

T. C. A. APPOINTS NEW DIRECTOR OF RELIGIOUS WORK

C. C. Shotts of Alabama Chosen
to Assist W. M. Ross by
T.C.A. Cabinet

WILL BEGIN NEXT WEEK

Has B.S. from the University of
Alabama—Was a Graduate
Student at Yale

Appointment of C. C. Shotts of University, Alabama, as special religious director of the Technology Christian Association was announced by W. M. Ross, general secretary of the association yesterday. According to members of the T. C. A. Cabinet, the T. C. A. has been contemplating for a long time the appointment of a religious director to assist Mr. Ross in his work. Mr. Shotts, who will assume his new duties on September 1, will be with the Technology delegation at Silver Bay this June.

Mr. Shotts was graduated from the University of Alabama in 1922, receiving a B. S. in Electrical Engineering. He has been a member of the Y. M. C. A. Group in the Department of Religious Education for 3 years and receives his B. D. from Yale this June, but is not an ordained minister. While an undergraduate in the University of Alabama he was Recording Secretary and President of the Student Y. M. C. A. and during his Senior year he was paid Assistant Secretary. During his four undergraduate years he led voluntary Bible Classes among Engineering students, also classes in World problems, and has had experience in Deputation Work being elected as one of the sixteen students to represent the Southern Field at the first meeting of their Field Council.

Has Good Personality
"A big, fine looking man with a very wholesome, stimulating personality, a good student, and a man who makes a fine impression on young men is Mr. C. C. Shotts, your new assistant secretary of the T. C. A. I do not know of a man who, in my judgment, would be better suited to the sort of work you outline. I have a feeling that in the work with boys and young men he is sure to have a splendid future." Such is the description given Shotts

(Continued on Page 4)

Construction Of Tennis Courts Is Postponed Again

Major Smith's Men Are Too
Busy Preparing Grounds
For June Reunion

All the energies of Major Smith's force will be devoted to preparing the Institute for the coming alumni reunion in June and the new tennis courts must wait until this event is over, Bursar H. S. Ford stated yesterday. Last year the soccer field was sidetracked in order to furnish loam for ground improvements and this year it is the tennis courts which must, temporarily at least, be sacrificed.

Work will begin as soon as the reunion is over, declared Major Smith, Superintendent of Buildings, and he hopes to have some of the courts, at any rate, available in the fall. Four will be built in all and they will be modeled after a private court in Belmont which is considered by those in charge of the construction, to be one of the best in this section. Major Smith had a number of different mixtures of concrete prepared and tested to determine which type was the best suited for the purpose and he has selected a type.

Bad weather prevented the old courts from being ready for use yesterday. They are now in condition excepting for the lines which were to have been put on Wednesday. Eddie Pung declared that the time it will take now to get them in condition is problematical, depending entirely on the weather.

Appointed Religious Director of T.C.A.

C. C. Shotts

CLASS ELECTIONS TO BE HELD SOON

Nominations For Officers Must
Be Turned In Before One
Tomorrow

Candidates for the officers and committee representatives of the Classes of 1926, 1927, and 1928 at the elections Wednesday are required to file their petitions before 1 o'clock tomorrow. The Elections Committee has selected the Information Office, room 10-100, as the place where papers must be left.

At 9 o'clock this morning, a box will be placed in that room to receive petitions. It will be removed at 1 o'clock tomorrow as according to the Constitution of the M. I. T. Undergraduate Association, all nominations must be in by that time.

Last year, enthusiasm was high during the week preceding the elections. When the papers were checked by the Elections Committee after the nomination deposit box was closed, 104 men were found to have the required number of their classmates' signatures to receive a nomination. This year whether the three lower classes are taking an interest in the nominations is a much discussed matter. It is known, however, that in the coming Senior and in the coming Junior classes, a great deal of interest is manifest in the nominations for Institute Committee representatives.

As has been previously noted in THE TECH, the constitution very definitely specifies the form of the nomination paper. Each sponsor must be a member of the class in which the candidate seeks office. Below is the form, repeated for reference:

"We, the undersigned members of the Class of _____ do hereby nominate _____ for _____ of our Class. (signatures of at least ten sponsors) I hereby accept the nomination. (signature of the nominee)

LIGHT VARSITY BOARDS BOAT FOR PRINCETON TO RACE TIGER 150S

A 150 pound crew, an entirely different eight both in spirit and makeup than the one that left for Annapolis two weeks ago, boarded the boat last night for Princeton where they will meet the Tiger light Varsity on Lake Carnegie Saturday. Many changes in the lineup of the crew, made by Bill Haines in an attempt to find a more powerful combination, weakened the moral of the boat until the snappy 150's even bowed to the Jayvees in their last row.

Coming back from the Navy race the crew was low in spirit and during the week home they failed to snap out of this slump. With the handicaps caused by shiftings in the boat they did not hit their stride at all during the last few days. Despite this condition, crew enthusiasts believe that Dan Sayre who accompanied the eight on the Fall River Line boat last night will put the needed pep in the crew today when

TRACK TEAM WILL JOURNEY TO MEET TIGER TOMORROW

Old Nassau Strong In Sprints
And Distant Runs, Also
Field Events

BEAVERS WEAK IN SPOTS

Chink Drew Has Opportunity
To Avenge Defeat at
Penn Games

The Technology track team departs tonight for Princeton where they will take part in a dual contest with the formidable Orange and Black aggregation in Palmer Stadium Saturday afternoon. In view of the fact that Princeton has one of the most powerful teams in the East, the Engineers will endeavor to strive for enough places to make a good showing in the final total. According to past performances of the Princeton athletes, it appears that they will make practically a clean sweep of the field events while the Beaver's best work will show in the middle distant runs.

Distance Runs are Weak
On the Tiger squad there are three sprinters who are good for events in the century and furlong, and as Lou Porter cannot compete for Technology because of a sore muscle which he suffered at the Penn Games, the bulk of the work will be left to Copley, Kauzman, and Jeppe in both events.

In middle distance runs the Engineers are the strongest. With Stephenson, Leness and Jeppe in the quarter-mile and Leness, Warner, and Bailey in the half mile, Technology boasts of one of the best middle distant combinations in the East. George Leness was credited with a 1 min., 54 3-5 sec. half and a 50 flat quarter at the Penn Relays and this should be good for two firsts at Princeton if Leness competes in both events. The present plans of Coach Hedlund have Leness running only the half with Jeppe and Stephenson left in the 440. This seems to be the best plan for with the unreasonably stiff schedule which faces the Institute trackers for the next five consecutive weeks, it would be no less than a catastrophe to have Big George go stale.

Princeton Strong in Field Events
The Engineers will be well represented in the distance runs by Frank Bemis and Don Hooper in the two mile and by K. A. Smith and Davidson in the one mile event. At his best Bemis is unbeatable but because of the good and bad periods he experiences, it is hardly known how he will show up in the meet Saturday. K. A. Smith is a new comer in the distant game but because of the remarkable performance he made against Chute and Davidson in the mile runs during the past few weeks, he has well earned a place on the team in this event. Rooney cannot make the trip because of studies.

In the high and low hurdles, Hank Steinbrenner is going to compete against high class performers when he meets Scattergood and Howell of Old

(Continued on Page 3)

DEBATING TEAM WILL MEET UNION COLLEGE TONIGHT IN FINAL ENCOUNTER OF SEASON

Use Electric Wires To Transport Water

Carrying water over electric wires is the latest scientific novelty. An evidence of it was seen in the basement of Walker last night, when one of the ceiling lights suddenly began to drip water. In a few minutes the dripping had increased to a stream, and a couple of buckets were necessary to catch it as it fell.

A large crowd gathered to view the spectacle and to discuss the probable origin of the stream. It was suggested that the rain outside might have something to do with it, but the three floors above were cited as an opposition to that theory. Finally the cause was declared to be a leaking pipe, and the flood was soon stopped.

LECTURE ON SHIP OPERATING TODAY

"Freight, Traffic and Passenger
Departments" Second of
Naval Series

The second of a series of lectures on ship operating being given this term under the auspices of the Department of Naval Architecture and Marine Engineering will be delivered this afternoon at 3 o'clock in Room 3-270, by E. E. Parvin, secretary of the International Mercantile Marine. Mr. Parvin will talk on the subject, "Freight, Traffic, and Passenger Departments." Everyone is invited to these lectures, which are being given with the purpose of broadening the field for which students in Course XIII are being fitted.

Mr. R. H. M. Robinson, president of the United States American Lines, who delivered the first lecture last Friday, gave a general outline of the whole business of ship operating. The lecture this afternoon and the succeeding lecturers will elaborate on what was said in the first lecture and will take up in greater detail the various phases of ship operating.

The third lecture will be given next Friday by I. A. Campbell of the firm of Kulin, Woolsey, Campbell, Hickox, and Keating, Admiralty lawyers of New York. Mr. Campbell will talk on "Legal Principles and Problems of Shipping."

MUSICIANS PLAY LAST NIGHT AT EXPOSITION

Concert Well Received By Large
Crowd In Rogers Hall

The Banjo and Glee Clubs were well received in their concert given at the Home Beautiful Exposition at Mechanics Building last evening. A crowd of over 10,000 was present at the exhibition of furniture, house furnishings and decorations, the largest audience to which the clubs have played at one time. The Glee Club appeared first, followed by the Banjo Club.

As the concluding number both clubs rendered the Stein song. The Banjo Club was received best, the noise of the large crowd interfering somewhat with the selections of the Glee Club. This is the second time that the clubs have appeared to a large audience, the first time being at the Capitol Theatre where they played for a whole week recently.

Following last evening's engagement at the Home Beautiful Exposition in Mechanics Hall, the Combined Musical Clubs will play two other concerts this season, one at Rogers Hall on May 16 and the final performance on May 17 at the Somerville Kiwanis Club. The clubs also expect to render a short hour entertainment for the prisoners at Deer Island, but the engagement is not scheduled as a regular concert and is not compulsory for the men on the clubs.

TECHNOLOGY TEAM TO OPPOSE DEATH PENALTY FOR CRIME

W. C. Ashbury '25, J. C. Evans '25,
and J. W. Sullivan G, Rep-
resent Technology

QUESTION ARGUED BEFORE

Technology's debating team will meet Union College tonight in Room 5-330 at 8 o'clock in its last debate of the season. The proposition, "Resolved that capital punishment be abolished" will again be used as in the Dartmouth meet, with the Institute men maintaining the affirmative as previously.

J. W. Sullivan G, will be the first speaker for Technology, and will be followed by W. C. Ashbury '25, and J. C. Evans '25. W. S. Livingston '27 will act as alternate. Union's team will be composed of F. A. Cieman, E. K. Pritchard, W. B. Jaffe, and P. H. DuBois, alternate.

Professor H. G. Pearson, head of the Department of English will preside at the debate. Technology and Union have each selected one judge, E. D. Johnson, and F. J. Carney. The third judge has as yet not been announced, his selection having been left to the two chosen judges.

First Appearance of Union Here
The debate tonight will mark the first appearance of Union at Technology in a forensic meet. Union secured the honor of being the sole debaters to defeat the strong Bowdoin team, when they obtained a unanimous decision on the question of the adoption of the Child Labor Amendment. The men from Schenectady also defeated Hobart College in argument on the issue concerning the limitation of the power of the United States Su-

R. O. T. C. MEN PLAN TO SEE HOG ISLAND FORT

Seniors, Juniors, and Sophomores of the Engineer and Coast Artillery R. O. T. C. units are eligible to attend the trip to the Hog Island Fort in Boston Harbor tomorrow afternoon. An army boat, which will be furnished for the occasion, will leave the Army Base pier in South Boston at 1.30, and will return late in the afternoon. All men wishing to make the trip will be required to sign up first with Lieutenant Levy, as the trip is limited to 75 men from each unit.

The main defensive weapons at the fort are two 16-inch guns, one of which is already mounted, and the other in the process of being mounted. These weapons weigh 200 tons, including the base, and have a range of 30 miles. The shells have a weight of about one ton. The guns are the largest now used by the United States, and make the Hog Island Fort the most modern in this section of the country, although the fort has not yet been commissioned as an active defensive unit.

CALENDAR

- Friday, May 1**
9:00-5:00—Filing of class nominations in Information Office.
4:00—Naval Architecture Lecture. Room 5-226.
8:00—Debate, Technology versus Union College. Room 5-330.
- Saturday, May 2**
9:00-5:00—Filing of class nominations in Information Office.
1:00—Hog Island Trip by R.O.T.C. students. All invited.
1:15—Start of Outing Club trip to Mt. Monadnock.
- Monday, May 4**
2:00—Meeting of Technology Dames. Emma Rogers Room.
- Tuesday, May 5**
9:00-5:00—Last day to file scholarship blanks.
- Wednesday, May 6**
9:00-5:00—Class elections. Main Lobby.
6:15—Masonic Dinner at Masonic Lodge, 536 Massachusetts Avenue.
- Thursday, May 7**
5:00—Institute Committee Meeting. Alumni and Faculty Room.
7:30—Smoker of Society of American Military Engineers. North Hall, Walker.

THE OPEN FORUM

To the Editor of THE TECH: The Technology men who meet the representatives of Union College on Friday evening are unusually well qualified to uphold the reputation of the Institute in the field of debate. They possess ability as thinkers and as speakers, they have been well trained, and the debates of the last few weeks have given them practice on the platform from which they have greatly profited. They handle themselves well, and it is a pleasure to listen to them. Hitherto they have received little support from the student body. On the occasion of their last public appearance this season this support should be given heartily. I appeal for a good turn out to welcome the opposing team and to show our appreciation of the fact that Tech men can be not only good engineers but also good debaters. (Signed) Henry G. Pearson.

As We Like It

"BADGES" With plenty of light humor to relieve the usual strain of the mystery play, "Badges" at the Plymouth Theatre, gets away from the sameness of most of the recent mysteries. With not too much of the intricate, which was perhaps overdone in such plays as "The Bat" and "The Cat and the Canary," together with the continuous vein of comedy, the production may well be said to live up to its classification as a "comedy-mystery-drama"—for so the program has it. When a young girl, of most pleasing appearance, finds herself followed day in and day out by a strange young man, who soon introduces himself bashfully as a correspondence school detective and tells her that she is being followed by several other individuals and that her mail has been tampered with, there is infinite room for speculation on the mysterious side of the situation. It is in this way that Madge Kennedy as Miriam Holt meets Gregory Kelly as Franklin Green. From the time of their meeting, situations develop with great rapidity—but enough for the plot. Mysteries are intended to arouse the imagination; the rest we will leave to conjecture. Kelly's ever-present cocksureness of his ability as a detective together with the amazing exhibitions of this ability and knowledge of the law, are truly amusing while his personal bashfulness prevents his appearing too forward. The well known Miss Kennedy is as young, impetuous, and vivacious as ever and lends a softening and human touch to the play which would otherwise perhaps savor too much of the detective story. C.C.H.

THE DEBATE TONIGHT

IN a communication which is printed in another column of this page the head of the English Department asks the student body for its support of the debating team. In times past similar pleas have been made for the support of other Institute activities, but in most cases it was a question "Shall I see a so-and-so game this week or next week or in the years to come?" There are unlimited opportunities for seeing athletic events of all kinds but a debate is usually unique in itself, the subject seldom being repeated. Furthermore, no speaker can grow enthusiastic speaking to empty seats. A particularly live subject has been picked, too, for tonight's debate. Many articles have appeared in current magazines on the subject of capital punishment. The arguments pro and con have been multitudinous. We have against this penalty the moral question of the State setting itself in the place of God. The futility of capital punishment has been proven, at least to the satisfaction of its opponents, by the classical example of the vacillations of the State of Maine. On the other hand and upholding this age old device, it is said that today's high murder rate is due entirely to the leniency of our courts; the death penalty is not for punishment but for an example and a social protective. With a subject so full of possibilities and with the assurance that the arguments will be well handled, we may well drop into room 5-330 tonight with confidence that we will have an interesting and mentally stimulating evening.

ELECTIONS! ONCE more elections have come around. Once more the snow-storm of nomination papers passing around classes has come. And once more politicians are acquiring a large number of new friends, and are playing the old old game of vote swapping. So along with the other signs of the times, an editorial on elections is in order. There is little new to say. An editorial on this topic might almost be reduced to substituting in a formula, or a case of—use form 101C. It all reduces to, "Think for yourself, and vote for the man who in your opinion is the most worthy." But let us look at another phase of the question. Have you ever realized that when you elect a man you do something besides give him an honor? You are a member of a business organization, and you are hiring a man to work for you—a counsel. You are the boss! The man you elect is going to stand for you, handle your business. To outsiders he is an impersonation of you. By him you are going to be judged, for he is the characteristic type of you or else you would not have elected him. For wages he receives the honor of his position. So let us think of this when we cast our vote. Let us use the same care in choosing our officers that we would in choosing personal business representatives. If we do not vote at all, we acknowledge that we are a useless member of the organization. We care neither what happens to our business, nor what others think of us. And finally let both the elector and the elected realize that each has a duty to the other.

PACIFISTS AND OSTRICHES THERE has been much discussion recently by people who style themselves "workers for peace." Truly, it is an ideal; but the method of striving for it is fundamentally wrong. The world, at heart, is just the same now as it was when cave men heaved boulders at the animals. Men have always fought and always will fight for the same reasons: jealousy, pride, anger, love, hate—all the primordial instincts have stood unchanged through the ages. Above all rises the greatest principle, that of self-preservation. Existing laws have meant nothing to the man who has thought life was cheating him of wealth, health, and happiness. His answer has always been—Fight! They talk of educating the youth for peace. Such education, insofar as it is justifiable, belongs to the province of the home. Beyond that, it is simply a case of teaching youth to be an ostrich: to stick his head into the sand. Let the "parlor reds" remember that our particular corner of the universe is not Utopia, but just good old Earth. We people who live here are humans and are perfectly aware of the fact. The ideals we possess are incorporated in our very being, not in handbills strewn at the doors or stuffed into the letterboxes. Idealism is a thing each person must create for himself—not something to be wrapped up, boxed, and sold to the public as a cure-all.

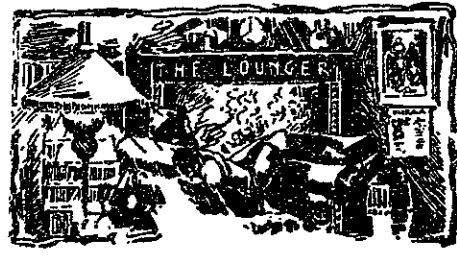

"BABY BLUE"

"Baby Blue," a comedy differing somewhat from the general run of musical shows in that it has some semblance of a plot, opened at the Wilbur Theatre this week. It is a pleasing production and worth seeing. The dialogue and situations are amusing and entertaining. The show is just new and is still more or less in the process of re-arrangement. The settings are good and the story is able to hold one's interest as the action progresses. The trite musical comedy dodge of making mistaken identity the key note of the plot is used, but skillfully enough so that the hackneyed situation does not seem too time worn to appeal to one's sense of humor. The trick of (Continued on Page 4)

Other Plays

- COLONIAL: "Music Box Revue." Usual pot pourri of songs and dances. COPLEY: "Grumpy." A very good and interesting play. HOLLIS: "Loggerheads." Irish humor which means scraps. The musical hits are mighty good. TREMONT: "Scandals." The 1924 edition. Not bad. WILBUR: "Baby Blue." Reviewed in this issue.

The FENWAY MASS. AT BOVLSTON Marie Prevost and Monte Blue in "RECOMPENSE" A Sequel to "Simon Called Peter"

The Interfraternity Conference, according to a special agent of the Lounger, elected officers Wednesday night. That was the sum total of the business taken up during the meeting. It was decided, characteristic fashion, that no more meetings should be held this year. It was feared that another meeting would prove too strenuous for the officers. During the course of the election discussion of the candidates consisted of doubts whether they had time for the intense labor involved in steering this papier-mache organization. The vast volume of business transacted, the immensity of the responsibility made it obvious that the offices should go to men with a surplus of time. Ah, the universality of truth! The busy Conference! It is further rumored that attendance at the Conference is due entirely to the food that is being served. The Lounger suggests that Messrs. Schell and Freeland be employed in the capacity of resurrection engineers to rehabilitate this papier-mache organization. Dear Lounger: It is always refreshing to learn that some one or two have succeeded in keep-

NETMEN DEFEAT B. U. IN FIRST MATCH

Team Starts Season With Victory Over Terrier Team

Although hindered by the biting cold, the tennis team won an easy victory over the B. U. netmen Wednesday, taking the meet by a score of 5 to 1. The outcome was according to expectations, but an upset featured when Capt. Russell and Broadhurst were defeated in the first doubles match 6-3, 6-4. Both Tech players were far from the top of their game, partly due to the weather and partly to the fact that this was the first match of the season. Frequent nets and double faults lead the pair into difficulties, and the B. U. players pressed their advantage to pull out the match. All the other matches went to the Tech players in straight sets.

Captain Russell started slowly against Martin of B.U., and had a score of 4-2, 40 love piled up against him before he began to settle down to play. After winning the next five points in succession for the game, he pulled the set out at 6-4. This unexpected reverse seemed to break Martin's confidence, and he offered little trouble in the second set. Russell kept him on the run, hardly shifting his own position from the back court, raking the corners and side lines with long drives. Martin made only one game in that set, Russell taking it 6-1.

Peck Up Against Clever Man
The second single match went to Broadhurst, 6-3, 6-1. His steady stroking and placement game seemed to confuse his opponent, who threatened seriously only in the first set. Broadhurst kept the same pace throughout and was never in danger. Hill had a rather strong service, but Broadhurst had no difficulty in handling it.

Ken Peck faced a very clever player in Shao, B.U.'s third man, and for some time had difficulty in solving his opponent's type of play. The first set was closer than the score indicated, the games going to deuce several times. Peck's type of play largely involves wearing the other man down by returning every thing that is sent across the net, and he employed this style Wednesday to good advantage. Shao had a pretty assortment of shots, and used them, but Peck was always there with the racket waiting, and his gets were in many cases remarkable. Frequent returns of shots that looked like sure placements wore down Shao, and Peck pulled out his match 6-2, 6-3.

Cold Makes Playing Difficult
Ernie Hinck, last year's freshman team star, breezed through his match in rapid manner. Linquist never troubling him. Hinck's cannon ball service was working in fine shape and whenever it shot across the net it was good for an ace, as it is almost impossible to get a racket on it because of the speed. His forehead was not so steady as it was last season, many of his drives going into the net. However, it has great power, and with more practice it should be very effective. Hinck's game, in contrast to Peck's depends upon speed rather than steadiness. Where Peck is content to return a ball, Hinck is looking for a kill, and when he kills it it stays killed. On the strength of his performance in this match, next time may find him playing a different position.

The first doubles match found the Tech pair thoroughly stiffened from the cold, and the resulting play was a mass of errors. Both Russell and Broadhurst relapsed from their quality of play in the singles, and played indifferently. Martin and Hill took the match at 6-3, 6-4.

A much different spirit pervaded the second doubles. B. U. sent a new combination into this match, Hicks and Chaddock. This pair were very clever performers, and led Peck and Hinck a merry chase in the first set. The advantage bobbed back and forth, most of the games going to deuce several times. The Tech team found the net a good number of times, which nearly cost the set. They finally broke through to an 11-9 win, and took the second set without much trouble 6-1.

The team journeys to Williamstown today to meet the Williams team. This is a formidable combination, and should provide plenty of opposition for the Tech players. The order in which the men play has not been determined yet, but Capt. Russell will probably play first man, with Broadhurst second, and an even choice between Peck and Hinck between third and fourth places.

- The summary:
- SINGLES**
J. Russell, M.I.T. defeated D. Martin, B. U., 6-4, 6-1.
F. Broadhurst M.I.T. defeated E. Hill, B.U., 6-3, 6-1.
K. Peck M.I.T. defeated W. Shao, B.U., 6-2, 6-3.
E. Hinck M.I.T. defeated G. Lindquist, B.U., 6-1, 6-2.
- DOUBLES**
Martin and Hill, B.U., defeated Russell and Broadhurst, M.I.T., 6-3, 6-4.
Peck and Hinck, M.I.T., defeated Hicks and Chaddock, B.U., 11-9, 6-1.

TRACK TEAM WILL ENCOUNTER TIGER AWAY TOMORROW

Orange and Black Can Boast of One of the Strongest Teams in East

HILLS SHOTPUT TITLIST

(Continued from Page 1)

Nassau. Scattergood won second place in the national intercollegiate for the past two years, over the high barriers, so that Hank should be able to judge his intercollegiate chances in this event.

Princeton has by far the strongest field event team in the East. Not only does she boast of two intercollegiate champions but several runners-up also. Chink Drew is expecting a close contest in the hammer throw and has been training for it all week. At Philadelphia last week Gates of the Orange and Black defeated Chink with a heave of 155 feet in winning third place. This has placed the Beaver captain in a determined mood to win Saturday. Hill and Beattie for Princeton are also considered place winners so that between the entries there promises to be a real duel with a new record in the offing.

Major Sanford in Pole Vault
Holmes is the Cardinal and Gray's best bet in the broadjump but since he will meet three Princeton men who can jump better than 22 feet he may be inspired to better his mark which he has not as yet reached. Holmes and Rogers of Technology will oppose Gibson, intercollegiate champion in the javelin throw. Gibson should experience an easy victory.

One of the best struggles of the meet is expected in the pole vault when "Major" Sanford meets the Princeton jumper who tied for the title at the Penn games last week with the bar set 12 ft., 6 in. All spring Major has gone over the bar set at near 12 feet and in the meet should do much better, when opposed by a star performer. Ralph Hills, a former student at Technology, holder of the intercollegiate shot put title, is good for 48 feet when at his best. Saul Brodsky and Glantzberg will represent the Engineers but are hardly expected to approach Hill's mark. These weaknesses of the Beaver team will go far toward making the score one-sided, but considering the Tiger's unusual strength in the field events, they are more justifiable.

Sophs Lose To Frosh in First Ball Encounter

Wednesday afternoon the frosh gave the Sophs and ole' man dope a setback when they gave the champs the short end of the 11 to 7 count. The yearlings played a good game in the field but were noticeably weak at bat. However, this was made up for by the poor way the Sophs handled the ball, allowing several slow grounders to go for bingles. Mock and Proctor did the heavy work for the frosh, each getting two hits and three runs. O'Hearn turned in a very creditable performance by fanning five men and allowing only one walk.

It was a very ragged brand of ball put forth by the Sophs, '27 making a total of seven errors. They were helpless before the curves of O'Hearn until the last inning when they staged one of their famous rallies. In this inning they fell short four runs of tying the score by pounding out five hits. This was the only opportunity the outfielders had to show what they could do. Captain Steele, who did the heavy work for his team, says that the team will soon be in good shape to turn the tables on the frosh. He points to the last inning as to the spirit of the team.

BEAVERS TO MEET PROVIDENCE TEAM AWAY FROM HOME

Players In Fine Condition for Game Tomorrow With Strong Team

RHINEHART DUE TO TWIRL

Infielders and Outfielders Are Furnishing Good Support

With three wins and only one defeat under their belts, the Beaver ball team journey tomorrow to Providence to meet the strong nine of Providence College. This is the only game this week, as the game with the Old Colony Trust team on Wednesday was postponed until next week. The chances for a win over Providence seem about even, as both the Beavers and Providence handed the Northeastern team a defeat by a large score.

As a whole the team has been playing a good brand of ball, as their victory over Worcester Tech testifies, and the batting average of the men, as a whole, is a treat for sore eyes. The only weakness in the team at present seems to be the cock-sureness with which they enter their games. If they would only settle down to some fighting baseball and stop amusing the stands, they would no doubt find themselves on a longer end of the score than they showed against Worcester and Norwich.

Infield Playing Good Brand of Ball

The pitchers are being rapidly rounded into shape, each having pitched at least one full game. Ingram, Rhinehart and Canfield are now taking their regular turns in the box and doing some mighty fine twirling. As Ingram worked against Worcester last week, Rhinehart will no doubt draw the assignment to work against the Providence team tomorrow. In his first game against Northeastern, he allowed them only three runs and a very few hits, all well scattered. All of the runs came in the first couple of innings, after which he settled down and held them scoreless.

On the whole, the infield is playing a fine brand of ball, scooping up many hot ones from all angles and positions. The weakest spot in the infield seems at present to be at the short station. Freeman and Seely have been alternating at this position, endeavoring to get the best results. Both men are playing good ball at times, yet on the whole their play is uncertain. There is always the feeling that a ball is going to get through at a critical time, keeping the spectator in suspense.

Game Called at 3.15 P. M.

The outfield is pulling the balls out of the air regularly and doing their share of stick work. Bill Brown, guardian of the right garden was slowed up somewhat last week with charley horse, but is now back in condition again, and covering as much ground as anyone. Cotter in center and Nickle in left are both natural fly chasers and let few hit balls get out of reach. Both men are doing some mighty fine work with the willow.

The game at Providence is called for 3.15, so there should be quite a number of men that are able to make the trip. In a car, the trip can be made in a very short time, allowing the men to reach there before game time.

as a sample of what the team is capable.

JUNIORS PREPARE TO DEFEND TITLE AS CREW CHAMPS

Class Crews to Race One Mile On May 23 for Possession Of Richards Cup

JUNIORS WEAK THIS YEAR

The interclass crews have started training for the Richards Cup Race to be held on the Charles on May 23. Interest in the event has been diversified, the two lower classes making the best of the time of preparation, while the Juniors and Seniors have been slow in responding to the call for candidates. As the line-ups of the respective eights will be announced about May 16, a rapid course of action is necessary.

This is the third year of the holding of the race. The class of '26 has been victorious in the two previous encounters, winning both races by a safe margin. However, by the present showing of the Sophomores and yearlings, there will probably be a new set of numerals inscribed on the trophy. As the first freshmen crew will be unable, by virtue of outside competition, to participate in the regatta, the burden will fall upon the second frosh eight to uphold the class prestige.

The winning crew will be awarded gold watch charms, with a reproduction of the Richards trophy on one side, and the name of the man on the other. The numerals of the winning crew are inscribed on the cup. The distance will be one mile.

On Saturday, while the 150 pound crew is racing at Princeton, the 150 pound and second frosh crews will meet Huntington School on the Charles. The race will be over the Henley distance, and will start at 3.30.

BEAVER GOLFERS WIN FIRST MEET WITH B. U.

Playing fine golf in spite of the cold weather and the biting winds which swept across the links, the Beaver golf team defeated the B.U. team 6-0. Considering the poor weather and the early season, all of the men turned in some fine scores. Captain R. W. Head of the Institute team turned in the best card of the afternoon, with a 39 on the second nine holes.

The summary:
Captain Head (T) d. Fitzpatrick 5 & 3;
Edmonds (T) d. Plankett (B.U.) 3 & 2;
Head—Edmonds d. Fitzpatrick-Plankett 5 & 3;
Elkins (T) d. Nelson (B.U.) 4 & 3; Johnson (T) d. Wray (B.U.) 3 & 2; Elkins-Johnson d. Nelson-Wray 4 & 3.

C. C. SHOTTS CHOSEN NEW T.C.A. DIRECTOR

Will Be Assistant to W. M. Ross and Will Direct the Religious Work

(Continued from Page 1)

by Dean Brown, head of the Yale Divinity School in his letter to R. P. Zeigler, chairman of the Advisory Board of the T. C. A.

In his college and Graduate School work he has been dependent on his own resources for his support, earning his way by coaching athletics, teaching mathematics and directing the recreational and religious activities in summer camps for boys. Shotts won his Gold Football as center on the University of Alabama football team, and also plays and has coached basketball, boxing and baseball.

Is A Large Man Physically

He is a large fellow physically, standing six feet, two inches and weighing 180 pounds. He is at present teaching in the Hopkins Grammar School, New Haven, which is one of the oldest of the New England private schools.

The appointment of a new assistant to Mr. Ross was first considered at the Setting-up Conference of the T. C. A., which was held last fall at Drabington Lodge, Kendall Green. At this conference two resolutions were adopted: 1—That the utilitarian service should be continued, that is, the undergraduate employment, handbook, room registry and the book exchange. 2—That more emphasis should be laid on the so-called religious education.

The Religious Service Department is composed of D. A. Shepard '26, R. W. Head '26, J. H. Wills '26, and G. A. Drew '25, with W. M. Ross as supervising head. This committee adopted the following resolution January 19, 1925 which was accepted by all of the T. C. A. Departments and resulted in the appointment of Mr. Shotts.

"Whereas students at the Massachusetts Institute of Technology, since they pursue materialistic courses are prone to neglect pursuits of a religious nature and whereas the modern spiritual illiteracy, prevalent among college students, is a thing to be deplored and corrected if possible, and whereas the general secretary of the Technology Christian Association is so occupied with his present duties as to make additional burdens inadvisable, therefore be it resolved: that this department recommend the employment of a paid secretary for religious service whose duties shall be in part to have sole supervision and direction of such work of a religious nature that may be approved by the Cabinet, and, resolved: that these activities shall include the supervision of such Bible Study classes or Chapel exercises as may be inaugurated at this Institution, and that the Religious Service secretary shall assist the general secretary in such matters as may arise.

Will Take Charge of Religious Work
Mr. Shotts' Work will then be to take charge of the Bible Study classes, Religious Meetings, Church Relations, Deputation, and the Industrial Service Work, such as teaching prisoners. He will also assist Mr. Ross in his work of supervising the different activities sponsored by the T. C. A., and will also take care of any new work which might arise. Mr. Ross believes that the coming of Shotts will be a big help in continuing and broadening the work of the T. C. A. and hopes that the men will co-operate with the new assistant secretary.

"BABY BLUE"

(Continued from Page 2)

providing an excuse for the chorus is more cleverly handled than usual, as the butler in the supposed absence of his master (rich, as every musical comedy hero must be) has invited the entire cast of a stranded show out for a week end party.

Warrant bearing plain clothes men, runaway girls, a penniless novelist, long lost relatives, a choleric attorney, and a few others all help to complicate matters and to snarl things up so that it is little short of a miracle that the authors are able to straighten things out in the final act for the conventional happy ending.

Irene Dunne makes a most attractive runaway from an isolated country town, coming to the suburbs of New York seeking romance. The chorus is rather good. As the advertisements truly say, it is a "youthful, dancing, prancing chorus." As a dancer from Egypt, Miss Wehrle startles the audience with stunts of the circus contortionist variety. Though her dances show a great deal of muscular control, practice, and all that, they are not particularly graceful or pleasing.

Taking things all in all, the show is what the American public always seems to want—something easy to see, and just as easy to forget. It furnishes an evening of relaxation and requires no mental effort—perfectly safe for parents or children, but none the less entertaining for the college man.

W. A.

TECHNIQUE HAS BUT A FEW COPIES LEFT

Three Hundred Books Put on Sale This Week Almost Gone

The sale of Technique copies is going on rapidly. Of the 300 copies put on sale this week in the main lobby, only a few are left. Anyone wishing copies of the year book can procure them from 12 to 2 today and tomorrow in the main lobby, but after this week it will be necessary to go to the Technique Office to get copies.

Freshman competition for election to the Sophomore staff of Technique is now open. This staff will be chosen in June from this year's freshman competitors. There are plenty of positions available on the business and editorial staff, with a chance to make the Junior board the next year. All freshmen who are interested have been asked to call at the Technique office on Tuesdays, Thursdays, and Fridays from 5 to 6.

CLOSING MEETING HELD BY UNITARIAN LAYMEN

The last meeting, for this season, of the M. I. T. Chapter, Unitarian Laymen's League was held Tuesday evening at the Unity House, Park Square, Boston. Supper was served at six-thirty, after which the following officers were elected for next season: president, H. Humphrey '26; vice president, R. W. Johnson '26; secretary, P. N. Rugg '27; treasurer, J. L. Supr '27. Following the business meeting, Rev. Charles T. Billings, of Cambridge, gave a talk on the choice and reading of books.

DEBATING TEAM TO MEET UNION TODAY

Technology Team Will Uphold the Abolition of Capital Punishment

(Continued from Page 1)

preme Court. This subject was the same as that used by the Technology team in debates with Maine and Oregon State Agricultural College. With the exception of the alternate, the same team as that which defeated Bowdoin will be used by Union tonight.

Abolition of capital punishment is a subject of much interest in debating circles at the present time. It was chosen by the Intercollegiate Debating League as a proposition for general use in the spring forensics. In the debate with Dartmouth last Friday evening in Huntington Hall, Technology secured the decision upholding the affirmative on this subject. After leaving Boston, the team from Hanover used the same proposition against Brown on Saturday evening.

In the debate tonight, the Institute men will engage in their fourth and last meet of the season. The team's first opponent was Maine, when the subject of limiting the power of the supreme Court was argued. This was followed by the debate with Oregon State Agricultural College when the Institute men were again defeated on the same proposition. Dartmouth was the third opponent last Friday, and was defeated by a two to one decision.

Notices and Announcements

OFFICIAL

G. S. 4

Students taking G. S. 4 will be held responsible by May 7 for the following reading in Schaub and Isaac's "The Law in Business Problems":

Pages 115-258.
Pages 273-284, re. making of contracts.
Pages 525-573, re. negotiable instruments.

SCHOLARSHIPS

All applications for scholarship aid for the school year 1925-26 must be left at room 3-107 on or before Tuesday, May 5th. "Application for Scholarship" blanks may be obtained in room 10-100.

Scholarships are award only to those students who produce satisfactory evidence of their need of assistance, and whose scholastic records are good. A student who is not in need of aid cannot honorably apply for a scholarship. Attention of the holders of Cambridge Scholarships is called to the fact that these scholarships once forfeited on account of poor record cannot be again awarded to the same applicant or to another.

UNDERGRADUATES

FREE FENCING LESSONS

Men desiring free fencing instruction, especially tall or left-handed men, report to Coach Danguy on Tuesdays and Saturdays at 5 o'clock in North Hall.

CLASS OFFICE NOMINATIONS
Nominations for class officers must be filed sometime between 9 o'clock today and 1 o'clock tomorrow. The petition form may be found in the T. C. A. Handbook under the section "Elections Committee."

T. C. A. EMPLOYMENT

The Bureau desires the names of men who are on the Massachusetts Civil Service Lists, with reference to summer work for the State.

NAVAL LECTURE

The second lecture of the series on Ship Operating will be given Friday, May 1, at three o'clock in room 5-226. Mr. E. E. Parvin, secretary of the International Mercantile Marine, will speak on "Freight, Traffic, and Passenger Depts." Everybody is invited.

TECHNOLOGY DAMES

The Technology Dames cordially invite the Technology Matrons to attend their next meeting Monday in the Emma Rogers Room at 2. Speaker will be Professor W. S. Franklin. A business meeting for the Dames will begin at 2.30.

M. I. T. A. A.

Annual Insignia Award Dinner Wednesday, May 13, at 6.30, in north hall, Walker. Get tickets from A. A. Office or any manager. \$1.50 per plate.

TECHNIQUE RUSH PICTURES
Orders will be taken for Technique Rush pictures by Keystone at Technique Office any night after 5.

AERONAUTICAL

Nominations for president, vice president, secretary, treasurer, and Combined Professional Societies representative of the Aeronautical Engineering Society should be turned in to the Information Office before Wednesday, May 6. Forms should be made out in manner specified in T. C. A. handbook.

T. C. A. EMPLOYMENT

The Bureau can place a man as cashier, hours 12 to 2.30 P. M., and 6 to 8 P. M.; also a man as waiter, hours 6 to 9 P. M., in hotels. Work will last all summer. Quick action is necessary. Reply at once at T. C. A. Office.

TECHNIQUE

Any men wishing to secure copies of Technique can do so this week. Remaining copies of the Year Book will be disposed of in the main lobby from 12 to 2 each day this week. Next week it will be necessary to procure the books at the Technique office in Walker Memorial.

SOCIETY OF AUTOMOTIVE ENGINEERS

W. C. Thee, G. will read his paper on "Detonations" in room 10-250 this afternoon at 3 o'clock.

R. O. T. C. TRIP

Engineer and Coast Artillery R. O. T. C. students wishing to visit Hog Island, Boston Harbor, to inspect the new fort tomorrow, sign up for the trip with Lieutenant Levy. Seniors, Juniors, and Sophomores invited. Boat will leave Army Base at 1.30 P. M.

BEAVER BASEBALL

Meeting of Beaver baseball team and managers in Hangar gym at 5 o'clock this afternoon.

S. A. M. E.

The Society of American Military Engineers will have its last smoker of the term next Thursday, at 7.30 in the north hall of Walker. Two speakers have been secured for the evening. All men interested in the Engineer Unit are invited.

CLASS CREWS

More Seniors and Juniors are needed at once to fill their class boats. Report at boat-house immediately.
