COMBINED CLUBS TO GIVE CONCERT AT WHITNEY HALL

Xmas Concert and Dance Will Take Place of Fall and Winter Affairs

SPECIALTY ACTS PLANNED

One of the special acts of the evening will be the Buffalo Trails Minstrel Band, which will perform immediately after the concert, the show being given in honor of the special minstrel and club's programs. The groups will be furnished for the occasion by the students. The concert will begin at 8 o'clock, and dancing will be held in the auditorium after the last number. The program will consist of vocal and instrumental music, and there will be a selection of music by the students of the concert. The concert will be held on December 18th in the auditorium of the school. The program will consist of vocal and instrumental music, and there will be a selection of music by the students of the concert. The concert will be held in North Hall, Walthall, at the usual time for concerts.

Phonofilms Company May Soon Exhibit at Institute

Newest Invention of DeForest Shown for First Time at Institute

A recent invention of the DeForest Phonofilms Company, Mr. DeForest invited the company to demonstrate their new invention at the Institute for a special exhibition. The invention, developed by Dr. DeForest, promises that if it can get another slice from the new phonofilms no one will ever be able to make a film that will be made here in accordance with Dr. DeForest's system.

Phonofilms are the most important advance in the art of motion picture film. The type of moving picture film is made of fine, flexible, thin sheets of celluloid, and the sound is recorded on the film. In the production of the film, a light is passed through the sound recording, which is recorded by the film material. Variations of the intensity of the light cause variations in the film material, which is recorded on the film. The film is then developed and after the development, the film will be sliced and after slicing, the film will be sliced into smaller parts. The picture will be sliced and after slicing, the picture will be sliced into smaller parts.

Newsreels:

Newest Invention of DeForest Shown for First Time at Institute

Mr. DeForest, having a long and successful career in the field of phonofilms, is no stranger to the art of sound reproduction. He has been associated with the phonofilm industry for many years, and his contributions to the field have been recognized by the industry. His latest invention, the DeForest Phonofilms, is a major advancement in the art of sound reproduction, and it is expected to revolutionize the industry. The invention is a film that can be sliced and after slicing, the film will be sliced into smaller parts. The picture will be sliced and after slicing, the picture will be sliced into smaller parts. The film will be sliced and after slicing, the film will be sliced into smaller parts. The picture will be sliced and after slicing, the picture will be sliced into smaller parts. The film will be sliced and after slicing, the picture will be sliced into smaller parts.

Hudson to Speak on World Affairs

Represented United States on Mission of the Post-War Commissions

Through the suggestion of President Walker and subsequent arrangements with the various nationalities division of the National Council of the United States, Mr. Hudson was invited to address the Institute on a subject of universal interest to the students of the Institute. His subject was "World Affairs," and he devoted a considerable part of his time to the discussion of the present world situation. Mr. Hudson's address was very well received, and it was enjoyed by all present.
INDUSTRIAL CO-OPERATION

Of the factors that distinguishes Technology from other engineering schools is the close contact it maintains with industry. We have our own Technical Research Association, with a staff of professors and engineers.

EVENTS OF THE WEEK

WRESTLERS REPORT IN LARGE NUMBERS

Dr. Rockwell and Coach Speak At Wrestling Mass Meeting

More than 40 men were present at the mass meeting scheduled for the wrestling team on Monday afternoon, for the purpose of getting acquainted with the new coach, Jack Albright, and for hearing from the old coach, James H. Felton, president of the advisory council, and last year's captain, Deke Crandall, for the coming wrestling season.

In his talk to the young men, Mr. Felton said that he expected the wrestlers to show interest in the sport and also to support the coaching staff. Albright spoke to the men stating that, as captain, he would do his best to look after the team and the interests of all who were interested in the sport.

The meeting was opened by President Rockwell of the athletic council, and the meeting was closed by Captain Albright.

The meeting was an excellent one and the young men who were present showed a very keen interest in the sport.

MEN MARCH IN THE HOME OPENING SATURDAY

The Tech men will put in their appearance under the banner of 1928 when the starter's flag is dropped in by one of the Tech men, after the banner has been raised by the girls from the flag pole.

Mr. E. R. Men will be the starter, and theTech men will pull in the first heat of the season. The meet will be held at the track, and the Tech men will give a good show. The meet will be held at 5 o'clock tonight.

The Tech men will give a good show tonight. They will give a good show in the first heat of the season. The meet will be held at 5 o'clock tonight.
CITY TUBERCULOSIS SURVEY BY HORWOOD

Professor Horwood Reports on Survey of Last Summer

Special stress was laid on providing for possible suspicious cases of tuberculosis by Professor Murray S. Horwood of the Boston Department of Sanitation and Public Health, in a paper before the Boston Tuberculosis Association meeting in Boston last week.

Dr. Horwood's report was a result of a survey of the City of Boston conducted with the cooperation of the Boston Tuberculosis Association in cooperation with the Boston Sanitarium, other medical societies, industries and the schools and universities of the city.

He describes the summer camp established for tuberculosis patients and the health cribs in the schools, the increasing importance of disease in industry as not sufficiently realized. Active cases of tuberculosis can be cured for in the sanatorium, he says, but the large number of subclinical cases properly taken care of, prevents any real control of the disease.

MEDICAL DEPARTMENT TREATMENTS INCREASE

Wiser and generally the well-weathered has increased the number of patients handled by the Medical Department. At the opening of classes, 1,200 persons were enrolled in the department. This represents an increase of 500 over last year, and 100 over the number handled during the summer. The increase in the number of cases treated is due to the sudden changes of the weather. Last year was the first year that any success was achieved.

NOTICES

OFFICIAL

POLITICAL ECONOMY X-20-31

The final examination in X-20 will be held on December 14, at 10 a.m. in rooms 1-230.

UNDERGRADUATE

TECHNIQUE

Intermediate students will be accepted at the School of Engineering for the academic year 1925-26. The continuation of the School of Engineering will be held in the Engineering Building.

RADIO SOCIETY

The Boston Society will hold a meeting at 7:30 P.M., Friday, in room 1-310. In addition to the regular talk there will be a discussion period on the subject of "The Future of Radio." The program will be under the direction of a well-known engineer.

TECH SHOW

The Tech Show Orchestra will perform tonight at 8 P.M., in the Engineering Building. The program will include a variety of music by the best known composers.

SWIMMERS VIE FOR CLASS SUPREMACY IN MEET TONIGHT

Sophomores Make Best Sh ow in Preliminaries And Should Win

FRESHMEN SHOW PROMISE

Lucy of 1929 May Be Surprise Of Meet By Winning

This afternoon the interclass meet will decide the water supremacy of the four classes. Wednesday night the preliminaries and semifinals in the 60 and 100 yard events will take place with a final held, completing the list of entries for the mains.

With men entered in every event, except the butterfly, the event meets will be run up enough points to pick it out. The final masters will not be able to pick it up.

For instance, the senior entering nine men, and each of whom is expected to score heavily.

The program will be as follows:

1. butterfly,
2. 60 yard,
3. 100 yard,
4. 200 yard,
5. 300 yard,
6. 400 yard,
7. 600 yard,
8. 800 yard,
9. 1,000 yard.

A description of the preliminary meeting is, therefore, given after the announcement will be made.

The Sophomores enter men in every event of the above-

CALFEND

On Tuesday afternoon, December 15, the combined Musical Clubs will complete the final of their vocal and instrumental programs. Each group will also present a short feature act, each of which will be followed by an extended discussion of the program and an informal period.

The Tech Club will present "The Tracker," a straight musical comedy. The plot is quite original and the dialogue is free from morbidity. The musical numbers are of very fine detail. The cast includes a large number of Tech artists, and the orchestra is composed of 32 members, 20 of whom are Techmen. The tickets are sold for $1.00 at Tech box offices and at the Institute box office. The performance will be given at 8:30 o'clock.

The Tech club also plans to present a straight dance act. The program will be completed by a short feature act, which will be announced later.

"EDUCATION" OR "TRAINING"

In ordinary usage, we employ the word "education" to mean the fitting of men and women for life through training to be useful or beneficial to them in living, and "training" to imply the purpose of fitting the object of the training for some one task.

At the student convention at Wesleyan last week, Dr. P. F. Goodnow, president of John Hopkins University, made the point that education, as we have defined it, should be confined to liberal arts, that is, education which engenders collegiate athletics and social life; and that the colleges should be devoted exclusively to advanced work or training.

This latter function, as Dr. Goodnow well stated it, serves as a place where engineers may be trained. This work of training engineers it does not mean that any college or university can do adequate preparation in the profession of engineering, for the nature of the subject is such that the profession must be developed through the curriculum of the school.

But, after all, the Institute does not educate. It is much more a technical school as would be a school for barbers, or for mechanics, or for carpenters. True, the training which it gives demands a far higher degree of intelligence than those manual occupations, and a far greater capacity for learning; but the fundamental purpose in such a case is to train students to make a living rather than to teach them to live.

Perhaps a slightly more flattering analogy may be drawn between an engineering course and a medical or legal course. The purpose of the medical school is to teach medicine, and of the law school is to teach the law. The same is true of the Institute, although the complications of its curriculum make the comparison less exact.

The future function of the real reformer of this spirit to the extent that it has come about will be to bring about the following changes:

1. The curriculum should consist of a basic course in science, mathematics, and engineering, followed by a more advanced course in the specialty of the student.

2. The course should be flexible enough to allow for individual differences in the students.

3. The course should be designed to prepare the student for a career in engineering, with a strong emphasis on practical applications.

4. The course should be taught by engineers, not by professors of education.

5. The course should be updated regularly to reflect the latest developments in the field.

The only thing left to do is to apply these principles to the actual practice of engineering education.

The future of engineering education depends on the success of these reforms. If they are not adopted, the Institute will continue to produce engineers who are not ready for the work of the profession.

The future of the Institute lies in the hands of the students. They must be the ones to demand and receive the changes that are necessary for their success in the field of engineering.

The future of the Institute lies in the hands of the students. They must be the ones to demand and receive the changes that are necessary for their success in the field of engineering.
Hard Game Expected When Engineers Encounter Big Green; Tomorrow Evening

INTER CLASS MEET HELD TONIGHT AT CAMBRIDGE POOL

Veteran 1923 Team is Favorable To Carry Off Honors

TRIALS HELD WEDNESDAY

(Continued from Page 1)

A gainst the recommendation of Charlie Estes, who has been selected as the skipper of the Harvard crew for the season, came the news that Concordia, of the Engineers, will match their skill with the Dartmouth quintet in front of a favorable home crowd tonight. The meet comes at a time when the Engineers are in real need of victory, for they lost their opening game of the season to Boston University last week, and are in dire need of a victory to shore up their confidence and to gcet the season back on the right track.

The Engineers will have to meet the Dartmouth quintet on the edge of the varsity lineup, for the Ivy League team is loaded with stars. The Dartmouth team is expected to field their best lineup, and the Engineers will have to play a great game to get the victory.

The meet will be held at the Cambridge Pool, and is expected to be a close battle. The Engineers will be led by the veteran 1923 team, which is expected to carry off the honors. The meet will be held at 8:15 P.M., and is expected to be a great attraction.
NEW MEN SECURED AS T. C. A. ASSISTANTS

Letters asking them to attend a special meeting were recently sent out by the T. C. A. Committee. It has been hoped that an interest in Christian Association work by students would be increased through the use of these ideas and interest will doubtless be shown by some students who would like to join such a group. A meeting at 9:00 in the back office today at 9 o'clock.

An announcement of the final plans for the Memorial Service for men who gave their lives to the World War was recently made.

CHRISTMAS GIFTS FOR HIS COMFORT

Gifts that touch his heart are our passports to his heart and there's nothing a man likes better than to slip into a soft, warm and most comfortable garment of the kind a man can wear. Who wouldn't want for Christmas?
