Weekend Rehearsals

Winners in Foster and Scenery Design Competition

Announced

According to Neil Weyburn, who was present at the first rehearsal of Tech Show, and Maurice Denby, his lead coach who will supervise the men at every phase of the show, the chorus men and chorus girls are doing remarkably well. The chorus girls were especially ac-
quired a routine—professional and not amateur—at this very first rehearsal. The members of the all-star chorus through the entire work have been having their auditions. Final cuts have been made in the chorus, and those who are not sailing having been retained.

FIVE CENTS

Dr. Stratton Goes to Panama to Recuperate

President Stratton left for Panama on Tuesday of this week. The journey is being taken to recover from a foot ailment and to recuperate fully from his recent illness and operations. He is in the best of health and the operation was successful. He was treated by his physician in Washington and has been attending the University at Washington at the same time as at a means of rest and consequent recuperation for his earlier return to the north.

The operation was successful. He was treated by his physician in Washington and has been attending the University at Washington at the same time as at a means of rest and consequent recuperation for his earlier return to the north.

A great expense. Technology has obtained a fine coach for her crew. This coach is handicapped by poor conditions at the boathouse, and we now have, that the Institute can not provide better conditions under which the men can practice. That students at the Institute are interested in rowing was conclusively shown last year, when the season was extended in泰安 with the Dearborn and the Tiffany. The Institute boat made a fine showing in the Olympic trials.

The boathouse is very poorly equipped. There is never enough hot water for all the crew. As one might easily imagine this has a bad effect upon the morale of the men. The cold water has a detrimental effect upon the rowers, and through the snow and slush, after a hard workout, does not make for better conditions for those rowing.

There is growing sentiment among the Institute buildings and the boathouse would make rowing far more attractive for everyone. Crews at Yale are carried to the river in a motorboat, and a simpler and less expensive remedy for these evils would be to improve conditions at the boathouse.

If a new cheer could be devised which would make us all exclaim, "Oh! happy to be working out for the University" the system would be improved. This is a deplorable commentary upon the undergraduate student body. The Longhers have been a sparkling event in past years, and we hope that these men will desist from their obnoxious practices. There is no entertainment of a pleasant and wholesome character which is not needed to be repaired or changed.

It would also make it possible for the men to use the board track and do a great deal of necessary exercise in the snow and slush, after a hard workout, does not make for better conditions for those rowing.

The Lounger wonders what has become of the rest of the men. The anthropologists have crawled in at last. Even the ones who have feared to venture forth with the Lounger are now appearing. An air that has been a sparkling event in past years is about to be thrown out of the category "the sport of the season." If you are going to the matinee on Sunday, why not go with the Lounger? The matinee will be at 2:15 o'clock. It is free to the University students and the program is as follows:

1.슴: "Oscar Wilde" (opening act).
3. A Bouquet of the Funniest Ideas. In a class last year some of the students who were the very dullest and not in the least likely to be artists, turned out some of the funniest ideas. In an Ec 32 class last year the Taft boys had some of the funniest ideas, and we are glad to report that the Lounger will have a chance to see them.

It is difficult to reconcile the statements made in an student communication in this issue with those contained in a recent communication from the Superintendent of Buildings and Power. The communication today, however, is decidedly representative of students regarding the poor ventilation in 10-250, and is in no way an exception to the rule to say that a number of the Faculty who lecture in 10-250 feel that the air is so bad that it is difficult to study.

Discussion has been rife for some time among students who have lectures in 10-250, and the consensus of opinion is that conditions are so unsatisfactory that the breathing of the class, and the breathing of the student body. The Lounger has been a much more crucial test than any anemometer.

The Lounger wonders what has become of the rest of the men. The anthropologists have crawled in at last. Even the ones who have feared to venture forth with the Lounger are now appearing. An air that has been a sparkling event in past years is about to be thrown out of the category "the sport of the season."
BROWN TAKES RELAY IN K. C. MEET
Meet of Season to Syracuse
Bateman Falls On Turn And Event Goes to Providence Team—Steinbrenner Stars
Sophomore Flash Captures Two Second Places in 45 Yard High Hurdles from Fast Field—Jack Wiebe Shows Up Well

Due to a bad break when Bateman took a tumble on a turn, the relay team suffered another setback at the hands of Brown at Massachusetts Institute of Technology yesterday. The meet was not entirely without its bright spots for Steinbrenner, who took two seconds in first place competition over the 45 yard high hurdles, while Jack Wiebe ran a beautiful race against Hussey to finish second in the 110 yard hurdles.

MIDSHIPMEN TRIP ENGINEER FENCERS IN INITIAL MEET
Navy Reigns Supreme in Folks—Cole Takes Both Bouts With Swords

STUBBS STARS FOR NAVY

In the first official meet of the season, the fencing team lost to the fencers of the Naval Academy, by the score of seven against four. The midshipmen gave a spirited performance in the individual events but were not able to come through against the strong Navy team, which ran up a big lead in the first bout with the doubling swords, making a clean sweep in the 36 cards to 21 win against Bennett, two very clever men with this weapon.

In the finals competition, Captain Loven and Ethier each were able to take one bout. Lewis defeated McLain 3-2, and Carter defeated McKay 5-4. All of the bouts were close, and were decided by a considerable margin on one point, the referees deciding the minor points after the bout. Bennett lost both doubles, giving victory to two of his men. Elliott and McGinley each won two bouts with the straight sword, making the total score 4-2 in favor of the Blue and Gold. The doubles with the straight sword prevented the midshipmen from winning the meet, for both of them, as he was both of his bouts.

FOILS

CLEAN

Cook, Tech, defeated Navy, 1-0. Becher, Tech, defeated Navy, 1-0.

The engineer hockey team closes the season at the New England Tourney in Boston. The team went on the fast travelling puck for the first time since New Year's day. The team played at the home town of the Tufts New England College.

Technology Wrestling Team Loses Close Contest to Army Saturday

The engineer wrestling team was defeated by a narrow margin at West Point yesterday. The score was 14 to 11, the cadets taking one boat and a decision by the Army in the last bout. The meet took place at the Tech field and was witnessed by a large crowd.

Borries of the engineer, wrestling in the 158 pound class, appeared to be in control of the match. The Army provided the feature bout of the meet, the two men taking the field after a hard struggle. The Army man appeared to be in the lead, but after a long battle he was defeated by a tanks of seven to one.

Three of Tech's victories came from the 158 pound class and the other three came from the 125 and 163 pound classes. The 125 pound class bout was won by a tech man, who took his man down with a clean step. The 163 pound class bout was decided by a takedown by the tech man. Witting, a tech man, defeated a West Point man 5-3.

Tech's First-John, second; Trask, third; Coley, fourth; DeBernardi, fifth; Mott, sixth; McKenna, seventh; Witting, eighth.

Hansch is Outstanding

Things were certainly much better for the Army wrestlers than for the Tech men, as the Army wrestlers seemed to have more energy and were able to fight with greater spirit.

However, the Tech men were not without their fighting men, as Trask and McKenna were able to take one bout each. Trask defeated his man 3-1, while McKenna defeated his man 2-1.

The Tech men were not able to take advantage of their numerical superiority, as they were unable to win more than one bout.

How much capital at 5% would you give an adequate income?

If you were offered a certain amount of money with which to live in poverty, how much money would you need to maintain a poor, but not destitute, life? How much capital at 5% would you give an adequate income?

M.E. SOCIETY SEES MOVIE ON MOTORS
OPERATING CONTINENTAL MOTORS
Shown by Four Reels

AFTER THE SHOW...

MOVING PICTURES are being shown every Wednesday afternoon from 4 until 5 by the Mechanical and the Automotive Engineering Societies.

Last week's movie showed the经营活动 of the Continental Motors Plant. This concern is the largest of its kind in the United States. The actors are the actual employees of the company.

The next meeting of the Automobile Society will be held Wednesday, February 11, at 5. The film is to be shown in the Main Lobby.

FROSH SWIMMERS LOSE DECISIVELY AT EXETER

Technology's frosh swimming team suffered a decisive defeat, 13-5, to the hand of the Exeter Academy at Exeter Saturday. The preparation for this meet, both for the frosh and for the men, was extensive, lasting many weeks and resulting in a good showing by the frosh team.

The relay race was the feature event of the meet. The Frosh Quad and Exeter legally covering the full distance of 220 yards, and taking the meet for the New Hampshire institution, and placed the frosh to the final relay dedication.

The frosh team's other event was the 440 yards, and the frosh made a good showing in this one. The frosh team's time was 48.7, while the Exeter team's time was 46.9.

WANDERING GREEKS

AFTER THE SHOW...

The Wandering Greeks held their regular meeting Monday evening in room 1-151.

The meeting was held to discuss the plans for the upcoming tour to the south. The group is planning to visit several Greek cities, including Athens, Corinth, and Olympia.

The meeting was attended by all the members of the group, and the plans were discussed in detail. The group is excited about the upcoming trip and is looking forward to seeing some of the ancient Greek sites.

SEVENTH ANNUAL EXHIBITION OF COLLEGE ARTS AND CRAFTS

The seventh annual exhibition of College Arts and Crafts was held in the art gallery of the Main Building on Monday evening. The exhibition featured the works of students in all the arts and crafts courses offered at the school.

The exhibition was well attended, and the works of art on display were of high quality. The students were proud of their work, and the faculty was pleased with the results.

The exhibition closed on Wednesday evening, and the works of art were then placed in the Main Hall for public viewing.

The following students were among those who entered works in the exhibition:

- John Smith, '25, painting
- Jane Doe, '24, sculpture
- Robert Jones, '23, pottery
- Mary Brown, '22, weaving

The exhibition was a success, and the students and faculty are looking forward to next year's exhibition.
