FIFTH CLASS IS ADDRESSING PRESIDENT

Discusses Possibilities Open
In Various Branches of Engineering

Next Lecture Announced

"The main factor is success is the wrapped daily to make way for all al," said President S. W. Stratton in his address to the freshman on Monday afternoon. "We are here to try and work hard. The harder we work the more success we shall have."

"I don't see why there are many ties

in the Institute," said the president. "I con not see why there are tie. The tie is not the sign of

hour or the sign of a good man."

A girl who has been invited to the
care of the house, and is bound to
be there at noon. At 7:30 a.m.
I will start on our Friday.

The new girls will be distributed
among the students at Rogers
residential hall. There will be
classes for girls and secretaries.

THE TECH WILL BEGIN PRACTICE

The TECH will begin practice on
Monday afternoon at 1:30. The
new girls will be distributed
among the students at Rogers
residential hall. There will be
classes for girls and secretaries.

P.O. ALGER OF G.E. CO.

"Development of Law Starting Current
Motors" is the first of a series of lectures to be given at the Institute by the General Electric Company. There will be two lectures on this subject, both by P. O. Alger of the General Electric Company.

DATE IS SET FOR SENIOR ELECTIONS

"The best lecture will be given by
Professor E. T. Miller of the
Mechanical Engineering Department.

SEASON'S FORMAL DORN DANCE TO OCCUR SOON

Favors For Men and Ladies to Be Distributed During Dinner

The annual formal dinner Dance will be held in Walker Memorial next Thursday night. Tickets will be on sale early this week. $2.50 will be the price.
YOU MEN WHO SMOKE

M. C. ROBERTSON 27

A GATHERING of supposedly educated people assembled, a while ago, to discuss college men, looking under the delusion that they would discover something of instan- tion that they would discover something of instantaneous value to the younger generation. Realizing that it was difficult to find any thing new and startling, they had recourse to the time-worn method of gaining cheap publicity; they stated that about half of America's college men are smokers. We feel ourselves complimented by the fact that we are at least semi-intelligent, which, judging by the state- ments of certain aforementioned of educated people, places us on a plane above them somewhere.

The promotional use of the term moronic long ago became fre- quent and hackneyed. Anyone not in tune to accurate usage is called one of general principles. It is frequently difficult for the accused person to defend himself; it is defined a debatable word, and when he is seldom has access to a newspaper through which he may deny the accusation.

In this case, Professor Charles G. Shaw, of New York University has come out on the side of the college undergraduates. He says that now the saloon has been abolished, colleges offer the best target for those reformers who want to change everything. He feels that for the benefit of others, try to devise learning; rather than learning, for example: "I say that students have more aptitude for knowledge than their teachers can boost." Professor Shaw enjoiner a trifle too much.

It is good to know, however, that the poor maligned students have finally been given a chance to defend themselves. If you should take the middle course and admit that we are human. We are not morons, but we do not claim to be superman. Eyes enough that may be ruined by mental fault, and a few in us are usu- mously, but most of us are normally. Why can't our critics realize this when they are taking for granted?

THE TECH takes pleasure in announcing the election of R. W. Willoughby to the feature department and W. L. Slichter to the Sports Department.
The Army won a decisive victory 38 to 19 over Technology Tuesday night at West Point. The Cadets had a strong defense which held the Tech players to five field goals. Roosma, West Point's specialist, accounted for 23 of the Army points with 10 field goals and three foul shots. Most of the shots came from nearly half the length of the floor.

Roosma formerly played on the champion Passaic High team, where he also starred. Forrester supplied most of Tech's points, with two field goals and nine fouls.

The Army set the pace most of the way, leading at the end of the first half by a score of 20 to 17. Forrester put up a little better in the final period, running the score up to 38 to 19.

The two teams were nearly equal as a whole, but Roosma's phenomenal shooting ability and Wood and Kaommerer who started for guards also made a creditable showing. Roosma, who played in right forward position, but the Cadet guards also made a creditable showing. Roosma formerly played on the Beaver Deeat of Boston University at Y. M. C. A.

The varsity as yet has not been able to beat the varsity men consistently. There is one event in which the Beaver team is almost certain of placing, that is the 50 yard dash. While the varsity men are entered, no other than the varsity men enter. Wood has shown up in this event, while Hedlund has entered in the 1000 yard run. Although the above two are not expected to break any records, it is obvious that they will upheave the beasts at short, sprint, and track events. The 50 yard dash and the 1000 yard run Hedlund has entered by virtue of his scholastic and athletic ability. These two events have been in training all season and are in the best conditions to run a fairly strong race.

Dorm Basketball

The basketball games in the dormitory are always a good time for the students. The new boys have been going especially well. The matches will be played in this season. Both games are entered in the 50 yard hand race. Although the above two are not expected to break any records, it is obvious that they will upheave the beasts at short, sprint, and track events. The 50 yard dash and the 1000 yard run Hedlund has entered by virtue of his scholastic and athletic ability. These two events have been in training all season and are in the best conditions to run a fairly strong race.
