FRACTIONS AND DORMITORIES

CHARTS TO BE DISPLAYED

Money Given to T. C. A. To Be Honored Y. M. C. A. Members

At its meeting yesterday afternoon, the executive committee of the T. C. A. completed the final plans for its campaign. About 105 men will take part in the drive, which is expected to amount to $300, which is hoped will be raised by Thursday night.

On Monday night solicitors for the drive will make their rounds for the first time. They will be divided into two sections, one from the various Fraternities and the other from the Dormitories. These two divisions will work together, and should finish the campaign before Wednesday afternoon, after which the actual soliciting will be undertaken by each fraternity's own representatives.

According to charts showing statistics regarding numbers and contributions of the fraternity members and that of the Dormitories, these two units will be able to show a larger total of contributions than the General Union.

The committee wishes to thank the various classes and organizations for the cooperation they have rendered in this campaign.

FIRST CONCERT OF CLUBS LAST NIGHT

Will Combine Fall and Winter Concerts This Season Into One Affair

Frisen's Department Store last night was the scene of the first Musical Clubs Concert of the season. The concert was held in the above store, and was sponsored by the Boston Y. M. C. A., Smith '26, accompanied by C. W. Clay '26 and H. L. W. Wellesley, formerly with the Louisiana Refining Department of the Atlantic Refining Company, has returned from a long period of study and research into large petroleum organizations. In recent years it has become apparent that the petroleum in this country is so cheap that it was not worth while to use it for many different purposes. A great demand for the discovery of benzene by Michael Faraday, the French physical chemist, and the subsequent work of W. E. Bright, has led to the formation of the National Research Council, the National Research Council of the National Institute of Technology.

The committee wishes to thank the various classes and organizations for the cooperation they have rendered in this campaign.

As Yet Only Six Papers Have Been Turned in at Room 10-100

Nominations for the freshmen elections to be held next Wednesday are also in the Information Office before the executive committee. Six nomination papers have been turned in, in the Economics Committee has announced that they will accept nominations for the various offices. Eight officers will be by the election. President, Vice-President, Secretary, Treasurer, Informative, and six members of the Committee on Fraternity Relations are the members of this committee. Two of the six nomination papers are from the Class of 1929, and one candidate for the Class of 1930 is represented.

The committee wishes to thank the various classes and organizations for the cooperation they have rendered in this campaign.

F. A. SCOTT TO BE THIS AFTERNOON'S ADELRED LECTURER

Has The Average Engineer an Opportunity to Be a Leader? The Title of Talk

AWARDED WAR MEDAL

Scott Received Distinguished Service Medal for Work On War Boards

"This is the second time this year that the American Society of Civil Engineers has awarded a medal for work on the War Department," said President Scott. "This is the third time this year that the American Society of Civil Engineers has awarded a medal for work on the War Department."
SOME courses at the Institute are presented so badly and so senselessly that even exceptionally intelligent students can pass them without the aid of tutors. No one can deny that such courses are "offensive and unbecoming" unfair to the student and that they are travesties reflecting upon the curriculum. Since students are not satisfied with the way in which their courses are presented and continually find it necessary to tutor in these particular subjects, no reasons other than those above outlined are offered.

Another element enters into this complex situation. There is no lack of students who are desirous of doing a purely secondary and adequate study and do all they can to increase their ability to function as little as possible. Some of the quizzes, have built up a tremendous business; others have fared equally well because the professors have been talking about the subject. So in general, it is a condition thrust upon the tutors by the students who are the producers of the problem.

Something needs to be done about it; frankly we do not know even the number of the ill-prepared subjects can be investigated and steps taken toward their improvement. Some need more time for presentation; others need more time to present them. There is one instructor in one of these more difficult courses whose reach is not to be found. Whenever the instructor succeeds in getting a group of the course the answer is, they seek out the financial wizards and spend $3.00 parcels of passing material. That is, having no other alternative, they buy the course.

UNDERGRADUATE AWAKENING

INCE the opening of the fall term, undergraduates of New Haven College have shown a lively interest in the administration of their college affairs. Lately one observes an active discussion of college problems by the students themselves. Strange enough, many of the more interesting discussions of the present have to do with the growth of the undergraduates and the awakening of their responsibilities.

The recent incident of the "Turkey Girl" is but one of many similar uprisings that have been observed here. When a person became a national figure as "the Count of the Under- shirt" because he helped the king dress. Now a girl attains a national position as "the queen of the Turkeys," she has the advantage of being a female. The growth of the theory of "divine right" to rule is demonstrated by the fact that this particular Great minds travel in the same uml, and purchase $3.00 parcels of passing material. That is, having no early, he should be given a "Tech is one instructor in one of these more difficult courses whose reach is not to be found.
