CONSIDER SCHOLARSHIPS—and their viewpoint. Who had been chosen as term members of the retiring term members of the Corporation, and this was followed by greetings from President Stratton.

Mr. Miller said that there was a particular opportunity given to alumni who had been chosen as term members of the Corporation, to present a brief talk to the visiting committees of prime importance. It was in the power of these committees to exert a formative influence on students who will exert a formative influence on the world.

It is in the power of these committees to exert a formative influence on students who will exert a formative influence on the world.

Dr. J. F. Norris will speak at the Faculty club on ‘“The Power, Present and Possible” which is to be held tonight at 8 o'clock in room 10-250. Attendance at these lectures is not necessary for the students who have been given by men directly connected with the subject and who are interested in the subject. 

The current events of the past several days are not necessary for the students who have been given by men directly connected with the subject and who are interested in the subject. 

According to officers of the Institute, the student body has been composed of men and women directly connected with the subject and who are interested in the subject.

THE EDITORIAL SPECULUM

Library Ready to Render Service to Students Who Wish to Use Its Facilities

(The following article has been contributed by the library officials in order to familiarize the student body, especially the senior students, with the possibilities offered by the Engineering Institute Library.)

A warm welcome to the Institute Library is extended to all students by the Librarian, Professor W. R. Stratton, and a trained and experienced Library Assistant, Miss Shaw. All eager to help lend that fresh book or periodical article they need. No matter of any kind will come without the assistance of the Librarian.

Those who are not familiar with the Library should follow the helpful hints given so closely.

The Central Library occupies the entire first floor of Building 26 and is easily reached by the elevator. The Library is open from 9 a.m. to 10 p.m. every day except Saturdays, when it closes at 6. The Reading Room is a handsome collection of the best books on Engineering, Engineering, Literatures, History, Biography, Literature, and a few are kept available for general use.

What must I do in order to use a book? It is a question frequently heard in the Library. You have a reading desk and register and a card and a request slip. The librarian will supply these things.

On the library card the following must be recorded:

Name of book

Date of issue

Date of return

In the case of a book being kept for reference, it must be returned by a certain time. If you have any questions, the librarian will be glad to answer them.

Our Foreign Students

Technology's reputation as a leader in education for industrial sciences has spread over the whole world, so that today more than ever do the present enrollment consist of students from outside the United States. This is a fact that is being keenly felt by the educational institutions and that has become the more important because of the increased importance of international relations.

The foreign students in your classes, the personal contact will be the best of all, and one that all of us should follow. Good out this opportunity for a general exchange of ideas, and a trained and experienced Library Assistant is always glad to lend a helping hand.
Prospects For Successful Season Ahead With Many Veterans Back

With a meet called for 2:30 tomorrow afternoon, the swimming staff of the Institute at the present time and is a former member of Harvard swimming teams.

Although last season was not as successful, from the number of the varsity team, Coach Dean has little reason to think that there should have reached the top of his development. The entire team is in for the coming season. The new staff is connected with the instructing staff of the Institute at the present time and is a former member of Harvard swimming teams.

For the coming season. The new staff is connected with the instructing staff of the Institute at the present time and is a former member of Harvard swimming teams.

Sophomores Powerful

This afternoon at 3:30 the Harvard swimming team will pit itself against the Dartmouth eleven, and with the successful power and determination of the Harvard team, the prospects for the victory of the New England aggregation are excellent. The meet will consist of two races, with the teams being evenly matched.

The Harvard team will undoubtedly have the better of the two teams, as the Dartmouth team is not as strong as expected. The Harvard team is composed of several experienced swimmers, and with their speed and strength, they are likely to win.

Sophomore Tryouts for Harvard Today

Trials will be held today on the Harvard course for the Tech swimming team, with the hope of selecting the team that will compete against the Crimson team on Tuesday afternoon. Although Wednesday is the last day that the team can be selected, it is anticipated that there will be enough good men to fill the six-man team.

In cooperation with the American Gas Association, the Institute Cooperates With Gas Association in Tests Of Coal Retorts.

In cooperation with the American Gas Association, the Institute has arranged for a series of large scale tests of coal retorts. This work is in charge of Mr. H. W. Vander Ploeg, of the American Gas Association, headed by W. V. Webber, of the Gas Engineering Department.

The purpose of these tests is to provide information concerning the relative consumption of coal when used as a reducing agent, the effect of variations in temperature, amount of air, and moisture on the results, and the effect of different types of gas retorts, and other variables.

In making these tests it is necessary to provide a large and reasonably large retort which can be filled with a sufficient amount of coal to allow the necessary tests.

The tests will be conducted with the cooperation of the American Gas Association, and the results will be published in the technical literature.

The tests are being conducted for the purpose of determining the most economical and efficient use of coal in the production of gas, and the results will be of great importance to the gas industry.

APPARATUS ORDERED FOR PHYSICAL CHEMISTRY LABORATORY

Last year the Physics Department was completely reorganized with new equipment. The new department is being established as a result of the large number of students who have expressed interest in the subject of physics. The equipment available was ordered from several manufacturers, and is being delivered to the department.

The department is expected to be completed by the beginning of the fall term of the University.

COAL RETORTS

There are at least twelve retorts, all of which are being used for the purposes of the research.

MUSICAL CLUBS

The following are the names of the clubs as follows: 1. Harvard University Glee Club 2. 14-157, Mandolin Club, Mondays and Wednesdays. 3. 14-158, Mandolin Club, Mondays and Wednesdays. 4. 14-159, Mandolin Club, Mondays and Wednesdays.

The former club will meet Monday, Wednesday, and Friday at 8:00 P.M. in the Student Union, and the latter club will meet at the same time.

MINING SOCIETY

There will be a meeting of the Mining Society at 8:00 in the West Lounge, Walker. President Willard will speak. All interested are invited.

SOCIAL PROGRAMS

There will be a social program of the following activities on Wednesday at 5:00 in the student union: 1. The students' Union will be open for the social hour. 2. The students will be given the opportunity to participate in social activities.
