

ADVISORY COUNCIL COMMENDS ACTION OF TITLE HOLDERS

Intercollegiate Titles In Foils And Tumbling Held By Institute Men

STRAIGHT "T"'S AWARDED

Propose I. C. A. A. A. and New England Meets Be Held on Same Day

At the monthly meeting of the Advisory Council on Athletics held last evening the Council went on record as officially commending two members of Institute athletic squads who in two weeks captured two intercollegiate titles. Last Friday Joseph L. Lewis '26 won the intercollegiate foils title and on March 29 Ivan I. Waller '27 secured the intercollegiate tumbling title. Records established by Elliot B. Grover '28 and Albert T. Puschin '28 in swimming meets were accepted as official Institute records.

Considerable discussion ensued over the proposal received that the I. C. A. A. A. meet and the New England meet be held on the same day. This would necessitate Technology withdrawing from one of the competitions and received little favor. It had been proposed that Technology enter the New England's only, but as this would prevent the Institute men from even competing for the intercollegiate titles the proposal was not favorably received.

Thanks were officially extended to Tech Show by the Council for the financial support offered to athletics by the show. The first \$2000 of profits obtained and half of any amount over this has been pledged to athletics by the Show organization. Appreciation was also expressed to the six fraternities which acted as hosts to visiting high school boys during the show.

(Continued on page 4)

GOODWIN TO GIVE NEXT COURSE TALK

Will Outline Course XVI Today —Lindgren Explains Course XII Tomorrow

Continuing the Course lectures for the freshmen, Professor Harry M. Goodwin '90, will talk on the qualifications of Course XIV today in room 10-275 at 1 o'clock. Tomorrow Professor Waldemar Lindgren will talk on the course in Geology, of which he is in charge.

Professor Goodwin will outline the course in Electro-Chemical Engineering, and explain some of the opportunities which it presents. This course aims primarily to prepare students to enter the various electro-chemical, electrothermic, and electro-metallurgical industries. The instruction given is of so broad a character that students completing it are prepared to undertake various lines of purely electrical and chemical work as well as that in electrochemistry.

Professor Lindgren's talk to the first year men tomorrow on the subject of Geology and Geological Engineering will consist of an outline of the course and the advantages derived from it. Recently the geological engineer has won a place in many technical enterprises related to Mining Civil Engineering and water supply. Course XII is primarily designed for this purpose, although it is also of advantage to those intending to study geology in the more theoretical aspects.

These lectures will both be held in room 10-275 at 1 o'clock, and will last about a half hour. Any upper-classmen interested may attend.

Boston Theatres Show Movies Of The Parade

Many of the Boston theatres are showing pictures this week of the Circus Parade, which were taken last Thursday by the Pathe News Service.

All the freaks and animals are pictured in action while the Committee rides serenely in an open hack. No motion pictures were taken of the Circus itself.

CHARLES MOORE TO GIVE ALDRED TALK

In continuation of the Aldred lecture series, Mr. Charles Moore of the Congressional Library at Washington will endeavor to present his views on "The Fine Arts of Work" in room 10-250 on Friday at 3 o'clock.

Mr. Moore is a member of a number of art societies, and as a novel idea will attempt to combine art and engineering. Graduated from Harvard in 1878 Mr. Moore has spent a number of years in art work. He is an original member of the National Committee of Fine Arts; having held the position of chairman since 1915, and is a member of the National Gallery of Arts.

At present, he is the acting chief of the division of manuscripts. He belongs to the Century and Harvard Clubs of New York.

REDEMPTIONS DUE FOR JUNIOR PROM

Mal Hallet's Eleven Piece Orchestra Will Play For Dancing

Final arrangements for the Junior Prom of the Class of 1927 are rapidly being completed with the event but two weeks distant. The Prom Committee has promised that this year's party will be the best of recent years owing to the fact that the Committee has been successful in obtaining Mal Hallet's Original Eleven Piece Orchestra to supply the music.

This orchestra appears to be very popular for Junior Prom music. Besides playing at Technology the group play at the Boston University Prom and probably at the Boston College Junior Class event. At the present time the group is completing its third year at the Arcadia Ballroom in New York City and their appearance at the M. I. T. Prom will be the first engagement of their New England Season.

Those who have signified their willingness to act as Patrons and Patronesses for the Prom number forty-five, include Governor and Mrs. Fuller, President Stratton, and Dean and Mrs. Talbot. The Committee has made the request that all those attending the Prom refrain from presenting corsages to their girls in order that some of the heavy expenses of the week may be relieved and also in order to give the affair a more uniform appearance.

Gov. and Mrs. Fuller Are Patrons
One half of the sign-ups sold were redeemed at the end of last week. Redemptions will be concluded Thursday and Friday of this week from 1 until 3 o'clock in the cage in the Main Lobby. The price of redemptions is seven dollars and stag and chaperone tickets will also be put on sale at this time for six dollars. Stag tickets do not include supper except by special arrangement with the committee. There are still a moderate number of tickets for which sign-ups have not been made and these may be purchased for the regular price of \$12.00.

Seating assignments will be made on Thursday and Friday of this week at the redemption booth and any further seating preferences should be sent in immediately to Lee McCann in the Walker Memorial Committee Room in the basement of Walker in order that they may be assigned Friday. Sign-up statistics show that Juniors will compose over 60 per cent of those attending the Prom with members of the Senior Class making up the majority of the remainder.

SOSMAN TO LECTURE ON ELASTIC WAVES

Dr. Robert B. Sosman, research geologist with the Carnegie Geophysical Institute, will deliver his third lecture today on "Elastic Waves in the Actual Earth" in room 4-370 at 4 o'clock this afternoon. This is a continuation of the lectures conducted yesterday and Monday, in which he discussed elastic waves in a homogeneous earth and a radially heterogeneous earth.

In the first two lectures, the form and existence of waves in a hypothetical earth was discussed in preparation for the more complicated discussion of waves in a complex sphere such as the earth really is. The lectures will continue throughout this week and next, and will discuss the structure, formation and composition of the earth's interior.

SENIORS TO CLOSE ENDOWMENT FUND CAMPAIGN FRIDAY

Executive Committee Reports Nearly Half of Seniors Have Subscribed

MEETING HELD AT ROGERS

Members of Three Courses Have Made No Contribu- tions to Fund to Date

With but three days remaining of the Senior Endowment Fund Campaign, there are over 375 members of the 632 comprising the Class who have not signed for their share of the Endowment. According to David A. Shepard '26 members of the Class are showing interest, but several of the members of the Liason Committee are not responding and there is danger that the Class of 1926 may fail in its purpose of providing for the Institute an Endowment Fund of \$125,000 due in twenty-five years.

For the first time, group insurance is being used which means that instead of all the Seniors taking medical examinations, just the twenty-five men who are volunteering will be examined with the policies covering them, with the Institute named as the beneficiary. Consequently there is a minimum of trouble in participating in the Endowment.

Inquiries having been made concerning fully paid-up policies, Harry U. Camp '18, the Aetna Life Insurance representative, stated that a cash payment of \$100 will be accepted making the \$250 share paid in full. Most men are accepting the yearly payment plan extending over the twenty five years, the initial premium being ten dollars. This covers the expenses of advertising, mailing lists and provides a small fund to cover lapsed policies, as well as the actual payment of the first premium. Premiums after this year will be \$8.70 each.

Standing of Courses In Senior Endowment

I	41%
II	32%
III	23%
IV	13%

Dr. Tweedy Gives First of Series of T.C.A. Talks On Religion and Science

"Jazzing Life" To Be Subject Of Talk Tomorrow Noon In East Lounge

"There is absolutely no conflict between science and religion. Any god in the world works through science, and scientists in their research are merely tracing the works of God," was the opening sentence of the first of a series of talks by Dr. Henry H. Tweedy of the Yale Divinity School yesterday afternoon in room 10-250, under the auspices of the Technology Christian Association. The subject of the talk was "Belief in God and the World of Facts." The presiding officer was President Samuel W. Stratton.

In his talk Dr. Tweedy pointed out that if thought and reason were applied to religious problems in the same way that they are applied to scientific problems, we arrive at an atheistic conception of the universe. The speaker showed that if a man were analyzed in a purely material sense, he would prove to be merely three pails of water and a package of salts, which is the ultimate end of man anyway. Thus the finest things of man are not of a material nature,

MASS MEETING OF ALL MEN INTERESTED IN SPORTS IS CALLED FOR NEXT FRIDAY

Dr. Rowe's Statement To The M. I. T. A. A.

"The future of Technology athletics is in possibly a more hazardous state than at any time in the last ten years. Decrease in the student body has meant a decrease in income to the Athletic Association without any material change in necessary expenditure. You have been offered help in your emergency by the Tech Show, and you have asked the Corporation for an increase in the Student Tax. Have you any right to expect help from the Corporation unless you show yourselves capable of self-help? We are facing a definite emergency, the future of Technology athletics rests on the success of your efforts. Can you afford to fail?"

Scenic Movies To Feature Freshman Lecture Tomorrow

Films Presented by Courtesy Of a Number of Western Railroads

Another moving picture is to be the feature of the weekly freshman lecture. Six reels offered by a number of railroads, showing various national parks in this country, will be shown in room 10-250 tomorrow at the usual hour, 4 o'clock.

Foremost on the program will be a colored film which was recently included in the bill at the Metropolitan, showing the Grand Canyon of the Colorado in all its glory.

Besides the colored reel, various views of the Yellowstone country are represented. Entering by the Gardner Gateway one sees in detail the many terraces at Mammoth Hot Springs, the Middle and Norris Geyser basins and the section around Old Faithful. Old Faithful as well as the Giant Geyser appear in full action.

One reel is devoted entirely to Rocky Mountain National Park. It depicts the country of the Colorado Rockies near Estes Park.

Two reels showing Glacier National Park in northwestern Montana, adjoining the Blackfoot Indian Reservation, have been spoken of as the most marvelous photographic masterpieces of scenic photography ever produced. They have been

(Continued on Page 4)

FIVE SPORTS MAY BE DROPPED NEXT YEAR, SAYS ROWE

Crew and Track Practice To Be Called Off For The Meeting

PREDICAMENT IS SERIOUS

A mass meeting of all Technology athletes has been called for next Friday at 5 o'clock in room 10-250 when plans for the M. I. T. A. A.'s participation in the Tech Show combine will be discussed. Dr. Allan W. Rowe '11, secretary of the Athletic Advisory Council, will be the principal speaker.

Although expectations ran high at the start of the drive which the A. A. is carrying on to sell Tech Show tickets to the public, and it was pointed out at the first meeting of managers and Tech Show that no difficulty should be experienced in making \$2000 profit for athletics, later developments have shown that there is hard sledding ahead if the desired sum is to be realized.

At a second meeting Monday evening discouraging reports were given by managers of the various squads, and as the need for the additional fund is becoming more evident every day, it was decided to hold a mass meeting Friday to help put the drive over. Speaking at Monday's gathering, Dr. Rowe pointed out that unless the \$2000 profit for athletics is realized, at least five sports will be dropped next year.

Practice Cut Short for Meeting
All squads now practicing for the Spring sports will be excused from practice at 5 o'clock on Friday so that they may attend the meeting. Coach Haines of crew has ordered all shells to be off the river at that time and Coach Hedlund of the track team has also ordered his men to report at 10-250 rather than at the track.

According to officials of the A. A., that organization faces this year a deficit of \$2000, which can be made up in no other way than by the Tech Show combine. It has been pointed out by Dr. Rowe that there will be no increase in the student tax, or any other help from the Corporation, unless the men in the A. A. can show that they are interested enough in keeping the sports now at the Institute to take advantage of the help which Tech Show has offered.

All members of athletic squads, whether practicing now or not, are asked to realize the importance of attending the meeting in 10-250 Friday at 5 o'clock.

X-RAY ANALYSIS TO BE T. E. N. FEATURE

Research Laboratories Publish First Report of Work

Methods of employing X-Rays in the determination of the molecular structure of metals will be discussed by R. H. Aborn and E. W. Bruggmann, research assistants in the Department of Chemical Engineering, in the feature article of the April number of T. E. N., which will be put on sale next Monday. There will be an editorial on "Classes and Courses," which is the first of a series discussing non-technical controversial subjects of student life and organization here.

Prominent authorities admit that the application of X-Rays to the analysis of metals has been developed to a high degree in the Research Laboratory of Applied Chemistry, and this article is the first report to come from the laboratory on this subject. Most of the work has been done by the co-authors of the article.

CALENDAR

Wednesday, April 7

4:00—Tweedy Lecture, "Jesus and the Successful Life," room 10-250.
4:00—Sosman Geology Lecture, room 4-370.
5:00—Senior Week Committee Meeting, Walker Committee Room.
7:00—Alpha Chi Sigma Smoker, Faculty Dining Room, Walker.
7:00—Civil Engineering Society Meeting, North Hall, Walker.

ANOTHER POINT OF VIEW

A RECENT suppression of the sale of The American Mercury in Massachusetts has caused considerable comment. The sense of propriety of the Boston Watch and Ward Society has been offended.

The cause of the suppression was an article upon religion and sex. Surely any attempt to enlighten the world should be encouraged, not suppressed. Not so with the Boston Watch and Ward Society, an organization of philanthropists who endeavor to make Boston a better place to live in—to their way of thinking.

It is somewhat alarming to see the liberties of the Boston public so disregarded by these "rigidly righteous" persons. By their actions they defeat the purposes for which they stand.

Reforms are necessary to the life of every community but care should be taken to consider each question from the viewpoint of the majority. The original colonists came to America to escape the reforms of Europe only to experience the return of that which they sought to avoid—more reform leaders.

Boston is a modern city. It is confronted with serious problems. To solve these problems, men should be influenced by modern thought, not prejudiced by the ideals of the past.

O ye who are so good yourself, So pious and so holy, Discourt what scant occasion gave That purity ye pride in, And (what's often more than all the rest) Your better art of hiding. —Burns.

Joe Levis' victory at the Intercollegiate Fencing Meet in New York last week should go a long way toward disproving the old saw about not having time for activities and athletics at Technology.

SUPPRESSION, CREATOR OF DESIRE

THE MOST popular indoor sport at the Institute would seem to be razzing the Walker Memorial Dining Service. Undoubtedly this action is in part called for, but the question arises as to whether the fellows who do the razzing are not in part responsible for the service they receive.

Consequently when a customer comes in and sniffs sneeringly at all the food, asks for the soup when he is opposite the meat counter and vice versa, mumbles his orders to all the men behind the counter, changes his mind frequently, and, in short, goes out of his way to be unpleasant, it is not to be wondered that he receives poor service.

Therefore it would seem to be up to each student to do his bit for the service by thinking a bit before he gives his orders, speaking them distinctly, leaving his place almost as neat as he would at home.

As We Like It

THE YOUNG PERSON IN PINK

The story—a young girl in pink, suffering from loss of memory, wanders into Hyde Park. She tries to enlist the aid of several people who mark her as rather off-color. A young dandy "falls for her line," and takes her to his middle-aged fiancée's home, messing things up thereby.

Play—The action drags in the first act badly, picks up in the second, almost reaching American farce speed, and slumps in the third. Some of the lines are very good, but not enough to make this play the success in the United States, it has proved to be on English boards for several years.

The players—Mr. Clive rests this week, performing his bit nicely in the first act. Leonora, as played by Miss Standing, loses force by the wooden posing, and strained effort of this actress trying to put over her part.

The house—it was well filled, enjoyed the play, was generous with applause, and went home pleased.

Resume—if you want something light, this will prove to be an enjoyable evening. It will not hurt anyone's feelings.

OTHER PLAYS

- COLONIAL: "Ben Hur."—An excellent photoplay. COPLEY: "The Young Person in Pink."—Reviewed in this issue. HOLLIS: "Seventh Heaven."—The War as seen from the garrets of Paris. MAJESTIC: "The Big Parade."—The best war picture we've seen. MEW PARK: "Rain."—Drama founded on a tropical deluge. PLYMOUTH: "The Judge's Husband."—Woman tries to usurp man's place. REPERTORY: "The Circle."—Interesting and well recommended. SHUBERT: "Captain Jinks."—Not at all bad; nothing startling. TREMONT: "The Dove."—Holbrook Blinn at his best. Very, very good. WILBUR: "Aloma of the South Seas."—Drinks, sharks, dances, and all that.

40 Years Ago This Week: Part of the coming Glee Club concert is to be "A Tale of Woe." It was a bad slip to announce it previously. Class banquets have been held this week by the Seniors, the Sophomores, and the freshmen.

25 Years Ago This Week: All the better seats for the Tech Show have been sold. A few 75 and 50 cent seats only remain. Seats for the dress rehearsal, however, have had little popularity.

10 Years Ago This Week: Three fraternity baseball leagues have been organized this spring and practice has already started. Plans for a Co-operative Society as a branch of the Harvard Society have been accepted.

Intercollegiates: The separate colleges will be loosely incorporated into a central institution called the Claremont Colleges, the title University being purposely avoided.

entity although they will function together in some mutual interests such as libraries.

Pomona College has foiled "Gigantism." From the beginning a small college limited to 750 students it has bravely resisted the usual temptations to expand. But now the authorities have seen a way to keep the advantages of a small college while at the same time adding the more attractive features of a larger university.

The students of St. Stephens College have obtained a truce, but no more, in their strike for equivalent power with the faculty in the disciplinary measures. The president of the institution has announced that neither the leaders nor their followers will be punished.

LANGROCK FINE CLOTHES advertisement featuring a central logo and two columns of university names: YALE, HARVARD, PRINCETON, BROWN, WILLIAMS, AMHERST, COLGATE, LEHIGH, LAFAYETTE, CORNELL, PENNSYLVANIA, MICHIGAN, CHICAGO, ILLINOIS, CALIFORNIA, VIRGINIA.

It's like groping in the dark to invest in clothing of unknown character—the element of disappointment is paramount.

Our fixed standard "Quality, Purity and Price moderation" steadfastly maintained by us for more than a quarter of a century, safeguards our patrons and insures satisfaction.

Are You Going Into the Bond Business?

There is a cycle of fashion not only for the hats college men wear but for the line of work into which they go.

But your job has to fit your head as well as your hat, for it has to fit your state of mind.

Like your hat also, your job needs to fit your purse.

Therefore, why not choose one that brings not only satisfaction in service but in financial return.

Selling life insurance is one of the few modern businesses that does just this.

It takes:
Intelligence, Zest and Ability

It gives:
 Liberty of action, the philosophic satisfaction of selling future security and present serenity to living people, and a response, immediate and tangible, in monetary as well as mental reward.

CREWS SHOWING IMPROVED FORM

Changes Made in Varsity Eight Prove Effective—150's Showing Fine Form

Technology's four major crews are making rapid strides forward in their rowing technique. The practice spins on Monday and yesterday were very gratifying, and showed marked improvement over the work previously displayed by the respective eights. The Varsity in particular has shown tremendous progress, indicating that the shifts made by Coach Haines have been effective. With slightly more than two weeks left before the opening races of the season, the men have been tightening up, and buckling down to hard work.

Coach Bill Haines, determined to secure the best possible combination for his first eight, is continuing his program of shifts and changes. Larry Day, who was shifted to the Jayvees last week, has regained his seat at number two on the Varsity shell, replacing Dave Donovan, who goes back to his old position on the second eight. Erickson at five has been troubled with a sore back and was three to Erickson's position at five; out of the boat in yesterday's workout. Knight has moved up from Peterson of the 150's moving into Knight's seat at three. Peterson rowed with the Varsity eight last year, and has been pulling number seven on the Light Blue crew this spring.

Greer Returns To 150 Boat

The changes in the eight appear to have been effective; the boat attaining the form that has been looked for all spring. In the practice race yesterday Capt. Bill Latham's Red crew had little difficulty in leaving the Jayvee Gray eight and the fast frosh crew several lengths in the rear. This was in marked contrast to the difficulty encountered in accomplishing it on Saturday. The time and balance of the eight has improved markedly, and the power lurking in the shell is beginning to show itself. After a few more nights of practice, the men should achieve the requisite sense of proportion and balance.

Capt. Mark Greer has returned to his seat at stroke of the 150's after an absence of several days. Coincident with Mark's return to the shell, is the return of the eight to the flashy form shown last spring. Greer's absence and return appears to have acted like a fuse to the crew, and the display of snappy rowing form on Monday, when the Light Blues rowed away from the speedy yearling outfit, was a revelation.

Whispering Waves

A recent visitor at the boathouse was Coach Ed Stevens of Harvard. Bill and Ed discussed rowing prospects of the coming regattas.

It is an inspiration to watch Bill Haines coach a crew. To see Technology's crew mentor live and row every stroke with his men, following every little motion and feeling every little defect is a joy all its own.

Metropolitan newspapers recently appeared with the news that Harvard crews had made a startling innovation in rowing circles by adopting scarfs as protection from the cold windy blasts, and that the Junior Varsity crew was remarkably original by adopting LIGHT BLUE as

their color. We humbly remark that Technology crews have been wearing scarfs for the past two years, and

The 150s still lack the punch that will be essential if they are to win from Harvard, Yale and Princeton. The men are all experienced, however, and the boat should soon strike real racing form.

Although hampered by high winds, the Navy Varsity has been working out regularly on the Severn. Coach Bob Butler is not yet satisfied with the work of the first two boats. Olsen has been shifted to the first boat, and several of the forward men have been interchanged.

The Syracuse Varsity has been entered in three regattas, each of which will be over a different distance. They will row one mile and five-sixteenths at the American Henley, two miles on the Severn, and four miles at Poughkeepsie.

The value of proper training for an athletic event was clearly shown in the recent Oxford-Cambridge boat race, which Cambridge won by the comfortable margin of four lengths. The cause of the Oxford demise was poor condition. For one thing, the men were given wine, claret and champagne, and were forbidden to drink water. To quote *Punch*, "it was pathetic to see the gallant fellows gaze hungrily at the stuff as they rowed over it." As a result of their poor training, one Oxford man collapsed at the two mile mark, another passed out at the finish and the remainder of the crew were completely exhausted. The Cambridge crew, on the other hand, had maintained careful training, and finished the race with heads up. This should prove a shining example to Technology's athletes. When temptation beckons, "remember the Oxford crew."

M. I. T. A. A. ELECTS NEW MANAGERS

Riley, Adler, Dempewolf, and Whiting Chosen For New Positions

As the winter sports have been drawing to a close the assistant managers have been on edge from the fear of the coming elections for managers of their particular sport. The M. I. T. A. A. has recently relieved the pressure on the assistants in four of the sports, wrestling, swimming, soccer and hockey.

Adolph A. Adler '28 has been chosen manager of wrestling. He is enrolled in Course II and has his home in Boston. Adler devoted most of his time the past season to coaching the freshman team. Frederic D. Riley '28 is the choice for swimming manager. Riley is a native of Quincy, Mass., and is taking course XV-2 at the Institute. He has been quite prominent in the Field Day contests, playing on the 1928 football team both this year and last.

As manager of soccer, Albert S. Dempewolf '28 has been selected. Dempewolf is a student in Course V and hails from New York City. Hubert B. Whiting '28 of Holyoke is to manage next year's hockey team. Whiting is enrolled in Course I. The hockey team has also chosen its captain, electing Wm. P. Berkeley '27, who resides in Cambridge.

Track men have been missing Glantzberg's scarlet locks around the track house this season. In his first year here Glantzberg broke several of the freshmen weight records considered as one of the most promising candidates for the vacancy which will be left by Saul Brodsky.

According to their official opening dates "Os" Hedlund's men have the advantage of a two weeks' start on the Crimson Squad. This, however, is practically negligible as the best runners on both teams have been training all winter.

LAMBDA CHI'S MEET PICKED DORM TEAM

Basketball Championship of School to be Decided

In the Hangar gym Thursday at five o'clock the intramural basketball championship of the Institute will be decided. Lambda Chi Alpha, winners of the fraternity league, will clash with a picked all-dormitory five.

Coach Norm Bates, first string forward of the Varsity quintet, has been drilling his Dormitory charges daily in the Walker gym for the past three weeks and reports that the men are in splendid condition. At the point-getting positions Estes is counting on Hope of '93, high point scorer in the Dorm league and Morry Cohen, diminutive forward of last year's frosh quintet. Irv Gannon, elongated Holmen center, will be Estes' selection at the pivot position. At guards the likely selections are Red Earle and Ernie Dodge, both a pair of guards who are a thorn in the side of the opposing forwards.

On the other hand, the Lambda Chis have not had their hands on a basketball since their defeat of the Betas. This may bode ill for the fraternity men, but if they work on Thursday

night the way they did in their last game, the dorm team will have to exhibit some fast playing to win. Reyners at forward and Bunnell at the guard position are expected to be the mainstays for the Lambda Chi men.

TECH CLUBS ARE TO HOLD MEETING

Cincinnati Will Be Scene of Alumni Gathering—Institute Delegates To Attend

Tech Club Associated, an Alumni association of Technology, will hold its 1926 convention at Cincinnati April 23 and 24. The headquarters of the convention will be Hotel Alms, Cincinnati's newest hotel.

Complete plans for the program during the convention have not been drawn up yet, but will be announced in about a week. Ladies will be included in the participation of all events.

Acting as official delegates from the Institute, Professors Warren K. Lewis '05, head of the department of Chemical Engineering; Leicester F. Hamilton '14, chairman of the dormitories; and Samuel C. Prescott '94, vice-president of the Alumni Association, will attend the convention. Robert H. Richards '68, Professor Emeritus of Mining Engineering and Metallurgy; David A. Shepard '26, president of the Senior Class, and Orville B. Denison '11, Secretary of the Alumni Association, will also make the trip.

Friday, April 23, will be "get-acquainted day," with a business session in the afternoon and a smoker in the evening. Among the subjects to be discussed are: the best method of maintaining interest in the activities of local clubs, the new regional scholarship plan and the "National Technology Center."

Saturday, April 24, there will be an automobile excursion to the station of the Columbia Power Company at Miamiport, where all will be the guests of the company at lunch. In the evening a dinner will be held at the hotel, with addresses by the delegates from the Institute.

NOTICES

UNDERGRADUATE

NOTICES

CIVIL ENGINEERING SOCIETY

There will be a meeting of the Civil Engineering Society this evening in the North Hall of Walker at quarter of eight. The speaker will be Mr. L. G. Towne '09, Chief Structural Engineer of Stone and Webster. His subject will be "The Design and Construction of a Modern Office Building," and will be based on the actual construction of the 275-foot building of the Insurance Company of North American in Philadelphia.

FIFE PLAYERS WANTED

A reward of complimentary tickets to the Spring Concert will be given to anyone who can play the fife with any degree of proficiency. Make inquiry at the Musical Clubs office, 308 Walker Memorial.

FREE CONCERT TICKETS

The Social Division of the T. C. A. has received 30 student tickets, which with fifty cents will admit the bearer to a recital by Hulda Lashanska at Symphony Hall tomorrow evening. These tickets are redeemable today only, any may be obtained at the T. C. A. office.

All classes at the University of Bucharest, Roumania have been suspended until after the Easter vacation as a result of a student strike. The strike was a protest against admission of Hebrew students.

CHEMICAL SOCIETY MEETS HERE FRIDAY

Professor Richards, Winner of Nobel Prize, to Speak

Professor Theodore W. Richards, Director of the Wolcott Gibbs Memorial Laboratory at Harvard University will read a paper on "Internal Pressures, Chemical and Cohesive, which Determine the Existence Solids and Liquids" at a meeting of the North Eastern Section of the American Chemical Society in North Hall, Walker, at 8 o'clock.

Professor Richards is well known in the world of chemistry having received many honorary degrees and been presented with numerous medals. He has been elected to the chief chemical societies of the world and as a crowning honor, he was awarded the Nobel Prize in Chemistry in 1914. He is particularly noted for his determination of atomic weights.

The usual dinner, to be held in North Hall, Walker at 6:30, will precede the meeting. Reservations must be in the hands of the secretary not later than today. A cordial invitation is extended to members of the Institute chapter, who have recently been affiliated with the section, to attend both the meeting and the dinner.

CALUMET CLUB ELECTIONS

Calumet Club announces the following elections as the result of the meeting last Tuesday night:

CATHOLIC CLUB TO HOLD JOINT DANCE

An "acquaintance" dance with Saint Cecelia's College Club will be held by the Technology Catholic Club next Friday evening at Saint Cecelia's Hall on Belvidere Street in Boston.

This is one of a series of dances which have been held throughout the year for the purpose of affording an opportunity for the members of the Club and their friends to become acquainted with students from the various girl's colleges in the vicinity of Boston. Music for the dancing which will begin at 9 o'clock will be furnished by the Campus Serenaders.

About 200 Harvard men responded to Coach Farrell's call for track candidates Monday. Among this delegation are four champions, Captain Tibbetts, indoor two-mile intercollegiate champion; E. C. Haggerty, out-door mile champion; "Soapy" Watters, indoor mile champion; and "Al" Miller, who at times has held the intercollegiate 70-yard dash record.

BOSTON

Decorate yourself with the degree of P. A.

THAT means "Pipa Amoroso" in the Latin, or "pipe-lover" in plain campus English. P. A. has certainly endeared a pipe to more men than any other letters in the smoke-alphabet. Because Prince Albert lets a fellow smoke all he wants to—and makes him want to!

Cool as the stare of a marble Venus. Sweet as the approach of vacation. Fragrant as spring blossoms. Think up your own similes, Fellows. You will when you pick P. A. and a jimmy-pipe for permanent roommates. Prince Albert is great tobacco, and that's not blah.

Get yourself a tidy red tin of Prince Albert today. Fill the bowl of that old jimmy-pipe to the brim and borrow a match. Then you're set for some great smoke-sessions, as sure as you're a foot high.

PRINCE ALBERT

—no other tobacco is like it!

P. A. is sold everywhere in tidy red tins, pound and half-pound tin humidors, and pound crystal-glass humidors with sponge-moistener top. And always with every bit of bite and parch removed by the Prince Albert process.
