FINANCIAL STATUS OF ACTIVITIES SET FORTH IN REPORT
All But Three of Self-Supporting Activities Announced

Have Handed $135,437.24
Recommend That Activities Plan Budgets of Expenditures And Follow Them

Only three of the self-supporting activities are not due to receive a deficit during the next year, according to the report submitted by the Finance Committee at the final meeting of the 1925-1926 planning season. The report includes a review of the financial status of the major activities and the professional societies, and sets limits for the coming year's accomplishments based upon these facts.

N. M. Voo Doo, Music Club, Technology, and The Hinkle are the only the three that are able to raise sufficient funds to carry over their activities during the next year.

In the case of the N. M. Voo Doo, the deficit of the undergraduate dues, while the T. C. A. covers its income principally from the undergraduate dues of November of each year, for which reason the deficit was carried forward from the undergraduate dues of November of each year. For this reason, it is possible to keep the undergraduate activities in continuous operation without a deficit, according to the report submitted by the undergraduate finance committee for the current year. The total amount of money handled by the undergraduate finance committee for the current year was $9,387.67, according to their income from membership dues.

Activities Loss Prospers
The Finance Committee has found the current trend of prosperity for the self-supporting activities to be very encouraging during the past year, and it ascribes to several causes. Among the major causes of student interest in the activities, delay and length of period and the conditions of management, and unfavorable conditions of the economic depression of the last year. While there may be a few of these activities, it is still that the situation is not too bad. The financial statements of the activities for the current year are as follows:

- T. C. A.: $15,000.00
- Music Club: $10,000.00
- Technology: $7,000.00
- The Hinkle: $5,000.00

The other students as well as members of the Finance Committee are in agreement that the activities are doing well and that they are being conducted in a careful manner. The members of the Finance Committee are very impressed with the success of the activities during the current year.

Suggestion Committee Changes
Among the changes in the Finance Committee was the suggestion to increase the number of members of the committee from three to six. This will make it possible for the committee to devote more time to the management of the activities. The members of the Finance Committee will work to increase the amount of money handled by the committee in the coming year.

RELIGION IN INDUSTRY IS FEATURE SUBJECT
May T. E. N. Today, Included Many Other Articles

One of the featured articles in the May T. E. N. section of the News is the article on Religion in Industry. The article discusses the importance of religion in the workplace and its impact on the lives of workers.

SCHOLARSHIP AWARDED TO INSTITUTE STUDENT
J. R. Rainey, a student in the architectural course at the Institute, has been awarded a scholarship. Rainey will receive a bachelor of arts degree from the College of William and Mary in May.

Bonfords and B. C. Tied for First Honors in N. E. Meet

In conjunction with one of the most successful seasons of rowing at Technology in years, the Institute Graduation annual banquet in the Riverside Court Hotel was attended by a large number of students. During the Institute's history, this season has been the most successful season in terms of rowing success, presentation of awards, and from the point of view of the student drive for the self-supporting activities at Technology, succeeded in winning the annual award.

The Institute's success was attributed to the efforts of the self-supporting activities, and the professional societies, and sets limits for the coming year's accomplishments based upon these facts. The junior and senior classes were the main features of the evening. Throughout the dinner speeches, there were many interesting stories told by the Tunesters. Following the speeches, the chairs were cleared to make room for the entertainment. In the case of the activities, a light and lively entertainment was provided for the guests.

Professor Jackson Tells of Plans For Change in Method of Teaching Course VI

"Not until at least fifty percent of the students in a class have曲线 plotted, is there any way of determining how important the course is for the class," stated Professor D. C. Jackson, in his talk on the change in the method of teaching the Technology course VI. Professor Jackson stated that his idea of teaching is to make it possible for the students to gain a thorough understanding of the subject matter. He believes that the students should be able to work on their own, and not have to rely on the professor to give them the answers. Professor Jackson stated that his idea of teaching is to make it possible for the students to gain a thorough understanding of the subject matter.

Book Reviews

"From and Poetry," writer, and editor, and a gift of the Municipal Art and Letters of Socrates University.

This book is interesting in that it suggests an emotional and philosophical approach to the study of the human mind. It may be accomplished by college students, but it is not designed for the general reader.

Half a dozen short stories occupy the first half of the book. Two or three of these are quite good and all of them in a consistent style. The poems, on the other hand, are more varied in form and content.

Of course, judgment of such a book is difficult because the reader cannot expect to find in it a single, continuous work. The poems are presented in a logical order and the whole is printed in a clean and unpretentious format. But while there are some notable exceptions, the book is generally well written and the poems are of considerable merit.

The book is being distributed through the usual channels and it is not restricted to students. Since it is a work of fiction, it will be read with amusement by all who enjoy the genre.

"The Dark Side" by John Wyndham is a short story that deals with the idea of a world in which individuals are not allowed to live. The story is set in a high society and the main character is an aspiring young student.

Several stories appear in the second half of the book. They are more varied in style and content and some of them are quite good. In general, the book is well written and worth reading.

The book is available at most bookstores and it is not restricted to students. Since it is a work of fiction, it will be read with amusement by all who enjoy the genre.

FURNACE FUSES METAL WITH WIRELESS HEAT

Reports from England that the wireless furnace was to be adopted by the steel industry, is not new. The method, which has been called "wireless heating," has been known for a long time. It is essentially a method of heating metal by means of electromagnetic waves. The waves are generated by a generator and directed at the metal, causing it to heat up.

The advantage of this method is that it is very fast and efficient. It can be used to heat metal to very high temperatures, which makes it ideal for certain types of metalworking. The method is also very clean, as there is no smoke or fumes produced.

However, the main disadvantage of the method is that it is relatively expensive. It is also not suitable for all types of metal working. For example, it is not suitable for heating large pieces of metal.

In conclusion, the wireless furnace is a valuable addition to the metalworking industry. It is fast, efficient, and clean, but it is not suitable for all types of metal working.

ORDER YOUR SEAT EARLY

"Hello Man!"

Don't forget my Whig's. Bring your own calls, and call on others.

Use it yourself when work drugs. Take a pick-me-up.
The meet began rather tentatively, but as time went on, the runners seemed to develop a competitive spirit.

In the match that just bristled with excitement, the B. C. Eight defeated the Head (T) Eight by 4 lengths.

The Tech men seemed to be putting in a good performance, and were on the lookout for the Freshman crew. However, the Sophomore and Senior shells were also in the running, and were giving a good account of themselves.

The frosh crew, in particular, were putting in a good showing, and were keeping pace with the upper class crews. The Sophomores and Seniors, on the other hand, were a bit further behind, but were not to be taken lightly.

The meeting was held on the Charles River, and was attended by a large crowd. The weather was perfect for a boat race, and the water was calm and clear.

The Tech men were confident of their chances, and were looking forward to a good performance. The Freshman crew, in particular, were putting in a lot of practice, and were looking forward to the race with great excitement.

The B. C. Eight was in the lead, and was holding a comfortable margin over the Tech crew. The Sophomore crew was in third place, with the Senior crew in fourth.

The race finished with the Tech crew in the lead, with the Sophomore crew in second, the Senior crew in third, and the B. C. Eight in fourth.

The Tech crew was pleased with their performance, and felt that they had put in a good effort. The Sophomore crew was happy with their second place finish, and the Senior crew was pleased with their third place finish.

The B. C. Eight was content with their fourth place finish, and felt that they had given a good account of themselves.

The Tech crew, with their victory, had reclaimed the lead in the race against the Sophomore and Senior crews. They had put in a good performance, and were looking forward to the next race with great anticipation.
TECH TENNIS TEAM
WINS AT MEDFORD

Broadhurst and Hinck Lose in 4-Hard Three-Set Matches To Tufts Men

Playing somewhat erratic tennis on Friday, the Varisty tennis team was only able to defeat Tufts on the Medford courts 4-2. Broadhurst, normally a consistent victor, was eligiated due to three smashed fingers, and after three hard sets to Nystrom. The match with Dartmouth on Saturday was rained out.

Miller’s New Mark Accepted in 4-25 but Kirwin’s Record Not Allowed

Although the Technology freshmen track teams scored first places in all the running events and in the high jump, the Brown ring’s supremacy was indicated by tufts in the field events.

Two freshmen track records were set by the M. T. V. runners. Jim Perkinson continued his spectacular season by running the half mile in 1:13.5 sec, breaking the record held by P. H. 1:13.6, and Broadhurst with well placed shots. Kirwin was somewhat of a surprise in losing the 100 yard record held by Jack Miller, with a time of 11.5 sec. Unfortunately a new mark was not allowed, as one of the three flyers failed to clock the two-second mark.

Martin Scores for Tech, 28-22

Captain Chinn won the specialty, the only event with 4-1 against the rest.

Kirwin scored for the Engineers, his number being 8-5 on the field.

Notices and Announcements

OFFICIAL

R. O. T. C. EXAMS

B. R. O. T. C. EXAMS will be given to summer campers on the following dates:

June 24, 1925—(1st. part for the 1925-26 regiment) in the morning.

June 25, 1925—(2nd. part for the 1925-26 regiment) in the afternoon.

Students who take English and Biology will be eligible to take the English exam. Students may take the 1st. part before the 2nd. part.

This exam may be taken on the Tech campus only.

Graduates will be given a special degree.

CEM. SOCIETY ELECTIONS

Election of officers for the Cem. Society will be held today in room 3-376 from 9 to 10.

Civil Engineering students may get their themes in room 2-285.

TECHNIQUE

The Technique will be open every afternoon after 4 to deliver books. Books reserved by signature may get them before 3:30.

M. L. T. MATH CLUB

Dr. King of the Harvard Observatory will speak on “The Constellations of the Universe” at the next meeting of the Math Club, on Monday, May 21, in the North Hall of Walker. Everyone interested is invited.

MUSICAL CLUBS

There will be a very important meeting of the Musical Clubs on May 23rd in the music room.

BENCHMARK COMPETITION

Competition closed today at 5:00. All interested students who have a short report due in the TECH business office, room 2-270, on May 23rd.
