The Corporation considers report of Tax Committee

Recommendation For Increasing Student Tax Rates

Much Discussion

RELIEF IS VERY PROBABLE

Portraits of Dr. Macaulan and Mr. George Eastman are

The report of the Student Tax Committee was brought before the members of the Corporation at their meeting and it is announced, according to President Stratton, a good deal of the discussion centred around the question of whether the Corporation realizes the need running through the present situation for the admission of more money, but they are not sure that they are ready to vote an increase. This matter was by far the best solution in the problem of providing more money for the University of Rochester in the present situation on account of the great depression.

The Corporation voted to allow the student tax rates to be increased one cent per quarter.

Second Freshman Talk of Term is on “Man As a Citizen.”

At the second freshman lecture of the term, Mr. C. H. Spurgeon, of Newton, will discuss “The college man and his place as usual tomorrow at 7:30 p.m. in the College bustle.

According to Major Child, the talk of the moment will be the chairman of the students, who says that the college man is in a large way the controller of the community, and it is the opportunity to take pride in the country depends on him. In his talk he will be talking about the place of the college man in industry and public life. He will show the college man and his place in the world, and he will present his views of the place of the college man by every college graduate.

The lecture will be held in the College building at 7:30 p.m. on March 13, and will consist of a two hour lecture on the subject of the college man.

H-v CONVENTION AT CAMBRIDGE

Y. C. B. Boys’ Organization Are To Be Welcomed by Dean Talbot

Between 166 and 200 boys are expected to attend the Harvard-Yale Convention of New England with the University of Cambridge. This is the first time a group of this size has been invited to a convention of this kind.

The program will be divided into two sessions, with lunch at Walker Library at 6 p.m. Saturday night. The second session will consist of a two-hour session on the subject of the college man's attitude towards the college at 1:30 p.m. Sunday.

Dean Talbot, who will be the chairman of the convention, will preside over the meeting.

TO HOLD COMMUNION BREAKFAST SUNDAY

Rev. F. L. Kresson, president of St. John's University, will be the speaker at the Communion Breakfast which will be held in the College dining hall.

The theme of the breakfast will be "The College Man and His Place in the World," and it is expected that the address will be of interest to all students who are taking part in the convention.

The breakfast will be held at 6:45 a.m. on Sunday morning.

Corporation Now Using A System Of Advisory Committees In Four Courses

The Corporation has approved the establishment of a system of advisory committees in four courses.

The system will be used in the following fields:

1. Economics
2. Mathematics
3. Physics
4. Chemistry

The purpose of the system is to provide better guidance for students in these fields and to improve the quality of instruction.

FRESHMAN MID-TERM MARKS APPEAR SOON

Intermediate marks for the freshmen class will be issued at the end of the week, according to the term, in accordance with the policy of the school's office. At the end of the term, grades will be published in the school's office. The policy is that the grades will be published at the end of the term, provided the students have been in the school for the entire term and have achieved at least a C average.

O. B. Danison In Favor of Circus

To Co-operate With Student Activities

Your issue of March 4 has just been delivered. I am glad to see the Circus discussion prompts me to write in favor of the Annual Circus, which is a great event of the year. The students of the University of Rochester are the ones who will enjoy it.

I am glad to see the Circus discussion prompts me to write in favor of the Annual Circus, which is a great event of the year. The students of the University of Rochester are the ones who will enjoy it.

Eighty Members of Tech Show To Make Smith Trip

Alumni Already Responding To Calls For Letters

Leaving at 5:15 tomorrow morning, a group of eighty members of the Tech Show will leave on the trip to Southampton, where the group will be met by President Harry S. Smith of the college. Several of the members will be shown to the college tours and voted to be accepted by that institution.

Many of the alumni are already responding to the calls for letters, and the trip is expected to be a great success.

Lockers in Walker Are Rilled Monday

Monday night at 6 o'clock, lockers in Walker Memorial will be filled with the belongings of the students who are away on the current spring trip. Despite the presence of the students, the lockers in Walker will be filled with their belongings.

The students who are away on the current spring trip are expected to return soon and bring back their belongings.

The Institute authorities offer a reward of $100 for information leading to the arrest and conviction of the thief.

The second freshman talk of the term will be given by Dean Harry S. Smith of the college. The talk will be held in room 4370, Saturday afternoon at 5 o'clock.

The Mass will take place at the Holy Cross Cathedral at 6:45 on Saturday night, with music by the Hii-Y band. Several interesting speakers will be present, including President Harry S. Smith of the college.

Companies will be shown to the college tours and voted to be accepted by that institution.

Many of the alumni are already responding to the calls for letters, and the trip is expected to be a great success.

An Alumni Advisory Committee will be appointed to make recommendations for the future of the Tech Show. The committee will be responsible for planning and conducting the annual trip to Southampton.
As We Like It

OUTWARD BOUND

For those who enjoy "happy" singing of the melodramatic type, this production of "As We Like It" will be fine entertainment. Some of the actors who delighted in pleasant comedy will be heard in this musical comedy. The play is set in the balcony and is considered, as stores at the end of the season has only a few copies. The facts are: that the quantity of the offering is almost negligible, and that the "loyal alumni" has made in regard to his Alma Mater.

It seems that a wealthy better-off-egg man has a half-wit son. The son was the first half-wit student at the university.

Need Engineers Who Can Create New Knowledge

"Our engineering accomplishments in the future will be largely determined by research and to the improvement of the usefulness and value of our knowledge," says Prof. A. H. Ter- rell of the School of Engineering at Rensselaer, the heads of the Mechanical Engineering Society Wednesday evening.

Duke-college, "lay down South," says that his school is the only one worth while, for it is governed by the culture and prejudices of the ancients. The author, Mr. H. Knox '27, has given his reasons for dealing with the notion of man's conquest over nature. The vote of course, is a fine chance for the student who is not interested in this case of the university woman and the American Indian.

In the past, one has been given the impression that graduation from college means that he is a scholar and a man. The publications of these ex-

Strong Swimming Team Formed For Next Year As Tank Season Closes

1926 SWIMMING SEASON

M. I. T. Opp.
Boston University 34 34
Arch 39 32
Williams 26 22
Yale 29 25
Dartmouth 14 26
Union 33 39
Syracuse 39 42
Brown 29 42

Total 234 289

In the first match of the season, the Boston University varsity fell an easy prey to the Engineers for a large score. The second meet, with Arch, proved a heartrending defeat for the Hamiltons when, with victory within their grasp, the relay team lost in the final dash to the finish.

William's, the next opponent of the Engineers, garnered the majority of points to secure a decided victory. The first road trip took the Engineers to two of the contenders for the championship of the East, Yale and Dartmouth.

On the following weekend Union and Syracuse were victorious over the Engineers, the latter being a very hard fought match that was not decided until the final relay was over. The defeat in the Providence post at the hands of Brown was the final defeat of the season.

Team Coach for Intercollégiate

Intercollegiate

Throughout these contests the Can-

brothers, who were members of the winning team, scored the deciding points for the Engineers in each case. The decisive victory over Yale was scored by the Engineers in the last dash of the season.

Chances for next year's team are very hopeful. Center and back men in the finals, will be back, as well as Captain Will. The leading man in the second relay, was the chief point of strength. The back men in the relay are the weak points of the Engineers. If these can be strengthened, the Engineers will be very successful.

It is hoped that several more colleges, including Tufts and Northeastern will be added to the present tank. The Engineers are hopeful that several promising freshmen who have joined the Varsity team next year.

BROADCASTS FROM 1XM ARE SUCCESSFUL

Appreciation of the Standard Frequency Service is Widespread

Reports have been received by the M. I. T. Radio Station from France, England, the Azores Islands, and the Panama Canal Zone and Canada thanking the Society for sending them standard frequencies. This week it has maintained on every frequency of standard frequency service.

Modern radio transmitting stations need some method of sending their frequency constantly as a reference, and a method of keeping within the limits, which is to say, to keep the time of the radio waves that are sent out by the station. This is the purpose of the standard frequency service, which is broadcast from 91 to 23.2 meters. This service has been so well received that plans have been made to increase its area and during March broadcasts will be made on 24 different separate frequencies from 3928 to 16300 Kilocycles.

"Crystal Control Will Be Used"

"Crystal Control Will Be Used Through the courtesy of the General Radio Company a Prico-Electric crystal has been obtained which operates on 153 Kilocycles and will enable the frequency broadcast to be controlled with a greater degree of accuracy. By using the harmonic of the crystal, which is sent out over a wide range and with positive accuracy, this crystal control of oscillating circuits is a recent development in the field of radio communications and is important because it affords a very stable means of controlling radio-frequency currents.

The transmitter which is employed for this purpose uses a 250 watt, tube in radio parlance as a "P" tube and the power input is supplied by a high voltage transformer and a battery-rectifier rectifier. Plate supplies are being made to supply this transformer and rectifier from a storage battery and there will be a complete 60 cycle in an effort to give the emitted wave a smoother note on the very low wave.

PHYSICS X803

The final examination in X803 will be held on Saturday, March 20, in Room 440, from 1:30 to 2 P.M.

NOTICES

OFFICIAL

PHYSICS X802

Lectures in X802 will be given in accordance with the class schedule every Friday in Room 427. Examinations will be given at the final lecture and all students will be required to take the final examination.

UNIVERSITY LAW SCHOOL

Professor H. A. MacNamee of the Chemistry Department will deliver a lecture to the Senior Chemistry students on Colloid Theory. This lecture will be held at 11:00 A.M. in the hangar gym on Friday, March 12.

OPEN HOUSE NIGHT DATE IS CHANGED

Committee Decides on Change At Monday Meeting

Due to the fact that members of the Faculty plans to be absent during the Spring Break, the Open House Night has been changed by the Open House Night Committee from April 17 to April 21.

In order to make this function successful, the presence of practically all the Staff is desirable, particularly the heads of the departments. Invitations are being extended not only to friends and relatives through the students, but to prominent men in the world of science and business. The entire Inquiry will be thrown open to the visitors and the work at Technology as well as activities will be presented. For this reason, it was deemed advisable to postpone the affair in order that each department and group will be well represented by its members.

PROFESSOR TO SPEAK ON COLLOID THEORY

Professor H. A. MacNamee of the Chemistry Department will deliver a lecture on Colloid Theory to the Senior Chemistry students. This lecture will be held at 11:00 A.M. in the hangar gym on Friday, March 12.
