SCIENCE AND ART

GALAWORTHY case said that the only two truly impartial observers are the scientist and the artist. To most people it comes as something of a surprise to see these two compared, rather than contrasted. But there are a great many cases where it seems apparent that there is no more difference between the follow-
er of the muse and the followers of the retort than between either one of these and a member of any other profession.

Perhaps a striking example of the fallacy of believing that science and art are incomparably divorced from one another is to be seen in the history of the Museum of Fine Arts, in Boston, just at the head of the world. It was developed as a technical enterprise for the staff members to do laboratory work, and it was the place where the laboratory apparatus was kept. It has taken several years of improvement to make it a first-class laboratory.

"IN BOXES TO REDE IX ME DELYTE"
T.WRESTLERS TACKLE NORTHEASTERN TEAM

Thursday evening at 7:00 in the hangar gym the engineer wrestling team officially opens the interclass season. The meet will be comprised of the following groups:

The teams will be comprised of the following groups:

- Northeastern University
- Bowdoin College
- Connecticut State College
- Dartmouth College
- Harvard University
- Massachusetts Institute of Technology
- Yale University

The meet will feature a number of weight classes, including:

- 125 pounds: Rabinowitz or Harris
- 135 pounds: Schoenfelder or Radoslovitz
- 175 pounds: Ulrich or Rabinowitz

The Harvard wrestling team has been practicing diligently for the upcoming season. Their focus is on improving their techniques and building strength. The team has high hopes for the new year, and they are determined to succeed.

Harvard Capsures Close Hockey Game Wednesday

Displaying the best brand of hockey that they have shown so far this season, the Crimson puckchasers went down to the University of Rochester to the hands of a clever Crimson hockey team which might be said to have as yet more genuine than quantity game. They were of course played in the first period, but in the last two they literally ran rings around their opponents. In the course of the game the Crimson capped off their own fine performances, and in this way we were able to keep our players fresh all at times.

Crimson Fast Skaters

Johnny Deignan, back again at goal displaced all his old form. In the first period he had to make 11 stops compared with the time that Tom Deke Crandall made in the second. In the second period he had no need of his friend to help him. On the other hand only two shots came his way and he managed to keep up with his game. Bill Berkeley was the star performer of his team, standing out among all the forwards. The first rate effort was made by Johnny Deignan. He knocked the puck away from the center and in front of his goal. When Johnny blocked it. The latter provided the first real Technology threat of the second period. The third period was played out with only two goals scored. The second goal being scored by Technology. The Crimson was driven at goal by Tech. The Crimson had to stop these measures when John Deignan's work at the cage. Finally the Crimson was able to score a goal, thus giving them the lead in the game.

during the next few minutes the battle was raging for the second tally. Deke knocked the puck in at the net for the second and final tally of the game.

The Crimson was able to hold their ground and outwit the Technology pucks in all departments. The Crimson was able to hold their ground and outwit the Technology pucks in all departments.

The TELERIS VISIT SIMPLEX WIRE LABS
Members of the Electrical Engineer-
ing Society made a trip Wednesday after-
noon to theSIMPLEX WIRE and Cable
Company in Cambridge. The visit was fol-
dowed through the construction of cables from the
manipulating of copper wire to the process
of coating the finished cable with lead.

The tour, which also included the
fabricating laboratories which were in
the process of production, ended with
a visit to the sales department
where it was explained how the
cables are inspected by passing
300,000 volts at the end of the
process. The men followed through on
the finished product through the
manufacturing processes.

CHRISTMAS CONCERT AND DANCE TONIGHT
"Christmas carols and Yuletide mirth" are the
b№den of the program for tomorrow night’s
Christmas concert at the First Presby-
terian Church, which will be given
by the students of the School of Archi-

decture and the School of Chemical
Engineering.

SPOFFORD DISCUSSES EARTHQUAKE EFFECT
"Earthquakes and Their Effect on Buildings"
was the subject of the last meeting of
the Civil Engineering Society, which
was held Wednesday evening.

Women’s Auxiliary May Meet
The Women’s Auxiliary of the American
Society of Civil Engineers will meet on
February 17th at 8:00 p.m. at the
Joan of Arc room, in the Hotel
Berkley.

Boston, Mass.
I. The girls' father and mother. This ability for their children-both of an-ther sex. They are brother and sister-children of an-other father, who had died when they were small. At least, he had two daughters and one son. One of the daughters was a fair-haired English lad, Ruben, the apex of the triangle, is a

II. This idea of life that is at once gratifying your sense of benevolence and cultivate your own selfishness. One way to buy all the books you have been crazy to own throughout the year but denied your self, because, after all, books are a luxury, while dinners and movies and Pollitz tickets are star necessities. Buy them all and read them all before you give them away. Save your friends' and relations' and teachers' and editors' leaves for them. Buy the books you know you ought to like rather than those you know you do like. Better still, if the moment comes to part with them, run out and buy a needle or a box of cigarettes or a pair of oxford stockings or an extra toothbrush and keep the books. On that whole everywhere will be much happier, most of us. Austen won't be disappointed by the latest Auden Petsky or the Life of Judge Gairy, when she won't want to know what old Solomon, if, indeed, it were old Solomon, would say if he were in the catch.
HITCHENSON DONS CANONICAL BLACK

Rollo is a great iconoclast. Perhaps it would be surprising if this tall, broad-backed, somewhat morose and unpleasant, now purring and smiling cat, could have a merry ride. - The burlesque of the Rollo boys in literature, the book the old Rover boys were so treaquellnly burlesqued, bat in the main the book is humorous, but much of it is humorous satire. Henry Mencken, humorous magazines are full of the old Britishers. Our literary and decadence of satire. Perhaps it would thundering, and always masculine.

In the twelfth century, the book were those treating of the classical elements of the human foibles.

This Freedom.

Sato Historically Considered
And A Recent American Example

ENGLISH SATIRE AND SATIRIST, by Hugh Walker, New York: E. P. Dutton & Co. $3.00.

In the 1920's a number of English authors were writing social criticism. They dealt with the foibles of their fellow countrymen. They played a scorching light on human foibles. They added an element of vigor and sharpness to their writing. They were, no doubt, a great deal of interest.

A. Stewart, Stephen Leacock, Hey-
