Moore believes that the men will thus be able better to understand the actual alignment of the atoms in the molecule. The models may be of any size or material.

Winners in a similar contest conducted by Professor Moore last year were C. M. Cooper '25, who received the first prize, and W. L. Morgan '25 who was awarded the second prize. Models handed in at that time were made of a great variety of materials, glass tubing, cork, copper wire, hairpins, and gum drops proving to be most popular. The first prize last year consisted of three volumes of leading chemical books, Vanthoff's Chemistry in Space, Bernthson's Organic Chemistry, and Henrich's Theories of Organic Chemistry. The second prize was a volume of Bernthson's Organic Chemistry. No announcement has as yet been made regarding the prizes to be awarded in this year's contest.

CORPORATION XV GOES TO LEVER SOAP PLANT

Twenty men attended the Corporation XV trip made yesterday afternoon to Lever Brothers Company, Cambridge. The Industrial Engineer of the company, Mr. P. R. Babcock, made a talk on the organization, the basis for wages, and other management matters, after which the party made a tour of inspection of the plant. The Lever Brothers Company are manufacturers of soap, Lux and Rinso being among their products.

Touchdown Gives THE TECH Great Moral Triumph Over 'Snique Team

Cheered onward by the voices of less than 3043 spectators, THE TECH eleven, working with the famous muddle system, completely overwhelmed the Technique henchmen in a stupendous moral victory.

THE TECH on this annual free-for-all last year, administering a terrific beating to the 'Snique squad. With practically no effort on their part, the newsmen succeeded in piling up their points in each quarter until the game ended with a score of 6 for THE TECH and 0—NOTHING for Technique. The winning team's score would have been ever greater, if it were not for the fact that many points were lost in the dark.

Long Gains by THE TECH

The fight was featured by the expert fumbling of the 'Snique players. Unofficial report has it that men practiced this play Faithfully for two weeks before the game. THE TECH's gigantic machine made its greatest gain when the Technique quarterback dropped the ball on THE TECH one foot line. Ferguson for the newsmen recovered the pigskin and was about to make a 98 yard run toward the

REDUCTION OF INSTITUTE COMMITTEE EFFECTED AT MEETING YESTERDAY— SEVEN REPRESENTATIVES LOSE SEATS

HAINES RECEIVES \$1000 FROM AN UNKNOWN DONOR

Sender Stipulates Money Be
Spent For Shell To Be
tributes Articles

NEW BOAT NEEDED BADLY

Coach Bill Haines is a happy man now, for he received a notice from Horace Ford, Bursar, crediting the crew with \$1000 for a new shell. Accompanying the check, the donor of which is only known by Bursar Ford, was a letter in which the sender stated that the money was to be spent on a new shell when built to be called the "Avery H. Stanton Shell." Curiously enough, Avery H. Stanton was manager of crew last year, and this year is president of the M. I. T. A. A. He has been questioned about the sudden arrival of the money, but states that he knows nothing about it.

It is evident that the unknown giver realized the necessity of equipment at the boathouse, for a good shell is one thing that Tech lacks at the present time. By obtaining this money Bill will now be able to go ahead and have a shell built that will make it possible for his Varsity eight to compete with Harvard and Cornell. Prior to this time the Technology crews have either had to borrow shells or use the old ones at the boathouse.

According to a statement from Bill last night, he is yet undecided as to who will build the boat. He also wanted the fact known that he was very grateful to the person who sent the gift. He is sure of having the new shell completed before the Spring season, so that the Varsity will be able to row in a shell that can compare with those of other contestants.

Numerous people have been questioned concerning the name of the donor of the gift, but as yet nothing has been learned. According to manager Guy Frisbie, Dr. Rowe '01 denied any knowledge of the matter, and Bursar H. S. Ford also stated that he was unaware of name of the giver.

LEAVES FOR NEW YORK TO HIRE SHOW COACH

D. E. Elmendorff '26, Stage Manager for Tech Show 1925, left for New York late last night to arrange for the engagement of a coach for the show. The management has decided not to retain Mr. R. L. Harlowe as cast coach this year. Mr. Harlowe acted as coach for Tech Show 1923 and Tech Show 1924.

PRESIDENT STRATTON TO HAVE OPERATION

Gall Stones Necessitates Trp To
Washington Surgeon

President S. W. Stratton is in Washington at present awaiting an operation. Dr. Stratton left the Institute unexpectedly in order to consult with his physician, Dr. W. G. Morgan of Washington. Dr. Morgan decided that an operations for gallstones was necessary and that it would be inadvisable for the president to return to Cambridge.

No date for the operation has been decided upon yet, but it is expected that President Stratton will be absent from his office about six weeks. He had been actively at work until his trip and his absence has made it necessary to cancel a few engagements.

NO DECISION MADE ON TWO TERM PLAN

Discussed at Faculty Meeting—
Action to Change System
Not Yet Taken

No action was taken by the faculty on the proposed change to a two term basis at their regular meeting Wednesday. What discussion took place has not been ascertained except that it was decided to postpone action until the next meeting. Sentiment seems divided among the ranks of the faculty and the probable outcome of the proposal is doubtful.

A committee appointed from the Institute Committee submitted a report to Dean H. P. Talbot '85 on the three term system. This report gave the results of the referendum conducted by THE TECH to determine the attitude of the transfers on the question, and it contained also the result of the fraternity vote taken last Monday night together with a summary of the reasons given by the students for wishing to retain the present plan of three terms. It is understood that the Dean presented this report to the faculty.

Seldom before has the student body taken such a decided stand on an educational question. Since the Institute Committee brought it before the attention of the students it has held the center of discussion, and the consensus of opinion has almost unanimously disapproved of any change. Conjectures and speculations have been made as to how the two system would function, and some wild and some sensible disadvantages have been talked of.

Two professors discussed the question with their classes yesterday, and most of the students took advantage of the opportunity to express their opinions.

TECHNIQUE USES GULE TO GET SENIOR PHOTOS

Despairing of luring the Seniors into the newly made studio in room 3-410 by fair means the Technique has been forced to try another method and have placed a member of the opposite sex in the studio to attempt to entice the seniors to have their pictures taken.

At noon yesterday after the new assistant had been on the job only half a day 45 Seniors had taken the fatal step; making a grand total of 160 men for the week and a half that the studio has been at the Institute. The studio must be taken down next Friday as it is hampering the Sophomore draftsmen in their drawings so that the remaining six hundred Seniors will have to report before that time.

Next week the hours of the studio will be changed in order that the Seniors may report during their lunch hour because the photographer has noticed that the larger number of men report from 12 to 12:30. The new hours of the studio will be from 9 to 2, instead of the formerly used two periods.

PROPOSED CHANGE IN SIZE OF BODY WINS AFTER FIGHT

Combined Professional Societies
Deprived of Members
By Large Vote

PUBLICATIONS KEEP SEATS

Move Made to Make Committee
More Efficient As a
Legislative Body

One man will represent the Combined Professional Societies from now on, instead of eight, it was voted at the Institute Committee meeting last night. There was much argument both for and against the plan, but it was of a mild tone. Much discussion of the plan has been heard at the Institute recently.

The meeting opened much as usual; minutes were read and accepted and committee reports were given. All members were present, Harrison Browning '25 withdrew his motion, made at the last meeting, that the four publications have a single representative, and S. W. John '26 withdrew his motion that the Dorms be all represented by one man. Then the motion that the Professional Society members lose their seats, and that a single representative take their place was taken up.

R. A. Mitchell '25, who made the original motion, supported it, declaring that the Societies turn to the heads of the departments rather than to the Institute Committee for supervision. The one occasion on which they represent the student body, he declared is on Open House night, and one man would be sufficient to represent the Societies as a whole for that occasion.

H. E. Weimiller '25, chairman of the combined societies, in answer stated that the Professional Societies representatives had been on the Committee for many years, and that to remove them would be a serious matter. He declared that the Societies were not desirous of dragging down others with them if they must go, but proposed that two motions which they had that day withdrawn in order to make the men from the publications and dormitories realize the situation. He further declared that the Committee membership was a reward for men who received no other for their work.

Austin Cole Jr. '25, answered by say-

(Continued on Page 4)

MUSICAL CLUBS GIVE CONCERT AT CONCORD

The Women's Clubs of Concord are sponsoring the third of the Combined Musical Clubs' concerts this evening at Veterans' Hall, Concord. Following the taking of the photographs of the clubs at 5:30 o'clock this afternoon a Royal Blue Line palace car bus will leave Walker at 6:15. The management wishes to request that all members of the clubs be on hand early enough so that there will be as little delay as possible in the taking of the pictures.

The specialty acts included in the evening's program are: the banjo duet by Raymond Mancha '26 and D. A. Shepard '26, sleight of hand numbers by T. A. Knowles '27, violin solos by K. M. Peterson '28, trombone solo by A. R. Keith '28, and a cornet solo by D. S. R. Ullrick '26. The sleight of hand performance is a new number on the clubs' program.

CALENDAR

Saturday, Nov. 21
Friday, Nov. 22
3:00—Lecture by Prof. Fabry in 10-250.
4:00—Personal Hygiene lecture by Dr. Croke in 10-250.
8:00—Dormitory dance, main hall, Walker.
8:00—Course VI-A Dance, north hall, Walker.
12:30—Latin American, Spanish and Portuguese students lunch in north hall.

STOLEN GOODS

WE know that in every large body of men there are bound to be a few who are a little careless and apt to forget which is mine and which is thine. Any one is apt to stray from the paths of honesty to the extent of forgetting to return a pencil, or something like that, but we did not know that we had among us one who would descend to such a crime as stealing a typewriter from one of the activity offices in Walker. That is about as low a piece of dishonesty as has come to light in many a long year.

Does this man know that the activities are for the good of the whole student body? Does he realize that without these activities we would all of us be likely to have the single track minds that most people decry in the engineer? Does he know that in stealing from an activity he is stealing from the entire undergraduate body? Finally, does he know that in doing such a deed he is really hurting himself as much as he is hurting anyone else, and that few men after the first deviation from the straight and narrow path ever come through honest in the end? Apparently not, or he would not have done such a thing after serious consideration.

We trust that this will not occur again. We hope that every man here will remember that honesty is the one necessary quality in a man's make up if he wishes to be really successful. A man may accumulate wealth through dishonest means, but he will not enjoy riches so gained as much as the man who makes his living in a respectable manner. Of course we know that "there is so much bad in the best of us, and so much good in the worst of us" but we can't help thinking that a man who would do a trick like that is beneath contempt.

To facilitate matters we propose that next time the freshmen vote for the men not nominated. The ballots might be shorter.

THE FACULTY SEEKS OPINIONS

IT has come to our attention that at least two of the Professors of the Institute are interested in laying before the student body and getting student opinion first hand concerning the situation regarding the two term system. One of them held a round table discussion with his class on the subject of the proposed change. Perhaps it was productive of ideas for him; perhaps it was not, but nevertheless the opportunity was eagerly seized upon by the class, and much discussion resulted.

The other man spent a goodly portion of a class hour in setting the situation before the man, and then took a vote from the men present. The vote was substantially even for and against the two term proposition. We do not believe this to be representative, only twelve votes being cast, but it may be. In a personal letter to the editor, this professor expresses surprise that the students seem to favor lengthening the school year rather than having two semesters. He stated in a conversation that he didn't believe the fraternity vote was representative, as it was from the men who would be less liable to want to work in the summer, and so would not mind how long they stayed around Boston.

It is assuredly possible that the mass of the students are entertaining a mistaken attitude about the entire proposal, but it is an assured fact that the consensus of student opinion is in absolute opposition to a two term year.

Judging from the news of the day many American colleges are becoming more and more cognizant that the student viewpoint is of educational value. To use a homely illustration the symptoms of the patient to be operated upon require a great deal of consideration before performing the operation. The evidence that one professor entertained this viewpoint was thoroughly appreciated by the students. Student reaction is one of the many things to be considered in initiating a chance such as proposed—that is, the students see it in this light. It is highly possible that they are wrong.

The faculty seems as undecided as the student body is decided on the question of changing to two terms.

The Lounger attended the Institute Committee meeting last night, and sat through darn near one solid hour of de-

bate without getting any real meat. He was very much disappointed, as he had expected some real fun. There were one or two points worthy of consideration.

One of these was the statement of the worthy chairman to the effect that for the first time in the history of the Committee, there was a one hundred per cent attendance. That shows that if something of importance does come up, and the members of the Committee know about ahead of time, they can get around. Austy Cole made a rather pointed re-

mark when he said that while an election to Congress was not to be considered as a reward, no one could say just what Congress is supposed to represent.

The only real oratory emanated from Henry Sachs, but he seemed to have a rather perverted idea of the way things are done on the Committee. His main idea seemed to be that the men on the Committee who are "appointed" form a block to oppose those who are elected, and if the Professionals are taken off, the "Elected" men will lose their present two-thirds majority, and so can't put anything over on the "Appointed" men. There are two jokers in this idea. In the first place, things are not done that way, and in the second place, as Austy remarked, most of the men that Henry classes as "appointed" are really elected by a goodly number of men.

The Lounger is very glad to see that seventy-seven per cent of the freshman class voted in the recent elections. The Lounger believes that he is safe in stating that this is the largest vote that has been cast in the history of the Institute. Whether this shows that the entering class is going to be a political unit of importance in the future, or that the present frosh are merely taking advantage of the first time that they have been able to make an "X" on a ballot (or the equivalent of that, since they had to make numbers), and as soon as the novelty wears off they will cease to vote, is a matter of conjecture.

The Sophs are getting gypped. The Mil. Sci. Department has now shown them Reels 44, 45 and 35 of a gripping drama entitled "The Use of a Trench Mortar, et al." They want to see the other 42 reels as the continuity is rather broken, and they lose the plot.

On behalf of THE TECH and the technique football teams, the Lounger extends heartfelt thanks to those two brave Red Cross nurses who so valiantly disregarded the stares and comments of the spectators that the wounded might at least die in peace and comfort. There were not as many dead and dying on the gory field of battle as had been expected. So attractive were the nurses, that the Lounger did his best to get injured and so thrust himself upon the tender mercies of these modern Florence Nightingales. Despite his strenuous efforts to get himself broken up, the Technique players by their lack of fight and get-up-and-go kept him from getting wounded. As a result, he was forced to forego the pleasure of the coveted ride on the stretcher.

A lot of men want a varsity baseball team in the spring. The unofficial team gathered together last year showed that we have the material as well as the desire for the sport. There is no time like the present for stirring up interest over the national game. If anything is to be done in the spring, a certain amount of advance publicity is absolutely essential. If you want a team in 1925 to represent the Institute, get busy now and talk it up.

For the love of Pete keep off the grass! The corners are getting to look like the very devil. If you are too lazy to take the extra step or two that will be necessary if you keep to the walks, by all means jump in the river. You are too lazy to be of any assistance to the 'Stude or to the world. After the Corporation went to all the trouble and expense of fixing us up a lawn, it is just damned foolishness not to take a little care of said lawn. How about it?

Play Directory

- BOSTON OPERA HOUSE: "Cyrano de Bergerac." Walter Hampden in notable revival of famous drama of romance.
- COLONIAL: "Stepping Stones." Excellent musical comedy.
- COPLEY: "The New World," "The Old Lady Shows Her Medals," and "Barbara's Wedding." Three one-act plays by Barrie, with all his delicate humor and sentimentality.
- HOLLIS: "The Nervous Wreck." As funny as such a play should be.
- MAJESTIC: "Charlotte's Revue." A British show which is pleasing American audiences.
- PLYMOUTH: "The Potters." The humor of ordinary existence.
- ST. JAMES: "Judy Drops In." Comedy of Greenwich Village life.
- SELWYN: "For All of Us." Serious stuff.
- SHUBERT: "Wildflower." Good. Last three times.
- TREMONT: "Saint Joan." A mighty drama well acted.
- WILBUR: "Moonlight." Musical comedy, with much sentiment.

Survey Shows That Engineering Profession In U. S. Is Overcrowded

According to the statement of Colonel Percy E. Barbour, editor of "Mining and Metallurgy," the official journal of the American Institute of Mining and Metallurgical Engineers, there are too many engineers in the United States. In discussing the fact, he says that employers are bringing about an artificial demand for engineers by dismissing the higher paid men and replacing them with the younger engineers, who in point of lack of experience, are not so highly paid.

Speaking in a similar vein, John Wellington Finch, mining geologist and engineer, of Denver, after carefully surveying the situation in the Oriental countries, has declared that until American capitalists blaze a financial trail in these countries, the demand for engineers in this field will remain practically nil.

This brings the subject back to the point where the question is "What are we going to do with the tremendous number of engineers who are being sent out into the world every year?" One of the leading employers of grad-

uate engineers pertinently remarks that the positions which 90 percent of the new engineers take up, are of such technical simplicity, that they could easily be filled with inexperienced men with but slight technical training. It is not at all hard to see that if such a condition lasts long, it can not help but have a bad influence on the engineering profession as a whole.

To meet this situation, many plans and ideas have been advanced; however, the idea of a good many of the thinking world of today seems to be summed up quite well in that of Mr. Barbour. (Incidentally it may not appeal to the sense of humor of Tech men.) That the technical schools should require more of their graduates, thus limiting to a greater extent the number graduated; and that they should require two years or more of pre-requisite literary work. While this idea may be a little inclined to the extreme, still it is a fact coming to be recognized that a prospective engineer must be trained in other things besides engineering.

Communications

Horace S. Ford, Esq., or William Haines, Esq., M. I. T., Cambridge.

Dear Sir:—At the request of an old friend of Technology rowing, we enclose our check of \$1,000; said sum to be devoted to the building and purchase of an eight-oared shell, to be known as the "Avery H. Stanton Shell."

It is hoped by the donor that Mr. Haines will supervise and instruct the builders of the shell out of his own experience to the end that Technology may have a racing ship of the best type.

We should be glad to have you acknowledge the receipt of this amount and of your understanding of the conditions of the gift.

(The above letter was received by Bursar Ford under the date of November 17. He wishes the name of the donor withheld. In turning a copy of the letter over to the Editor, he says, "With a new shell for the crew, and a new board track for the Track men this winter, one might be justified in hoping for Technology success on both land and sea."—Editor.)

DAMBDA PHI CARE IS NEW FRAT IN KANSAS

Greek philologists will have new letters of the alphabet to worry about, but students will not be deterred from taking up Greek once they manage to roll the new letters on their tongue. In fact from now on, the enrollment in the Greek language course should be larger than ever, judging from the good time the students at the University of Kansas are having. The Dambda Phi Data and the Dambda Phi Care and the Dambda Phis are three chapters that have banded together to prove that you can be happy though a Greek scholar.

IGNORANCE COMBATTED IN "EDUCATION WEEK"

From November 17-23, the American Legion will guide the destinies of American Education Week. Other well-known bodies such as the Bureau of Education and the National Education Association will speak out their voices against ignorance, which President Coolidge has eloquently termed "the most fruitful source of poverty, vice and crime."

UNCERTIFIED FLOWERS BANNED AT YALE GAME

Harvard men will have to be extremely careful in their selection of flowers for their fair companions at tomorrow's game. An announcement has been made by the United States Bureau of Entomology to the effect that Chrysanthemums, asters, cosmos, zinnias, dahlias, gladioli, and hollyhocks will be barred unless the bearer is armed with a special permit, signed by an authorized florist who certifies to the health of the flowers. Certain areas have been quarantined to prevent the spread of European corn borers, and as flowers are carriers of this pestilence, it is essential all flowers be inspected and passed as harmless before being transported out of the quarantined zone. As New Haven is outside of this district, Federal and State agents will be on hand to enforce the regulations.

GAME CALLED OFF BY MENTOR OF ST. ANSLEMS COLLEGE

Scarlet Fever Epidemic Causes Action—No Definite Cancellation

NEWS CAME YESTERDAY

In a night letter received by Sidney Baylor '26, general manager of football, the game with St. Anslem's College at Concord, New Hampshire, was tentatively called off for tomorrow on account of scarlet fever in New Hampshire. A telegram was sent immediately to Concord asking if they wished to definitely cancel Saturday's game. At the time of going to press last night no answer had been received from the Granite State school as to what was going to be done. Luke Ban-

Late last night no reply had been received.

During the past two days the weather has lost nearly all of its zero aspect of last Monday and Tuesday; at that time it looked like the Beaver travelers would meet up with some snow in the Granite State. It is ideal football weather at present and the members on the team say, "they wish for no better for their game." Nearly all the team kept up with some sort of training since their last game as negotiations for a game with some outside school were in the air throughout the season.

Signal drill will be the chief Soph diet this afternoon when Luke has his men on the field in a final workout to smooth over some of the rough edges and recall to the players their various plays. Since the men are all in good condition and have the fundamentals of the game still under their skulls from a month of stiff practice, no drill in the fundamentals is necessary. According to Bannon, "the signals have to go off with a snap if they are going to get anywhere with the offense." Following is the list of men expected

FRESHMEN DOING WELL

Down in Huntington Y. M. C. A. on Tuesday, Wednesday, or Thursday evenings, Coach Russ Dean can be found busily engaged in nursing an infant varsity-swimming-team plant into full blossom.

Much of the strength of the team is being supplied by Ralph Johnson, a very good back and crawl stroke man who will strengthen the team in those events. Both he and his brother Paul, a strong breast stroke swimmer of the freshman class, are from the Punahow Academy in the Hawaiian Islands, and while there, they won the all-around water novice championship in the face of keen competition, for winners are made there. In this connection, it should be remembered that famous swimmers such as the two Kahana-mokus, the two Kealohas, Harris, Kruger, Crane of the University of Wisconsin, and the two torpedoes, Pratt and Thurston, of the historical Yale relay team years ago, all attended that school.

Varsity Not Yet Picked

The varsity team has not yet been picked, but a selection will be made within a short time to meet the unusually heavy schedule which is as follows: Lowell, January 10; Yale, January 16; Amherst, January 21; West Point, January 24; Boston University, February 7; Wesleyan, February 28; Brown, March 7; the N. E. I. S. Meet at Dartmouth, Hanover, New Hampshire on March 13 and 14; and a tentative date with the Brookline Swimmers' Club, January 31. The only home meets will be with the Boston University and Brown. Of the men out for the above job, Captain Waiworth, Kerns, Hinrod, Wies, Armstrong, Higgins, Johnson, and Parsons are doing well, but more are needed to push this sport to the fore. If more winning teams can be turned out and greater all around interest is shown by the students in swimming, a pool may be built at Technology, thus doing away with the inconvenience of having to go to the Y. M. C. A. for practice. Just before this term ends, justification of a tank can be proven if a large number of men turn out for the inter-class water carnival which will be held.

About 25 freshmen are working out regularly and are fast rounding into shape. Besides Paul Johnson they have a star in Grover who sliced a 100 yards in a minute flat a few nights ago. Very good time for this early in the season. A schedule nearly as long as that of the varsity has been planned for them, but the meets will be mostly with local schools.

TECHNIQUE WINS AT LAST 6 TO 0

(Continued from Page 1)

THE TECH players refused to inflict further punishment on the weaklings. The amazing ignorance on the part of the 'Snique force regarding the technique of the game was shown at the end of the first quarter. Sitting in the midst of the field, dazed by the terrific speed of the scribes, one 'Snique linesman whispered at the top of his voice, "What is it—QUARTER or WATER?" An able water carrier for THE TECH, quickly watered the victim, while it is said that he was later quartered by THE TECH machine. This great display of charity and willingness to oblige their opponents, on the part of the newsmen brought forth thundering cheers from the crowd in the grandstand.

The most successful, best-organized attack on the part of the 'Snique players was made later in the evening at a dinner at Louis' French Restaurant. Nourishment for the overwhelmed year-book players was furnished by the charitable Managing Board of THE TECH.

Final official score THE TECH 0—Technique 6. Accidents: Technique, touchdown by Steinbrenner in second quarter.

Line Up in THE TECH-Technique Game

THE TECH	Technique
Doten	Le. Jacob
Guise	lt. Stallmans
Credden	lg. Colt
Ashbridge	c. Davier
Howard	r.g. MacDuffie
Owen	r.t. Brand
Ferguson	r.e. Walter
Partin	l.h.b. Steinbrenner
Davy	r.h.b. Sparr
Cline	q.b. Hammond
Killian	fb. Faithful
THE TECH—Subs: Rothschild,	
Worthington, Stevens, Harris, Learoyd,	
Henderson.	
Technique—Subs: Carey, Spitzli,	
Hawkins, Cheney.	

Fencers Improving In Night Practices

Coach Danguy Pleased With Showing of Men

Coach Danguy of the fencing team has his knights of the foils indulging in practice every night. Monday, Wednesday, Friday and Saturday they manoeuvre the swords in the hand-ball courts on the third floor of Walker, while Tuesdays and Thursdays they hold their practice sessions in the rooms of the Boston Athletic Association. The entire squad has been divided into three separate teams: Team A, Team B, and Team C which engage in team contests every Saturday. This division was made arbitrarily and has no bearing upon the relative merits of the individual men composing the separate squads.

Last Saturday Team A engaged in an informal match with Team C and this Saturday Team B meets Team C. These informal contests serve not only to give the team practice but also enable the Coach to get a line on the individual fencers. The freshman class which is well represented on the squad is receiving regular instruction in the art of manipulating the foils. The first match does not come off until the beginning of the second term, so the men have a good chance to develop a strong team.

The gift of \$1000 to the crew for a new shell gives Bill Haines a chance to get a boat that will fit the needs of the varsity. Last year the first boat used to give and twist decidedly whenever the men leaned on the oars, and the shell as a whole was totally unfit for racing.

The Union Boat Club and Harvard offered shells but these, although splendid boats, were not adaptable to the crew. The men could not get used to the new shell and get the same speed they were getting out of their own. The result was they reverted back to the former boat. Now that they will have their own everything in the way of boat troubles will be removed.

CAPTAIN DYER

LUKE BANNON '27

non stated last night, "that he would go forward with the plans for the game and hold a light signal practice this afternoon." Following is the letter received by Baylor yesterday:
Manchester, N. H.
S. Baylor,
Mass. Inst. of Technology.
Our game in Concord has been cancelled by the Concord Board of Health on account of a scarlet fever epidemic in Manchester.
We have no home grounds for Saturday hence impossible to play game—very sorry—letter will follow.
Signed, Athletic Director.
The above was received over the telephone and is not quite definite as to the exact situation, therefore a message was dispatched this afternoon to St. Anslem's inquiring as to whether the game was called off definitely.

to make the trip tomorrow: Cline, Earle, Dyer, Dodge, Rhinehart, Franks, Richards, Volant, Steele, Burke, Peterson, Small, Lobo, Robinson, Innerasky, and Sherrill.
Technology is sure of a record-breaking boxing team at last. The other day, as Mike Hoar, the famous veteran statistician, was roaming around as usual looking for someone to bowl out, he came across the boxing candidates working out in the hangar gym. After carefully giving them the once-over, Mike ventured the opinion that they were a pretty snappy bunch. Our scribe, artfully trailing the noted trainer, heard him impart to Coach Rawson the information that he had the prospects of the best team in years, and that the boys were so snappy that they reminded him of his own younger days. So watch our boxers bring home the bacon this year.

UNDERWOOD TO SPEAK ABOUT "LIVING THINGS"

W. L. Underwood, special lecturer in the department of Biology and Public Health, will deliver a series of three illustrated lectures on "The Habitat and Behavior of Living Things" in room 10-411 on Tuesday, Thursday and Friday December 2, 4 and 5. The lectures on Tuesday and Thursday will be given from 11 to 1 and on Friday from 12 to 1 o'clock. All interested are invited to attend.

Mr. Underwood is an experienced naturalist and is an expert with the camera. He has photographed a number of animals in their native environment and has colored the pictures himself. He will employ slides reproduced from these photographs to illustrate the lectures.

STUDENTS IN FOUNDRY COURSE INSPECT PLANT

All students taking the course in Foundry are required to make an inspection of the plant of the Walker Pratt Manufacturing Company this week. These trips were substituted for the regular classes in Foundry, and attendance was taken at the office of the factory.

This company manufactures the Crawford ranges and its plant is equipped with modern appliances. The men were particularly interested in the making of the moulds and pouring of the molten metal.

Mr. O'Neill, instructor in the Foundry course, has announced that the inspection trip planned for this Monday has been postponed.

OUTING CLUB TO HOLD MEETING IN WALKER

Final plans were completed yesterday for the Outing Club smoker to be held in north hall, Walker Memorial, on December 4. At this meeting final plans for the Winter Trip will be discussed. If 26 students sign up for the trip a special car will be hired. There will be no horseback ride this Sunday but there will be a hike a week from Sunday if plans under way now are completed.

EDITION OF FRESHMAN GRAY BOOK SOLD OUT

All the freshman Gray Books have been sold from the Technique office, there is to be no second edition, and the only chance that any freshman has to obtain a copy now is from Eddie Pung's cigar stand in the basement of Walker where there are a few copies left.

This year's Gray Book will not have as large a deficit as last year even though the book last year cost nearly twice as much as this year's book.

Next year the Gray Book will be slightly changed in that the students section number will be placed with his name eliminating the ambiguity of this year's book where captions to pictures are not always convenient.

INSTITUTE COMMITTEE REDUCED AT MEETING

(Continued from Page 1)

ing that the Institute Committee was not blindly following precedent, but was doing as it thought best. Moreover, he declared that the Institute committee is a legislative body, and not a reward, any more than an election to Congress is a reward.

Harrison Browning '25 declared that the Professional Societies represent a class of men who would not be otherwise represented; that they draw their membership primarily from non-active men; and that they were much closer to the student body than the members for the classes because they

worked side by side with the men.

H. N. Sachs '25 spoke for a few minutes in an attempt to prove that if the Professional Societies lost their representation, the number of elected representatives on the committee would no longer have a two thirds majority over the "appointed" members. C. L. Petze '25 replied by saying that the heads of the activities were just as much elected as the heads of the Societies.

H. C. Hoar '25 declared that the Societies were looking on the motion as a personal attack on them, which it was not. He said that it was certainly not good legislation to make motions and then withdraw them. The Committee must be reduced to an efficient legislative basis. He said and this must be done by cutting out the Professional Societies, who did not legislate, and leaving unchanged the representation of the publications, whose finances and policies were supervised by the committee, and of the Dormitories.

Finally, it was declared that everything which could be said had been said, and it was moved to put the motion to a vote. A secret ballot was decided on, which resulted in the passing of the motion by a 22 to 11 vote. H. E. Wehmiller '25 rose following the vote to declare "The Professional Societies have no hard feelings concerning the passing of this motion, and will continue to do all in their power to further the work of the Institute Committee."

DEANE CHOSEN LEADER AT FRESHMAN ELECTION

(Continued from Page 1)

School, Fall River, and at Chauncy Hall. At Chauncy Hall he was a member of the tennis team, and was President of the Student Council last year. He was captain of the freshman Field Day tug-of-war team, and is now out for crew. He is a member of Theta Chi fraternity.

W. B. Dean comes from Chevy Chase, Maryland. He prepared at Central High School, Washington, D.C. where he was a member of the rifle and swimming teams. The new secretary, J. L. Baker-Carr, is from Concord, Mass., and he was captain of the freshman Field Day relay team. Weinberg prepared at the Far Rockaway High School of New York City. He was a member of the football and basketball teams.

Baker comes from Holyoke, Mass. He prepared at Worcester Academy, and at the Windham High School, where he was president of the class of 1923. Kane, the other member on the Executive Committee, is from Youngston, Ohio, and went to the Virginia Military Institute before coming to Technology.

Preferential System Used

Chute is from Andover Academy, where he was a member of the track team. Wood, of Salem, N. J., prepared at Chauncy Hall, where he took part in basketball and track activities, and was treasurer of his class.

C. R. Muhlenberg, Chairman of the Elections Committee, declares that although the counting of the ballots by the new system is quite a tedious process, he believes that the preferential system is a more truly representative system than the Australian Ballot, since a man to be elected must have more men supporting him than any other candidate.

Notices and Announcements

OFFICIAL

5.941 RECENT DEVELOPMENTS IN SCIENCE

The eighth meeting will be held Thursday, December 4, at 4 P. M. in room 10-250. Professor S. C. Prescott, Head of the Department of Biology and Public Health, will talk on Recent Applications of Bacteria in Tanning.

FOUNDRY '283

The trip planned for Monday has been postponed. Classes will meet as usual.

FABRY LECTURE

Prof. Charles Fabry will lecture on the subject, "Light in Engineering and Science," this afternoon at 3, in room 10-250.

UNDERGRADUATE

RIFLE TEAM

Candidates for the varsity rifle team are requested to report at the range Monday between 3 and 5 in the afternoon, or on Friday between 2 and 5.

COMBINED MUSICAL CLUBS

Freshman candidates for the business department of the Musical Clubs may interview Messrs. Walker, Hately, or Garen any day at 5, in the office, 310 Walker.

FRESHMAN RIFLE

Medals have arrived and may be seen in room 3-307.

SOPHOMORE TUG-OF-WAR

Picture will be retaken at 8:30 Monday in room 3-410. Bring jerseys.

SOPHOMORE CLASS

All the men on the Sophomore crew are to report in room 3-410 at 1:15 today to have their picture taken for Technique.

CATHOLIC CLUB

St. Cecilia's College Club will hold an informal dance, today, at 8 in Guild Hall, Belvidere street. Members of Tech Catholic Club and friends invited.

WRESTLING COMPETITION

Wrestling managerial competition is open to all freshmen. Apply to A. A. office after 5 o'clock.

LATIN AMERICAN CLUB

Latin American, Spanish and Portuguese students are invited to lunch in north hall this Saturday, Nov. 22 at 12:30. Dean Talbot will speak.

COMBINED MUSICAL CLUBS

Season picture of club in Walker Gym today at 5:30. Busses for Concord leave immediately afterwards.

TECH SHOW ORCHESTRA

Tech Show orchestra rehearsal in north hall, Walker, Friday at 5 sharp.

M. I. T. COMBINED DRIVE

All pledges should be redeemed as soon as possible. They may be paid in the front office of the T. C. A. any day from 9 to 5 o'clock. Receipts will be issued.

DORMITORY DANCE

There will be an informal Dormitory Dance in main hall, Walker, this evening between 8 and 12. Music by Hackett's orchestra.

FRESHMAN FOOTBALL

The team picture will be taken today at 3 in room 3-410. Bring equipment, especially headgears and jerseys.

PERSONAL HYGIENE LECTURE

Dr. Croke will give third Personal Hygiene lecture on "First Aid." Room 10-250 at 4 today. All freshmen are required to attend.

COURSE VI-A

Dance tomorrow evening at 8 in north hall, Walker.

M. I. T. A. A.

Sophomores wanted for Publicity Dept. Report at A. A. office any day next week.

SWIMMING

All classes are asked to get together within this next week to elect their captains for the big inter-class water carnival to be held just before the end of this term. Little time is left for organization.

FRESHMAN RIFLE TEAM

Report for practice hereafter on Mondays and Thursdays, 2:15-5:30. Range open Wednesdays, attendance optional. See bulletin board in range for new schedule of firing, to be effective Monday, Nov. 24.

DR. FABRY TO DELIVER LAST LECTURE TODAY

Dr. Charles Fabry will deliver his last lecture on light interference today at 3 o'clock in room 10-250. The subject of this final lecture is "Light in Engineering and Science." The public is cordially invited to attend this lecture by the Institute officials.

Dr. Fabry has been giving a series of lectures on light interference to the graduate students every Tuesday and Friday since October 17. He has spent the greater part of his life in studying light and optical instruments. Recently the French Academy awarded Professor Fabry the Osiris prize for his work in interferometry. This prize was accompanied by a grant of 100,000 francs.

During his stay at the Institute Dr. Fabry delivered an invited paper before the Optical Society of America on the measurement of light; attended the meeting of the Illuminating Society in New York; and gave two lectures before the Physics Seminar.
