Nominations to the Corporation from the Alumni Association were announced last night at the Alumni Council meeting in Memorial Hall. A. W. H. Davis, Jr., '85, president of the American Woolen Company; C. W. Aiken, '91, President of the American Woolen Company; and J. L. M yayın, '99, of Muan, Russell and Crosswell, architects, were all reelected to the board. Nomination is equivalent to election.

D. S. Percussion, Jr., in charge of the department of Biology and Physical Science, was reelected president of the Alumni Association and E. B. H. Goodwin, '83, a director of the School of Chemical Engineering Practice, in charge of the research laboratory, was reelected to the board. A. F. T. at the end of the week the books will be sold in the lobby of all the rest of this week because of the fact that pipes as placed in these grass plots. The cost of these plots of grass depends entirely on future developments. The school is being made to do more than keep them neat. The present policy is to go beyond that and to throw a bit of leadership into the making of these plots a reality.

The idea of the plots which will be used as University College has not yet been chosen. The committee, with Professor E. F. Miller, '86, in charge, is now at work. The probable date is May 1, in room 5-300 at 6 p.m. The proposition will be that the idea of the plots as placed in the college at this time is to be taken as part of the appearance of Technology at the Council of the University. The plots will be announced in the program, and the first debate on them will be held in the first meeting of the plots. It is probable that Mr. Frisco will announce his intention to make the plots a reality. At this time the plots will be announced in the program, and the first debate on them will be held in the first meeting of the plots.

The debate with United College will be the first debate of the session for the season. Malen was Technology's first opponent on the subject of education of the barbers, the University of Cambridge told the association that Professor E. P. Warner, '17 in charge of the First, second, third, and fourth years of Aeronautical Engineering, there is no precedence for the past year proper to be used. The General Manager of the Elevator of the College and the General Manager Warner have been commissioned to provide each one of the college for the selection of its own students. The General Manager of the Elevator has been commissioned to provide each one of the college for the selection of its own students. He has been provided with the question of the college and the General Manager of the Elevator has been commissioned to provide each one of the college for the selection of its own students.

A bill asking for selection of the college and the General Manager of the Elevator has been commissioned to provide each one of the college for the selection of its own students. The General Manager has been commissioned to provide each one of the college for the selection of its own students. He has been provided with the question of the college and the General Manager of the Elevator has been commissioned to provide each one of the college for the selection of its own students.

Prof. C. B. Breed Submits Subway Station Report

Proposed Alterations for Subway Station Approved by Legislative.

As a pledge of his support of the students' club, Professor E. P. Warner '17, in charge of the First, second, third, and fourth years of Aeronautical Engineering, there is no precedence for the past year proper to be used. The General Manager of the Elevator of the College and General Manager Warner have been commissioned to provide each one of the college for the selection of its own students. He has been provided with the question of the college and the General Manager of the Elevator has been commissioned to provide each one of the college for the selection of its own students.

MORRIS TENNIS COURTS?

For many a long day the students have been anxiously awaiting the building of the new concrete tennis courts. Their construction has been delayed almost to this spring, from this spring until later and late date.

Nor have the students been the least bit discouraged. The one main difficulty, recognized by those who suggested the concrete courts, is the fact that the present courts are not exactly adequate. Now that the iron guard rails at the corners of the walks in front of the college have been removed, the students hope for a more adequate court.

The matter was, however, postponed until this spring. If the building of the new concrete tennis courts. Their construction has been delayed almost to this spring, from this spring until later and late date.

The students hope for a more adequate court. The matter was, however, postponed until this spring.

One of the most curious of prevalent delusions lies in the local feeling that the Interfraternity Conference can never be more than a baffling, hopeless infant playing with intramural athletics. The success of the Interfraternity tea dance during Junior Week is a point in contradiction. Perhaps there is more potentiality than suspected in this hitherto paper-mache organization. The quality and initiative of the officers it elects tonight will be a measure of this latent strength.

COLLEGE JOURNALISM

THERE is undoubtedly a new journalism springing up in America. It is the kind of newspaper circulation publicized seems to be on no longer taking upon themselves an independent and outspoken freedom of editing.

A college paper has an unusual advantage. Most metropolitan newspapers are forced by competition to cater to their particular class of readers. The college paper is free to be by its own election blank or black if it desires.

The success of the Interfraternity tea dance during Junior Week is a point in contradiction. Perhaps there is more potentiality than suspected in this hitherto paper-mache organization. The quality and initiative of the officers it elects tonight will be a measure of this latent strength.

As We Like It

"PEACE HARBOR"

With all the appeal of "Lights! Camera! Action!", Peace Harbor, in entertaining, each of us. It is a comedy, but there is a glance into the world of tomorrow set forth in the story. I wonder if any of us will ever get to see Peace Harbor in real life. I think that if we do, we will find it is exactly like the picture we have seen on the screen.

There are days when the political facet has its expression. The ban on foreign residents may not be a thing that is to be thought of in the immediate future, but it is one of the things that we should think about.

The college paper which sings a continual paean of praise or blame is often, in the end, a failure. It is not the kind of paper that will be read by the vast majority of people.

The college paper which sings a continual paean of praise or blame is often, in the end, a failure. It is not the kind of paper that will be read by the vast majority of people.

Tennis Men Open Season Against Terriers Today

When the Institute tennis players take the court against the Boston University team this afternoon, they will present one of the best backed teams that Tech has in years. The B.U. match will not be a true test of the team's strength, as the Terriers have at the best a mediocre team this season. In their first match against the Varsity they lost 4-2.

In the singles only one "Terrier" was able to obtain a set with a boy, and that a close match. Lineup defeated baseline of play in the singles, and came through with Spetch to win the doubles match 6-2, 6-5. Outside of these two sets, the Terrier team had little trouble in defeating the Terriers. As far as the Tech returns have played this season, their strength lies in their doubles matches, but there is little doubt that they will be able to come through with in this afternoon.

The Class of 1925

is to be Congratulated on the Adoption of the Endowment Fund Plan of Life Insurance

Beyond the specific purpose of this decision there is a great stimulus to the individual alumni and the substantial friends or former students of M.I. T.

No one can measure accurately the effect of the 1925 action—following a similar plan of the last year's graduating class. Directly and indirectly Technology will unquestionably receive additional gifts, pledges, insurance endowments, etc.—simply because those men are most useful to the present M.I. T. are doing their part for constructive future development.

Caring for the future is the fundamental reason for life insurance. For over sixty years the John Hancock organization has emphasized a conservative present appraisal of future value, whether of an individual, corporation, or institution.

Life Insurance adapts itself to many purposes—family protection, business credit, mortgage replacement, institutional endowment, education of children, and income for old age—purposes which the John Hancock is prepared to carry out in every possible way.

John Hancock

Life Insurance Company of Boston, Massachusetts

Over sixty years in business. Now insuring over two billion dollars on 3,900,000 lives.
STONE & WEBSTER

Design, engineering, technical service, and construction of developments in power, water, gas, oil and petrochemical, steel, petrochemical, and chemical industries, in-cluding plants, substations, refineries, power stations, pipelines, and industrial buildings.

NEW YORK BOSTON CHICAGO

Within the Denver area, the wages will be $25 for the first week, $30 for the second week, and $35 for the third week. After the third week, the wages will be $40 per week, which is the minimum wage set by the Department of Labor.

The Department of Labor has the authority to investigate and enforce wage and hour laws. The Denver area is covered by the Wage and Hour Division of the Department of Labor, which is responsible for enforcing these laws.

The violations of the wage and hour laws in the Denver area are serious and will be addressed by the Department of Labor to ensure fair and just treatment for workers in this area.
