SALE OF TICKETS TO POPS CONCERT WILL END TODAY

Large Call for Seats by Alumni—Women to be Allowed on First Floor

FROM PLANS COMPLETED

Dinner to be Served on Balconies—Music by Mears' Best Orchestra

Today affords the final opportunity for Alumni to obtain tickets to the Pops Concert at Symphony Hall on Thursday evening. The concert will be held at 8:15. Only two blocks of seats remain on hand, and students are reported to be selling tickets very rapidly. It is highly probable that the concert will be sold out by noon today.

Company D was selected as the escorting Company in the Regiment to the Colors. The presentation was made by Colonel W. F. Pyke, head of the Department of Military Science at the Institute, who presented the colors, placing them in the hands of the Commandant of Cadets. The colors will be placed in the parader between Walker Memorial and Memorial Hall.

MUST STOP RIOT IN THE '93 DORMS

Dorm Committee to Investigate

due to the fact that the dormitory committee was unable to present any definite evidence against the men involved in the disturbance. In order to get to the bottom of this, it was announced yesterday that the committee would be brought in to determine what was going on. In a moment the members were reported. A light electric sign bearing the words "Safe-Tall dorm" was discovered in the darkness. After a short departure, the sign was again reported, and after some rapid, to latest reports, no trouble has been reported.

Professor Miller to Speak

Class Day address will be held on Exchanging Sights in the main hall of Walker. Following a few words from President E. R. Watkins, Professor C. E. Miller will deliver the Class Day address. Prof. Miller will then introduce a skit, which it is said, will make every sophomore laugh at his classmates and former instructors. After the skit, some speeches will take place in the presence of the seniors.

Student Rifle Team is also to receive the Collier Memorial Medal for the year 1925-26, with Cadet First Lieutenant B. T. Oakley commanding the drill unit in the Battalion. The presentation was made by Colonel W. F. Pyke, head of the Department of Military Science at the Institute, who presented the Colors in the Regiment to the Colors.

President G. E. B. WILL Deliver Commencement Address

Charles A. Coffin, prominent Boston merchant, former president of the American Institute of Electrical Engineers, and member of the American Society of Mechanical Engineers, will deliver the commencement address at the end of the Institute course of instruction.

R. O. T. C. BATTALION IS GIVEN NEW STANDARD

Clemens, Head-Ballistician, 1925

With impressive ceremony, the Mass. Institute of Technology Chapter No. 1 of the American Society of Mechanical Engineers presented the Freshman, R. O. T. C. Battalion with its new colors yesterday afternoon, the ceremony taking place about 4 o'clock on Monday afternoon. The colors were last presented by the Corps of Cadets on Monday afternoon of the previous year.

IN THE INDECOROUS DORMITORIES

THERE Dormitory Committee is endeavoring to prevent disorderly activity in the dormitories. It is hoped that they succeed even if it be necessary for them to eject several men. Men that are inconsiderate of the usual rules have no more room in these dormitories than child-oly have no place in common living quarters.

The latest trouble occurred in '93 and consisted in the flooding of several rooms with water. True, the water action was precipitated by untimely and disharmonious vocal effusions from the upper class students and the course was not an easy one. We were somewhat in sympathy with a recent display or rather, the new dormitories, but the cause was not sufficient to excuse the end. This belief is given for its value to those interested. The continual lack of facilities for handling the problem in the dormitories, and the great number of college students working in the place, give a very unstable product, and obvious misplacing of the axes of integration. This method is not very practicable. In the end for end, it is reintegrated. This is a scab and of spending a few weeks otherwise, one that is the way to serve the country.

THE OPEN FORUM

To the Editor of THE TECH:

In an editorial to the Friday, May 28 issue of THE TECH you said that the country must be served and one way to serve the country is to 'enroll the Y. W. C. A., register the Y. M. C. A., and build up sentiment against student radicalism.' The Y. M. C. A. does not have the right to determine the social act, 'Only twice a year,' 'Absolutely against communism in the mixed camp.' It may be added that the Y. W. C. A. do not have the right to determine the social act, 'Like a fish,' 'Absolutely against communism in the mixed camp.'

The affair functioned splendidly the morning after the riot and the foreign defense in China. We were somewhat in sympathy with a recent display or rather, An editorial in the Friday, May 28 issue of THE TECH, which is a compound of some one momentous occasion which is a compound of some one momentous occasion. Originally it was very unfortunate that conditions at the University were improved by the course of events. But the conditions at the University are reversed, and the course of events at the University is reversed. This is a scab.
LENESS, SANFORD

Engineers Score Points In Pole Vault And Half Mile

Due to the excellent work of George Leness in the half-mile, and Major Sanford in the pole vault, Technology is again before the track world as the "factory" of athletic stars. Winning second honors for himself and the Institute, Major Sanford secured for the Engineers' track team the only decisive losses of the season. B. U. and Brown were defeated 6-0, all of the men showing excellent golf in these matches. Last week in their last meet of the season, the Cardinals and Grey goats tied the strong Colgate team 3-3.

The only decisive losses of the season were to Harvard and Williams, both of whom possessed better than the average team in the country. They were defeated through the entire season with only one defeat and that at the hands of Yale in the last match of the year. Williams also possessed a team that could take the measure of most college teams in this part of the country. Both the Harvard and Williams matches were lost 6-0.

Amherst and Holy Cross, the Tech team went down to defeat after a series of individual struggles that were not decided until the last green. There was only a stroke or so different between a win and a loss in the Holy Cross match. Amherst was more fortunate winning five out of six of the matches.

With a win over B. U. to open the season, it appeared as if the Engineer team was on its way to a long string of wins. The Terrific team had several individual stars that were counted upon to come through, and it caused considerable surprise when the Tech team came through with a 6-0 win.

A Brown team that was very little better than past was the next victim of the engineering Engineer team. Playing the best tennis that they could, the Institute team again charged the matches. Playing the best tennis that they could, the Institute team again charged the matches. Playing the best tennis that they could, the Institute team again charged the matches. Playing the best tennis that they could, the Institute team again charged the matches.

GOLF TEAM ENDS SUCCESSFUL YEAR

Have Defeated Brown and B. U.
With Ease.—Tied With Colgate 3-3

By two decisive wins and one tie, as compared with four losses, the golf team on the whole enjoyed a satisfactory season. B. U. and Brown were defeated 6-0, all of the men showing excellent golf in these matches. Last week in their last meet of the season, the Cardinals and Grey goats tied the strong Colgate team 3-3.

The only decisive losses of the season were to Harvard and Williams, both of whom possessed better than the average team in the country. PERSONALITY WON JOB FOR HAINES

Said to Have Been Important in Appointment as Coach
At Columbia

The radiating personality for which Coach Bill Haines is famous is said to have been an important item in winning for him the position of head coach of Columbia University crews until the fall of the Pennsylvania regatta month. Agility with the piano keys and his spirited songs are believed to have been as important as his ability to turn out winning eighties.
The Boston Herald, in yesterday's edition, quotes a member of the Columbia rowing committee as saying "With Haines was in New York for his first race with us, one of the committee came to him on quires after a practice session and hit through an hour's delightful entertainment, a feast of playing and singing, and saw how his men reacted to it after a long row. We figured substantially that the result of man needed to chase away the glooms in Columbia rowing, and that the fact that he is master of his game, although that primarily wasn't first consideration with us, helped us considerably. So we sought and secured Bill Haines." We figured subsequently that this was fact that he Is master of his game, al-

Bever Ball Team Enjoyed
Mediocre Season Against College Outfitters

Finish Year With Five Wins and Six Losses—Coach Bannor and Manager Tacy Work Hard in Shaping Winning Group

The trial season of the Beaver baseball team ended with the infinit sport having made a creditable showing with 5 wins and 6 losses. Most of the games dropped were by the breaks of the game.

The first game with Tufts was award-
ed with mixed results. The Tufts team was quite strong, but the score was won by the Beavers.

The second game with Brown was close, but the Beavers held their ground and held the opposing team to 3 runs.

The third game with Wesleyan was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 4-2.

The fourth game with Amherst was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 3-2.

The fifth game with Middlebury was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 2-1.

The sixth game with Williams was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 1-0.

The seventh game with Vassar was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 0-0.

The eighth game with Wesleyan was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 0-0.

The ninth game with Amherst was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 0-0.

The tenth game with Middlebury was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 0-0.

The eleventh game with Williams was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 0-0.

The twelfth game with Vassar was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 0-0.

The thirteenth game with Wesleyan was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 0-0.

The fourteenth game with Amherst was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 0-0.

The fifteenth game with Middlebury was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 0-0.

The sixteenth game with Williams was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 0-0.

The seventeenth game with Vassar was close, but the Beavers managed to hold their lead and defeated the opposing team by a score of 0-0.
COMMITTEE HAS SCHEDULED MANY REUNION EVENTS

Two Days Brimming with Action to Feature June Alumni Reunion

PLAN BIG HARBOR OUTING

Committee Seeks to Make 1925 Gathering Will Be the "Best Ever"

Two days brimming with action, will feature the Alumni Reunion to be held at Technology on Thursday and Friday, June 12 and 13. The affair, from the point of numbers, seems an assured success, as about 2500 alumni have filed their intention of being in attendance for the festivities.

Members of the general committee anticipate a large attendance and are making the sub-committees to make plans accordingly.

A number of class get-togethers will add considerable interest to the affair. They will follow the regularly-scheduled events of the reunion, many being held on Saturday or Sunday of Reunion Week. A large number of the alumni are expected to stay on until the sixteenth of the month for the commencement exercises.

Register On Thursday

Thursday, the first day of the reunion, will be given over to registration in the main lobby after which the alumni will assemble in Walker Memorial for a buffet lunch.

Fariborz S. Ford, who is in charge of the program for the Thursday afternoon, has arranged a number of interesting exhibits in connection with "Technology at Work." Mr. Ford has visited the service in at least one professor from each department including: Professor H. C. Peckham, representing General Studies; Professor H. W. Flather, Architect; Professor H. W. Peirce, Testing and Heat Transfer Laboratory; Professor W. E. Housley, Mathematical Laboratory; Professor E. J. Winters, Electrical Department; Professor F. E. K. Bowler, Civil Engineering; Professor R. S. Williams, Metallurgy; Professor George Oegerl, mineralogical Laboratory; Professor L. P. F. Hackett, Chemistry; Professor H. H. Smith, Mechanical Arts; Professor H. L. Zimmer, Civil Engineering and Mr. J. S. Norton, Boemien Bay Laboratory.

President Entertains at Tea

The committee plans to have a special exhibit in each of these departments of particular interest to the alumni and to have these exhibits listed in a special program. A number of periods will be provided to take the visitors to any of the exhibits which may appeal to them.

President S. W. Stratton will act as host to the visiting alumni at a tea and reception at his residence on Thursday afternoon. According to the plan of the committee, the alumni will assemble at the president's home between 4 and 6 in the afternoon after inspection of the buildings. They will be received by Dr. Stratton, assisted by officers and prominent members of the Alumni Association and their wives.

Harbor Outing On Friday

A luncheon dinner in the evening at Mechanics Hall, Boston, will be the feature of Thursday's events. According to Carl Gram '09, chairman of the dinner committee, the committee will strive to eclipse all previous efforts and provide a "bang up feed." On Friday, June 13, the entire membership will gather at 10:15 a.m. for a tour of the island trip. Two boats have been chartered to convey the alumni from the harbor to a trip which promises to have as vivid memories of the earlier outings which the Alumni have had in the past-the trip to Nantasket in 1904, the trip to Nahant and Nah-tea in 1909, the day at Nahant in 1911 and the trip to Plymouth in 1928. Tell Night of the Pops will conclude the regularly scheduled events of the affair, when the Alumni, members of the Senior class, will gather to serve what has almost become a tradition.

Burroughs invites Students and Graduates

To every college student and graduate, the Burroughs Adding Machine Company extends a cordial invitation to visit its factory and general offices at Detroit.

In engineering, producing, merchandising and finance, mechanical figuring equipment is indispensable. Without it, the high speed of modern business would be practically impossible.

In this broad field Burroughs is both pioneer and leader. For forty years it has been developing machines and methods to meet business and professional needs. Its factory—the largest of its kind—builds the only complete line of adding, bookkeeping, calculating and billing machines. Today the Burroughs sales organization covers the entire world.

College men desiring to learn more of the opportunities this great institution affords will be welcome at any of its sales offices in the United States or foreign countries.

and the program will be con-
cluded. The Tea Dance will have
its usual popularity and will continue until about 3:30 o'clock.
Tickets will be sold by members of
the Tea Committee. Reservations for the tea have not yet been ac-
cepted.

PROM TO CLOSE EVENTS
Senior Woman festivities will be
brought to a close with the Senior Promenade, to be held in Walker Hall Tuesday evening, June 16. According to C. C. Gager, Chairman of the Prom Committee, this event promises to be
one of the most brilliant and enjoyable affairs for the Seniors’ four (or more) years at the Institute.

A tea dance, arranged by the American and European Societies, will be given after the Senior Promenade and their fair guests will sit down at tables on the outside
balcony of Walker. Awnings, which will be placed in front of these tables, are being erected, and gay decorations will blanket the dancers. Master Pearl himself with slight of hand
must use his magic to provide the sweet symphony for dinner dancing until about 10 o’clock when the tea will be
removed. Dancing in the fagade and con-
tinued until 6 o’clock, these teas will be
served with tea and coffee or punch, as the cases may require.

Preparatory dance orders will be dis-
tributed in the main lobby some time this week, no definite announcements having been made as yet. The arrangements for the Junior Prom, and especially those for the en-
gaged invitations are to be given out soon. Laid down for the Junior Prom at the present time is the informa-
tion that these teas will be served with tea and coffee or punch.

H. C. Hoar, Chairman of the Prom Committee, has declared that the entertainment in Walker Hall will be on an even par with the grand promenade and dinner that took place the previous evening. An orchestra of six syncopators. Matrons, which will be present being erection, and any questions
should be addressed to him.

How chemical control insures du Pont quality

One of the surest factors of success in the Du Pont Company is the reputation it enjoys today in maintaining the highest standards of quality. This reputation is based on the constant effort and thought which go into every field of the company’s operations.

Chemists at the Du Pont laboratory work especially hard to ensure that the company will continue to meet the high standards which have made it one of the leading chemical companies in the world.

By the careful selection of all materials and the complete control of every stage of production, the unvarying du Pont quality is insured. It is the maintenance of the unvarying quality that the company is proud of.

In order to make sure that du Pont explosives are of the highest quality, the du Pont chemical engineers watch every manufacturing step. The careful research and development of every stage of production, the unvarying du Pont quality is insured. It is the maintenance of the unvarying quality that the company is proud of.
