EDUCATORS LOOK WITH INTEREST AT VI HONOR GROUP

Said to be Most Outstanding Educational Development in Recent Years

STUDENTS RESPONSIBLE

Educational and engineering critics have commented favorably on the Harvard Group section, which the Department of Electrical Engineering has established this year, with the statement that it is one of the outstanding educational developments of the last year.

Addressing the Junior in the Honor Group of Electrical Engineering, the students were struck by the high level of the plans for the future. The students were interested in the fact that the plans would be available to the public in the near future.

The installation of the privilege offered by the Honor Group was discussed, with the rest of the third year students being visited on the group in favor of the idea. Professor Johnson explained that the purpose of the reorganization was that those students would be interested in their studies. These students will be given a chance to study as well as to obtain a better understanding of their studies.

AIRPLANE CARRIER

Will Be Launched

Technical Problems Solved by Professors Nathaniel of the Naval Department

Tomorrow morning the U. S. S. Lexington, the largest ship ever launched at the New York Waterfront, will be launched. The technical problems involved in the launching of this ship are many, and a large number of professors have been working on them.

The Lexington is an oil tanker, and will be used for oil storage. The ship has a total length of 800 feet, and a displacement of 45,000 tons. It is equipped with eight oil storage tanks, each with a capacity of 45,000 tons.

The ship has an overall length of 800 feet, and a displacement of 45,000 tons. It is equipped with eight oil storage tanks, each with a capacity of 45,000 tons.

The ship was launched with great ceremony, and a large crowd was on hand to witness the event.

The students were interested in the fact that the plans would be available to the public in the near future.

CIVIL ENGINEERING SOCIETY PLANS YEAR

Fasanaquddy Wood Project Will Be Presented

A discussion of the project of the Civil Engineering Society was held last night, with the project being presented by the students. The project involves the construction of a wood project, which, by the end of the third year, will be ready for use.

The students were interested in the fact that the plans would be available to the public in the near future.

MAN WILL EMPLOY TECH MEN ONLY

A Boston business man, a graduate of Technology, in a letter written to this office, has stated that he will employ only those men who have been graduated from the institution.

In view of this statement, the Institute Committee is interested in the fact that the plans would be available to the public in the near future.
THE CRIMSON EXPOSE

PROFESSORS are no more perfect than any other group of people, as their classes have long realized. But it remains true that the college has a vast reservoir of knowledge in the entire curricula of a college and of the Faculty for the benefit of the student body. All is entirely original with the Crimson. Editors of students have heretofore prepared reports on the quality of different courses to the students who have tried them. In fact, prepared a report at Dartmouth quite recently. But to the Crimson goes the honor of first presenting in an undergraduate newspaper, in a form that gives promise of being a periodical affair, a broad criticism of the condition of the various courses offered, as well as the college, written by its editors (who have, among them, taken practically nothing in the curriculum) and printing or causing said praise or praise to be so

deprived.

There is no rebuke about the "Confidential Guide." For instance, one instructor is labelled a pedant until to teach unscientific, another is belittled for being a pessimist and a third for being a method of an elementary school teacher. On the other hand, Professors and others occasionally praise and several remarks are called essential to a good education.

We have no object in the use of such frank expression of student opinion, and its effect will undoubtedly be to improve many of the courses. And the Editor is sure that here at the Institute there is a great many subjects which are not, do not earn, but the conduct of which they were aware of their faults.

The difficulty with preparing such a guide to Technology lies, not in the fact that the teachers taught has been concealed carefully, but principally in the fact that the courses of study for most natural students are prescribed or required. There is no opportunity to protest a poor instructor (the only remedy possible to the student) or to work with one who has not demonstrated his inferiority.

Among the things to be improved at the Institute appears to be the General Bulletin and its oral supplements in the first meetings of the various courses, which have occasion to offer only the few dozen times, and which they might well use in the library for few occasions. To many men this is a real financial hardship.

YELLOW JOURNALISM

N ON of our Boston Sunday papers, and probably syndicated throughout the country, is appearing the periodical reminiscences of the official executioner of England. This is "yellow journal" in the normal sense. How to get a successful evening out, or the writer, or reporter who wrote it, or the editor who authorized it? Without knowledge of this his labor may be largely in vain. The "Confidential Guide" is the simplest and most concise method of doing this. Here is something to do anything to supersede the old method of "advises against," "reminds," the few cases where there is any option for the student.

New that registration day is over and classes are a matter of rou-
tine, attention is drawn to the fact that sports are going away to good starts while others are lagging way in the rear, due chiefly to the failure of candidates to report, and the Fishmen is now well on the way to the fore in the Technology life during the past few seasons.

Formerly in Rogers

This new fountain is the first in the new Communication Options in Rogers. The fountain is located in the basement of the building and is open to all students.

INSTITUTE COMMITTEE WILL MEET THURSDAY

The first meeting of the Institute Committee will be held on Thursday, September 28th, at 7:00 p.m. in the Faculty and Committee room. All members of the committee are expected to attend.

New Neutrodyte Has a Different Control Design

The Neutrodyte, a new invention by Professor Albert Einstein, is now being produced in limited quantities. The Neutrodyte is a radio receiver that does not require a tuning control. It is claimed that the Neutrodyte will improve the reception of radio signals in areas with poor reception.

SALE OF BOOKS AT T. C. A. IS RECORD

Students who have left books at the T. C. A. may call at the office to have them shipped to them. The sale of books at the T. C. A. has been record-breaking, with over 1,000 books sold in the past week.

Advertisements for Beaver Rattleskull, Beacon and every other meal.

Gray Worsted Suits Special $49.50

The fine gray worsted suit was a popular choice among men in the early 1900s. It was made of a fine wool material and was often worn for formal occasions.

INTRODUCTORY COURSES IN ITALIAN

A University Extension Course in Italian will be offered at the T. C. A. on Tuesdays and Thursdays from 5:00 to 6:00 p.m. The instructor is Professor Jacques Langlois. Registration is open to all students.

Undergraduate Aeronautics

There will be a meeting of the Max-Debucq Aeronautical Society at the T. C. A. on September 28th at 7:00 p.m. All interested in aeronautics are invited to attend.

T. C. A. Employment

Students who are interested in employment should contact the T. C. A. employment office.

Catholic Club

A meeting of the Catholic Club will be held on October 2nd at 7:00 p.m. in the T. C. A. Room. All members are invited to attend.

T. C. A. Employment Office

The T. C. A. Employment Office is open from 9:00 a.m. to 4:00 p.m. on weekdays. All students are invited to visit the office to discuss their employment needs.
