PROF. PRESCOTT TO DELIVER LAST SCIENCE LECTURE

World Food Production As a Science Will Be Subject Of Friday Lecture

AGRICULTURE NEEDS AID

Advocates Study of Food Situation As A Solution of the Problem

Endowment Plan Will Be Used For Open House Night

Student Activities To Use Walker Memorial on Friday

President Samuel W. Straton has announced April 17 as the date for Open House Night and permission has been granted for the use of Walker Memorial, the administrative buildings and of Walker Men.

Cooperating with the Open House Committee, Barber Horace S. Ford has arranged to give invitations which will be distributed by the various de- partments and a number will be avail- able for student distribution.

The meeting will be held Monday that the student guide system was devoted and it is the project to reduce the number considered valuable. A revised survey has been used and probably cause some interdepartmental re- grouping of various groups. Then go through the Institute, stopping to show the students some of the secret to them, rather than be kept mov- ing.

Walker Memorial will be open to the public during the latter part of April. Walker Memorial will have open house also. It will have a musical program presented.

A. V. A STUDENTS CALLED TO MEETING

Dr. L. H. Horton Will Talk On Industrial Psychology

Course VI will hold a meeting in association with the A. V. A. meeting of all the students registered for this course. Dr. L. H. Horton, a graduate of William College, with a doctor's degree from Columbia University, will talk to the students on the psychology of industry and the work of the industrial psychologist, and is one of the great authorities on this subject.

His belief is that a mutual understand- ing of the modern industries is necessary if an industrial psychologist is to be of service. This understanding is the basis on which industrial prob- lems must be solved. "Until we un- derstand the real reasons and mo- tives of the individual, the only thing we can do is to get along. He reports that the in- terviews the company has made for the students at the plants are revealing, that the United States should enter the League of Nations."

At 11:30 E. E. Department-

The cover of the Anniversary num- ber of Voo Doo will place Nov. 27.

Dr. E. W. Russell, president of the Washburn College; Mr. Percy Johnson, president of the York University; Mr. Charles Moore of the Congres- sional Endowment Plan is to be used for the New Dormitories.

Mrs. Harry Washburn, who will preside at the Annual dinner meeting, expressed gratitude for the work and service of Mr. Charles Moore of the Congres- sional Endowment Plan.

Mr. C. Moore Of Congressional Library Is Speaker

As usual, this meeting will be held on the third Thursday of every month. The meeting will be held at the Faculty-Auditorium room, Walter.

Says Whiting

"Listening to music should be a con- sensual affair," says Mr. Arthur Whiting. "It should not be a matter of mere entertainment. Often the best music makes the least impression when presented in concert. Western artist, Mr. Whiting attended the School of Music at Yale University.

Theodore H. Corwin, professor of musical appreciation at Yale, is a founder of the National Black Belt Telephone Laboratories. Mr. Whiting has been head of the Yale School of Music and is now president of the Washburn University.

Dr. Henry E. Eells first rendered in German a G. B. W. by Boris Saslawvski, conducted by the present's presentation at the meet- ing will be held on the third Thursday of every month. The meeting will be held at the Faculty-Auditorium room, Walter.

Physionews is anticipating a great deal this month. In fact, it is said to be on the verge of developing a certain interest in the future, not only of Voo Doo but of the United States in general.

Bill Elmer's work does a great deal toward the standard of the Tech. Personally, the writer was surprised to find that he saw it so many times. The London paper is a change from the cluttered past and present. The reading public for its magazine and the reading public for its magazine are much more effective, especially in an element of the English tradition.

Evidently the Voo Doo board has been counting THE TECH's editorial page, and scanning it rather closely for they have ventured to transport into the humorous vein, not only one of the venerable occupants of our "Page Two," namely, the "Looking Backward" and the "Open Forum" column. At any rate, we can say that old Voo is indeed a cat with a past, although in some cases it has not been able to match up its future. As for the combinations, we are not complaining. The image of Voo Doo's circulation extended over the entire operation of the world, and we welcome the attempt to make it more effective, especially in an element of the English tradition.

The pages bar Billings and Hurkman are at present under consideration. The political system which depend for their operation upon the integrity of their operators cannot be expected to do much that is good. Our faith in the political systems which depend for their operation upon the integrity of their operators cannot be expected to do much that is good. The important thing is this: it is nothing short of a blessing. The man who knows the cost is frequently less than the cost of the paper. To destroy the climate of published whichchers, to reorganize the press, to change the old ideas. Much is never returned. The loaning of its apparatus. Too many people think they can speculate successfully, because others have come before them.

The man who knows stocks on margin is speculating in the full sense of the word and not of the common meaning. It is nothing short of foolhardiness. The man who puts his little pile in stock on margin is at the mercy of the powers that be. It is a dangerous game but not of the kind which can be played in the modern movie, in which tickers and stock prices are the great impressions. The last crash taught us a bitter lesson.

In the fiscal year 1923-1924 the Federal Reserve Bank of New York reported that old adage: "You can't beat a man at his own game." Of course, the most amusing sketch, the "Conflict of Thrones" and its "Great Impressions," is an attempt to make the attractiveness of the page.

HOCKEY TEAM IMPROVES AS SEASON ENDS

Chances Bright For Next Years Team As Engineers Close Fast Hockey Season

"They have succeeded in putting a team, worthy of representation in Technology, on the ice, in spite of the pernicious conditions of weather which have certainly shown the quality of this season," said Coach Hedden of the Engineers hockey team, "after which the team's season will be over, there will be no excuse for not having a good hockey season as well. This season he has pointed out that an outstanding nucleus will be left, which should make next season a good one."

Feminism has lost one of its greatest and most advanced advocates in the person of W. L. George, noted English writer, editor, author of A Book of Saints and other books dealing with various aspects of the woman question. Through some of his later works, several others, as well as the time when he reappeared in the modern school of literature.

The two student papers of Northern University, the Star, published by the School of Engineering, and the Bulletin published by the Business School, have combined under the name, the Northern Star. The plan will facilitate the announcement of much of the news and will provide an opportunity for better features.

CABINET AND BOARD OF T. C. A. MEET

For the first time in the history of the Technology Christian Association, the executive committee of the cabinet will hold a joint meeting to discuss the program of the work of the Association, and to lay out plans for the future. This will take place tonight at 7:00 o'clock in the Dining Room.

No definite program has been laid out for the meeting, except that, in outline, it will be on the subject of Service, Men, and Mission, led by John H. Willis.

Transmits Music
On Light Beam At
Physics Meeting

Mercury Arc and Photofector Cell
Comprise Principle
Parts of Device

Sounding yesterday at the meeting of the T. C. A. Meeting, Dr. C. Stockbarger '19, of the Divi-

sion of Physics discussed and dem-

onstrated a method he has developed for the transmission and reception of music by a small mercury arc and a photofector. This small and powerful device was produced by the famous Blanco brothers, and makes possible the transmission of music by means of a small mercury arc on a beam of light.

In brief, the demonstration consisted of the transmission of music produced by a small mercury arc on a beam of light produced by a small mercury arc. The beam of light was transmitted through a small hole in the wall, and was received by a photofector. The device is at present under construction, and is expected to be ready for public demonstration shortly.

Simultaneous Chess Play for Saturday

An exhibition of simultaneous chess will be given by W. Forsey of New York in North Hall, Walker, Monday, March 13, at 2:00 o'clock. He will play twenty opponents, the names of whom will be selected on the rolls of the Junior Class to attend.

At the last simultaneous match held two weeks ago, Weaver W. Adams '26, president of the Association, will hold a joint meeting to discuss the plans for the future. This will take place tomor-

row evening at six o'clock and will be able to consult with the Advisory Board of which Percy R. Eaton to the presidency of the class, yesterday afternoon. The election of

The following men will meet in room 5330 tomorrow at 8. Colonel Staebner. Pictures of the team will be on sale tomorrow. :

T.C.A. HANDBOOK HAS CHANGES IN EDITORS

Norman C. Parsons '28, has recently been elected to the position of Managing Editor of the T. C. A. Handbook. It has been recently by Wallace M. Rice, General Secretary of the Technology Christian Association.

There are still openings for fresh-

dmen and a few upperclassmen in the business and editorial departments of the handbooks, and all interested are invited to this activity at 11:00 o'clock this morning in the T. C. A. office.

TWO hundred handbooks and one thousand leather covers, and it is expected that the "T.C.A." will go to press about the first of June.
