

ENGINEER MATMEN WILL WRESTLE IN OLYMPIC TRYOUTS

**Coyle, Hereford, and Tryon to
Wrestle Tomorrow At
Cambridge "Y"**

HEREFORD'S CHANCE GOOD

**Best Amateurs of New England
Will Strive for Places
On U.S. Team**

Fresh from the victory at Brown last week when the wrestling team won the New England Intercollegiate Championship, several members of the wrestling squad will enter the A. A. U. Olympic tryouts at the Cambridge Y. M. C. A. tomorrow night. Rock Hereford, New England champion in the 158 pound class, Dick Tryon and Ted Coyle, runners up in the unlimited class and 115 pound class respectively at the Intercollegiate, along with several members of the second and freshman squads, will be the contenders for Technology. Dag Norwood, champion in the 135 pound division will not be able to enter the tryouts because of an infected forehead.

Rock Hereford is the favorite in his class for the New England division; defeated but once in the last two years, he has a most imposing record as a wrestler while at Technology. Last year Rock captured the Cardinal and Gray wrestlers, and came through the season with only one decision against him. Four of his matches he won by falls, while the other four victories came from decisions. In the meet with Lehigh last year, Rock lost a close match to Cox who has since graduated from school. After losing his bout in his own class, Rock entered the unlimited division and succeeded in gaining a decision although greatly outweighted.

Rock Beats Navy Captain

At the Navy meet last year Rock gained his most impressive win of the season when he conquered the Navy captain, Arnold, spilling the Annapolis man with a bar hold and chancery after only two and a half minutes of wrestling.

In the New England Intercollegiate Rock came through with the championship. Last year he also won the title of New England amateur champion. In the amateur meet he defeated Wolf who was the national champion in his class.

Because of the conflicting dates of the national amateur meet and the dual match with Harvard, Rock was prevented from entering the former meet.

This year his record is not marred by a single loss, three falls and six decisions complete his season's victories.

LECTURES ON SEX ARE IMPORTANT T.C.A. SAYS

**T.C.A. Sends Out Invitations To
All Fraternities**

Yesterday a letter went out from the T. C. A. office to each one of the 31 fraternities of the Institute. This letter was sent by D. H. Keck '25 and invited the attendance of as many men as possible at the lectures to be given by Dean Seerley of the Y. M. C. A. College, Springfield. The main purpose was to stress the value of the lectures and to ask that the various fraternities and societies refrain from having meetings on the dates when the talks are to be given. "Sex Factors in Human Life" is to be the topic of the three lectures.

Last term the Bible Study Class met twice a week. This term the meetings in Herrick House, 490 Beacon Street, will be discontinued but the class will continue to meet in 404 Atkinson and the opening session will be held next Thursday at 6:45 o'clock.

Prior to this term the class has consisted solely of students, but M. H. Finley '24, who is now director, is trying to get an outside man to assist. As yet the name of the new man or the subject is not definite but will be announced next week.

The Executive Committee of the Technology Christian Association has decided that their elections shall be held at 5 o'clock next Monday and will then make their results public. The nominating committee consists of: C. M. Phelps '25, R. Hereford '25, and A. W. Rhodes '25.

LLOYD'S SCHOLARSHIP IS OFFERED FRESHMEN

Lloyd's of London, the maritime insurance company, is offering a scholarship in Naval Architecture and Marine Engineering which is open to any member of the freshman class. The winner will be appointed on the results of the June examinations and will be required to take course XIII in Naval Architecture and Marine Engineering. Any freshman interested in the scholarship is asked to apply at room 5-121 for further information.

VOID TECHNIQUE SIGNUPS APRIL 1

**Absolutely None Will Be Re-
deemed After End of Month
Say Editors**

Technique signups will positively be void after the end of this month, the editors declare, which, contrary to the custom of previous years, will be before the Technique is offered for sale. It has been necessary to do this in order that the printer may know how many copies to print, rather than printing too many or too few, as heretofore.

Signups may be redeemed at the Technique office at any time before March 31. Those who wish their names in gold on their copies must apply at the office today or tomorrow. As only a third of the sign-ups have been redeemed so far, the officials of the year book expect a last-minute rush.

Most of the work of editing has been completed during vacation, and the printers are now working day and night setting up the book. The editors expect the proofs within a few days, and they say there is no reason why the issue should not appear for the Technique Rush, April 19, as scheduled.

Plans for the Rush are now being completed. As usual, the first part of the procedure will be entirely new, and will remain a secret until the day of the Rush. The parade will be slightly different, but the general idea will be the same as in previous years.

Bursar's Office Collects For A Thousand Fines

**Students Are Free to Inspect
Their Deposit Accounts
At Any Time**

Between March 6 and March 19 the Bursar's office collected \$5760 in fines for late registration and conditions. When one realizes that this means 1152 fines the enormous crop of failures at the Institute can be estimated. Beginning on March 6 with \$65 the daily collections have risen until on March 19 a maximum of \$1730 was collected. Excepting only the first day at least 20 men have paid fines each day.

Bursar Ford thinks that many men are under the impression that it is always necessary to petition the Faculty to have a fine removed. This is necessary if the fine has been regularly incurred, but if there has been any error it will be fixed at the Bursar's office. "Considering the large number of fines and the book-keeping they necessitate it would be surprising if no mistakes were made" said Mr. Ford. If an error has been made in the records the man should call at the Records Office and if an error has been made in my department they should come to me.

Another thing which the Bursar thinks is not generally understood is that the books relative to all student deposits are open to the men with accounts. The Chemistry Department alone has books with 1400 accounts and while any of the 1400 men have the privilege of looking at their accounts at any time, according to A. C. Melcher, Manager of the Division of Laboratory Supplies, only about 100 men take advantage of this each term.

It is much the same in all other courses where laboratory deposits are required. The only men who ever call and check over their accounts are those who are working their way through school and according to Mr. Melcher their number seems to get fewer each year.

DARTMOUTH CLUBS' SEASON PROGRAM OF VARIED STYLE

**Glee Club and Dance Orchestra
Leaders Both Prominent
In Athletics**

BAND TO PLAY IN PARIS

**Last Intercollegiate Contest Won
By Dartmouth Glee Club
Last Year**

Although details of the program of the joint concert given at the Copley Plaza Hotel by the Technology Musical Clubs and the Dartmouth College Musical Clubs have not yet been arranged, it has been decided that each branch of each organization will render one selection; that is, there will be one number by the glee club, the banjo club, the mandolin club, and the dance orchestra of each of the musical clubs giving the concert. Regarding the Dartmouth clubs, the Glee Club is led by H. L. Haws '24, the Banjo and Mandolin Clubs by W. Sturtevant '24, and the Barbary Coast Jazz Band by V. E. Hagenbuckle '24.

Jazz Band Is Prominent

Haws of the Dartmouth Glee Club is appearing with the organization for his fourth consecutive year. He has also done a considerable share of work in the athletic line, serving for two seasons on the football squad, last season as quarterback, and further varying his activities by playing on the baseball and basketball aggregations of his college. The Glee Club took first place in the Intercollegiate Glee Club Contest in New York City last year, thereby gaining for one year, an enviable position among other college glee clubs. The club has been coached for the past eight years by Professor L. B. McWhood.

The leader of the Barbary Coast Jazz Band, V. E. Hagenbuckle, also plays the violin with the Mandolin Club and like his fellow-musician, Haws of the Glee Club, has served consistently on the football squad. The jazz band has appeared at a number of intercollegiate balls in New York City and will play at the Intercollegiate Ball to be held in Paris on August 9.

Have Many Specialties

Professor M. F. Longhurst has this year been appointed coach of the Banjo and Mandolin Clubs of Dartmouth College. At the concerts given by the Dartmouth clubs this year, W. Sturtevant, leader of both organizations, plays with O. L. Barker '26 in a banjo duet specialty act. During this season, the Midnight Sons, composed of four banjoists and

(Continued on Page 4)

FRESHMAN ARMY MAKES USUAL SPRING DEBUT

With the advent of the Spring term, Technology's army, the freshman R. O. T. C. unit, has again made its appearance in uniform. Yesterday for the first time this year the freshmen appeared in Great Court in their uniforms, although no regular drill was held.

The men yesterday were only required to line up and hand in their class cards, but the wearing of uniforms was required, and was very generally observed. No announcement was made regarding the beginning of regular drill, except that the freshmen were told that corporals would be picked from their ranks at the next exercise.

Student sergeants, picked from the Sophomore class as a result of last year's freshman drill, were in attendance yesterday, and will continue to assist in the training of this year's army.

The new Technology insignia for the R. O. T. C. uniforms is being worn by the freshmen for the first time this Spring. It consists of a circular "patch" half cardinal and half gray, bearing a gray "T."

Competition Starts

There will be a meeting of the entire staff of THE TECH and candidates today in room 2-146 at five o'clock. New candidates are urged to attend as the Annual Spring Competition starts then.

Leads Dartmouth Glee Club Here Next Week

H. L. Haws

DEBATERS LOSE TO SYRACUSE TEAM

**Failure To Suggest New Law
Main Reason Why Team
Was Defeated**

Before a small audience the Technology debaters met the Syracuse team last Wednesday night. After much debating among themselves the judges finally came to the decision that the visitors had the better arguments. Although the judges had difficulty in deciding, they came to the conclusion that the Technology team had suggested no new immigration law to take the place of the present 3% law, and for that reason chiefly, did not win.

The main reasons for re-enactment of the present immigration law presented by the affirmative were: that it was a necessity in keeping out the vast hordes of Europeans coming in each year; that the law was sound and scientific in principle; and that prosperity enhances assimilation. The negative side claimed that the law was not scientific; that it allowed paupers and criminals to enter the country; and that only two minutes were taken to examine each immigrant that entered the country.

J. P. Munroe '82, who presided at the contest, made numerous appropriate remarks between the speeches. The judges consisted of J. W. Spring, J. H. Powell, and P. W. Guernsey.

PRESIDENT STRATTON AT ELIOT CELEBRATION

President S. W. Stratton was a guest at the celebration held in Saunders Theatre yesterday afternoon in honor of the 90th birthday of Dr. Charles W. Eliot, president emeritus of Harvard University. The celebration was carried out by representatives of the Corporation, Faculty, Alumni, and Undergraduates of Harvard. Chief Justice Taft and Governor Cox were two of the speakers of the afternoon. Dr. Eliot was president of Harvard for 40 years, resigning 15 years ago.

COAST ARTILLERY UNIT TO MAKE HARBOR TRIP

The Coast Artillery Unit of the R. O. T. C., together with the Coast Artillery R. O. T. C. Unit from the University of Maine will make a trip around Boston Harbor on March 25, inspecting the defenses. This will be the first of a series of such trips.

An infantry drill at the Army base at 12:15 o'clock will start the program. Following this will come a tour of the various forts in the harbor, including Hog Island, the trip to be made on a Government harbor boat, returning to the Army Base about 5:30. Application for reservations may be made at the Military Science office before 4 o'clock Monday.

PRINCETON TIGER GYMNASTS' FOE IN FIRST HOME MEET

**Contrary to Popular Belief
Beavers Will Be Hard
Pushed to Win**

RUIZ TO BE ON PARALLELS

**Veteran Princeton Team Meets
Engineers for Honors
In Walker Gym**

The gym team will go up against Princeton in the first and only home meet of the season in Walker tomorrow at 8 o'clock. The match contrary to the general run of college dope is not going to be quite as much of a snap for Technology as has been advertised. Princeton has always had a good team and it is just as good this year as ever. The men are for the large part veterans who have been through many a meet and have plenty of experience to carry them through this one.

One thing that will help out the Engineers quite a bit is the fact that Ruiz will be able to do his stuff on the parallels. On account of his studies he was not able to go on the trips and his absence has really been the team's most serious handicap. Unless something mighty unexpected happens, he has a mighty good chance to clean up first place. There is some doubt yet as to whether he will make the Intercollegiate trip or not but if it can possibly be managed he certainly will be a member of the team.

McCoy Again Available

As this is to be the only home meet Captain McCoy is pulling in as many of the men as possible who were not taken on the trips. Newcome is entered in the rings and both Finly and Libman on the rope climb.

On the horizontal bars Liecny and King will be the only performers and as Princeton is especially good on this piece of apparatus the Beavers will be pretty hard set to push out the black and orange men. Both did mighty fine work in the navy meet and if they do as well in this one a place for each is entirely possible.

On the rings McCoy and Shear will go on as usual and with the addition of Newcome make up a mighty strong trio. McCoy should get first if everything goes properly and the other two can certainly cause the Princetonians some trouble. McCoy is also entered in the rope climb and parallels and with the two heats on each piece of apparatus, he should certainly have sufficient exercise to last him for the rest of the evening. Smith is also to perform on the parallels and in addition will help Rol Turner out on the horse.

Anderson On Mats

Anderson and Wayne will take care of the mats but there is considerable doubt as to whether they will be able to clean up first place or not. Andy's wrists have held up under the strain mighty well during the previous meets but in the last two weeks they have swollen up and are extremely sore. He has stopped practice and hopes that a good rest with frequent treatments will take down the swelling.

McCoy, Finly, and Libman are on the rope, and between the three of them the team ought to get two of the scoring places. McCoy's speed is clearly shown by the fact that he took third place in the Navy meet for if any place might be called the home of the rope climb Annapolis is certainly it. The judges for the meet will be Eberhard of the B. A. A., Fox of the Y. M. C. U. and Hebert of the Y. M. C. U.

WHEN DOES A MAN BECOME AN ENGINEER?

SOME extended discussion has been raised by a recent suggestion of William Kelly, new president of the American Institute of Mining and Metallurgical Engineers, that an engineering degree should not be granted until there is sufficient evidence of professional ability.

The purpose of Mr. Kelly, it seems, is to make a man prove that he is an efficient and capable engineer before he is permitted to take his place as a member of the profession. It is obvious that such a procedure on the part of the college is a step beyond their domain.

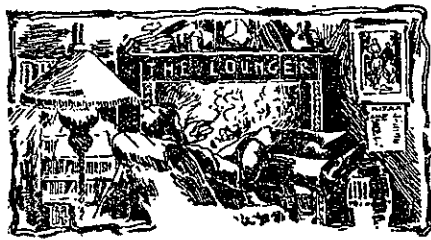

The best solution of the problem seems to lie in the granting of licenses by the state. Not until a man had proved his competence should he be legally recognized as an engineer. Such a method would certainly be more effective and less troublesome than delayed action in granting degrees.

DR. CHARLES W. ELIOT

TRIBUTE was paid yesterday all over the world to Dr. Charles W. Eliot, President Emeritus of Harvard, on his ninetieth birthday. Fifteen years ago Dr. Eliot resigned the executive chair at Harvard which he had held for forty years, to become a leader of public opinion.

Today, at his advanced age, he is still active, and is one of the foremost citizens of the country. It is not surprising that Harvard men all over the world sent greetings yesterday to such a distinguished man, of whom Theodore Roosevelt once said, "He is the only man I ever envied."

Dr. Eliot has probably done more for education than any other American. He is principally responsible for the great increase in the number of young men and women who enjoy the advantages of a college education, since he has given his life to broadening the opportunities for higher education in this country.

Every time a term begins the Lounger congratulates himself that he is no longer an unfortunate freshman, doomed to thread the mazes of the freshman registration system. The system of signs, billboards, stop-go machines, semaphores, and the like which appears three times a year in the freshman Chemistry laboratory far surpasses the worst of Boston's subway mazes.

Nothing is left to the imagination of the youngsters. They are told where to enter, can go only one way, and even are minutely instructed what to

read to find out all the things they must do to avoid Uncle Horace's famous \$5 fine. All this propaganda makes the already complex task of registration seem a perfect nightmare of intricacy.

This wondrous system was only in its infancy in the Lounger's yearling days, and that is why he is so thankful he is no longer a frosh. Ever since his early days the system has been growing more and more complicated, and there is no doubt that it has not reached its full flower of complexity yet.

CONTEMPORARY COMMENT

COACH HAINES LAUDED BY HARVARD ADVOCATE

On the twelfth of this month the 150 pound crews, gave a dinner to members of an inconspicuous group, Bill Haines, whilom Coach of Rowing in this college. To an outsider, to anyone not in touch with this group, or with the feelings of oarsmen in the college—for instance, to the Graduate Advisory Board—the feeling exhibited at that dinner would have seemed truly remarkable.

Why? The reason may be found in the keynote of his farewell speech at this dinner. It was not his policy, he said, to aim at the pure winning of races, and nothing else, but he believed that "rowing is for the development of the man." Oh heresy extraordinary! It is more important to see that every man is having fun, to see that the spirit of sport is triumphant over victory and defeat.

BELIEVES ENGINEERS SHOULD KNOW ENGLISH

The following excerpts are reprinted from an article in "The Technician" of Georgia Tech, entitled "The Value of Speaking and Writing Good English to the Engineer," by J. W. Ivy, of the American Cast Iron Pipe Co.

It has been said that an orator is a man who does not know anything but can tell you all about it, while an engineer is a man who knows many things but cannot tell you about any of them.

This is an age of salesmanship. We all have something to "sell," and the best "salesman" will naturally be the biggest winner in life's great gamble. The doctor must "sell" his services; the politician his theories and promises; the preacher his ideals; the beggar his hard-luck story.

If a wholesale jobbing house sent out a man, illiterate from birth, to solicit trade for them, they would get few orders and would quickly become the laughing stock, and rightfully so, of their competitors and the buyers alike.

CREWS PRACTICE STRENUOUSLY ON WATER EACH DAY

Men Rapidly Rounding Into Form Under Coaching Of Bill Haines

VARSITY FAST IMPROVING

The initial appearance of the Technology Varsity crew on the Charles last Monday marked the end of an intensive winter's work on the machines and the beginning of an even more vigorous term of practice in the shells. During the last few days of the vacation the crews went out twice a day for about an hour. Starting yesterday the crews resumed their old schedule and will appear once a day on the river. It is as yet hard to make any estimate as to the crew's strength, for the transition period from the steady machines to the cranky shells is a bad one, and it will be some time before the real result of the previous practice becomes evident.

Nevertheless, it already looks as though Coach Bill Haines has a promising bunch of oarsmen to whip into shape this year. Captain R. C. Eaton '24 is a veteran of three years' experience at Technology and at No. 7 he is one of the mainstays of the Varsity eight. J. E. Latham '26 has been stroking the crew in practice on the river. He rowed No. 6 on last year's Sophomore eight. A. F. Underwood '26 who rows at No. 2 is another candidate for stroke. All the other men on the crew are veteran oarsmen.

The position of stroke has not yet been definitely decided upon by Coach Haines. With Underwood and Latham both of last year's first freshman crew as candidates for the position, it is hard to decide definitely who will fill the place of stroke. Latham has the most experience on the water in this line while both of them have been alternating in stroking the crew on the machines. Yesterday the crew lined up as follows: No. 1, Perra, No. 2, Underwood, No. 3, Horle, No. 4, Coleman, No. 5, Flaxington, No. 6, Sayre, No. 7, Eaton, and Latham at stroke. Reid was the coxswain for the crew.

Wolf Out At Last

Wednesday, Coach Haines coached the crews for the first time from the launch "Wolf." The first and second varsity crews as well as the two 150-pound crews and the first freshman eight were out. In order to obtain the maximum efficiency of the momentum of the body when pulling through, Coach Haines has had the men row without the usual toe straps. This policy was also used on the machines. Instead of losing power by stopping their bodies by the straps, the men have been learning to row without them. Wednesday an amusing incident took place in one of the shells when a man putting all his weight on the oar on the stroke "caught a crab," the momentum catapulted him over backwards on to the man behind. The men show decided improvement due to the Coach's policy and lean on the blocks with a will.

First Race In Month

A month still remains before the first race when they meet the Navy and all the little kinks will be smoothed out in time. The training table for the crew has helped wonderfully in conditioning the men as well as strengthening the morale of the crews by being together, and by the time they row their first race they will be in tip top condition.

The 150 pound crew looks fine. With Greer at stroke the men have been going strong on the river. Wednesday Coach Haines gave them a long workout on the river when they were out a little over an hour. The freshman crew seems to be the most difficult problem at present. With Maertius, Piper and Fria, all promising candidates, ineligible, there is quite a scarcity of heavy men. Captain R. C. Kales and L. S. Tappan seem to be the nucleus of the eight at No. 7 and stroke respectively, but the other positions are doubtful, although Emery, Copeland Williams and Derby look like pretty valuable men.

From The SPORTS DESK

Again the Institute authorities exact their toll of Engineer athletes. If the report that Marvin Rick is to leave Technology is correct, Coach Connor loses one of the best prospects for next year's track team. Rick entered the Institute this fall after having been out of Princeton for awhile. While at Princeton he was one of the star performers on the cinder path and since his coming to the Institute he has been one of the Engineers' leading runners. He ran on the freshman relay team but the short distance is not to his liking, and it is the mile and two mile that are his favorites; also the longer distances. He unofficially broke the Institute record in the two mile this season.

Coach Connor and the track management are making plans to run the training table for the varsity squad on as extensive a scale as possible this year. All the track men will soon be asked to signify whether or not they intend to eat at the training table so an estimate can be made of the number expected.

Last year the training table proved successful for both the crew and the track teams and it is hoped that it will be supported by the men this season. It filled one of the most essential needs of Technology athletics as it allowed the teams to consistently keep training.

With the rush and grind of Institute life, one of the hardest things for any of the athletes to do is to keep fit, and the training table has proved a great aid in this.

To a visitor in the track house it is unfolded that Gubby Holt, leader of last year's cross country team, does not confine his efforts solely to athletics. On the black board apropos of the approaching spring track season is a colored crayon work of art which represents a small Beaver getting the best of a large Tiger. To one unfamiliar with the varsity track schedule it might not be quite plain that Gubby's drawing shows graphically what is going to happen to Princeton when they meet Technology.

Drew is slowly getting back into his old form again after a layoff due to his accident when a Ford descended upon him, none too gently.

ENGINEER MATMEN ENTER TRY-OUTS

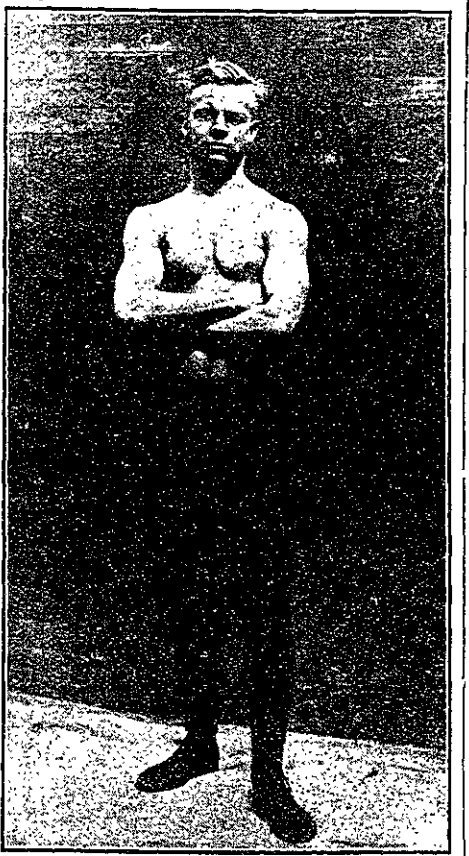

(Continued from Page 1)

Two of the falls came in the Inter-collegiate at Providence last week when Rock threw first his Crimson opponent and his Bruin opponent who held him to decisions earlier in the season. One of the chief reasons for the number of falls being not so great as last year was the fact that most of the men who wrestled Rock were sent in to wrestle defensively. The Lehigh meet was a notable example. The Brown and White man absolutely refused to go to the mat with the Tech rappler and furnished plenty of amusement at times by his actions.

Has Good Olympic Chance

Should Rock come through the New England trials he will go to the final tryouts in New York in June. Although the favorite among college wrestlers Saturday, he may meet some amateur unfamiliar to the followers of the collegiate game who may prove

Favorite in Olympic Tryouts

Rock Hereford, who in two years of varsity wrestling at Technology, has only been defeated once, will enter the Olympic trials to be held in Cambridge Y.M.C.A. tomorrow night.

troublesome. At New York the best grapplers of the country will vie for the honor of representing the United States at the Games at Paris. Smith of the Navy, who threw Rock when he was a Sophomore at the Institute and Cox of Lehigh are some of the men Rock will have to overcome.

Ted Coyle will wrestle in a special 115 pound meet. Last week Ted received his worst drubbing of the season from the hands of Goldberg of Harvard. Ted has been one of the best scorers for Technology this year, winning five falls; at Providence Goldberg succeeded in getting a wristlock on him from which he was unable to free himself. In the meet Saturday Coyle will have another crack at the Crimson man, and provided he can develop a defense against this hold he will be right among the leaders.

NORWICH RIFLES FIRST IN LEAGUE

Technology's Targets Delayed —Now Shooting Off Ninth Match

The Technology rifle team is now shooting off the ninth and last match of the N. I. R. L. The other teams have finished their matches, but the Beaver results have been delayed due to the non-receipt of the official targets. Norwich stands first having won all of the matches; Pennsylvania and Columbia rank second and third respectively; while the fourth place remains between Technology and Penn State, and will probably go to Penn State as they shot 1936 in the ninth match, which is better than the Beavers have done all season, and ranks second only to Norwich's high mark of 1953.

Below are given the results of the N. I. R. L.:

	Won	Lost
1. Norwich	9	0
2. Pennsylvania	8	1
3. Columbia	7	2
4. Penn. State		
5. M. I. T.		
6. Harvard	2	7
7. Syracuse	4	5
8. Yale	3	6
9. Dartmouth	1	8
10. Princeton	0	9

Freshmen Competition

The competition for Manager of the freshman track teams will be opened today by the Track management. All candidates should report at the A. A. office at five o'clock. The position is a new one and the duties lead to manager of the freshman cross country team in the fall and the indoor and outdoor track teams.

The competition will be held throughout this term and the manager elected at the close of the spring season. All members of the freshman class are eligible.

A number of the Engineers are not confining their efforts to any particular event. McArdle seems to be going in at least four of them, as he is seen in the high jump, javelin, pole vault and Jeppe has been deserting the cinders, as every once in awhile, he takes to tossing the javelin discus, on the other hand.

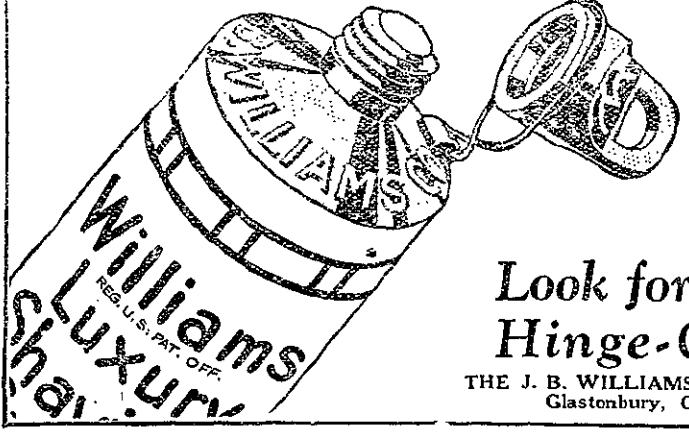

After College What?

STEADY progress to a responsible position in the business world—or a long period of training at minor work before you are fitted for an executive role?
 To help you succeed more quickly the Babson Institute offers an intensive one-year training course in practical business. From actual experience the fundamental principles of business are made clear. By positive examples, the student is shown how to apply these principles in the conduct of every day commercial affairs.

Write for Booklet
 Send for booklet "Training for Business Leadership." Describes the courses in detail and gives complete information about the facilities of Babson Institute and shows how men are trained for executive roles. Write today. No obligation.

The way to get the finest shave
 The Hinge-Cap is a sure way of identifying Williams Shaving Cream. And Williams, besides giving you the convenient Hinge-Cap, will improve your shave in three ways:
 First, the lather is heavier and holds the moisture in against the beard. Quicker and more thorough softening of the beard results. Second, the razor glides more easily through the Williams-softened beard because Williams lather lubricates the skin. Lastly, an ingredient in Williams keeps the skin in good condition no matter how heavy your beard nor how frequently you shave. In addition, you'll enjoy Williams because it is a pure, natural white cream without coloring matter of any kind. Ask for it.

VOLUME XLIV

announces its annual Spring Competition to be conducted in the advertising, news, editorial, treasury and circulation departments.

Previous newspaper experience not necessary. We will train you to the work.

Men interested are asked to confer with the General Manager in Room 302, Walker Memorial, this afternoon, between 4 p. m. and 5 p. m.

A general staff meeting will be held this afternoon at 5 p. m. in room 2-146.

BE THE FIRST TO COME OUT ACT NOW!

Notices and Announcements

All notices for this column should be in by the morning of the day preceding the issue.

Notice

Starting with today's issue The Tech will run a special sub-division of the notice column for sport notices. These must be in to the Sports Editor before 6 o'clock on the day of issue.

OFFICIAL

No more excuses will be endorsed by the Medical Department unless the student notifies the Department either in person, by letter, or telephone, when the disability begins.

EH 22

Men desiring to take EH22 during the current term should meet Mr. Copthorne on Tuesday next at 12 o'clock in room 2-132, when the hour of the meetings of the course will be determined finally. Meanwhile they should leave copies of their schedules with Mr. Pearson's secretary in room 2-285, unless they have already done so.

It seems probable at present that the hour which will meet the convenience of the largest number of men will be 12 on Tuesday and Thursday.

SCHOLARSHIPS

All applications for scholarship aid for the school year 1924-25 must be left at room 3-108 on or before Saturday, May 3. "Application for Scholarship" blanks may be obtained at room 10-100.

Scholarships are awarded only to those students who produce satisfactory evidence of their need of assistance, and whose scholastic records are good. A student who is not in need of aid cannot honorably apply for a scholarship.

Attention of the holders of Cambridge Scholarships is called to the fact

that these scholarships once forfeited on account of poor record cannot be again awarded either to the same applicant or to another.

VISITS TO HARBOR FORTS

Members of the Faculty and of the Coast Artillery R. O. T. C. Unit are invited to inspect the defenses of Boston Harbor next Tuesday. The trip will start at the Army Base at 12:15.

UNDERGRADUATE

BOOK EXCHANGE

The T. C. A. Book Exchange requests that any person having books called for in the General Bulletin and desiring to sell them leave the same in the T. C. A. Office immediately.

CHORAL SOCIETY

General Study credit is given for work in the Choral Society. Get information at rehearsal which will be held today in room 5-330 at 5.

DE WITT CLINTON HIGH SCHOOL

The Alumni Association of the De Witt Clinton High School, New York City, will hold its annual reunion and dance on Saturday evening, April 24, at the Hotel Waldorf-Astoria. Tickets may be secured by application to Mr. Lucian Lamm, secretary-treasurer at the high school, Tenth Avenue and 59th Street, New York.

COMBINED MUSICAL CLUBS

Tickets for joint concert with Dartmouth on sale in Main Lobby each day from 9 to 2 starting today. Price \$5 a couple.

SPORTS

CREW TRAINING TABLE

Men who were at table last term are requested to attend table in Walker as before, 12:30 at noon and 6:30 at night are the hours at which meals are served.

CONTEMPORARY COMMENT

(Continued from Page 2)

their ambition dies and they linger in a state of mediocrity, working hard but getting nowhere. Knowledge is a great thing but it must be brought to the attention of others if it is to be recognized, utilized, and above all, paid for.

Some of you now at Tech are doubtless planning careers as consulting engineers. If this be true, you will probably want to start with some established firm. When you seek employment, you will find that there is a surplus of "engineers"—men who draft, work up a set of plans and specifications, solve intricate engineering and mathematical problems; and that the salaries paid for such work are small, with chances of advancement all too few. On the other hand, if you show some ability as a "salesman," holding out promise of developing into a "business-getter," you will find many places open to you, and advancement quick and certain.

The consulting engineer must first of all sell his services, or rather the services of his organization, to those needing them. This is the big job. Once the contract is secured, there will be no difficulty in working out the engineering problems. Men who can do this are plentiful and their services cheap, but the Business Getter—Ah! that is quite another thing. Such men are scarce indeed, much sought after, and rich is their reward.

Second only to speaking is the ability to express yourself well on paper. The engineer is frequently called upon to prepare written reports, to draw up specifications, to outline proposed engineering work, and to write articles for publication or for reading before engineering societies or similar bodies. If such papers are made "readable," interesting and not boring, either to the layman or the trained engineer, and yet readily understood by both, they are certain to excite favorable comment. The fewest number of engineers write entertainingly, and with proper appreciation of their subjects. Yet, properly handled, there is no more fascinating or romantic discourse than one which deals with some engineering problem or accomplishment.

Be one of the few engineers who can both write and speak good English, and your success is assured. The future will take care of itself.

INSTITUTE MUSICIANS HOLD JOINT CONCERT

(Continued from Page 1)

pianist, appeared as another specialty act with a number of popular selections.

Among the specialty acts presented by the Dartmouth clubs this season is that by guitar trio composed of F. Knowles Jr. '26, E. N. Torbert '25, and J. B. Sly '24. The act is new this year. R. Major '26 offers a violin solo as a specialty while R. C. Riotte '26 renders piano solos.

TUFTS MAY HAVE STUDENT GOVERNMENT

President Couzens of Tufts College has recommended to the student body the adoption of a Student Council to assist the college authorities in matters relating to student discipline. The President has often had occasion to call in one or more of the student honorary societies to advise him on student opinion. He suggests that the Council be composed of representatives of the three honorary societies, and that the method of election to the societies be changed so that the entire student body might participate. President Couzens hopes that the plan will be considered, alternatives or elaborations discussed, and that the formation of such a body be got under way.

TEXAS BELLES COMPETE TO GRACE BEAUTY PAGE

Seventy-five girls of the University of Texas are out for places on the Cactus beauty page. The editors of the magazine are selecting the thirty most beautiful from among the seventy-five that have been picked by the eleven sororities and the girl's rooming houses of the University. Of these thirty, an impartial person will select the eight lucky ones whose pictures will then appear and who will be named as the winners of the contest. Every member of the University is entitled to cast a vote for the eight girls of his or her choice. However, although this vote will greatly influence the decision of the editors, it will not override their final opinions. The ballot is printed in the Texan and was run there for three days so that all might have a chance to indicate their preference.

To The Readers of The Tech

Those desiring a bound copy of Volume XLIII should order it at once. The cost will not exceed \$8.
