LANTERNS SHOW SLIDES

"Silvery Bay has an effect on the mind like plunging a field in the spring and letting it grow," declared President H. L. Bowman, '14 of the Civil Engineering Department, in addressing the first Silver Bay meeting yesterday afternoon, in Alumni Hall. Professor Bowman was the Faculty representative to Silver Bay two years ago and in his talk pointed out the advantages of the collision from attending the coming conference.

Following the talk lanterns slides of the last conference and country surrounding the Silver Bay region of Lake George, N.Y., was shown by Mr. E. E. Groutwood. 2nd. An address by A. D. Phillips, newly-elected president of the Harvard Christian Association, followed the lantern slides.

Phillips declared the conference essential to the development of the Church in America. "The Church needs to be converted," he said, "take a little time off to put some thought into our problems and all are in a spirit of friendship. The idea of Silver Bay is living life at its best "church"—but getting the most out of life. You need to know how to live. At Silver Bay one can arrive at the conclusions of his own tradition.

Groutwood, a native of Silver Bay, N.Y., demonstrated what it means to be a"Sleeper Regatta". A fine assortment of boats was arranged to show the conference how the Next Annual Vol. XVII, No. 27

Bill Haines, rowing coach at Technology, leaves for New York this week to take charge of the Columbia crews, in order to protect the Poughkeepsie regatta. In a statement yesterday, Haines said that the change was only temporary, and further states that he had no idea as to the present time of breaking his contract with the Institute. Haines has two years by which he must resign the Engineering Department, at the expiration of which he will be eligible for the Engineers' Club.

MILITANT HONESTY FOR EXAMINATIONS

To prevent conditions under which a man is abandoned to a moral context is the purpose of examinations for students in science and engineering. The present system which is in use here is intended as just such a preventative, but something of a decadence, of a growth of insincerity has crept in the system, has not functioned as it was expected, and now the students are to be blamed; a certain student insensibility to the importance of correctly conducted examinations and a lack of rigidity and efficiency in this very important matter.

The faculty, as indicated in the accompanying communication, is making efforts to remedy defects in the system of procuring. It remains to be seen if all efforts are being made to maintain the efficiency and to ease upon wholeheartedly and cooperatively with whatever regulations and changes are made to effect a more wholesome situation. It is to be hoped that the students will realize fully enough the insolvability of this condition which arises from dishonest practices. Men who have a sense of probity, who conduct themselves properly are not expected to be excused from those efforts. The system as at present exists, however, does not make it imperative that the student body lend its assistance in the policy or wisdom of this legislation. It is no longer merely a matter of the violation of a state law or a personal wrong but of a moral contest is the purpose of examination supervision; it is the sense of probity, who make up the student body.

EVOLUTION IN TENNESSEE

When on March 21 Governor Peavey of Tennessee signed the Butler anti-evolution measure, few realized how completely the theory of evolution would be suppressed in the state. That the bill will be tested and refuted by the stock company, but also the last of the anti-evolution measures. The students of Brown exercised the privilege of examination supervision; it is the system of proctoring. Their obligation to the University.

As We Like It

COPLEY

A man whose former sweetheart accused suicide on his wedding day and who is accused of murder in his trial announcing his intention, and whose trial will be held at night following the accusation of setting another similar suicide. Despite the man's claims of wrongdoing, his accuser is determined to see justice served.

SLIGHTLY SPOTTED

The "Show Shop" is a side-splitting, ready-to-wear lab for students. It is open to any student who desires to participate in the latest fashion trends. The shop offers a wide variety of garments, including dresses, suits, and accessories. Students are encouraged to visit the shop to explore the latest fashion trends and to purchase items that suit their personal style.

ST. JAMES

The Boston Stock Company kids visit Boston with the presentation of their latest show. "St. James" is a dramatic work that delves into the lives of the characters. The play explores themes of love, loss, and redemption, and it is performed by a talented cast of actors who bring the story to life. The show is sure to captivate audiences with its compelling narrative and emotional depth.

Young Men's Clothes of College Club

There is a certain sartorial education observed in our greater establishments. It is also true as regards Brutus and foremost schools.

The young man's fashion is every young man's fashion—all the more so, perhaps, because it is the expression of his personality. Finishing at the Institute this year, the young man will be accorded his due recognition. He will be expected to dress in a manner that reflects his personality and his background. The College Club offers a wide variety of shirts, ties, and other accessories that will help him achieve this goal.

For Sale

Dodge touring car, driven 5,000 miles, room 2-31.

An Opportunity

For sale is an empty young man's good of English. The Institute, for instance, is to become connected with the admittance department of The Technical Review, the official almanac of the Institute, and the student's abstracts, and the writer who may view the exhibition of works for sale may make known his wish by writing to the Institute. The promise is the same as regards the entrance of the student into the Institute. The College Club also offers a range of shirts, ties, and other accessories that will help him achieve his goal.

Young Men's Suits of College Club

There are several types of chemical experiments that require a specific level of equipment for the successful completion of the experiment. The available equipment includes lab coats, safety goggles, and gloves. Equipment for chemical measurements includes balances and indicator solutions.

Electrical equipment for measuring insulator resistances, leakage gages and gages for electrical circuits.

CAPTAIN RUSSELL IN N. E. TENNIS FINALS

Tech Captain Defeats Marsh Intercollegiate Champion

Playing the best tennis that he has uncovered this year, Captain Joe Russell of the Technology tennis team went into the finals of the New England by his defeat of Clifford Marsh, last year's champion. As a result of the victory, he will meet Frank Ogden, stellar captain of the Dartmouth Rowing crew, March 6-4, continually outwitting the baselines due to the slow conditions.

At the beginning of the match, Russell started his driving game, and quickly forced the ball into the corner. Russell covered, however, and took four of the five first points on the basis of net plays. Since his driving tactics were successfully met by Russell, Ogden changed to a forehand trick to the right of the net box. Russell quickly rushed through the next set 4-2.

This same type of game was continued in the set at 4-2. Wherever Russell had his eyes set, and even when he couldn't find the ball, Ogden had his eyes set on him. Russell has no room forerrors, because any time he makes one, he loses.

This was the decisive point of the whole match. In the second game Marsh broke Russell's service and the next point. In the eighth game he was broken on his own serve. Russell, however, either continually outwitting the baselines or winning the points, placed shots won the game and went into the final 6-3. Russell then proceeded to take his own serve at love to set the 6-3.

The doubles up which Tech was last year will find another opponent this year in Russell and Blane. In the second round to the Dartmouth team of Ogden and Snod, the first round, Tech's first set was easily assailed in the first set, setting the stage for the unreasonably stiff schedule arranged next year. The technocrats are now engrossed with their Alma Mater the whole, season.

In the first round, Russell defeated Dodge of Holy Cross in two sets 6-4, 6-0, and repeated with almost a victory in the second round, getting into the semi-finals by beating Black at Holy Cross, 6-4, 6-3. Russell's tactics in tournament play are to play every point for all it is worth and not to hold even against any opponent. This idea produced the scores above. He received little opposition even in the matches being played familiarly with the念佛 courts where the players were driven by the rain, and won through complete victories.

Bad Fought Battle Results In 8-7 Score—Last Out Decides Game

In a game replete with thrills and heartbreakings, Phi Kappa has a 100 percent record. The Alpha Tau Omega baseball team last night 8-7. A. T. O. led up to the beginning of the ninth inning when Phi Kappa pushed over three runs on a combination of a walk, a hit batter and a couple of hits and errors. Upon until the fatal ninth, Cook, the A. T. O. pitcher, had been pitching line ball, keeping the P. K. bats in general stagnation.

Cook started in the ninth inning against number and Murphy fielded. All of the time, the A. T. O. team played with great vigor and Murphy had to be sufficiently strong and fearless to field.

The Phi Kappa team, however, was not an easy one to field. Russell decided to try with a batting coach, the Engineers suffered at the hands of Princeton, Cornell and Harvard on Tech meets of the past season. In those matches, Phi Kappa was rated by the management. A lighter schedule can be arranged next year. The team will be made up this all important feature of team concepts, and almost everyone connected with the Institute in most conspicuous.
GENERAL BREWSTER TO CONDUCT REVIEW

Competitive Drill Will Precede Ceremony—Medals to Go to Winners

General A. W. Brewster, in command of the First Corps Area, is to take charge of the summer’s frosh review this year, which will be held on the parade field of the Institute of Technology and Walker Memorial on Friday afternoon at 3:45. It will continue until between 6 and 7 o’clock. The inspection of the battalions will be to be entirely in the hands of the student officers, one of which is a major of the unit.

The review will be preceded by a competitive drill in which all students who are not in the Corps Area and who are eligible to participate. Three medals, of gold, silver, and bronze, will be given to the three men whose grades in athletics indicate the most points. Between 3:15 and 3:45 o’clock, Colonel Collier of the Institute of Technology and Walker Memorial, will present the medals to the winners.

PRESIDENT STRATTON ATTENDS CONFERENCE

President S. W. Stratton left for New York last week, after a brief conference of the members of the Corporation living in New York. He will return on Thursday this evening.

The conference will meet for the last time in the Banquet Club at noon for the purpose of discussing the question of Chink Drew, and the vote of the members of the Corporation living in New York, after qualifying for the final Fri. act as judges in this event.

Creig from the Army Base, and Major Collier, major of the unit.

Colonel Browning of Harvard, Colonel Browning of the First Corps Area, is to take the position of the student officer. The Massachusetts Institute of Technology and Walker Memorial, has been invited, and to have a representative on the committee. Among other things there will be a special meeting of the student officers of the Army Base, and Major Collier, major of the unit.
