Mr. F. C. L. A. - Master of Faculty Assembly

Affiliated with the Student Council of the University of Maine, the Master of the Faculty Assembly is the representative of the Faculty and acts as a liaison between the Faculty and the Student Council. He also serves as an advisor to the Student Council on matters pertaining to the welfare of the students.

MRS. SIMPSON AND PROFESSOR HAMILTON WIN FIRST PRIZE

"No glass is clean, except in a few cases. Some of the more popular, the so called "clean" glasses, are not clean at all." This statement was made by Dr. Hamilton, professor of English, in his lecture on the history of the word "clean." He also pointed out that the word's original meaning was "to purify," and that it has been used in a metaphorical sense to describe objects that are not necessarily free from dirt or grime.

The blowing of the west wind, which was caused by the passage of a cold front, brought with it a drop in temperature and a rise in humidity. The weather was described as "chilly but not uncomfortable." The forecast for the coming week indicates continued cool and damp conditions.

The Master of the Faculty Assembly, Mr. F. C. L. A., announced that the next meeting of the Faculty Assembly will be held on February 27. The meeting will be attended by all members of the Faculty, who are invited to attend and participate in the discussion of any matters of concern to the Faculty.

The Master of the Faculty Assembly, Mr. F. C. L. A., has announced that the next meeting of the Faculty Assembly will be held on February 27. The meeting will be attended by all members of the Faculty, who are invited to attend and participate in the discussion of any matters of concern to the Faculty.

Dr. Hamilton’s lecture on the history of the word "clean" was well received by the audience. The lecture was held in the Student Union, and was attended by a large number of students and faculty members. The Master of the Faculty Assembly, Mr. F. C. L. A., introduced Dr. Hamilton and thanked him for his enlightening presentation.

A NEW CIRCUS GROUND

THE circus is coming to town! At yesterday's meeting of the Institute Committee it was decided that Technology would have a circus this year. It has been recommended that it be held in the armory which can be provided by the department of gymnasiums.

The last circus at the Institute was a good one, but there is no reason why this year's shouldn't be even better. There is over a month to get ready in, which will be ample time to put on a good show. The advantages of the armory over either of our small gavins is obvious, and if it is possible to engage the armory, it is certainly the best place for such an event.

Believing that good physical condition is a great asset in passing examinations, the University of Texas has made it a rule that students must regularly attend gymnasium classes during the week. This is a wise rule, and one that we should all follow.

The body is a part of the mind, and if the body is not up to snuff, the mind will have to fall down in its efficiency of operation. It is of vital importance. It is just as necessary during the day as it is at night. Regularity in eating and sleeping with a bit of outdoor exercise is necessary because of the impossibility of having it in the newly-decorated main hall of Walker. If it is possible to engage the armory, it is certainly the best place for such an event.

The radio concert furnished considerable amusement for some of those at the party. Of course there was the usual instruction of being able to shoot creditably with 20 points when you heard the familiar voice "WEEL!"

BOSTON COLLEGE FROSH

Boston College for a wide awake Freshman class as evidenced by the enthusiasm demonstrated yesterday by the “Back Beat.” The class has already detailed for its first contact with the “Back Beat” of the “Boston Daily Globe” and other Boston newspapers.

The editor of the “Boston Daily Globe” has already stated that he will publish an article which will be read with interest by the Class.

In all fairness, however, it is only fair to point out that the “Boston Daily Globe” is the only newspaper which can claim the honor of being able to shoot with a cheery confidence that will be surprising to many of our students.

The brain is a part of the body and if the body is not up to snuff, the mind will have to fall down in its efficiency of operation. The mind will not operate as well as it can if the body is not up to snuff.

The body is a part of the mind, and if the body is not up to snuff, the mind will have to fall down in its efficiency of operation. It is of vital importance. It is just as necessary during the day as it is at night. Regularity in eating and sleeping with a bit of outdoor exercise is necessary because of the impossibility of having it in the newly-decorated main hall of Walker.

Every department at the Institute should make an effort to see that the students are in top-notch form.

The library has one book which deserves a great deal of attention. The book is the "Manual of Chemistry," and the editors of the "Back Beat" state that it is the only book that can claim the honor of being able to shoot creditably with 20 points when you heard the familiar voice "WEEL!"

LEcTURES ON PHYSICAL CHEMISTRY

Professor P. D. Beach, who is giving a course in Physical Chemistry under the auspices of the Chemistry Club, is to lecture again at 8:00 p.m. on Thursday evening in the library. The lecture is entitled "The Chemical Constitution of the Elements."

Many lectures have been received by the "Back Beat." One of the most interesting is the invitation of the department to attend the lecture of the "Back Beat." The lecture is entitled "The Chemical Constitution of the Elements." It will be given by Professor P. D. Beach, who is giving a course in Physical Chemistry under the auspices of the Chemistry Club.

The lecture will be given at 8:00 p.m. on Thursday evening in the library. It is open to all students, and is expected to be well attended.

The "Back Beat" is a new newspaper which was started last week by the research departments of several of the colleges of the East, as well as by the research departments of several of the colleges of the West. It will be published weekly, and will be sold for 10 cents per copy.

It is open to all students, and is expected to be well attended.

ELI FAVORED TO WIN IN INITIAL CONTEST FOR ENGINEER TEAM

New Haven Team, If Victors, Will Retain Scheelein Trophy—Armstrong and Hinrad Expected To Make Fast Time In Dash

Tonight the engineer swimmers meet the fast traveling Bullet from Palo Alto and in the natural element of the Beavcr is supposed to be the water, all

pictures favor the Bullet to come out on top. Yale has a crew team as usual this year, and it is going to take one of the best teams in the country to send them down to defeat. There
does not seem to be a weak spot in the lineup of the Yale team and though the Institute team has several promising stars, it does show a departure from the balance of the Bullet
team.

The Bullet team has probably the

best middle man. P. J. Johnson, hailing from Hawaii where Yale swam last year, and no time of 1:16 in the 100 yards is doubtful.

The Bullet team from Palo Alto is in the fast time of 1:15 and it does not seem possible that either Yale or the Bullet will get a win over each other.

The Bullet team from Palo Alto is in the fast time of 1:15 and it does not seem possible that either Yale or the Bullet will get a win over each other.

You'll be stepping out at the Musical Clubs Concert and the dances held at the Engineer's Club and the officers will be in Attendance.

Thursday night the Varsity boat team will have their last practice before the dinner Tuesday and the officers will be in Attendance.

Varsity Crew Goes Through First Workout at BoatHouse Wednesday

The track team was out in full force today as usual, and the boys are all in fine shape. The track team should decide the fate of the Varsity team early in the season and hold it throughout the year.

Dorm Basketball

The Yale men's basketball team was defeated by the Engineers today at the Palace, 45-35.
