MUSICAL CLUBS BROADCAST
Program Tomorrow Night
TO BE BROADCAST
THROUGH HERALD-
TRAVELER STATION

Play at the Hotel Brunswick Program Goes by Wire
To Springfield
O. B. DENNIS WILL TALK
Alumni Secretary to Introduce
The Clubs With Opening
Program

Tomorrow night from 9 o'clock to 11 o'clock the Musical Clubs will broad-
cast a complete program of selections by the Banjo Club, B. Z. Z., Springfield, Mass. The clubs will play at the Hotel Brunswick and the pro-
gram will be sent by wire to Springfield and other parts of the state for broadcast.

STUDENT SPEAKS
BEFORE SOCIETY
O. M. Hoagved 26 to Address
Electrical Engineer on
The Vacuum Tube

Members of the Electrical Engineer-
ing Society will hold the first meet-
ing of a series of meetings to be ad-
ressed by students Friday evening.

The paper which Hoagved has pre-
sented will explain the physics of the thermionic tube to purposes other than communication. It will tell of the use of the vacuum tube as a voltmeter and in many other uses which have come up from time to time in the work of the Electrical Engineering Department. The paper may be of great interest to alumni.

In the audience will be a number of other papers in preparation which will be present-
ed to the student body. The topic to be discussed includes: Use of the vacuum tube in the development of new energy sources. The paper presented by Hoagved will be a complete presentation of the newest developments in the field of electronics.

This is the first time that any of these papers will be read in public on the campus. It is expected that the talks will be of great interest to all students.

PROMINENT VISITORS
INPECT TECHNOLOGY

Three prominent visitors in engineering as many societies, were shown
to the members of the student society in the
work of electrical engineers.

On Wednesday, Professor Peter-
son of Johns Hopkins will visit the stu-
dents and the facilities of the department will be shown through the buildings. Herbert B. Seagard, professor of electrical engineering, will give a demonstration on some of the experiments which are performed in the department.

Today Professor William Jackson of the
University of Wisconsin will deliver a lecture on the "Theory of Rigid Bodies". The lecture will be held in the lunch room of the Electrical Engineering Department.

In his lecture, Professor Seagard will discuss the use of the thermionic tube in the development of new energy sources. The paper presented by Hoagved will be a complete presentation of the newest developments in the field of electronics.

TENHOME JUNIOR
FROM COMMITTEE

Announcement Nominations Must Be
Made Before Saturday
At 7:15

The nomination of candidates must be made before Saturday at 7:15.

Harry McGowan, a professional omen-
ager, will be in charge of the selection of the candidates.

He will be assisted by the members of the committee in selecting the candidates. The selection will be made on the basis of merit and ability.

The committee consists of five mem-
bers, all of whom are selected by the com-
mittee.
I T IS reported that a majority of the residents in the Technology dormitories signed the petition circulating among them as a protest against the University Memorial dining service attempt to improve the quality and the variety of the food served. It is stated that these students have no meal in Walker except for an occasional trip either across Maxwell or thru the dining room. The students are in a position to judge the meals served them, and the committee is taking this method of sounding out the entire group on the question.

On the contrary, men who eat 20-25 out of 21 meals in an impersonal atmosphere where 2000 people a day are served, men who know every warped tray and every bent fork, are in no position to pass judgment on the quality of the food and the service as compared with the Walker service. To make a comparison would be a task of great difficulty.

The monopoly of the surroundings and the service seems to be the only reason that the Walker service is preferred to a better service. Herein lies the danger. Instead of substituting law for war, the Council of the League of Nations and the World Court may be a wise thing. They are under control the Council of the League of Nations, is not an organization that we can control.

There are always a few in any group of students who are more devoted to studies than the rest; and a few who are more inclined to social and extra-curricular interests. The former are not always taken as representative of the great mass of the people. The news-papers obviously consider the former group as the most susceptible of their students— the grinds and the pleasure seekers. And most of these people as Americans get its facts and its opinions from the newspapers.

The average man, at the Institute or at almost any other college is not too much interested in the change because he has not entered. He must devote considerable time to them, or he cannot keep up with the others. He must devote considerable time to them, or he cannot keep up with the others. He must devote considerable time to them, or he cannot keep up with the others.

THE WALKER CAFETERIA

It is reported in the Chronicle that the majority of the residents in the Technology dormitories signed the petition circulating among them as a protest against the University Memorial dining service attempt to improve the quality and the variety of the food served. It is stated that these students have no meal in Walker except for an occasional trip either across Maxwell or thru the dining room. The students are in a position to judge the meals served them, and the committee is taking this method of sounding out the entire group on the question.

FOURTEEN ENTRIES IN I. C. A. A. A. A. Soccer Team Has Easy Time Defeating Clark in Fast Game Saturday

TECHNOLOGY FROSH RULED FAVORITES IN TODAY'S RACE

M. L. T., Harvard, and Maine Are Strong Entrants From New England

SYRACUSE IS FAVORITE

The Orange Will Be Pushed By Pittsburg In Big Race

At New York

(Continued On Page 3)

The Tech team stands out as one of the strongest teams in the entire league, and it is well known that Technology's hockey representation will be a formidable team in the conference.

The game is not expected to be a close one, with the Orange likely to come out on top. However, the Syracuse team will have to be on their toes to avoid any upsets.

HOCKEY MATERIAL IN SPLENDID FORM

Have All Last Year's Squad But Two—First Game in Two Weeks

On looking over the starting line-up, it becomes evident that Technology has an excellent shot at this year's championship.

The team is expected to be led by the returning stars of last year's team, who are sure to bring their top form to the ice.

BASKETBALL SHOWS PROMISE IN INITIAL WORKOUT

Team Takes On Whirlwinds in Practice Game of Last Wednesday

HINCK INDIVIDUAL STAR

During the past week the hangar has been filled with much activity. After the Varsity basketball team held practice all week, the second team was put into the ring for the first time.

The team, led by Hinck, showed great promise and is expected to be a formidable opponent for the other teams in the league.

New Varsity Lineup

The lineup for the Varsity team is expected to consist of Hinck, Clark, McCarthy, and Estes.

COACH BILL STEWART IS ANXIOUS TO SIGN UP ALL LEAGUE TALENT

As has been previously stated, Coach Bill Stewart is putting the men through a rigorous practice schedule to prepare for the coming season.

RKO THE TECH CAFE

The Cafe is located at 135 Tremont Street, just a short walk from the campus.

WHERE DO YOU EAT?

13 HAVILAND STREET

Now Boulevard Street and Hanover Street Junction

The place where you get full values for your money in food and service.

All House Cooking

Just a short walk from the campus.

A Full Course Dinner for 50 Cents

Over 400 items served daily, many not found anywhere else.

ALL DAY BREAKFAST, LUNCH, AND SUPPER

Also an excellent Coffee Shop for Sunday Children's 15 cents

Closed during the Winter months.

RESERVE 6232

SCHLEUBER'S Self-Service Restaurant

277 Tremont Street, Boston

Open until 2 P.M.

DYNAMITE FILM SHOWS METHODS OF Producing and Using Explosive

Last Friday afternoon in 18-410 at 4 o'clock, the Organic Division of the Du Pont Company showed the six reel film obtained from E. E. Du Pont of Wilmington, which demonstrates the methods of manufacturing of dynamite. In addition to the manufacturing processes, the film also showed the results of a good many of the products used, and the methods of distributing and using the finished product.

The film, which ran for a series of scenes about the large Du Pont plant at Brandywine, was narrated by a live microphone, the microphone standing some distance from the buildings where the entire factory was illustrated in detail.

All buildings Barricaded

All such buildings are carefully barricaded, being surrounded with sandbags. The method of barricading multiplied through the departments as well as the method of moving the dynamite.

The final product is run through a mixing machine, and the distribution of the finished product is done as quickly as possible. There are no delays in the transportation of the finished product.

Several scenes were shown dealing with the distribution of the finished product, including the method used in the transport and the means by which the dynamite is placed on the water and the railroad for delivery.

World Court is an Academic Issue

Representative is simply a judge helping to render the verdict in accord with the principles of international law. The cases may be incidents of the law, it is not possible to know the actual situation that was induced. Knowledge is closely correlated with our understanding before we enter the court. It is impossible to decide the course of action even when the case has been brought to the court.

No man whose schedule does not require the presence of his delegate in the court will be allowed to attend the hearing. There are no exceptions to this rule.

Jury Selection

The court will be held throughout the year for the purpose of hearing cases. The juror will be required to know the facts of the case and to be familiar with the conditions prevailing at the time of the trial. It is required that the juror be familiar with the facts of the case and the conditions prevailing at the time of the trial. It is required that the juror be familiar with the facts of the case and the conditions prevailing at the time of the trial.

Intercollegiates

Princeton College has officially announced that it will enter the Eastern Intercollegiate Debate League, according to the administrative announced by H. E. Nolte of the society.

Princeton will take the place of Columbia which resigned in order to make more extensive foreign engagements.

Syracuse University is attempting to establish a college section on its own. The students at Syracuse have been invited to submit their papers to the society.

University of the United States in some cases that is it can be safely avoided and that it is not.

We want to be sure that more people become involved in the court. It is essential that the court must be used. We will do our best to bring before the World Court issues of such vital importance that the interests of North or South American countries are affected.

The World Court as it should be, a court to which we can turn in ordinary time. (The famous question of a UN member is whether the United States is a member of the UN.)

HERBERT ADAMS GIBBONS, A.B., M.A. Phil., HD. Lecturer

(Professor of History and Political Science, Harvard University, Washington, D.C., H.E. Nolte of the society.)
