

FENCING TEAM IS TO MEET HARVARD TODAY IN WALKER

Several Veterans Are Back To Help Team in First Contest of Year

HAVE BEEN MINUS COACH

Second Meet Will Be Held With Bowdoin Next Saturday

After practicing faithfully practically all of the first term, although they have been without the services of a coach for the majority of the term, the fencing team open their schedule this afternoon, meeting Harvard in North Hall at 4 P. M. This is the first of two meets this week, the second one being with Bowdoin on Saturday afternoon in North Hall.

These two meets will be about the only opportunity that the Technology supporters will have of seeing the fencing team in action, as the remainder of the meets are away. Manager Wilson has arranged a stiff schedule for the duelling foils men, with several long trips, during the middle of the season.

For veterans the team is in good shape this year with Captain Sam Cole a veteran of three years, former captain Joe Lewis, winner of second place in the intercollegiate last year. Hawthorne, another man who has been on the Varsity several years. With these men as a nucleus around which to build the team, the Tech men despite the fact that they have no coach will be able to give any team a hard battle.

To meet Harvard in the first contest of the season is rather a hard nut for the Engineers to crack but they are in good condition because of their long session of practice. The crimson college always have a good set of fencers, and this year's team is no exception.

The Technology season culminates in a quadrangular meet between Harvard, Yale, Dartmouth and Technology to be held in Cambridge on the 20th of March. The two winning teams in this competition and the first two individual winners will go to New York where they will participate in the Intercollegiate. The intercollegiate are held the first of April.

Since negotiations for a coach from Belgium have failed to materialize in the arrival of a fencing mentor, the foils team has been coachless but the veterans on the team have been doing their bit in the development of the team by instructing the new men.

START COMPETITION FOR MEDAL DESIGN

A competition open to all graduate and undergraduate students in the Institute is to be held to secure a suitable design for a medal to be offered as a prize for work in aeronautics.

A prize of \$25.00 will be awarded for the best design and \$10.00 for the second best, and in case any one of the designs is accepted and a die made from it a replica of the medal in bronze will be given to the student submitting the design. The winning designs will be selected by a committee composed of Professor William Emerson, Dr. J. H. Means and Professor E. P. Warner.

All designs must be submitted to Professor Emerson or Professor Warner before 5.00 o'clock, Tuesday, February 23rd, when the competition closes. Rules and suggestions are given on posters of "Medal Design Competition" posted in the halls.

BELGIAN PHYSICIST WILL LECTURE HERE

Professor Th. De Dondeer, professor of Mathematical Physics at the University of Brussels, is coming to this country under the joint auspices of the Commission for Relief in Belgium Educational Foundation and the Institute. He will be here for ten weeks to deliver two series of lectures commencing March 22.

"The Theory of Relativity" is the subject of the first series and the other is the "Mathematical Theory of Electricity." One lecture of each series will be delivered each week, the meetings being open to all interested. Professor De Dondeer, together with Eddington of England, is one of the outstanding authorities on the Einstein Theory of Relativity.

Competition Opens For A. A. Managers

There is a wonderful opportunity for freshmen to win positions in the managerial department of the M. I. T. A. A., with competition leading to a manager's position in the junior year, now open. Besides the following list of freshmen, Sophomores also are needed for Basketball and Golf managerial competition.

Report at A. A. office any afternoon this week at 5 o'clock.

Freshmen needed:

Basketball	1	Gym	3
Boxing	2	Rifle	3
Crew	6	Track	3
Fencing	2	Tennis	3
Golf	2	Hockey	2

FROSH-LACONIA DEBATE PUT OFF

World Court Action in Senate Causes Delay—Varsity To Meet Tufts

Word has been received from the debating officials of the Laconia High School that they desire to postpone indefinitely their World Court debate with the freshmen, scheduled for February 13, because the recent action of the Senate has made this a settled matter and thus not of value as a subject for debate.

It is quite probable that the wording of this proposition will be changed to fit the new conditions now existing, that is, the teams will debate the wisdom of the Senate's ratification of this measure. However, nothing definite has been decided upon at present, either as to the new proposition or the date of the meet.

Negotiations are now being made with the freshman debaters of Boston University for a debate in the near future, and the plans for this meet will be announced shortly, according to D. M. Fuller, the debating coach.

Tufts varsity debating team will meet the Institute team Friday evening, February 19, in room 5-330, to debate the question, Resolved: That the United States should enter the League of Nations.

The visiting team has had two debates with Bowdoin on this question, taking a different side each time, and has won both debates. To counteract this, Coach D. M. Fuller of the Technology team will use a team made up entirely of men who have had a great deal of experience in debating.

Two members of the Institute team have already been chosen, these being J. W. W. Sullivan G. and H. H. Burt '29. The other man will be decided upon very shortly, and will be announced later by the coach, together with the names of the judges and the members of the Tufts team.

FRATERNITY COUNCIL TO HOLD TEA DANCE

On Friday, February 20, the Interfraternity Council will hold its first tea dance of this season. The dance will be held from 4 o'clock until 7 o'clock at the Fraternities Club at 397 Commonwealth Avenue.

The social committee of the Interfraternity Council has obtained "The Tunesters," well known to Technology dancers, to play. Tickets will be three dollars a couple, and all tables are reserved.

FRESHMEN AND SOPHOMORES

THE annual mid-year competition for positions on the staff of THE TECH opens tomorrow evening at 5 o'clock with a short meeting in the West Lounge of Walker. We can train the number of men set forth in the following list:

News and Sports Department	10
Editorial and Features Department	8
Business Department	12

The work is interesting and the training will prove invaluable. If you want to gain first hand experience in business or the ability to express yourself clearly in writing, come to the meeting and let us tell you about the competition. You need have had no experience. Come out!

TECH SHOW TRIP IS ENLIVENED BY GENEROUS ALUMNI

Dinners, Dances and Recreation Facilities Provided By Graduates

INSPECT UNION COLLEGE

Statements from members of the cast and management of 1926 Tech Show all indicate that they were well received and royally entertained by the Alumni on their trip last week. As M. A. Collins '27 puts it, "The entertainment was just plain lavish."

While in Hartford a party for the cast and management was arranged at the Cadawaller home in Manchester, Conn. From Hartford they traveled by special train to Pittsburg.

In Pittsburg a supper was given to the entire company at the University Club and recreation was provided in the nature of a swim at the Pittsburg Athletic Club. After the show a dance was held which was attended by many friends and relatives of the alumni; music was furnished by some of the Tech Show orchestra and some specialty acts were put on by the show members, impromptu. This party was voted the best of the trip.

In Buffalo lunch was served at the Buffalo Athletic Club and a tea dance was held in the afternoon at the Danforth home, the entire company in attendance. After the performance in the evening a dance was given for the company in the Consistory Theater building.

Dinner in Schenectady was furnished by the Alumni at Union College after which an inspection of the college was made. After the show all were quartered at the homes of the Alumni or in fraternity houses.

Annual competitions in all departments: business, editorial, New and Sports, of THE TECH open at a mass meeting to be held in West Lounge, Walker, tomorrow afternoon at 5 o'clock. All men interested in entering competition, leading to positions on the Associate Board, should attend this meeting. No previous experience is necessary.

PROFESSOR WARNER WRITES FOR REVIEW

Tells of Airplane Travel Over Europe Last Summer

An "Aeronautical Engineer Abroad" by Professor E. P. Warner '17, Head of the Aeronautical Course, is one of the features of the February issue of The Technology Review, the Alumni magazine.

Quoting the Review, the story gives "views on many more phenomena in Europe than those merely seen from the air." The article is accompanied by a number of photographs taken during the trip. Of interest is the fact that Professor Warner used airplanes whenever possible as a means of transportation. Not only does he discuss aeronautical conditions in Europe, but comments on the political and economic situation in several countries are made.

Professor R. E. Rogers has written the story of the annual banquet of the Alumni Association held last month in Boston. On the first page is a woodcut by Kenneth Reid '18, of Mr. D. W. Morrow who was the principal speaker at the banquet. The cover design is another of the pencil sketches of the series of the Institute buildings by Samuel Chamberlain '18.

DORM DANCE TO BE HELD NEXT FRIDAY

Morey Pearl's orchestra has been secured to furnish music for the informal Dorm Dance to be held Friday, February 19 in the Main Hall, Walker, from 8 to 12 o'clock. Matrons for the affair will be announced in a few days.

Tickets will be put on sale tomorrow and Friday in the Main Lobby from 12 to 2 o'clock, and the sale will continue throughout next week. The charge will be \$2.00 a couple.

The same orchestra played at one of the earlier dances of the year. In the previous engagement they rendered a good account of themselves, and they are expected to give a good program next Friday.

During the remainder of the year, arrangements for Dorm Dances will be in charge of junior assistants of the Dorm Dance Committee. All details for the coming event are in charge of E. R. Hayes '27.

Professor Lewis To Be Speaker At Minnesota School

Will Speak at University of Minnesota—To Address Duluth Alumni Also

Professor W. K. Lewis '05, Head of the Department of Chemical Engineering will address the students of the School of Chemistry, University of Minnesota, on February 16th. In the evening he will speak at a meeting of the Faculty of the Chemistry and Physics Departments and Graduate students.

"A New Method in Engineering Education" will be the subject of the student address. Professor Lewis will tell of the methods employed in the School of Chemical Engineering Practice of the Institute and the system of having students at the various stations at industrial plants. With this system, graduate students and some undergraduates are sent to certain designated plants and there work under the supervision of Institute instructors, usually for a six month period.

At the evening meeting Professor Lewis will discuss the "Amorphous State of Matter," and will also give a brief resume of the morning address. A film will be exhibited showing the work of Technology students at one of the stations.

The Technology Alumni at Duluth will hear Professor Lewis on February 15, and at that meeting he will tell of the work of the School of Chemical Engineering practice.

LECTURES ON ATOMIC THEORY TO BE GIVEN

Dr. Darrow to Deliver Three Lectures in March

Three lectures on "Contemporary Atomic Theory" will be delivered by Dr. Karl K. Darrow of the Bell System Laboratories, the first on Friday, March 5 at 2 o'clock in room 10-275 and the remaining two at the same hour and in the same room on March 12 and 19. These lectures are open to all interested and are to be attended by graduate students and Seniors in Course VI-C, Department of Electrical Engineering.

Mr. Darrow is a graduate of the University of Chicago, University of Paris, University of Berlin, and received his Ph.D in physics at the University of Chicago in 1917. Mr. Darrow was formerly engaged in preparing studies and analyses of published research in various fields of physics for the Western Electric Company. He is now reviewing scientific literature for the Bell System Laboratories and is the author of a series of papers on "Some Contemporary Advances in Physics" which have appeared regularly in the Bell System Technical Journal since October 1923. These papers are comprehensive "abstracts and reviews of such recent researches in physics as appear to him of special interest."

After the lecture the speaker will be glad to answer questions or to confer with those interested in relevant problems.

CONCERT SERIES IS PLANNED FOR STUDENT BODY

Will Be Under The Direction of Mr. Arthur Whiting of Boston

THREE CONCERTS IN ALL

First of Series To Be Given Next Tuesday at the Institute

Co-operating with the Corporation of the Institute, Mr. Arthur Whiting, well known Boston musician, will present a series of three concerts February 16, March 9, and March 30 at 8:15 o'clock in room 10-250. All members of the staff of the Institute and their families, as well as the students, are invited to attend.

These concerts are taken from a series which Mr. Whiting has been presenting at Yale, Harvard and Princeton Universities, and are planned to give a brief insight into several different periods of musical history. Mr. Whiting will preface each concert with a short outline of the particular period under discussion, and he and his associate artists will follow his comments by the playing of illustrative numbers. The programs are offered as an informal addition to the series of general studies given as a part of the class room work.

Whiting Well Known in Boston

For a number of years Mr. Whiting has presented a series of 13 concerts at the leading Eastern universities under the auspices of the music departments of these schools. As it has long been felt that there is a lack of musical appreciation at Technology, the Corporation decided on this series of concerts, and, through the co-operation of Mr. Whiting, secured him and his associates to present the three programs.

Mr. Whiting was for many years well known to the older generation of music-lovers in Boston as one of the leading interpreters of the music of Brahms. He is an accomplished pianist and also plays the clavichord. Besides this Mr. Whiting has always been noted as an ardent advocate of musical education.

FIRST OF RELIGIOUS SERVICES TOMORROW

Christian Association Complies With Chapel Demands

Professor Scamell of the English Department of the School of Business Administration of Boston University will be in charge of the first of the weekly religious gatherings to be held this term in the East Lounge, Walker, tomorrow at 12:30 o'clock.

In response to a demand for some form of chapel to be held at the Institute, this series of services is being started this term under the direction of the T. C. A. Prominent business, educational or religious men will deliver short addresses and short devotional exercises will complete the services, which will be held every Thursday during the noon hour.

CALENDAR

- Wednesday, February 10
- 4:00—Aeronautical Society Managing Board meeting, room 3-312.
 - 6:00—U. S. Chemical Warfare Society dinner meeting, North Hall.
- Thursday, February 11
- 12:30—T. C. A. Devotional meeting, East Lounge.
 - 1:00—Chemical Society Trip to Revere Sugar Refinery. Meet at Chemical department headquarters.
 - 5:00—Institute Committee meeting, Faculty Dining Room.
- Friday, February 12
- 5:00—Sedgewick Memorial Lecture, Huntington Hall, Rogers.
 - 5:00—Chemical Society officers meeting, room 3-312.
 - 5:00—Meeting of Song book Committee, Walker Committee Room.
 - 5:15—Chess Club meeting, Walker Library.
 - 6:00—N. E. Section, American Chemical Society, Supper, North Hall.
- Sunday, February 14
- 4:00—Popular Science Lecture, Prof. Franklin, room 10-250.

As We Like It

"LOYALTIES"

The instinctive tendency of a class to clannishly hang together in defense of one of its members is powerfully brought out by Galsworthy in his play of racial differences: "Loyalties."

Though fearing the accusation truthful, the fellow club members stand firmly on the side of one of their race, and staunchly try to refute the damning evidence of the Jew.

De Levis, the wealthy Jew, who proves himself such a thorn in the flesh, is an interesting bit of character study.

Though a trifle too emotional in spots, where the actors were a wee mite too distressed, the play was most effective. The loyalties to family, race, and club were exceptionally well handled.

"JOHN BULL'S OTHER ISLAND"

Appropriately introduced by a medley of Irish airs, George Bernard Shaw's 4-act comedy, "John Bull's Other Island," opened at the Copley Theatre Monday evening before a house filled to capacity.

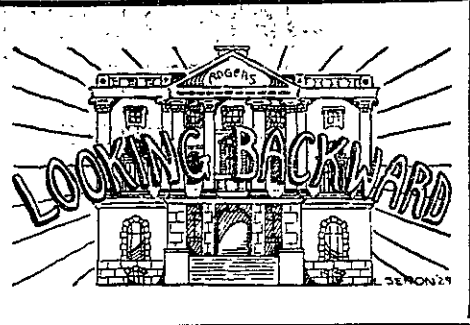

In the first act we meet a typical and likeable Irishman, and just as we reach the point where we expect and desire to see more of him, he is crudely banished from the story.

Very little action takes place and the "life" of the play depends upon the conversation and the Irish wit that permeates the production.

Alan Mowbray, as Thomas Broadbent, the conceited, blithering, blundering Englishman, travelling in Ireland offers some very fine acting which was appreciated by the audience.

OTHER PLAYS

- CASTLE SQUARE: "Able's Irish Rose." - In its 19th week.
COLONIAL: "Music Box Revue." - The usual musical show.
HOLLIS: "The Poor Nut." - The brown bagger goes a fraternity.
MAJESTIC: "The Big Parade." - A ripping good moving picture.
NEW PARK: "Rain." - Hurrah for Jeanne Eagles!
PLYMOUTH: "Rainbow Rose." - Rather entertaining.
SHUBERT: "Gay Paree." - Revue that one praises until one goes.
TREMONT: "No, No, Nannette." - One of our old favorites.
WILBUR: "Is Zat So" - A very amusing show.

40 Years Ago This Week

A professor recently described optics as fascinating. Many found it so in the recent examinations if the definition given by Webster is accepted.

25 Years Ago This Week

Four hundred American colleges and institutions of higher learning are to have representatives at the presidential inaugural next month.

10 Years Ago This Week

At the annual Banquet the chief topics of discussion were the dedication of the new buildings to take place next summer, and the need for an adequate dormitory.

Professor Would Inject Science Into Government

In a recent interview in the Yale Daily News, Professor Hall of Wisconsin expressed his views on the place of science and the scientific method in government.

Modern material science has applied itself directly to the problems of the human life about it. It has achieved wonders in creating engines and instruments of destruction, for instance.

To apply the scientific method to a study of judicial procedure is nothing more complicated than to think up some way of finding the actual facts.

"WE SHALL—"

AS OUR new organization assumes the responsibility for the regular appearance of THE TECH, we are reminded by the firm pressure of established precedent that we are expected to make a formal statement of a definite policy.

In our news columns, we shall attempt to present the information concerning Technology happenings, accurately and with due regard for the unwritten laws of journalism as we interpret them.

We have promised nothing more than THE TECH has always stood for, because we are aware that each new volume vainly hopes to build upon the successes of the previous organization and desires to profit by its mistakes.

The most noteworthy thing about the trip taken by Tech Show was the generosity and cordiality shown to them by Technology Alumni in the various cities visited.

This experience is indicative of two things: The Show must have been, in personnel and conduct, pleasing to the Alumni. It is logical to deduce that they merited the wholehearted attention they received.

SHOPPING

THE shopping season reopens. The semi-annual contest to avoid Professor Bore or to make sure of being in Professor Easy-marker's section is again under way.

This "shopping" for instructors is the despair of course heads. There was one case last year in a mathematics course, at the beginning of which, three instructors found themselves with ten or twelve students each and a fourth with over sixty; the official section assignment had divided the groups evenly.

Of course, it is hard on a man who has figured with mathematical exactitude just how to divide the burden of teaching evenly among the instructors in any subject to find the personal popularity or unpopularity of an individual setting his plans at naught.

"Shopping" therefore does some good inasmuch as it suggests to certain of the Faculty the possibility of improvement of their teaching. It does to some extent, what the European system of freely exchanging universities (getting credit at any one of the group for work done at another university) does for the Faculties of European schools: it points out the best and the "weak sisters" and thus tends to improve the quality of the teaching staff.

HOCKEY TEAM HOLDS EARLY WORKOUTS

Improvement Is Shown As Season Progresses

Practice every morning at the Boston Arena before the rest of the world has finished dreaming has earned for Coach Bill Stewart and his Technology hockey team the unique name of "The Merry Milkmen." Other colleges are able to practice afternoons because of comparatively short hours in classes, but the embryo engineers are never able to gather afternoons before five o'clock.

Such a state of affairs however was not long to trouble the Cambridge team for the players agreed to rise early and practice before school hours if Manager Carroll could secure the use of the Arena for such a time. Through the courtesy of George Brown, owner of the Arena, the ice was reserved for Technology players each morning from six o'clock to eight.

In the beginning there seemed to be little or no form to the team and they were soundly trounced in their first two matches by the Boston University Terriers and the Boston Col-

lege Eagles. In both of these encounters the players failed to team up and were told so in no gentle terms by Boston sports writers. Starting with the Harvard game however the sextet suddenly came to life and gave Ned Bigelow's charges an unexpected battle, outplaying them for two periods, only to weaken slightly in the last few minutes. They lost by only two goals.

It was not until the team journeyed to Amherst to meet the Massachusetts Agricultural College that they broke into the winning column. The Scientific Farmers were blanked by a 3-0 score. Next, a return game was played with Boston University and, to the surprise of nearly every hockey fan, the Technology team rushed the Terriers off their feet, winning by a 2-1 score in fastest and hardest played college game of the year.

Since this game, the team has been obliged to cancel dates because of the term examinations. Now that these are over, they are ready to take up their sticks where they left off. The Engineers have a better chance this year than ever before in the Windsor Cup Series. The Bates game at Lewiston, Maine, on Saturday should put the team on edge, for their coming games.

Freshmen Showing Up Well

On last Saturday the Frosh team was unexpectedly beaten by the Andover sextet. Fairly good hockey was displayed by both teams during the first two periods. At the end of this time, the Cambridge team broke up slightly and allowed the prep school boys to slip the puck into the cage three times. Poor ice handicapped the teamwork of both outfits, so little could be judged by the score.

Crosby at wing, and Palmer at center, showed up exceptionally well, and it is about these two that Coach Bill Stewart hopes to build his team. Cullinan also displayed considerable speed at right wing. When Richardson acquires a little more experience at the cage he should develop into a really good goal guard.

Hedlund Pleased With Showing of Mile Relay Team

"Considering the fact that the average of the quarters run by the Technology relay men in the B. A. A. meet was 52 1-5 seconds, which is exceptional for a board track and that they were up against Harvard's best in the short distance runs, the boys did themselves proud in that meet on Saturday night," is the way Coach Os Hedlund expresses his opinion on the result of the showing made last week.

52 1-5 seconds on a cinder track is stepping right along but to circle a 12-laps-to-the-mile track, three times in that mark is a very credible showing for any team. Cy Meagher in his race against O'Neil ran one of the prettiest races he has run in a long time. Meagher, if he comes as fast in the next year or two as he has in the past year will be a worthy successor to George Leness, who receives his sheepskin this June.

Manager John Collins of the freshman team reports that arrangements have been made for a dual meet with Northeastern to be run the 20th of this month. There are some fast runners on the frosh outfit. Although their relay team took a defeat in the B. A. A.'s on Saturday night, this is hardly a discredit to their running ability, as the field was so large that the team getting the breaks on the passes was pretty sure to come out in the lead.

Things are beginning to look pretty bright over at the track house just now with such men as Jack Wiebe, Hank Steinbrenner and Marv Rick donning their running togs every day to work out on the board track.

Sports Desk

After reading the first editorial in Monday's issue of THE TECH and harking back to certain specific instances where the Boston papers have failed to give a Technology team due credit for a victory, we come to the conclusion that there is more truth than poetry in it.

A good example of the attitude taken by the metropolitan journals was last Sunday morning in a certain Boston daily. The headlines on the sporting page contained statements of the results of several minor relay races, which were run at the B. A. A. games, but failed to mention the defeat of the Harvard team by Technology. It seemed evident that they considered the Technology win more or less of a fluke or mistake, but such was not the case.

This opinion is also true regarding Technology athletes who excel in any particular branch of sport. They have to be almost world beaters before they win any recognition from the press.

This attitude probably, comes to a certain extent, from the old belief that brains and brawn do not go together. As this school is not one of the so-called athletic colleges, does not offer monetary and other inducements to crack prep school athletes and does because of its reputation for championship teams, sports writers get the idea that we are only a bunch of grinds, when such is not the case.

Perhaps another reason for this attitude is the fact that we have not a football team here and since the arrival of college football to its prominent place on the pages of a paper, the athletic ability of a school is judged by the success of its football team.

WILLIAMS IS NEXT FOE FOR SWIMMERS

Greatly strengthened by the addition of last year's star dash man, Armstrong, who has returned to school this term, the swimming team meets the Williams team at the Cambridge "Y" on Saturday night. Since practically all of last year's team are back on the squad this year the Tech team will give the Williamstown water men a hard battle for honors. This is the last, chance to see the Technology team in action as this is their final appearance at home.

Williams will come to Cambridge with a strong team, even more powerful than before the Christmas vacation. The freshmen become eligible for the Varsity team after the first term and as there are several stars on the Williams yearling outfit, they will be a welcome addition to the squad.

As far as can be learned at the present time there were no men lost to the swimming team by the faculty ruling, all men returning in fine fettle.

McCarthy's Men Back Ready For Hard Practice

After a good ten days' vacation, Coach McCarthy's basketball men are back ready for action. Action is very much in evidence in the Hangar gym every afternoon this week and the rest over the recess seems to have furnished renewed vigor to the squad to quite a large extent.

At the present writing, the Cardinal and Gray quintet have played half of their games. Of the eight encounters played so far this season, the Engineers have earned an even break in the number of games won and lost, winning four and dropping as many. In the opening engagement the Institute court team snowed under the New Bedford Textile five by an overwhelming score in the Hangar gym. A week later the team journeyed to Hanover where they met their first defeat of the season at the hands of the big Green team of Dartmouth by a 38-21 score.

During the next week, the Technology five played two hard games, losing both tussles. Tufts had a four

point lead over the Tech men and a day later Brown after being behind during the greater part of the game came to the fore to win by a bare margin of one point, the final score being 21-20.

After the Christmas vacation, the Cardinal and Gray took the Lowell Textile five into camp, winning by a 48-26 score. Harvard turned the tables on the Institute basketekers in the Heminway gym outclassing them to the tune of 28-23.

In the two remaining encounters, the Engineers had little trouble in winning over Rhode Island State and Northeastern, respectively holding the lead all the way through in both games. Although the team has broke even in the win and lose column, the team is considered a success taking into account the fact that three of the four losses were decided by a couple of points.

Saturday the Cardinal and Gray play Northeastern in a return engagement in the Huntington avenue gym and look good for another triumph over the "Y" boys.

NOTICES

OFFICIAL

CHORAL SINGING G58

Mr Townsend will meet the class in Choral Singing (58) for the first exercise at five o'clock on February 12 in room 5-330. The class will meet on Mondays and Fridays throughout the second semester at the same hour.

AIR SERVICE SCHEDULES

Schedules for this term's Air Service classes have been posted on the bulletin board in room 1-080.

U. S. NAVAL AIR SERVICE GROUND SCHOOL

There will be two lectures per week in this subject, every Tuesday and Thursday evening at 7, in room 5-226. The course will run until May 11, 1926.

E21 REPEAT

Students desiring to take E21 during the current term should meet Mr. Copithorne in room 2-278 at four o'clock on Thursday. The hours when the course will meet are to be finally determined. Bring schedule and tabular view. The text book for the first part of the term will be Mr. Roberts's "Introduction to Politics."

G-3, INTERNATIONAL LAW

Students of courses VI and XV, members of the ROTC and Seniors who take this course by special arrangement on account of conflicts should leave their registration cards at Professor Tryon's office, room 3-107.

UNDERGRADUATE

T. C. A. EMPLOYMENT BUREAU

To enable this Bureau to function efficiently it will be necessary for all men with application cards on file to put their new schedules thereon. It will be difficult to give assistance to any man whose second term schedule is unlisted.

SENIOR ELECTIONS

Nominations for the Senior Week Committee and Class Day Marshall are due in the Information Office on February 20, before 1 o'clock. The elections for these offices will be held Wednesday February 24.

AMERICAN CHEMICAL SOCIETY

There will be a meeting of the Society Friday evening February 12, in room 10-250, from 6 to 10.

Coach Rawson will be at Hangar Gym at 4:00 P. M. every day this week. Everybody come out for practice.

INSTITUTE COMMITTEE

There will be a regular meeting of the Institute Committee tomorrow afternoon at five o'clock in the Faculty Dining Room.

GYM TEAM PREPARES FOR NAVY CONTEST

On Saturday afternoon at Annapolis the Varsity gym team will meet the Navy in the first meet of the year. Technology has a number of veterans, but will experience difficulty in winning as Annapolis always has a fine team.

Five men will make the trip: Captain Smith, Newcomb, Waller, Burgess, and either Hudson or Stevens. Smith is an expert on the parallels, while Newcomb and Waller have had experience on the rings. Waller is also a veteran tumbler and Newcomb is adept at rope climbing.

The Varsity have been holding practice all of the fall in Walker gym and look about fit to give the Navy a good battle. There are about 25 men who are reporting regularly on the squad which is composed of both Varsity and freshmen.

AERONAUTICAL SOCIETY

The Managing Board of the Aeronautical Engineering Society will meet today at 4 o'clock in room 3-312.

LECTURE SERIES ARE OPEN TO THE PUBLIC

Elton, Bigelow, and Whitehead
Lowell Institute Speakers

Three series of free lectures are being given by the Lowell Institute during February and March. One of these is by Oliver Elton, late Professor of English Literature in the University of Liverpool, who is giving a series of six talks on "Some Eighteenth Century Writers." They are to be given at Huntington Hall, beginning February 15 and continuing until March 5.

Henry M. Bigelow, Curator in the Museum of Comparative Zoology at Harvard is delivering the second series which will be on "Recent Studies of the Northwestern Atlantic, Physical and Biologic." These also will be given in Huntington Hall and begin tomorrow, continuing until February 26.

A third series is being delivered at King's Chapel and is divided into two parts. The first, by Alfred North Whitehead, Professor of Philosophy at Harvard, is entitled "Religion, Its Passing Form and Eternal Truths," and consists of four talks, the first of which was delivered February 1.

NAVAL AIRMAN WILL COMMAND EXPEDITION

Lieutenant Commander Reginald Byrd, U. S. N., who addressed a large audience of Technology December 21st, telling of his experiences during the National Geographic Society Arctic Expedition last summer, is going to attempt again to reach the Pole. He has been notified by the Navy Department of his appointment as commander of the Wilkins Expedition which will leave this coming summer.

It has not yet been announced what part airplanes will play in the expedition but the appointment of an experienced man as Lieutenant Byrd, makes it appear probable that the attempt will be made to fly to the Pole. Preparations for the trip are now under way and Lieutenant Byrd is supervising the preliminary organization of personnel and equipment.

CHESS CLUB WILL DISCUSS YEAR PLANS

At its first meeting of this term to be held Friday evening in the Walker library at 5:15 o'clock, the Chess Club will discuss the time and place for the regular meetings.
