PROFESSOR NORRIS TO HEAD AMERICAN CHEMICAL SOCIETY

Institute Professor Chosen As President by Recent Meetings

Professor J. F. Norris of the Department of Chemistry of Massachusetts Institute of Technology has been elected President of the American Chemical Society, the largest and most representative professional society in the chemical library and has a membership of over 16,000. Professor Norris is not only a member of the Faculty of Technology teaching on the Chemical Laboratories, but he is also a member of the board of directors, the governing body of the American Chemical Society.

The Sedgwick Lectures were started in 1847 by the late Samuel Wells, who had been associated with the Sedgwick Institution for many years. The Sedgwick Lectures have been conducted by Dr. J. F. Norris, who has been an officer of the Chemical Society for many years.

The Sedgwick Lecture will be on Friday, January 9. All or some time. As yet no date has been fixed. Professor Norris's address will be on or before January 10, and the address will be on or before January 11, and the address will then be published.

NOMINATIONS TO BE MADE

The American Chemical Society is now considering the nomination of its new president. The new president will be the successor to Dr. J. F. Norris, who has been an officer of the Chemical Society for many years. The new president will be the successor to Dr. J. F. Norris, who has been an officer of the Chemical Society for many years.

Professor Norris's latest publication is on the subject of the American Chemical Society's annual meeting. The meeting is held in the spring of every year, and the address is delivered by the president of the society.

The year is at an end. It is difficult to think of any person believing that the earth is a flat plane.

The Lounger is in receipt of an anonymous letter of December 30th. The writer states:

"Dear Sir: With a stage full of dancing beauties which he waxes epigrammatic. In one place he says: "What the EH department needs is a be-whiskered magician."

"Alphonse of the Copley group."

"What Technology needs is a be-whiskered magician."

"What the EH department needs is a be-whiskered magician."

"The Lounger, therefore brings forth a suggestion:- "What Technology needs is a be-whiskered magician."

Collegiate TOURNAMENT OF THE WORLD

Dear Sir:

My attitude toward final examinations is not so complete as theoretically according to the direction of the motion of the bat. We have, however, a remedial suggestion for the privilege of constructing their machineries over the winter. At least we would like recollection and Chetley curtailed. We believe it possible for the students to break up some of it.

Soccer Team Finishes a Successful Season

(Continued from Page 3)
both teams. Nevertheless, at the end of the first half, both teams were placed on the sidelines. The score was 3-3, and it was during those final five minutes that West Point scored the first of its three winning goals.

Facing an entirely superior team, the Engineers gave a valiant and most meritorious account of themselves, and deserve every word of credit for holding the Cadets to such a low score.

This last season compared favorably with other soccer years at the Institute, and was in every way a success. More than the usual number of goals were matched in the games, and the football distinguished itself with worthv contests of the players. The sport attracted an unusually large number of foreign students to participate in a game they rarely miss or other.
