

Tech Show Ticket Sale Plans Being Drawn Up

A. A. MAY RECEIVE \$1000 MORE THAN AMOUNT EXPECTED

Reports From Cities on the Route Show Favorable Ticket Sales

PITTSBURGH ALUMNI HELP

Plans for the ticket sales campaign for Tech Show 1926 are now being drawn up and the committee in charge has been announced. On the first of March the campaign will begin, and if the efforts of the two organizations combined increase the first night sale of tickets to \$6,000 at the Boston performance the Athletic Association will receive \$1,000 more than the minimum budget of \$2,000. This was the amount promised under the merger agreement provided that the other two performances are as large as last year.

H. E. H. Knight '26 and Morgan Collins '27 have complete charge of the distribution of tickets. Members of the committee are Henry Janes '27, H. K. Friedlander '27, and D. K. Miller '27. Fifty Sophomores from the Athletic Association will work with this committee.

Tickets Selling Well

From reports received from the cities in which Tech Show will perform this year, ticket sales are progressing favorably. Pittsburgh in particular through Technology Alumni residing there, has shown a great deal of interest in the coming event, in spite of the fact that there are only three students here at the present time whose homes are in that city.

By the action of the Interfraternity Conference special ticket sales will be arranged in Pittsburgh for the benefit of students at Carnegie Institute of Technology. Arrangements will be made through the fraternities which have chapters at both Technology and Carnegie.

Special Article

In this way the Tech Show performance at Pittsburgh will have the purpose of bringing the name and reputation of the Institute before the people of that city. The fact that there are only three students from such a metropolitan area of a million and a half inhabitants has been commented on, especially since there is a group of 150 organized Alumni.

Because of this it is likely that a special article will be written for the Tech Show program. This will probably explain the advantages and possibilities that are available in science and engineering at the Institute. It will attempt to dispel the popular illusion that an engineering education is specialized and its field of application limited, by citing examples where Alumni of M. I. T. have achieved fame in non-technical fields.

Are You Going?

Tonight

TECHNOLOGY BOAT CLUB DANCE, North Hall, Walker, formal, from 9 until 1 o'clock. Tickets at \$3.00 a couple on sale in main lobby from 12-2 o'clock and at door.

Tomorrow

BASKETBALL, M. I. T. vs RHODE ISLAND STATE, in hangar gym at 8 o'clock. Tickets on sale in main lobby tomorrow. Fifty cents for seat in reserved section and admits to dance. \$1.00 for a couple. Registration card all that is necessary for unreserved section, but fifty cent charge for dancing.

Tuesday, January 19

MUSICAL CLUBS POP CONCERT, in main hall Walker in connection with Phantom Dinner broadcast, beginning at 7:30 o'clock. Tickets, including refreshments, fifty cents and can be obtained from any member of clubs. Affair stag and informal.

Endowment Committee Investigates Plans

Plans and specimen policies were presented to the Senior Endowment Fund Committee at their meeting Wednesday by Mr. H. M. Howes and Mr. M. F. Jones '94 of the Equitable Life Assurance Company.

Today at 5 o'clock in room 10-275 the Endowment Committee will meet Mr. Woodhouse of the Aetna Life Insurance Company who will describe the plan offered by his firm. On Monday the Committee will meet Mr. H. H. Kay of the Metropolitan Life Insurance Company and other representatives of insurance companies will have an opportunity to present their plans before the final decision is presented to the Senior Class.

MUSICAL CLUBS AT LEXINGTON TONIGHT

Make First 1926 Appearance Before Technology Alumni Club

Making its first 1926 appearance, the Combined Musical Clubs will give a concert at the club house of the Old Belfry Club of Lexington tonight. This club, an organization of Technology Alumni, sponsored a similar concert a year ago.

In addition to the selections that will be rendered by the Banjo, Mandolin, and Glee clubs, several numbers will be given by the quartette from the Glee Club, and Raymond Mancha '26 and Floyd Hall '28 are scheduled to present original improvisations as a banjo specialty.

Three busses will provide the means of conveyance for the men who are to perform. One will return immediately after the performance to accommodate those members who are unable to stay for the dancing which will follow the program, the other two leaving at midnight.

FRATERNITY COUNCIL SUPPORTS SWIMMING

In keeping with resolutions which were made at a previous meeting of the Interfraternity Council to boost activities at the Institute, tickets were distributed at the last Council meeting for the Amherst Swimming meet which will be held in the Cambridge Y. M. C. A., Saturday night.

At the Council meeting Wednesday evening A. W. French, Jr. '26 was empowered by the Council to appoint a committee to arrange the Interfraternity basketball tournament which will be played off next term. One house suggested a handball tournament but it was dropped because of lack of support. It was decided that another Interfraternity Tea Dance would be held. The date February 20th was selected for the affair, but no further arrangements were proposed at the time.

PROFESSOR BOWLES TO SPEAK ON RADIO

Second Popular Science Talk In Room 10-250 Today

Professor E. L. Bowles of the Electrical Engineering Department, will give the first of his three lectures on "Recent Developments in Radio," this afternoon in 10-250 at 4 o'clock. The second will be given tomorrow at 2:30 o'clock and the third, Sunday at 4 o'clock.

Tickets for the talks can be secured from the information office. Today's and tomorrow's addresses have been planned essentially for high school students while Sunday's discussion is intended for the general public. This is the second of the series of four Popular Science lectures to be held this year.

In portraying recent developments, the speaker will illustrate the processes used in radio control. A portable loop transmitter has been prepared sending out two waves, one for selection and one for operation. The receiving apparatus, with relays, is equipped to stop and start motors, lights, bells, trains, and to propel Felix, the radio cat.

PHANTOM DINNER AND POP CONCERT TUESDAY EVENING

Entertainment Lasts From 7:30
Until 12 O'Clock With
Many Features

RADIO PLANS COMPLETED

Seven Nationally Prominent Men Will Speak From Four Main Cities

Beginning at 7:30 o'clock and lasting until 12, the combined Pop Concert and reception of the Phantom Dinner broadcast will be held in Walker Memorial Tuesday evening, January 19. Admission tickets for the whole program are fifty cents each.

The Pop Concert will consist of practically the same program as was presented at the Christmas Concert. The Banjo Club Glee Club, Mandolin Club, and the Technicians will each contribute to the entertainment. In addition there will be a feature number called "Time Flies," by Louis J. O'Malley, magician.

Later in the evening, as part of the All-Technology Radio Dinner, the Glee Club will sing two numbers and there will be a specialty act from Tech Show. Whiting, of the Show, will sing "Olden Days," the Chorus will render "Rho, Alpha, Rho," and the Tech Show fifteen piece orchestra will play.

Plans have been completed for the National Technology Phantom Dinner, which starts at 9:30 the same evening, Eastern Standard Time. At present 61 Alumni dinners are scheduled to be held on that date in as many cities throughout the United States, and one in Havana, Cuba.

The Phantom Dinner program will consist of talks by nationally prominent men, and music by well known orchestras and artists. L. D. Gardner '98, chairman of the Radio Dinner Committee; David Saroff, vice-president and general manager of the Radio Corporation of America, and Thomas C. Desmond '09, president of the New York Technology Club will speak from New York. James G. Harbord, president of the Radio Corporation of America, and Charles G. Dawes, vice-president of the United States will speak from Washington, with Rochester and Boston being represented by George Eastman and Dr. Samuel W. Stratton, respectively.

Several musical features have been arranged including numbers by the Victor Salon Orchestra, Paul Specht and his Moulin Rouge Orchestra, and the Hotel Brunswick Dance Orchestra. In addition there will be selections by Godfrey Ludlow, Australian violinist of WBZ and a song by Miss Lucy Marsh of the Victor Company.

HOCKEY TEAM SPRINGS SURPRISE ON TERRIERS

Conquest of Strong B. U. Team By Score Of 2 to 1 Secures Revenge For Earlier Defeat

Playing the fastest and hardest hockey that a Technology hockey team has shown in the last two years, the Engineers tore away a 2-1 victory from a snarling, scrapping pack of Boston University Terriers Wednesday night. It was by far the most exciting college game that has been played at the Arena this season, and was replete with thrills from start to finish.

Entering the contest as heavy favorites as a result of their recent 5-1 victory over the Cambridge sextet, the Terriers were literally rushed off their feet in the opening session. Only some very clever work by Viano and Ling on the defense prevented Berkeley and Randall from scoring at this time.

Many Penalties Imposed

When the in-town team recovered from their surprise, the war began in earnest. Kontoff, who was substituting for Gregorie, the star of the Boston outfit, was speedily taken out, in order that the strongest team possible might be put on the ice. From this point on, Berkeley and Gregorie became the pivots about which, each team centered its attack.

Play became fierce, and penalties rather frequent as the rivals became warmed up. All team work was practically useless as both squads employed excessive body checking. Scott who played the hardest on either team in the first encounter, was well matched by his teammates Gregorie, and Lawless as well as his opponents Crandall, Randall and Berkeley. As

(Continued from Page 3)

BOAT CLUB DANCE WILL BE TONIGHT

Copley Plaza Orchestra Will Supply Music For Club's First Formal Hop

The Technology Boat Club will open its season tonight with a formal dance to be held in the North Hall of Walker Memorial from 9 until 1 o'clock. Music will be furnished by the Copley Plaza Orchestra under the direction of W. Edward Boyle.

This dance is the first one to be given by the Boat Club and the management of the Club predicts from the demand which is being made for the few available tickets, that the dance will be a distinct success. To correct the impression that this dance is only for those who are out for the crew, the club wishes to extend a welcome to anyone desiring to go. Tickets will be sold at the door and also from 12 until 2 o'clock today in the Main Lobby. The subscription is \$3.00 per couple and a few stag tickets at \$2.00 each will be sold.

Patronesses for the dance will be Mrs. William Haines, Mrs. Daniel C. Sayre, and Mrs. H. P. McCarthy. The committee in charge is made up of the following men: J. F. Collins '27, R. G. Kales '27, J. A. Drain, Jr. '26, L. S. Tappan '28, M. M. Greer '26, and D. S. King '26.

North Hall will be decorated for the occasion with oars and a shell and the committee hopes that the affair will serve to stimulate more undergraduate enthusiasm for rowing.

Views On Tech Show--A. A. Union

When the Tech Show was started there were two definite purposes in mind. The first was frankly to raise money for the well-nigh bankrupt athletics activities. The second purpose and one that had in it no small measure of prescience was to provide for the student body a recreational outlet and give to the participants contact of a social character outside of the class room.

In the course of the years the first of these primary purposes became less and less in evidence, while the second has grown steadily in significance and importance. It is true today that many other avenues have opened up for student activities but the Show still holds its own place as one of the important general undergraduate activities. With a recognition of the financial status of the athletics—a particularly acute condition this year owing to shrinkage in the student body and hence in the undergraduate dues—the Show has resumed its interest in and cooperation with this sister student interest.

As a result of conference, the Show is prepared to allocate a very appreciable percentage of its profits—if profits there be—to the current support of the several athletic teams. I would urge that those interested in athletics do all in their power to support the Show as well as the activity of their primary interest, as by so doing they will aid not one but two of the most important student enterprises.

As one primarily concerned with the athletics I feel it a privilege to express our very sincere and genuine appreciation of the generous attitude shown by the Show management and its Advisory Council.

(Signed)

A. W. ROWE '01

Anything that will make Technology undergraduates support their own Show is undoubtedly good. We have become used to thinking of the Tech Show as an absolutely separate institution, but we must not forget that some of its most successful and popular years in the past were given up to the support of Technology athletics. Certainly there is nothing which better deserves undergraduate support, and increase than our economical athletic budget. If this voluntary cooperation of the Show and Athletic Association succeeds it ought to do two things: obtain badly needed money for both and revive undergraduate interest in Tech Show. Let us hope that their object will be accomplished.

(Signed)

PROFESSOR R. E. ROGERS

A Record of Continuous News Service for 44 Years

Official News Organ of the Undergraduates of Technology

Concurring with Professor Hamilton in the belief that the placing of the Ford in the basement was one of the cleverest engineering feats that has been performed around the 'Stute in many a long day, the Lounger wishes to congratulate the Dorm Goblin on his engineering ability.

It made the Lounger shiver, wrapped up in a fur coat though he was, to see a couple of ducks swimming about in the open water in the middle of the river near the Harvard Bridge.

Some things seem to have come over the undergraduate public to decrease their hankering after "the cup that cheers" for the Lounger has noticed a marked decrease in the number of empty bottles tossed upon the ice on either side of the bridge.

The Lounger was much amused to learn that all Seniors at Harvard are now permitted to cut as many classes as they please.

BAGASSE TO BE USED IN SYNTHETIC WOOD

The word "waste" has less significance to industry every year, and now bagasse has its turn. But what is bagasse? New Orleans bankers, to their sorrow, know only too well, for they have lost money more than once in attempting to find a use for this waste product of the sugar industry.

Broer Dahberg is the man who comes forward with a solution of the problem. As he says, the timber industry is steadily destroying our forests and a few new trees are taking the place of those which are cut into boards for buildings.

The Celotex Company, which Dahlberg formed when he saw that his experiments were likely to work out favorably, has nearly perfected its process, and today bagasse directly from the sugar mill can be converted into seven-sixteenths inch lumber by a method which takes about three hours and a half.

Mr. Dahlberg, in Forbes Magazine, predicts great possibilities for the new industry.

"There is sufficient bagasse available in the United States and contiguous territory," he says, "to make 10 billion feet of celotex a year and every year. We are making at the present time about one-thirtieth of that amount."

Middlebury has inaugurated a drastic system to regulate absences and tardiness. Only three cuts will be allowed from each course unless on account of illness to which the medical director has been called to give a certificate, or on account of activities for which an excuse has previously been granted.

THE OPEN FORUM

To the Editor:

Let me congratulate you on your article in last Friday's issue on the World Court. There are one or two points in connection with it, however, on which you have not touched, and which I think are rather important.

In the first place, the Permanent Court of International Justice is essentially the same type of court originally conceived by John Hay, the great American Secretary of State, and proposed to the Hague conference by an American commission over a quarter of a century ago.

I do not wish, either to uphold or to condemn the Court. But I do think America ought to realize that it is fundamentally an American idea.

As We Like It

STELLA DALLAS

When "mother love" is advertised as the basis for a literary or dramatic presentation, we half expect a display of hackneyed sentiment and shoddy, mob emotion. In "Stella Dallas" at the Colonial Theatre, however, the excellence of the acting and the careful direction dispel all such expectations.

Belle Bennett as the tawdry Stella Dallas and Alice Joyce as the reserved but human Mrs. Morrison share the honors in the play. Miss Bennett's portrayal of the mother with taste for neither social nor domestic frills is remarkable in that it remains above even a suggestion of burlesque.

As we have said, the directing and technical treatment of the picture is far above the ordinary. No detail was too small to neglect, even the barely perceptible tremor of the moving Pullman car was reproduced.

THAT AUDITORIUM

AS WE have pointed out from time to time in this column, one of Technology's most important needs is a unification of spirit and a more general interest in Institute affairs.

It is little wonder that we tend to be a disorganized whole when we have so few opportunities to realize that we have more in common with our fellow students than a professional interest in the engineering world.

An assembly for Technology will require an auditorium large enough to accommodate the entire student body; and although the facilities are not available at the present time, the need for some sort of formal student gathering should hasten the addition of an auditorium to the Technology community.

The Phantom Banquet is nearing—indications point to a very successful affair but complete success is dependent upon the support of everyone. It is up to the undergraduates to contribute their share of energy toward insuring its nation-wide success.

"My secret for perpetuating youth? Enjoy all vices in moderation," says Dr. Adolf Lorenz, famous Austrian physician. After hearing so noted a health expert say a thing like that, there is great danger that some college men are going to take the remark seriously.

IMMORALITY AND LEADERSHIP

CAMBRIDGE University, England, is faced with a serious situation. J. B. S. Haldane, a professor there, has been named as co-respondent in a divorce case, and the authorities are considering dismissing him for immorality.

Since history began, there have been thousands upon thousands of recorded instances of men of unusual ability who did not consider themselves bound by the laws and conventions of the masses. Such were the Pharaohs of Egypt and the Caesars of Rome; such men were like the Greek Alcibiades; such were Shakespeare and Bacon; and in more recent times, our own Benjamin Franklin or the noted composer Richard Wagner offer examples of men who, though personally guilty of somewhat reprehensible conduct, have done great deeds.

But there is another side to the question. While perhaps personal immorality need not disqualify a man of unusual ability from creative work; while, for instance, Mr. Haldane might as effectively engage in research whether or not he is proved guilty; yet it is quite another thing to permit such a man to teach unformed youth.

Thus the responsibility of a college instructor or professor is a great one; and a college does well to satisfy itself of the character, as well as the ability of its teachers. And hard as it may seem to refuse a position to a man of ability because of his character, the duty of a college to its students eliminates the possibility of following any other course.

ENGINEERS DOWN B. U. HOCKEY TEAM

HOCKEY TEAM DEFEATS B. U. TEAM 2-1 IN HARD FOUGHT BATTLE WEDNESDAY NIGHT

(Continued from Page 1)

has been said before Scott's motto is "If I can't get the puck, I'll get the man." Crandall's motto is slightly different. It goes something like this: "If I can't get my man, I'll get the whole team."

Brooks Scores First

Two periods went by scoreless featured by some wonderful shots and stops from each team. The outstanding defensive play during this time was turned in by Crandall. He was sitting in the penalty box serving a two minute sentence when Berkeley, Randall and Weissner took the disk down the ice. Lawless took the puck from Weissner, and together with the sure shooting Gregorie made for the Engineer goal with Brooks, the only defense man to stop them. However, just as they reached center ice, Crandall's penalty time was up, and vaulting over the boards he raced diagonally across the ice, just in time to smother a quarter ice drive by Greg, who was in perfect position.

In the final period the fireworks commenced with Deke Crandall breaking through the Boston defense to drive one at Silverberg, who deftly turned it aside. For the next few minutes the disk was juggled back and forth in front of the cage by the opposing forwards. Suddenly from the middle of the scrimmage, Sam Brooks, the Engineer defense man, emerged and dribbled one right to the mouth of the net where Silverberg just touched with his skate. The angle that the shot was made at, provided a backspin on the rubber and it spun in around the goalies skate for the first score.

Terriers Become Desperate

Realizing now that they had to score, the Terriers gave everything that they had. They rushed up the ice now two in line, now three. But the Institute defense was firm and Richards at goal was at his best. In the midst of their effort, Otto Weissner and Randall paired up and carried the rolling cylinder down to quarter ice. Here Randy took it by himself and dribbled it to the boards, where he drove one straight into the cage for the second and incidentally the winning score.

With four minutes to play Boston University became desperate and massed their men together for a rush at the Cardinal and Gray goal. Gregorie, Lawless, and Scott, in close formation, carried the puck up the ice where Scott caged a pretty shot for the lone Terrier goal. They came back again, and this time pressed the defense back to the goal, where five men piled up in a heap. In the middle of this turmoil, Richards fell prone in front of the net to prevent any chance of score, while Brooks was impolitely stripped of his pants and forced to retire in favor of Nock.

For the remaining two minutes, the Technology forwards satisfied themselves with taking long shots at the Terrier goal. The latter team did not again threaten until the last moment of play when Gregorie drove a hard one from quarter ice which Richards ably blocked.

SWIMMERS MEET PURPLE TOMORROW

Engineers and Amherst Have Both Won Their Opening Meet of Season

Followers of swimming at the Institute will center their interest in the Cambridge Y. M. C. A. Saturday night when the Engineer natators take on the Amherst mermen in their second meet of the season. All present signs point to a closely contested meet with the balance in favor of the Engineers.

The Amherst swimmers will enter the meet fresh from a victory, even though by a slight margin, over Columbia Tuesday night. The final score was knotted 31 to 31, but the Amherst relay team having won their event, the victory was awarded to the Purple under the present swimming rules. This was the opening meet for Amherst and is an indication that the meet tomorrow night will be hard fought from start to finish.

Conover of Amherst won his race in the 50 yard dash against Columbia in 25.2 seconds. Grover, the Technology dash luminary, was clocked at 25.3 seconds against Boston University last Saturday in the half century and is capable of bettering this if pushed. The logical conclusion is that the 40-yard dash tomorrow night bids well to be a heartbreaker. The length of the Cambridge pool prevents the 50 yard dash from being the short distance event.

Whitey Woods Eligible

Young, another Amherst star, won the 100 yard free style in 1 minute 1 second but Grover bettered this mark early this season and should win this event.

The lineup that the Engineers will present will be the same as the one that beat Boston University last week with the exception of the relay team, which will likely be the first quartet consisting of Brown, Walworth, R. Johnson, and Grover, and in the dives Whitey Woods has been declared eligible and will be entered tomorrow. The reinstatement of Woods has caused rejoicing in the swimming camp as it is almost certain that he will take first place.

FROSH MERMEN TO ENCOUNTER ANDOVER

With the memory of last week's defeat fresh in their minds, the freshman swimmers journey to Andover tomorrow to meet the prep school natators with the idea of wiping out that loss of a week ago. The same team will represent the Institute as last week and they have hopes of avenging the defeat of last year's freshmen at the hands of the Andover swimmers.

BASKETBALL TEAM ENCOUNTERS RHODE ISLAND TOMORROW

Coach McCarthy's Men Greatly Improved—Fast Game Looked For

DANCING FOLLOWS GAME

For the second time this week, Coach McCarthy's Cardinal and Gray quintet will see action, meeting the Rhode Island State aggregation in the Hangar gym, Saturday evening at 8 o'clock.

Coach McCarthy is sure that the team will give as good account of itself as it did last Tuesday night against Harvard. The teamwork of the Technology five was equal to that of Harvard, if not a bit better, and it is only the breaks of the game which gave the Crimson a win. Harvard started the scoring but were soon overtaken toward the middle of the first half by the Technology play, only to forge ahead again to be on the top side of a 17-9 score. In the second half, the Forrester-Hinck scoring combination felt at home and it was not many minutes before the Engineers came within one point of knotting the count. Then the Crimson guns began to function and when the final whistle blew, Harvard was on top with a lead of six points to win by a score of 29-23. In order to win Harvard had to play first class basketball every second. The Technology five was a little less fortunate in locating the basket than Harvard, which forced them to taste defeat.

Coach McCarthy will probably use the same men Saturday that played throughout the game Tuesday. Captain Forrester and Norm Estes will take care of the point getting berths. Estes has improved considerably since the beginning of the season. Biehle will take care of the tip-off position and Ernie Hinck and Frank Myers will watch the opposing forwards. Stevens, Innerasky and Mock probably will be injected into the fray before the final whistle blows.

Dancing will follow the game and will last until midnight. The "Technology Tunesters" have been engaged to furnish the music.

RELAY MEN START SEASON TOMORROW

Practice Meet Against Harvard Will Be First Test of Engineer Strength

Tomorrow afternoon at 2:30 over on the board track at Soldiers Field the 1926 Technology track season blossoms forth in the first meet of the season, when the relay teams clash with the sons of John Harvard. Although this is but a practice meet, the races will not only be every bit as interesting as they would be if it were a regular meet but the contests will furnish the track dopsters with some chance to speculate concerning the winter intercollegiate season on the boards.

Frosh Strength Unknown

It is imperative that every man picked for the relay teams show up tomorrow afternoon at the Harvard track house by 2 o'clock at the latest. The list of men is given elsewhere on this page and Manager Field stated last night that every man whose name is in this list must be on deck.

Although the relay teams are a part of the winter track program, they are an institution by themselves. They are not connected with the track team but are almost set apart from the other events. George Leness who is captain of the varsity track team is also the relay team leader.

The Harvard intercollegiate relay has a pretty list of runners in the 6 lap event. Although the entries for Harvard were not available last night when this issue went to press, in all probability the crimson will place their four distance aces Waters, Haggerty, Tibbetts and Cutcheon.

The women at Willamette University are seeking to discover the Mystery Man, some to give him bouquets and others to get his blood. It appears that whenever a student wants a date he calls the Mystery Man and describes the type of girl he wishes. He is then given a list of those who are likely to suit him. Those who are not on the list of desirables are trying by various methods to stop this system.

At the University of Michigan, law students are required to try two cases a year, one before a judge, the other before a jury composed of freshmen.

Track Lineups

Varsity

1-lap—K. E. Smith, J. S. Wiebe, C. E. Tonry, H. G. Steinbrenner, A. S. Heyser.

'93 WINS OVER HOLMAN QUINTET

Closely Fought, Although The Final Score Is 26-17

Before a small crowd consisting mainly of Dorm students the Holman basketball team went down to defeat at the hands of the '93 hoopsters by the score of 26-17.

Play by both sides was close, even more close than the final score indicates. Coach Norm Estes' Holman aggregation obtained the lead in the first quarter but lost it when '93 started a rally. When the storm was over '93 was on top by the score of 13-4. In the second half, Holman had a slight advantage over her opponents, outscoring them 10-7 to bring the score to 20-14. In the final period '93 again went on a rampage and finished the game with a nine point advantage over the Holmanites.

The feature of the game was the close checking of both sides. For the winners the shooting of Hope was the individual feature of the game. Hope aided his cause considerably, inserting no less than six baskets from the floor. Weinberg, also of the winners ran a close second for individual honors, counting three times from the floor. Bill Latham also played a nice floor game aside from scoring two floor goals. For the losers the all around playing of Cohen, Dahl and Gannon featured.

At the close of the game Captain McFarland of the winning team was presented a shield by Professor Hamilton, emblematic of Dormitory basketball supremacy.

CHEMICAL SOCIETY HEARS ALUMNUS

Bradley Dewey '09 Advises Men "To Cater To And Flatter Your Employer"

Professor J. W. M. Bunker of the Department of Biology and Bradley Dewey '09, president of the Dewey and Almy Chemical Company were the speakers at the last Chemical Society meeting of the term Wednesday night in North Hall, Walker. Following the addresses two films on "Pottery" and "The World of Paper" were exhibited.

Mr. Dewey gave a dissertation on "Your viewpoint toward your job and your employer's viewpoint toward you." He stated that the executives are always complaining of the lack of men who can find the problems, while there are a great number who can solve them. "The engineers must keep up with the new ideas of the day in order to advance. Start making an acquaintanceship among older men and cultivate friendship; it will be very handy in your later life when financial aid and advice will be necessary."

The following advice was also offered the men as to their future relation with the employer, "Study your boss, cater to his idiosyncrasies, observe him, cultivate and flatter him, reason out your cases before you come to him as he is usually grouchy because of the others who asked foolish questions before you, and above all go further and do better work than that outlined by your boss—he will like it." To the future executives Mr. Dewey advised the following, "Be fair and have a point of view of a judge, take time to reason out to your employee why he is wrong or otherwise and be firm but not unreasonable."

Professor Bunker told the Chemicals about the details on the beef serum that he has recently discovered. He gave the story of how the fibrin is extracted from the blood of a beef animal and finally after several treatments converted into a serum which has the properties of egg white.

OPEN HOUSE NIGHT TO HAVE NO GUIDES

At a meeting of the Combined Professional Societies last night, at which Stuart John '26 presided, preliminary plans for the annual Open House Night were broached, and a plan for financing the organization was presented.

The society plans to abolish guides this year, because of the difficulty in keeping parties intact. Instead, the guests will be furnished with printed directions and then allowed to browse about at will thus allowing them to spend as much time as they like at each exhibit. Many information booths will be scattered throughout the main buildings for the convenience of visitors. Several routes will be outlined which the guests may follow if they so desire.

The seven recommendations of last year's committee were read, the most outstanding of these being the abolition of guides, the requirement that the entire faculty be on duty, and the assurance of a display by the Chemical Welfare Service.

BROWN WILL TALK ON WORLD FLIGHT

Director of Project to Discuss Accomplishments of Extensive Trip

Lieutenant Robert Brown, commander of the Boston Air Port, will deliver an address on the Round the World Flight next Monday in 10-250, from 3 to 5 o'clock. The program has been arranged by the Technology Dames, under the direction of Mrs. MacShort and Mrs. L. C. White.

There are several newly released reels which Lieutenant Brown will use to illustrate his talk. At the time of the flight in 1924, the speaker was in the office of the Chief of Air Service and had charge of directing and arranging for the entire project.

Lieutenant Brown was one of the 145 first line cadets in the Air Service during the war. After having received his flying training at Wright Field, Dayton, Ohio, in 1917, he was put in charge of the night flying school at Ellington Field, Texas. This was the first night flying field in the country and was managed very successfully. After the war he was transferred to the Operations Office of the Chief of Air Service, where he remained until he was moved to the Boston Air Port. The speaker delivered a short lecture about a year ago.

WRESTLERS MEET TUFTS VARSITY AND HARVARD '29

Dope Gives Varsity The Edge Over the Strong Men From Tufts

HARVARD IS UNKNOWN

Technology Yearlings to Have Good Team Except in Unlimited Class

Both Varsity and freshman wrestling teams have meets tomorrow in the hangar gym. The frosh take on the Harvard yearlings at three o'clock, while the Varsity meets Tufts at seven o'clock. The Varsity meet will be followed by the basketball game with Rhode Island State, and at the conclusion of that there will be dancing until 12. The program is expected to be a success as similar affairs were very well attended last year.

The Varsity wrestling team has good prospects of winning. It made a better showing against Northeastern than Tufts did. The team will have two changes. Adler will wrestle in the 175-pound class, and either Staebner or Carder will be in the unlimited class. The two latter men will have an elimination bout this afternoon. The Varsity will have a meeting today to elect a captain.

Concerning the freshmen, it is impossible to predict who will win, as the prospects of the Harvard freshmen are not known. However, Tech can be expected to put up a good fight with men like DerMarderosian, Burke, and Glen to rely on. Burke was elected captain of the frosh yesterday after defeating Ramsey in an elimination bout. Ramsey, who won his match by a fall against Northeastern, made a great fight, coming within four seconds of beating Burke, but lost after four overtime periods.

A weakness on the freshman team which may lose the match tomorrow is the lack of heavy men. At present there are no men out for the unlimited class; so the bout in that class will probably have to go to Harvard by default. Heavy freshmen are greatly in demand for the wrestling team.

The Lineups:

VARSITY

115 lbs. Cullen; 125 lbs. Johnson; 135 lbs. Rabinovitz; 145 lbs. Harris; 158 lbs. Franks; 175 lbs. Adler; Unlimited, Staebner or Carder.

FRESHMAN

115 lbs. Ross; 125 lbs. Dickenson; 135 lbs. DerMarderosian; 145 lbs. Burke; 158 lbs. Glen; 175 lbs. Giardino.

ADVICE ON COURSES OFFERED AT LECTURE

"It really doesn't make any difference what course you take, so long as you go through the one that you take, in good shape," said Professor C. L. Norton '93, yesterday at the freshman lecture, during his discussion of the choosing of a course.

Professor Norton stated that graduates of Technology are head and shoulders above men graduating from similar courses at other colleges. The different scientific courses at the Institute and the gist of their general subject matter and the opportunities open to graduates from the courses was explained by the speaker.

The idea was brought out that the training at Technology was not alone to give the necessary fundamentals of the subject, but to so train the men that they could successfully occupy executive positions.

REPORT SHOWS MANY T. C. A. PLEDGES DUE

According to the report of the treasurer of the T. C. A. submitted at a meeting of the cabinet held Monday, the total cash received in the T. C. A. drive is \$2269.40. In addition, there are a total of \$425.50 worth of pledges that have not been received up to the present time. This makes the total subscription of the drive \$2694.90.

Of the \$425.50 due on pledges, \$239.50 is due from fraternities, \$41.00 from dormitories, and \$145.00 from general list pledges. Although the report admits that some of these pledges have been paid to agents who have not reported them, the size of pledges due is large, and all students holding pledges are urged to pay them at once.

Up to the present time, a little over 60 per cent of the pledges issued during the drive have been paid. The director of the employment bureau submitted his report at the same time, and it showed, exclusive of vacation jobs, a total of 12 temporary filled jobs, 10 permanent jobs, filled and 42 permanent jobs held over, during the month of December. These jobs netted \$1988.50 for 23 men.

CROSS COUNTRY MEN CHOOSE NEW LEADER

At a recent meeting of the letter men of this fall's Cross Country team Harold W. Akerley '27 of Somerville was elected Captain for the 1926 season. Akerley was one of the mainstays of this fall's team. He was the second Tech harrier to finish in the Brown, N. E. I. C. A. A. and I. C. A. A. A. meets, and the fourth in the New Hampshire and Harvard meets. Next fall he is expected to be one of the best men out. The prospects of a strong team for next fall are good, with Chute, Rick and Akerley back on the job along with this year's Championship Frosh team.
