

BATTALION PARADE CLOSES INSPECTION TOUR OF INSTITUTE

Visiting Officers Examine Men in
Sophomore and Advanced
R.O.T.C. Courses

GIVE GOOD IMPRESSION

Determine Whether Technology
Rates as "Distinguished
Military College"

A Battalion Parade and Review by the infantry battalion closed the tour of inspection of the board of officers from the War Department yesterday. Although it will not be decided until next month, probably, whether the Institute has won the rating of "Distinguished Military College," the inspecting officers were favorably impressed, and there is a strong possibility that Technology will be so classified.

Yesterday and Wednesday Lieutenant-Colonel W. C. Short of the General Staff and Major R. F. C. Goetz of the Field Artillery visited classrooms to observe theoretical instruction. They tested the knowledge of the members of the various units by asking questions of them. They watched the Chemical Warfare men with their gas mask drill, saw the Signal men connect up telephones, watched the freshman Infantry Battalion in company drill, and observed each of the other units in their regular manoeuvres.

Perform Excellently

Examinations were held to determine the efficiency of the instruction, and in addition the inspecting officers approached men who were drilling with questions on the drill or on the work of their respective units. A report of the facilities provided by the Institute for the work of the department, of the credit allowed toward a degree for R. O. T. C. work, of the percentage of eligible Juniors and Seniors who take the advanced courses, and of the number of eligible graduates who accept Reserve commissions was prepared to aid the board in making its decision.

The Parade and Review went off without a single break. At four o'clock rifles were issued and the four companies formed in their usual positions. They were marched from there to the parade ground, and formed facing toward the wind tunnels, with a band from the Coast Defences of Boston on the left, near the hangar, and the companies extending to the right in order, in company front.

After a salute to the Inspecting Board, the parade was formed in column of platoons and marched in review. Forming again in column of platoons with the companies abreast, the men were called to attention and the inspecting officers went through the ranks, looking over the equipment and asking an occasional question. At a few minutes after 5 o'clock the review was concluded and the men dismissed.

T.E.N. MANAGING BOARD GIVE FAREWELL DINNER

Elliott and Donovan Principal
Speakers of Evening

The new T.E.N. Managing Board gave a farewell dinner yesterday evening to the outgoing board at the Hotel Lenox. About 50 men were present at the occasion, including several members of past boards. D. F. Elliott '24 and H. G. Donovan '24 were the speakers of the evening with members of the new board coming in for their say on matters. As a momento of the occasion the menus were supplemented by several pages of stories and jokes including many take-offs on the members of past and present boards.

DELEGATION SENT TO PEMBROKE LAST WEEK

A deputation was sent last Friday to Pembroke by the T. C. A., consisting of A. D. Carothers '24 and W. M. Ross, General Secretary of the T. C. A. Addresses were made in the Town Hall in the afternoon to students in the high school and grammar school, and discussions were held on the subject "Ten Years Hence Physically, Intellectually, Socially, and Spiritually." A supper was given at the G. A. R. Hall afterwards.

Decrepit Auto Shows Extraordinary Speed

An automobile of ancient vintage standing near the entrance to building 2 early yesterday afternoon, collected a mob of curious and interested spectators. "What is it, an auto?" someone asked. "No," said a man who claimed, or admitted ownership. "It used to be." "Well, you've got a good horn," some of the crowd told him.

The auto was a Franklin, made in about 1910. It was equipped with clincher tires, the rear ones much larger than the front. The lights were oil lamps; the horn was operated by a bulb. Although it did have a steering wheel instead of the old steering bar, the wheel was on the right hand side. There was no foot accelerator, and the emergency brake and gear shift lever were on the outside. The wind shield was of isinglass.

The only part of the car which seemed up to date was the motor. When the owner finally decided to leave, the motor turned over perfectly, and the car "tore off" at 20 miles an hour.

HOLD MEETINGS OF T.C.A. COMMITTEES

Eight Department Directors to
Select Managers of
Divisions

A meeting was held Tuesday of the new T. C. A. Cabinet which comprises the directors of the eight departments of the organization and the four executive officers. Work of the association to be followed next year was discussed, and it was voted that the department directors should appoint the managers of the subordinate divisions before the next meeting, which is to be held on May 27. J. A. Hoxie '25 was elected as the representative of the Cabinet to the Executive Committee. The Cabinet will meet bi-monthly hereafter.

The first meeting of the Executive Committee with the Cabinet representative present, took place Wednesday Harrison Browning '25, new Vice-president of the T. C. A., and W. M. Ross, General Secretary, were authorized to attend the meeting of the Committee on Student Work held at the Trinity Church Parish House Wednesday night.

This meeting was attended by representatives from Harvard, Boston University, Simmons, Sargent School, and Technology. At that time it was decided to send out booklets this fall to all new students in these colleges regarding student activities in Greater Boston churches.

The formation of the delegation to Silver Bay was also taken up. W. W. Quarles Jr. '24, was appointed chairman of Promotion Committee A comprising those who have been members of delegations in past years, and Austin Cole Jr. '25, was appointed chairman of Promotion Committee B, which is composed of men who are going to Silver Bay this year.

A report made by R. L. Holt '24 concerning the accounts of the T. C. A. was accepted. Assistant Bursar R. L. Rhind went over the accounts and made some recommendations, among which was the taking of an inventory of the Book Exchange.

Massachusetts Amateurs Gather For Banquet Tomorrow in Walker

A code contest will be the opening event of the Massachusetts Radio Convention, which is to be held in north hall, Walker, tomorrow evening. The contest, which is to be strictly for amateurs, will be at 5 o'clock, and will be conducted by Ted McElory, world's champion at receiving code.

After the contest, the banquet will start at 6 o'clock. Joe Toye, of the Boston Traveler, will act as toastmaster and master of ceremonies. The list of speakers for the evening is complete and includes the following: K. B. Warner, Secretary of the American Radio Relay League, H. W. Lamson '15, of the General Radio Company, S. Kruse, Technical Editor of "QST", A. A. Hebert, Treasurer of the A. R. R. L., F. H. Schnell, Traffic Manager of the A. R. R. L., and several others prominent in amateur radio, including the operator of British 2NM. Besides the code contest, there will

J. J. KEARNEY WILL SPEAK AT TODAY'S LECTURE ON LABOR

Will Give Labor's Views at the
Second of the Series
in Room 10-250

IS FORMER STATE SENATOR

J. K. Kearney, organized labor representative, will speak at the second lecture of the "Problems of Labor Relations" series today at 3 o'clock in room 10-250. Mr. Kearney is an official representative of the Hotel and Restaurant Employees' Alliance and holds the position of Business Agent.

As a former State Senator, he has always been an ardent labor advocate. He will present Labor's point of view which will be an opposite view from that taken by Howell Cheney of Cheney Brothers who spoke at the first of this series on labor questions given last Friday.

Will Take Opposite View

It will be remembered that Mr. Cheney opposed the flat Union Scale and advocated paying the workman in proportion to his ability and using the bonus system. It is expected, on the other hand, that Mr. Kearney will advocate the flat Union Scale, thus giving the other side of the labor question.

The third lecture will be the summing up of both sides in an impartial manner, by M. W. Alexander, Managing Director of the National Industrial Conference Board. Mr. Alexander will sum up the two sides at the third and last of the series to be given in 10-250 next Friday.

As at the first lecture, members of all the classes are welcome but it is requested that the lower classmen allow the Seniors, Graduate students, and members of the instructing staff to secure the best seats as these lectures are being given primarily for the benefit of these men.

REVEREND AHERN TALKS AT CHEMISTS' BANQUET

Annual Affair Held at Copley
Square Hotel Last Night

Reverend M. J. Ahern, S.J., head of the department of Chemistry at Holy Cross spoke on "The evolution of elements and other things" at the banquet of the Technology Chemical Society held at the Copley Square Hotel last night. Reverend Ahern devoted most of his talk to the attitude of the church toward evolution.

Professor R. E. Rogers of the English department of the Institute delivered an after dinner speech upon the "Fugacity of Mercaptan." This title was not chosen by the speaker but was suggested by several members of the society.

Dr. W. K. Lewis discussed the policies of the Chemical Society and made frequent references to conditions at the Institute years ago. Dr. J. F. Norris advised the men what they should do after graduation. Musical entertainment was provided by several members of the Tech Show cast.

Many Stars Entered Against Track Team In Triangular Meet

Engineers at a Disadvantage In Tomorrow's
Meet With West Point and Georgetown—
National Champs To Compete

With the formerly planned dual meet with West Point turned into a triangular affair with Georgetown as the third team, the Engineers' chances of getting a good share of the points in the track meet at West Point tomorrow is greatly lessened. West Point and Georgetown have teams composed of individual stars, and although Coach Connor depends on such men as Drew, Sanford, Jeppe, and Hoxie to score, the Beaver team is a better balanced combination than West Point and Georgetown, and hence will be at a distinctly disadvantage competing against teams who have a number of national champions among their ranks.

ATHLETIC AWARDS MADE AT BANQUET

President Stratton in Address
Praises Athletics at
Technology

About 150 men were present at the presentation of all the prizes won during the past season at the annual banquet of the M.I.T.A.A. given Wednesday evening in north hall, Walker. The awards were made by Dr. J. A. Rockwell '06 who gave out the shingles, Dr. A. W. Rowe '01, who presented the "T" charms, and by H. S. Benson, whose duty it was to present the Inter-Fraternity Relay Cup. Cups for field records in the javelin throw and pole vault were received by T. E. Garrard '25 and L. M. Sanford respectively, and the Inter-Class Track Meet Cup was among the many presented.

President Stratton in addressing the group at the dinner expressed approval of athletics in general at Technology and stated that as far as he could determine, they were not detrimental to a man's studies. In a further statement he brought out the value of athletics as publicity for the Institute by saying that publicity can be obtained in two ways: namely, by such victories as the crew recently scored over Cornell, and secondly by advancing the work of scientific research through the efforts of the members of the instructing staff. Of the two, he said the former is the only one through which the student body can boost their college.

When the time came for the presentation of the Inter-Fraternity Relay Cup to the Theta Delta Chi Fraternity, Mr. Benson made the presentation speech, but when the time for the handing over of the cup arrived, it was discovered that it had either been misplaced or forgotten so that the receivers had to depart without their trophy. The records for which the cups were awarded to Garrard and Sanford were 172 feet, 11 1/4 inches in the javelin throw, and 12 feet 1 inch in the pole vault respectively.

Dr. Rowe besides presenting the charms, commented favorably on the spirit exhibited by the men in the singing of the Stein Song and in the rendering of the Technology cheer.

GOLD MEDAL AWARDED FOR FRESHMAN DRILL

A solid gold medal will be the first prize at the annual competitive drill for freshmen to be held on May 27. On the medal is mounted a Technology Seal, below which is engraved "R. O. T. C. 1924." The reverse side bears the legend "First Prize for Excellence in Drill," followed by the name of the winner. The medal is suspended on a ribbon of Cardinal and Gray. Second and third prizes are similar medals in silver and bronze respectively.

The prizes are awarded for excellence in the school of the soldier, with arms.

Preliminary competitions to determine who shall compete in the final drill will be held on May 20 and 22. All freshmen taking military science are eligible.

The medals will be on exhibit in the trophy cabinet in the Trophy room of Walker, and pictures of the medals will be posted on the military science bulletin board and near the rifle racks until May 27, when the awards are to be made.

With Heacock who turns in the time of 10 seconds flat in the 100 yard dash, Lambert who has pole vaulted 12 feet one inch, and Barkes who is a world's champion in the high hurdles, turning in the time of 15 seconds, it can be seen what Captain Ambach and his men run up against when they meet the Army and Georgetown track teams.

Champions to Compete
Georgetown has a more imposing list of starters than the West Pointers as numerous national champions are numbered among the ranks of the team. Harry Helm national 2 mile champion, Vic Ascher 440 yard national champ, George Marsters national 1000 yard are some of the performers the Engineers will have to contend with.

But the fact that national champions are entered in abundance is acting as no damper on the spirits of the Beaver team, and plenty of competition will be afforded in the second and third places, although the Engineers may have a hard time to come through with many firsts.

Coach Tom Connor reports that all of the track men are in good shape for the contest, although two varsity men have been permanently lost for the season. Frank Fricker will be out of competition as he is just recovering from an infected foot, while Chen will be lost as a pole vaulter due to the pressure of his work.

Hoxie Is Good Bet
With Jeppe in the 220 and the 440, Drew in the hammer, Sanford in the pole vault, Hoxie in the dashes and Ambach and Blodgett in the hurdles, the Engineers will be able to push the Army and Georgetown in these events.

Hoxie will be Coach Connor's bet in the hundred yard dash. Taking first against a field of Harvard men last Saturday, Jack has placed himself at the head of Doc's list of sprinters. But he will be in fast company tomorrow with Heacock, the Army's 10 second man and national champion, to compete against. Hence first place in the dash seems to be going the Cadet's way. Gordon Joyce, and Roy Copley will be the

(Continued on Page 3)

PRESIDENT TO RECEIVE SENIORS THIS AFTERNOON

President Stratton will be host to the members of the Senior Class at a reception to be given at his home this afternoon from 4 until 6 o'clock. His object he states is to know each Senior personally rather than collectively as a body. This is the first time that President Stratton has received Seniors although he has given receptions to various other Institute organizations during the school year.

EXECUTIVE COMMITTEE OF SOCIETIES ELECTED

At a meeting of the Executive Committee of the Combined Professional Societies held yesterday the Executive Committee for the coming year was elected. This committee is as follows: H. E. Wehmiller '25, chairman; R. F. Needham '25, vice-chairman; G. G. Davidson '25, secretary; Harrison Brownning '25, treasurer.

CALENDAR

Saturday, May 17
6:00—Radio Society banquet, north hall.
Tuesday, May 20
8:00—Menorah Society meeting and smoker, west lounge.
Saturday, June 7
3:00—Senior Class tea dance, main hall.

"A VERITABLE STATE OF BONDAGE"

THAT American college men are in a veritable state of bondage was the theme of a recent address by Dr. Leroy Burton, president of the University of Michigan. The impossibility of any self-determination in the matter of curricula prevents the student with initiative and capable faculties reaching the intellectual heights he might attain if given free reign. Dr. Burton would give the upper-classman freedom from the group course restrictions and would allow him to follow the dictates of his own enthusiasm.

Up to a certain point such discussion does not apply to the technical student, for his is a specific training toward a very definite end. From the standpoint of the general student, however, this growing viewpoint in American college circles means the development of a more splendid educational opportunity than has hitherto existed here.

Such a system of free choice could only be open to the student showing evidences of capacity and leadership during his first two years. The evincing of these qualities would give the student the privilege of breaking out of an inflexible course to follow the bent of his mind in anything and in any way. He would be allowed to browse throughout the curriculum pasture without restriction. To students ambitious and of independent mind this would be a desideratum satisfied in the best possible matter. The graduate schools show its effect as well as the English system. Graduate students are willing to work even excessively long hours because they are taking the work of their choice; while the English student with his freedom works enthusiastically and naturally attains a broader education.

The fact that educators of such eminence as Dr. Burton are becoming favorable to this plan is of moment, and should serve as an impetus urging men to develop their leadership and their interest that the application of such a plan might prove feasible.

THE GOVERNMENT INSPECTION

THE government has two officers touring New England making inspections of all of the colleges and universities where Military Science is being taught. These men will say whether or not the various institutions are to be rated as "Distinguished Military Colleges." Ruling out Norwich, which is a distinctly Military College, Technology unofficially rates among the highest in its R.O.T.C., as it does in practically everything else that it attempts.

It certainly will not be the fault of the Military Department if the Institute does not receive this honor. However, there is a great deal of room for improvement. A few of the students still consider the R.O.T.C. as a large practical joke. The remainder give it the honor it is due, and a goodly proportion give it their whole hearted support.

The officers in their inspection made a thorough one. Every unit was visited in its classes and drills. Searching questions regarding the work of the various units were asked. Most of the answers were a credit to the instructors, and the rest were still more of a credit to the ingenuity of Technology men, who used the system of making an intelligent guess if they did not know the answer. There were very few cases where the inspectors were not satisfied with the answers they received.

If Technology receives the coveted rating, our name will be published in the War Department orders, and one more plume will be added to the number that the Institute is entitled to bear. Every year sees Technology rising higher in the esteem of men from all walks of life, and this will add the army to her list of conquests.

THE TECH takes pleasure in announcing the following elections to its staff: A. B. Guise '27, Circulation Department; Whitneyment; G. F. Brousseau '26, Sports Writer; J. H. Harding '26, Advertising Department.

COMMUNICATIONS

The following letter, received by the President of the T.C.A., I feel to be of interest and importance to the undergraduate body at the Institute. A conference such as that to be held at Silver Bay gives those who attend a chance to obtain a full appreciation of the problems that confront both educator and student in colleges throughout the country.

THE EDITOR

D H. Keck, President, Technology Christian Association. At about this time of the year every Technology undergraduate and post graduate is up against one of the most important decisions of his Institute career.

I am writing you to urge you to impress upon Technology men the importance of this decision because I fear that this year as in previous years, the majority of the men fail to realize its importance and in fact most of them

are ignorant of the fact that such a decision confronts them at all.

I can say with the strongest personal convictions that any man who fails to seriously consider the privilege extended to him by your association, of attending the Silver Bay Conference, is depriving himself of the possibility of an experience, the value of which, in his undergraduate and graduate life, cannot be estimated in dollars and cents or in time expended.

If I were ever presented with the opportunity of relieving my life at Technology, the one decision that I am positive I would not change, and there are many that I would, is my decision to participate in the Silver Bay Conference last year. No extra-curriculum activity in which I participated has up to this time proven itself of more value in my life than that week at Silver Bay.

THE TECH in its recent feature articles has very well covered the details of the opportunities extended to a man attending this conference. There is one point, however, that I would like to stress. The problems that the men discuss and the addresses delivered by the leaders, who are invariably among the greatest authorities in their field in this country, are of such a practical and concrete nature that the engineering mind cannot help but be interested in them and indeed profit by that interest. No vague, theoretical theology has any place in the conference. The question always is, "How can we improve this situation today," not tomorrow or the next day. It certainly is a happy hunting ground for the active engineering mind. Another feature that will appeal to the Technology student is the fact that problems are quickly boiled down to their fundamentals so that a minimum of time is lost in useless arguing.

Let us hope that no man will take this trip this year for the mere purpose of having a week's vacation. Though he will have a delightful vacation in that beautiful country, he will be hindering the other men who are up there for serious aims from deriving the fullest benefit from the conference. Do not let me create the impression, however, that the conference is a continual round of serious thought and discussion. At least four hours a day are set aside for athletics without which the conference could not have the value that it does. It takes exercise to clear the mind.

It is my sincere hope that you will receive applications for places on this year's delegation from a large number of representative Technology men so that the Institute as well as the men themselves can receive the maximum benefit that the conference offers.

A. Herbert Gray stated in the October "Intercollegian" that one of the important shortcomings of the American undergraduates is that "Intellectually they are docile." Silver Bay offers a splendid opportunity for building a foundation for overcoming this docility.

Sincerely,
 (Signed) E. E. Kattwinkel '23.

There are many sure signs by which it can be told that spring is here—also the fifteenth of May. Besides the conventional necking on the esplanade and Charles River Road, the budding herbage and mating English sparrows—even more sure than the gladdening garb of males and females of the species, have we our own little signs of spring. Gay sweaters, doggy socks, baggy trousers and straw hats may be found at any season of the year if looked for in the proper place. There is a Greek fruit vender near Rowe's Wharf that wore what on closer inspection proved to be a straw hat as early as the Ides of March—he will have it on till the first of November—comes early and stays late. But true, honest to Judas, signs of spring can be found much closer to us.

Consider you the student, that home sapiens of intellectual and scientific bent. But a few weeks ago he trod the light fantastic in gay celebration of Junior Week. 'Twas different then—the term was young, the girls were sweet and his heart was gay and untroubled. But the blighting consciousness of the impending exams has fallen on his spirit. How little known, how much to learn, how short a time to learn it in.

CREWS BEAT UNION BOAT CLUB OARSMEN ON ROUGH WATER ON THE CHARLES

JUNIOR VARSITY TAKES BIG LEAD OVER BOAT CLUB

Waves Practically Water Log the Boats During the Course of Race

In the second crew race on the Charles Wednesday afternoon the junior varsity and the 150 pound crew decisively defeated the first crew of the Union Boat Club over a racing course of one and three quarter miles. The junior varsity which beat Harvard last Monday came in two and one half lengths ahead of the Boat Club's crew, while the 150 pound crew won by about a quarter of a length.

The waves furnished plenty of excitement throughout the race as they washed over the sides of the shells, and soon had the boats pretty nearly water logged. Both boats were handicapped by the rough water.

The junior varsity set the pace practically all the way. The Engineers secured the lead from the start and held it, while the 150 pound crew had quite a fight on their hands to keep ahead of the Boat Club. The varsity paced the crews for the first mile, but turned back at this point as the water in the lower part of the basin was getting too rough.

While the Union Boat Club boat was near Harvard Bridge, the stroke caught a crab which practically put the boat out of the race, as the shell fell rapidly behind after this.

FITZPATRICK WILL LEAD FROSH TEAM

Exeter and Andover Have Both Beaten Harvard Frosh By Same Score

At a recent meeting of the freshman track team Harry Fitzpatrick was elected captain to lead the team in the two remaining meets. His specialty is the hurdles and the jumps, and he has been a consistent performer all season. Captain Fitzpatrick's men will need all their fight on Saturday when they oppose the strong Exeter aggregation who recently defeated the Harvard freshman by a score only three points less than that by which Andover beat them.

Exeter's star is Captain O'Neil who broke the Harvard Interscholastic half mile record under abominable conditions last Saturday. For the shorter distances Exeter has Luce who is counted to give Jack Wiebe a close race in the hundred. In the quarter mile Lane figures most prominently for the schoolboys as he is credited with the time of 52-1. If Captain O'Neil does not run the mile Exeter will pin her hopes on Ferguson who probably will come through in about 4-40. The yearlings will have a hard race in the hurdles as they will be opposed to two veterans in Elliot and O'Connell.

The pole vault is one of Exeter's strongest events and it will not surprise anyone if they place three men. Duffield will lead the schoolboy hopes in the high jump with about 5 ft. 6 in. if he is working well. The weight events are to be represented by Jack Brandenburg and Jack Dalenz, the former throwing the discus around the 25 foot mark.

The crew races Wednesday were held under difficulty as such a wind was blowing that the boats shipped water at every foot of the course. When the Harvard men tried to get their shell out of the water it was so heavy that it was cracked in the attempt.

FRESHMEN EIGHT TRAILS CRIMSON BOAT AT FINISH

Beavers Keep Even Until the Final Distance of the Crew Contest

Through a sea that at times threatened to swamp all three boats, the freshmen first eight trailed the first Harvard freshman crew at the finish but defeated the second Crimson yearling boat Wednesday afternoon. The first Harvard eight was ahead of the Engineers by half a length of open water while the Crimson seconds were a good two lengths behind the Beavers. Weather conditions were anything but ideal for racing, and the stress of the cross chop below Harvard Bridge was so great that the shell of the Harvard seconds was badly cracked.

All three crews got away to a fast start just below the temporary bridge, and for the first quarter mile it looked like anybody's race. At this point the second Harvard boat began gradually to fall behind while both first crews kept practically bow and bow. At Harvard Bridge the Crimson had a very slight lead, but as the water got rougher, they were unable to maintain it. In response to the cheering from the crowds of fellow students that lined the bank, the Technology shell bent to it more lustily, and slowly, but surely crept into the leading position. They were rowing much smoother than their opponents and looked at this point the easy winners. In the last half mile Harvard came up strong and the Engineers could not stay with them as their stroke went up and they rowed steadily into the lead. It was a marvellous exhibition of power and rhythm as the Crimson boat swelled the stroke up and swept across the line ahead of the Technology crew by a length of open water.

150 POUND CREW MEETS COLUMBIA TOMORROW NIGHT

Will Represent Technology in Three Cornered Race on the Harlem

Early yesterday afternoon the 150 pound crew accompanied by Coach Bill Haines and Manager Ken Lord boarded the boat for New York City where they will engage in a three-cornered race with Columbia. The contest is scheduled to be run off over the Henley distance on the Harlem River at 6 o'clock tomorrow evening. The participants will be the Columbia third varsity and 150 pound crew, and the Beaver lightweight outfit.

In the race with Harvard and Penn the coxswain had to steer through a fog and rain, while in this race he will have to run somewhat of an obstacle race. It is reported that the river over which the crews will compete is full of boxes and various other obstacles.

The lineup will remain the same as that which rowed in the race with the Union Boat Club on Wednesday. It is: bow, Grove; 2, Rosseau; 3, Davis; 4, Butler; 5, Flaxington; 6, Kaufman; 7, Peterson; stroke, Greer; cox, Houghton.

The weather man doesn't seem to believe in crew races if the way he has kicked up a fuss when the oarsmen have tried to race for the past week can be used to judge him by. He started out last Saturday and prevented the Harvard, Columbia, Penn crew contest with his rain and wind.

ENGINEER TENNIS EASILY DEFEATS THE BROWN TEAM

Seven Matches Out of Nine Go To Technology Men on Wednesday

In the match with Brown University Wednesday afternoon the Engineer tennis team took seven out of nine matches played on the Bruin courts. The Beavers won five singles with very little trouble, but Harris was defeated by Summers of Brown in a three set match. In the first doubles Captain Tressel and Russell were forced to accept defeat from Bennett and Chaffee of the Brown, making the only two matches the Engineers lost.

In the first set between each team's ranking man, Captain Tressel and Chaffee of Brown came together, Tressel making easy work of the Bruin netman winning by scores of 6-1, 6-1. Russell took over Bennett in easy fashion, the first being a love set. Joe Russell has a good accurate serve, and can place the ball well in the court, both these factors contributing to his easy win. In the second set the final count was 6-3.

Peck, Broadhurst, and Eddy all won their matches without experiencing any serious difficulty, although Peck had to play Gilbert of Brown in a 8-6 win in the second set. Harris, however, did not make out so well losing the only single match for the Engineers after playing three fast sets.

Doubles Prove Interesting
In the first doubles Tressel and Russell were paired against Bennett and Chaffee of Brown, and although they lost by scores of 5-7, 6-3, and 6-2 it does not indicate the closeness of the match, as Tressel and Russell put up a good type of play throughout the contest.

Peck and Broadhurst were matched against Summers and Tellman in the

(Continued on Page 4)

Baseball Comes From Long Rest

Junior-Freshmen Game Today Reopens Series for Baseball Cup

Intra-mural baseball forced into the background by the unfavorable weather of the last two weeks will come to life again today when the freshman team plays the Juniors at 4:30. Last week the Juniors after dropping two games in a row, first to Lake Bannan's frosh and then to the Sophomores, turned the tables on the graduating class winning a fairly well-played game by a 6 to 4 margin. The frosh will meet the Sophs sometime next week in a game which will decide who will head the top of the ladder as both teams are tied for first in the league each having lost one game and won two.

All the teams have not had many organized practices lately but every day a few ball-players cavort around the infield to get in a little batting and fielding work. At the first of the season Bill Walterkirchen's Seniors looked like they were going to repeat their win of last year when they marched triumphantly through the series to come out on top. Thesis work and other banes of graduation, however, have prevented them from taking a more active part in the game, which partly accounts for their present standing.

As the Juniors presented an almost new ball team in their game last week. The frosh proved themselves a hitting resources for today's game. Rhinehart who was a big success on the mound in the last tussle will work again today. The frosh proved themselves a hitting team when they bunched a few well-placed hits off Fitzgerald two weeks ago and will give the Junior pitchers a tough assignment to handle tomorrow should they start a rally.

Baseball Team Formed To Play Outside Games

"Beaver Ineligibles" Organized In Attempt to Make Varsity Team

Several baseball enthusiasts in an attempt to place baseball on the same footing as that enjoyed by the varsity sports have organized a team called the Beaver Ineligibles made up of the best available baseball material in the Institute. Tomorrow at Tech Field at 2:30 the outfit will make its first debut to Technology baseball fans when they meet the fast Park Athletic Association team. At present the men making up the team all come from the intramural class aggregations and with good backing these men hope to put out an organization which in a year or two will come to be recognized as the varsity baseball team of Technology.

Under the management of Luke Bannon '27 who has coached the frosh class team this year, a team has been selected that from all appearances will prove a cracker-jack club. At first base, Crandall, captain of the frosh this year who was picked by the newspapers last season as the best first baseman when at Somerville in Boston schools.

Caps off—to the Winners in the \$250 Prize Contest!
OVER 12,000 suggestions were received in the contest for slogans on the new Hinge-Cap on Williams Shaving Cream. The names of winners are given below. We congratulate these lucky persons and thank every one who participated for the interest shown.
THE J. B. WILLIAMS CO., Glastonbury, Conn.

1st Prize \$100
"Found—a cap that nobody lost."
J. C. Colley, '24, Emory & Henry College, Emory, Va.

2nd Prize \$50
"Better use me; you can't lose me."
Hempstead S. Bull, Graduate School, University of Michigan.

3rd Prizes (2) \$25 each
"Like the Williams habit—you can't lose it."
J. Anthony Walsh, '24, Brown University.
"It's bound to stay."
Alfred Clark, '26, Drake University.

4th Prizes (2) \$10 each
"Takes the 'mis' from missing—leaves the 'sing' for shaving."
Miss Emma T. Westermann, '25, University of Nebraska.
"The cap is always on, and you're lots better off."
Lincoln Fisher, '24, Yale School of Medicine.

5th Prizes (6) \$5 each
Awarded to Hy, Hyman, '24, Ohio State University;
Midshipman Donald Fairbairn, '24, U. S. Naval Academy;
H. L. Pennock, '26, Colorado Agricultural College;
Harold McCoy, '24, George Washington University;
Cadet George Arthur Graybe, '25, U. S. Military Academy;
Miss Callie McWhirter, '24, University of Georgia.

MANY STARS ENTERED IN TRIANGULAR MEET

(Continued from Page 1)

Engineers other representatives in the dashes.

Jeppie will have to travel to get a place against Heacock in the 220 dash. Heacock turned in a 212.5 time for the dash in the Army meet two weeks ago. However, on a fairly bad track and after a bad start last Saturday, Jeppie won the 220 in 23 seconds, it remains to be seen if he can give the Army runner a good fight tomorrow. Hoxie will be a running mate for Doug in this event.

In the 440 a national champ in the form of Vic Ascher of Georgetown will have to be accounted for by Jeppie. The Army does not have a sure point getter in this event so it will be a fight between Jeppie and Ascher for honors. Howlett who took third place in the Harvard meet will also be after a place for the Beavers.

The 880 run presents poor prospects for Technology. Charlie Phelps and Bailey will have the best chance to score

for the Cambridge team, but they will be up against Sullivan of Georgetown who is a national 600 yard champ and George Marston, national 1000 yard champ. Hence the Beavers hopes are not high in this event, either.

The mile run is another of the weak spots on the Engineer's team. Gif Symonds will be in the starter's line for the Beavers, but he will have all the opposition he wants from Newman of West Point. Newman had been doing the mile consistently around 4 minutes 36 seconds. Gif was the only Engineer to score in the mile against Harvard in last Saturday's Harvard meet.

The two mile appears to be solely a Georgetown event with Harry Helm national two mile champion looked to lead off the starters, and finish up a winner. Bill Rooney, Gubby Holt, Frank Bemis and Hooper will be Coach Connor's hopes. Bill has been troubled with stiffness the last few days and may not be in the best of condition to run but he can be depended upon to give a good fight to his opponents.

Captain Ambach, Manion, and Emmons Blodgett will have a tough job in the low hurdles when they come up against Barkes of the Army. But Technology ought to place well in this event as all three of the men put up a good showing against the Crimson.

The high hurdle race will be a struggle between West Point and Georgetown. The Cadets have Barkes in this event too, and he is a world's champ at present turning in the time of 15 seconds, but he will have no easy time winning as Georgetown has the hurdler who placed second in the national championships.

Chance In Shot Put

The shot put will offer an even chance to the three teams. Georgetown has Plansky, West Point has Stowell, both have been doing around 42 feet. Sanford ought to be able to carry off the first place for the Engineers in the pole vault but he will have plenty of close competition from Berry of the Army who has been doing 12 feet.

The high jump is a distinctly Georgetown event from the looks of it. They have Morton who has jumped 6 feet 4 inches. McArdle will be the Engineers' best. Greene and McArdle will have to fight to get a place from Milligan of the Cadets.

The broad jump will probably go to the Army as Sexton has been turning in distances of 21 feet 10 inches. Manion and Ballentine did over 20 feet for Coach Connor in the Harvard meet. Drew is in line for a first in the hammer throw. He did over 146 feet against the Crimson and has been improving steadily. Garrard and Jiggs Rogers should place in the javelin although Murphy of the Army has been throwing around 170 feet. Garrard has thrown the spear 172 feet, and if he

GOLFERS TO MEET CADETS TOMORROW

Hardest Match of Season in Line for Beavers

Tomorrow the golf team is to play the Army over the latter's course in what will undoubtedly be the hardest match of the season. Yesterday afternoon a last minute change in the line up of the team was made when Van Duesen beat Fitch and eased himself into fourth place. Outside of the one change the line-up is the same as before with Head, Massey, Fitch, and Van Duesen.

The Army has always had a strong team and they beat the Beavers last year when the team was at its best so that it is hardly to be expected that they will win this year after such a late beginning and with so little practice. The Engineers have been particularly unfortunate in the obtaining of places to practice and as soon as they did secure enough courses the weather turned against them.

BASEBALL TEAM FORMED TO PLAY OUTSIDE TEAMS

(Continued from Page 3)

for the Dorms last spring and this year plays with the Seniors will cover third. Simmonds of basketball fame is in the left garden. Right field is ably taken care of by Bill Walterskirchen, Senior captain who led his team last year to the Cup Championship. Bill Robinson, president of the Senior class is operating around the keystone sack assisted by Ingram, captain of the Juniors at short.

At center is Rhinehart who pitches for this year's frosh. Behind the plate will be Herman of the Juniors who has a good wing for second. The team has a great pitcher to work on the mound in Fitzgerald of the North Cambridge and Reading teams. Last year he hurled stellar ball for these clubs and has an enviable record of strikeouts in his career. Several other of the stars of the diamond are also lined up for the team, the most prominent among them being Shorty Manning of the Seniors, Johnson, heavy hitter of the frosh, Michelen, Senior catcher and Bow Barker, Senior second sacker. There is also a wealth of material left in the class teams along with many unknowns who as yet have not played at the Institute but have baseball records behind them.

ENGINEER TENNIS TEAM EASILY DEFEATS BROWN

(Continued from Page 3)

second doubles, and easily disposed of their opponents, winning by scores of 6-1, 6-4. Harris and Eddy paired against Gilbert and Martin of the Bruin team had to drag their match out to three sets to get a win. The first set gave indications of a long and hotly contested match, after many deuced games the Brown netman won the first set by 3-6; the other two sets went to the Engineers by scores of 6-2, 7-5 completing a successful match for the Beavers.

CREVELING CHOSEN TO HEAD MINING SOCIETY

At the smoker held by the Mining Engineering Society last Wednesday night, J. G. Creveling '25 was elected President, W. T. Brown '25, Vice-president, and W. H. Callahan '25, Secretary. For Treasurer F. L. Foster '25 was elected, and A. L. Sherman '25 was chosen as the representative to the Combined Professional Societies.

SCABBARD AND BLADE GIVE MILITARY DANCE

Last night the Scabbard and Blade Military Fraternity gave a dance in the main hall, Walker, in honor of the army officers who inspected the freshmen battalion in the afternoon. Music for the affair was furnished by Sid Reinherz's Orchestra.

An interesting feature of the dance was an airplane which stood in the middle of the floor. The wings were off and the propeller was placed directly in front of it. All the men attending the affair were in uniform and toward the latter part of the evening a Paul Jones was announced in order that the dancers might become better acquainted.

MAJOR ALLEN VISITS INSTITUTE WEDNESDAY

Major W. H. Allen, United States Army, and his two sons from Fort Adams, Newport, Rhode Island, visited the Institute last Wednesday as the special guests of President Stratton. After a trip through the laboratories, the party lunched at the President's house.

Notices and Announcements

All notices for this column should be in by the morning of the day preceding the issue.

OFFICIAL RECEPTION
President Stratton will be at home to members of the Senior Class today from 4 to 6.

UNDERGRADUATE SENIOR WEEK TICKETS
Blanket tickets will be on sale in main lobby all this week. The price will be \$16 and covers everything.

CHESS CLUB
There will be a meeting of the Chess Club and an election of officers in the committee room, Walker, tomorrow, at 2.

LATIN-AMERICAN CLUB
Elections of officers for the coming year will be held in room 10-275, tomorrow at 12. Every Latin-American is expected to be present. No membership is required.

COURSES VI, VI-A, VI-C, XIV AND XV
There will be a mass meeting for all electrical students this afternoon in room 10-250 at 4. The purpose of the meeting will be to organize and nominate officers for the M. I. T. Branch of the A. I. E. E. There will be speeches and the nomination of officers for the coming year will be in order. It is hoped that all students registered in courses VI, VI-A, VI-C, XIV, and XV, will attend the meeting.

CHORAL SOCIETY
There will be a rehearsal of the choral society in room 5-330 this evening at 5 o'clock. Officers for the coming year will be elected at this time.

RADIO NOMINATIONS
Nominations for the officers of the M.I.T. Radio Society for the year 1924-25 are now open. Petitions bearing the signatures of ten members and of the nominee, should be put in M.I.T. Box 160, before 12 o'clock Saturday, May 24.

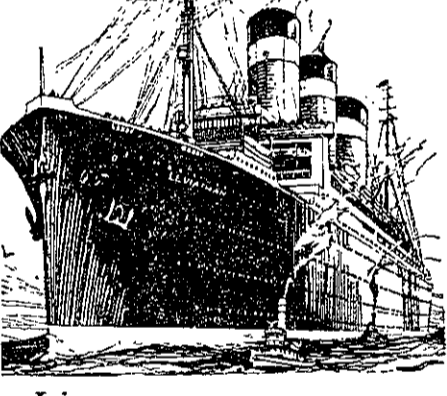

RADIO BANQUET
Tickets for the Radio Banquet tomorrow at 6, in north hall, Walker, may be obtained from officers of the M. I. T. Radio Society, or the Commonwealth Radio Association by mail, address M. I. T. Box 160, or at Electrical Engineering Headquarters. Price \$2.50.

MENORAH SOCIETY
The final meeting and smoker of the Menorah Society for the year will be held in the west lounge at 8 on Tuesday, May 20. Installation of new officers and discussion of the plans for the coming year will take place.

SPORTS SENIOR BASEBALL
Men on the Senior baseball team will meet in the hangar at 4 today to go to the President's reception in a body.

BASEBALL
Senior-Sophomore game which was postponed Wednesday will be played on the lower diamond this afternoon. Regular Junior-Freshman game will be played on the upper diamond.

FRESHMAN BASEBALL
Practice every Monday and Wednesday at 3:30 and Friday at 4. Watch Calumet Club bulletin board daily for information.

7 Weeks Trip to Europe for \$342.40
Made by Princeton Instructor Including Round Trip Steamship Fare and All Expenses for 34 days in Europe

THIS trip is fully described in a booklet written by Professor Nylander of Princeton University which gives the complete itinerary and itemized expenses. It will be sent you upon receipt of the coupon below. Also the folder "What's Going on in Europe in 1924" and illustrated literature about the United States Lines.

Steamship Fare—\$85 and up
Thousands of students and teachers are sailing for Europe this summer in the third class cabins of United States Lines' ships. Separate exclusive space has been reserved on the
S. S. President Harding - June 24th
S. S. Republic - - - July 2nd
S. S. Leviathan - - - July 5th

Similar reservations have been made on other eastbound ships and also on westbound ships (including the Leviathan) for your return.
College women are invited particularly to make reservations on the S. S. Republic sailing July 2nd, as special third cabin accommodations are available under proper chaperonage. Women will also be especially chaperoned on the other ships listed above and on the return trips.

Third Class Cabin on United States Lines' Ships Is Not Steerage
Third class cabins on these ships accommodate 2, 4 or 6 persons. They are clean, airy and comfortable. The berths have soft, sanitary mattresses and clean linen; —water and other conveniences in each stateroom. The food is wholesome, appetizing and plentiful and service of the best. Public rooms are large and inviting. Ample deck space is provided for games and dances. Daily concerts are a feature of the voyage.

This is your chance to enjoy the cultural and educational advantages of Europe at the lowest cost possible in years. Dozens of international events are taking place in Europe this summer including the Olympic games and the British Empire Exhibition.
