REPRESENTATIVE OF FRESHMAN CLASS

Field Day: Tag-of-War Captain
Leads Competitors at Polls Wednesday

ELECTIONS ARE CLOSE

W. B. Dean, Barker-Carr, and Weinberg Fill Other ...
Stolen Goods

We know that in every large body of men there are bound to be a few who are little cavalier and not to forget which is mine and which is thine. Any one is apt to stray from the paths of right doing to the sin of forgetting to account. Sometimes, as we like that, but we did not know that we had among us one who would be on the alert to save herself from the evil doings of another. It is true that the other activity officers in Walker. That is about as little a piece of dishonesty as has come down to us and in the last place, the activities for the good of the whole student body do. It does not have to be three acts consistent with the single act minds that must decay in the engineer? Does he know that no student who is an engineer in the college will not become a good student body? Finally, does he know that in doing such a deed he is really hurting himself as much as he is harming anyone else, and that few men after the first deviation from the straight and narrow path ever come through, being what they are, not without he would not have done such a thing after serious consideration. We trust that this will not occur again.

We do this because honestly it is the one necessary quality in a man's make up if he wishes to be really successful. A man may have the right kind of mind and yet not be a good man, because he does not enjoy rides so gained as much as the man who makes his living in a reputable manner. Of course we know that there is no man that, in the best of us, and so much good in the worst of us, that it doesn't behave any of us to talk about the rest of us. But we can't help thinking that a man who would do a trick like that is beyond contempt.

To facilitate matters we propose that next time the freshmen vote for the men not nominated. The ballots might be shorter.

The Faculty Seeks Opinions

It has come to our attention that at least two of the Professors of the Institute classes in laying before the student body and getting student opinion first hand concerning the situation recently. Two classes in this regard. We propose having a table discussion with his class on the subject of the proposed change. Perhaps it was productive of ideas for him; perhaps it was productive of ideas for us. We are engaged upon the class and much discussion resuted.

The above was spent upon a portion of a class hour in setting the situation before the man, and then took a vote from the man himself. We are probably going to change it, because of the two term proposition. We do not believe this to be representative, only twelve votes being cast, but it may be. In a personal letter to the editor, this professor expresses surprise that the students seem to line a brother. The school year rather than having two semen. It is a matter in a conversation that he didn't believe the frankness was representative, as it was from the man who wouldn't be less liable to work in the summer; and so would not.

It is asserted possible that the mass of the students are entertaining a mistaken attitude about the entire proposal, but it is an acetate fact that the conformed of student opinion is in all absolute opposition to a two term year. We are hearing from the news of the day many American colleges are becoming more and more cognizant that the student viewpoint of doing a certain amount of planning, the calculation of the patient of being operated upon great deal of consideration before performing the operation. The evidence that one professor entertaining that the faculty is becoming more and more concerned that the students. Student reaction is one of the many things to be considered, paying a chance such as proposed. It is the students see in this light. It is highly possible that they are wrong.

The faculty seems as undisciplined as the student body is decided on the question of changing to two terms.

The Lounger attended the Institute meeting last night, and sat about ahead of time, they can get around.

To facilitate matters we propose that next time the freshmen should assemble at lower 7029. The only important emanated from the statement of Colonel V. R. Nobile, editor-in-chief of The Springfield Union in the last night. Nobile is regarded as the leading dramatic and as "The Use of a Trench". Three one-act plays by Barrie, with "The Nervous Wreck." As funny as proposed—that is, the students may accumulate wealth through dishonest means, but he will not really hurting himself as much as those who are a little careless and apt to forget which is mine and which is thine.

GAME CALLED OFF BY MENTOR OF ST. ANSELM'S COLLEGE

Scarlet Fever Epidemic Causes Action--No Definite Cancelation

NEWS CALL CAME YESTERDAY

It is a sight to behold as a group of mentors of St. Anselm's College at Concord, New Hampshire, presented calls all over the state in answer to a request of the Scarlet Fever Epidemic Association of St. Anselm's College. The request was made with the understanding that no definite word would be given until the epidemic was over.

In New Hampshire, the Scarlet Fever Epidemic Association of St. Anselm's College has been active in controlling the epidemic. The association has been working closely with the New Hampshire State Health Department to ensure that all necessary precautions are taken to prevent the spread of the disease. The association has been providing information to the public and assisting the state health department in their efforts to control the epidemic.

BRIGHT PROSPECTS ARE IN STORE FOR VARSITY SWIMMING

Hawaiian Swimming Star Will Add Strength to Back Strokes--Fencers Improving In Night Practices

Coach Doug K. Plesse Will Show Swimming Star

Coach Doug K. Plesse will show the strength of his back stroke at tomorrow's meet against Yale. The Hawaiian swimming star will be introduced to the Harvard audience at the meet, which is expected to be a thrilling one.

UNDERWOOD TO SPEAK ABOUT “LIVING THINGS”

W. L. Underwood, special lecture in the Department of Public Health, will deliver his lecture, “The Atmosphere and Environment of Life,” in Little Dory Hall on Tuesday, December 3, at 7:30 p.m. All interested are invited to attend.

Mr. Underwood is an experienced meteorologist and is expert on the weather-glass and its use.

He has photographs of some of the most interesting environment of life.

These pictures will be most educational.

This lecture will only be given on December 3 at 7:30 p.m.

STUDENTS IN FOUNDRY COURSE INSPECT PLANT

All students taking the course in Foun-

day are required to make an inspection of the plant of the Walker Pratt Manufacturing Company. This week's trip was scheduled for the regular class in Foun-

day, and attendance was taken at the office of the latter company. The compa-

ny has been one of the leading found-

ries in the country, and its plant with modern equipment can be easily seen.

The students will be taken on a guided tour of the plant.

INSTITUTE COMMITTEE REDUCED AT MEETING

(Continued from Page 1)

The Institute Committee was asked to make the following changes in the student's Committee:

1. That the number of members of the Committee be reduced from 20 to 15.

2. That a committee be appointed to study the method of selecting members of the Committee.

3. That the meetings of the Committee be held on Thursdays at 8:00 p.m.

Dr. Faber to Deliver Last Lecture Today

Dr. Charles Faber will deliver his last lecture on tonight, in room 10-250. The sub-

ject of his lecture will be announced later.

Dr. Faber has been giving a series of lectures on the history of science to the graduate students every Tuesday and Thursday since October 21. He has been a great help to his students in studying and presenting their work.

Dr. Faber will give his last lecture this evening. Tickets will be sold from the Technique office, accompanied by a grant of $1.00.

During his stay at the Institute Dr. Faber delivered several lectures to the Optical Society of America as well as to the Musical Society of the University of New York; and gave two lectures before the Phoenix Science Club.
