ALUMNI DRIVE FOR DORMITORIES FUND WILL START SOON

WANT MILLION DOLLARS

Would Make Possible Erection Of Ten Additional Dorm Units

At the 118th meeting of the Alumni Council, held January 21 in Wallenberg, a definite start was made on an Alumni Dormitory Fund drive.

Consequently, these plans authorized the appointment of a committee of the Alumni Council to work in conjunction with the class secretaries in an endeavor to raise $1,000,000. This amount would be added to the $2,000,000 which was previously set aside by the Treasurer for the erection of dormitories.

The committee was composed of:

- Charles Hayden '90, President of the Alumni Association.
- Professor Hamilton, Treasurer.
- Mr. J. H. Wills '26, Manager of the Alumni Association.

Mr. Hayden, in introducing the subject, said that the purpose of the drive was to make possible the erection of ten additional dormitory units housing for our students. The need of such units is imperative, as the present dormitory facilities are inadequate to meet the needs of the present student body. He also spoke concerning the necessity for additional dormitory units in order to make possible the erection of ten additional dormitory units housing for the present student body. He also spoke concerning the necessity for additional dormitory units in order to accommodate the increasing number of students.

WILDER DESCRIBES CHEMICAL GROWTH

Technology First Institution To Develop Chemical Engineers

(Continued from Page 1)

partially broken down by the discovery of enzymes.

Period of Industrious Progress

Sclalind research had reached a high degree of efficiency, but the changes were so immediate and so constant that it was hard for the last man to accept. Many problems remained unsolved because no one would risk his money. In spite of these obstacles, the science progressed, and as the country passed through a period of material progress, engineers were given more opportunities.

A period of revolution, the "reign of machines," marked the advance, and the services of one or two chemical engineers were required in all large industries.

Chemical associations and societies spring up. One of the first was the Manufacturers and Chemical Association of America, which took an active part without compensation in all matters concerning chemical industries.

SUMMARY OF THE PAST 50 YEARS

The T. C. A. office will be open as usual during the examination period and the week following.

The T. C. A. office will be open as usual during the examination period and the week following.

When you've kicked the habit, fill your pipe with Prince Albert and light up. The cool contentment in every perfect puff. Doesn't bite your tongue or parch your throat, and PA is so genuinely friendly. It hits your lip and stays with you. We sell it in 5 cent packs, one pound crystal-glass humidors, and PA is still the number one Pipe Tobacco in America.

Don't put off till tomorrow what you can smoke today. Get a tidy red tin of P. A. now. Snap back the hinged lid and release that wonderful stuff—"on the rough stuff" at the very beginning. Just cool contentment in every perfect puff.
