DETEReNCE and respect for superior, particularly intellectual superiors, are hallmarks of a gentleman. Disrespect and boorishness characterize the little man, the peevish, egotistical, churlish one. The respect and discipline which has been so fully taught to us by our past and present instructors, is not so easily learned by the average student toward instructors in the class room.

A respect for authority requires a maximum amount of patience. For a teacher to present properly his material he must keep a sympathetic attitude toward his students. He must understand the attitude of the student in his class, the daily problems which influence the student in the class room, and then anchor it with a statement that the students observe the traditional courtesy of tipping their hats to the professorly. Only then are students prepared to receive what the teacher has to say with discerning judgment that relieves against doing the things which are forbidden. For example, if a teacher is teaching a science lesson, he must realize upon the most elementary reflection, that boorishness characterize the little man, the ‘peevish, egotistical, churlish one. The respect and discipline which has been so fully taught to us by our past and present instructors, is not so easily learned by the average student toward instructors in the class room.

In considering the condition here, there is much to condemn in the way the students have lost their self-control and poise, acting in an undecorous manner toward instructors in the class room.学生必须准备一个大型的报告,然后在课堂上进行展示。这将确保学生的准备和整体呈现是一致的。我们没有关于此问题的来源,但是它在我们的展示中占据了重要的地位。尊严和礼节的融合主要体现在文明和礼貌的修养中。我们都知道文明的修养在课堂上的呈现是一致的。尊严和礼节的融合主要体现在文明和礼貌的修养中。我们都知道文明的修养在课堂上的呈现是一致的。

The tech retort discourteous

GENTLEMAN, the summary is "everyday" said a certain professor to the “Talbot Reviewer” who had remarked a class cultivating a new subject and endeavoring to gain a new subject and endeavoring to make a new subject and endeavoring to make a new subject.

What he meant was that after each lesson we should take our bearings; understand the subject and the methods and the procedure of the subject. This work is the work of the teacher. He must ensure that his students be as attentive during the teacher’s instructions as they have been attentive during the teacher’s instructions.

LATITUDE AND LONGITUDE

A reader's letters to his son are recalled in this connection. We know of no source where the fundamental and rational principles of deferential conduct are so adequately and clearly presented. The reverence for authority, the dignity of the person, the respect for the average student, the attitude of the student in the class room, and then anchor it with a statement that the students observe the traditional courtesy of tipping their hats to the professorly. The beginning of a new term is the most logical time to take steps toward the betterment of the atmosphere in the class room. For example, if a teacher is teaching a science lesson, he must realize upon the most elementary reflection, that boorishness characterize the little man, the ‘peevish, egotistical, churlish one. Varsity Eight Gives New Simms Shell Its First Tryout

Varsity Handicapped As The Navy Race Looms To Front

Coach Bill Haines Will Race the Junior Varsity and 150 Pound Varsity Prior to the Race at Annapolis

On Saturday afternoon, the Varsity eight boarded the new shell for the second time, but took their first real tryout in the boat. The main intention of the trip was to determine what changes were necessary in the riggings and other details of the shell. The trial proved to be very profitable, for the men discovered many features that needed improving, the main complaint being that the riggers were entirely too low.

First Spring Practice to Commence in Gym Tomorrow

Spring basketball practice will start tomorrow morning under the guidance of Doc McCarthy. For the next season have promised to repeat the success of previous years, and the leading men of this year's fresh team. All promising candidates who are interested are urged to attend to this will greatly aid their chances of being selected for the team. This is an innovation in basketball practice, which, if successful, will try every spring as a regular part of the team's work. In all probability, spring basketball practice will be established at Technology this spring, for the first time, as it has never been tried before. This practice will undoubtedly entice the careful but sedentary young man to make a successful attempt at some of the harder sports in establishing spring physical fitness.
