New Course In Military Engineering Offered—Will Lead to Degree of S.B.

A new course in military engineering, with the title of "The Institute of Technology in War and Military Engineering," has been instituted for the first term of the academic year. The course will be taught by Professors E. R. espera.

THREE TERM SYSTEM

The system has been adopted to provide for the convenience of those students who are engaged in other work during the summer months. The first term will be from July 1 to September 1, the second term from September 2 to November 1, and the third term from November 2 to December 20. The course will be taught by Professors E. R. espera.

New Co-operative Course Given in E. E. Communication

A co-operative course in communication engineering with the Bell Telephone Co. is announced for the fall term. The course will be taught by Professors E. R. espera.

HEAD OF COURSE X IS GIVEN BRITISH HONOR

Dr. Lewis Elected to British Academy

Dr. W. K. Lewis, head of the Department of Chemical Engineering, Boston, has been elected to the British Academy. This is the first time that a member of the Institute has been elected to the British Academy. The election was made on the recommendation of the British Association for the Advancement of Science, and was based on the work of Dr. W. K. Lewis in the field of chemical engineering.

 elections.

The course will be taught by Professors E. R. espera.

As We Like It

THE STUDENT PRINCE

Music far surpassing reality that it is. It is not a musical play but a choice of over 600 songs considered for a possible musical play. The opera "The Student Prince," now in the hands of the stage is a historical romance. When we add that "DeWolff Hupper," be- cause of the condition, is unnecessary to consider the song, we can see that it was a very fine song.

While of course a King's taste in musical style must be taken into consideration, the result is that it is a poor devil of a dramatic tragedy. The play is not a success at all. The whole of the first act is a failure. The song is not only beautiful, but it was telling us something about the condition of the world.

Of course the music of the most prominent musical comedies and operas in the world is only a small part of the program. The students and the orchestra in the delight of its prime. In fact, the music was so well preserved that we were telling you what sort of a show "The Student Prince" is.

DeWolff Hupper and his attend- ants, ably assisted by the grotesque and sentimental cast, have achieved the impossible, and the Gorilla now accomplishes its purpose. Not only is there a romance woven into the stage until the final curtain drops. A little bit of acting is done by Matt Briggs who is cast as Arthur who, at the first curtain, elicits the applause of the audience. The last named are of the staff but anyone connected with the newspaper is an amateur and none of the others are expected to offer the student body. The newspaper is expected to be a part of the student body and they are expected to provide the fascination and interests that "College Boys." For you are a MAN and they are "College Boys."
FIELD DAY TEAMS REPORT SOON

Sophomores and Freshmen Renew Annual Enmity in Contests to be Held Field Day

"Now that the time for registration is fast approaching and along with it the first day of classes, it brings to mind the fact that it will not be long before the two historic organizations which have been vying for supremacy on "both land and sea" in the famous Fabricum Tech, will once more be on the same road. This will of course be the case at the annual meeting of the class of '27 but, as this class has now been relegated above the field day contest, the classes of 1925 and 1926 will fight to the bitter end for first honors.

Instead of the annual battle which has always been marked by the collision between the Sophomores and freshmen at the expense of the older students, a new strain of the sport will be introduced this year with the promise of making the event more exciting and in every way better. It is a battle of teams between the Sophomores and freshmen which will be waged in a number of sports, each one to be held on a different part of the campus. The contests will be held on the first day of classes, and are expected to be a great success.

Basketball Full Rule is RADICALLY CHANGED

When the time comes for the bas- ketball season to start, there will be a number of changes made in the rules of the game. The most notable of these changes is the introduction of the shot clock, which will be in effect for all games. This rule will require that the ball must be shot into the basket within a certain time limit, which is expected to make the game more exciting and fast-paced.

When he misses the basket, the opposing side will receive the ball and have the opportunity to shoot for a basket. This rule is expected to make the game more exciting and will add a new dimension to the sport.

Making The Pages Easier to Read

For the benefit of the readers, the management has decided to introduce a radical change in the way the pages are printed. This change is expected to make the pages easier to read and will help to lessen the amount of accidents usually occasioned, and also to lessen the keen rivalry which already exists.

CREW RACE FIRST EVENT

The first event of Field Day is the crew race which is held on the Charles, "over the whole course." This is usually a very interesting race and the teams are very evenly matched and are waiting for the honor of their school. The first event is expected to be a great success.

Football Game on Tech Field

Last year's freshman crew is actually TRAINING, necessar to be in order for the present moment. This crew trained the same as a whole, and will be numbered among the strongest crews that have ever been seen on the Charles in the past season. They will be seen before the face set for the event, they should develop into a formidable organization.

SIMPLEX

Simplex Wire and Cables, insulated with rubber, paper or varnished cotton and covered with braid, lead or steel armor, are rendering satisfactory service in many of the larger power stations of the country.
