

## SPECIAL NUMBERS WILL BE FEATURED AT CLUBS' CONCERT

Mandolin and Glee Clubs Will  
Make First Appearance  
Together

INCLUDES MAGICIAN ACT

Techtonians to Furnish Dance  
Music From 10 O'clock  
Until 3

A number of special features will be used by the Musical Clubs at their Spring Concert, which will be held at the Somerset Hotel next Monday, in an effort to make the affair as unusual as possible. The combined mandolin and Glee Clubs will appear together for the first time playing the "Gypsy Love Song." Charles R. Richheimer '28 will give his dancing act with the Banjo Club rendering the accompanying music.

In keeping with the spirit of the Patriot's day holiday, the Banjo Club has arranged a special fife and drum number which will be used on the program. The atmosphere of an old Colonial Ball will be furthered by the presentation to each young lady of a rose as she enters the hall.

Thomas A. Knowles '27 will put on his magician act for the first time this year before an undergraduate Technology audience. He has previously appeared at several of the local concerts this year and at these he has put on a number of clever and mystifying tricks which were well received. A glee duet will be sung by Gordon W. Browne, baritone, and Philip L. Riley, tenor. Both of these men are graduate students at the Institute, but they have not appeared with the Musical Clubs before this year.

A Banjo Triplet  
David A. Shepard '26, Raymond Mancha, Jr., '26, and Floyd W. Hall '28, will appear together for the first time as a Banjo Triplet and will play a number of popular melodies. The concert will last from 8:30 o'clock until 10:00 o'clock after which there will be dancing until 3:00 o'clock with the Techtonians, Martin M. Fireman '26, leader, playing the music. The Techtonians will appear at the concert with nine pieces.

Refreshments will be served during an intermission at midnight. The walls of the Louis XIV Ballroom at the Somerset which will be used for the dance will be decorated and fraternity banners will be hung around the walls.

Dance orders will be used for the dance. Tickets are \$6.00 per couple and \$4.00 for stags and will be on sale all week from 12 o'clock until 2 o'clock in the Main Lobby. Reservations for blocks of seats at the concert for fraternity parties of groups of friends may be made this week at the Musical Clubs office.

## DENISON MAKES TWO WEEKS ALUMNI TOUR

Orville B. Denison '11, Secretary-Treasurer of the Alumni Association, left last night for a two-weeks' trip among local alumni clubs. Spending a day each in Utica and Syracuse, during which he will address dinner meetings of the two clubs, he plans to arrive in Columbus, Ohio, on April 15th to attend the Thirteenth Annual Conference of the Association of Alumni Secretaries, scheduled for April 15-17 at Ohio State University. He will also be guest of honor at a dinner meeting of the Technology Club of Central Ohio, with headquarters at Columbus.

During the following week he will visit the local clubs at Dayton, Ohio, and Indianapolis, Indiana, returning to Cincinnati, Ohio, in time for the 1926 Convention of the Technology Clubs Associated on April 23-24.

## Spring Vacation To Begin Friday Night

Due to the change from the three-term to the semester basis, the Junior Week vacation will be an extra half day in length. Courses will therefore be omitted after next Friday, April 16, at 5 P. M., until Thursday, April 22, at 9 A. M.  
(Signed) Allyne L. Merrill '85.

## Institute Students To Travel Home by Plane

Three graduate students, Captain Walter F. Kraus and Lieutenants Harry A. Sutton and Jerome F. Donovan, will travel home by aeroplane for the Junior Week vacation. Captain Kraus and Lieutenant Sutton will make the trip to Washington via the air. They are both enrolled in the Aeronautical Engineering course.

Lieutenant Sutton, a graduate of the United States Naval Academy, will fly to New York tomorrow from the East Boston airport. He is a student of Naval Ordnance.

## OARSMEN TO HOLD BANQUET TONIGHT

Technology oarsmen will lay down their oars tonight and bury the hatchet with the disciples of John Harvard. Coach Ed Stevens and Capt. Winthrop will represent the Crimson at tonight's Boat Club dinner-conclave. The Walker Grill will be the scene of the festivities, which will be held in conjunction with crew training table. Coach Bill Haines, Technology crew mentor, will be present, and Mark Greer, president of the Boat Club, will preside. The dinner is open to all crew men; the charge being that of the training table meal.

## W. A. BENTLEY TO ADDRESS FRESHMEN

Curious Snowflake Forms Is  
Topic of Illustrated Talk  
Tomorrow

At the freshman lecture scheduled for tomorrow, Mr. Wilson A. Bentley of Jerico, Vermont, will discuss "Marvels of Snowflakes and Water Forms." The talk will be held in room 10-250 at 4 o'clock, and will be illustrated by a large number of lantern slides.

Mr. Bentley, after spending the greater part of his life studying the curious forms of snowflakes has collected what has been spoken of as the most remarkable collection of snowflake specimens. Most of these, he has photographed and will present many of them before his freshman audience tomorrow. He will include not only natural forms but also a number of artificial ones he has developed. These pictures have been taken during some forty years of experience and include what may be regarded as the "latest fashion" in snowflakes from the storms of the past winter.

As is the general custom with Mr. Bentley, the subject will be treated in a non-technical fashion. He has recently given this talk, and exhibited the slides before the Franklin Institute at Philadelphia, and in other places in that vicinity, and the reports which come from them are to the effect that the views are extraordinarily beautiful and worth-while.

## T. C. A. INSTALLATION TO BE HELD TONIGHT

Percy R. Ziegler '00 to Induct  
New Men Into Office

For the first time in the history of the Technology Christian Association, there will be an installation service for the purpose of inducting into office the men who will be the officers of the association for the coming year. This will be held this evening in the Faculty Dining Room in the Walker Memorial.

Percy R. Ziegler '00, Chairman of the Advisory Board, will preside at the installation, and will induct into office the three officers, the seven department directors, and the twenty-one division managers.

A dinner will be held afterwards at which John H. Wills '26, the retiring president, will be the toastmaster. Horace S. Ford, the treasurer of the Advisory Board, will be one of the speakers.

## Tech Show Played To Capacity House At Smith College

Tickets for Boston Performance  
Will Be Sold in Main  
Lobby Today

For the first time in several years Tech Show played to a capacity house when the "standing room only" sign was hung out at Northampton Saturday evening. Every seat in the Academy of Music was disposed of before the curtain went up, and several standing room tickets were sold as well.

At Pittsburg, during the mid-year tour, this record was almost equaled when every seat in the house was taken except a few in an undesirable section of the theater.

In contrast to the financially successful Northampton trip, the managers of the Show point out that the student sale of tickets for the Junior Week performance is very poor, very few applications having been received in comparison with other years. For this reason a booth will be open from 12 to 2 o'clock today and Thursday where applications will be received for the Boston performance. Tickets will also be returned at this booth for the applications already received.

Constructed by the same man who drew the prize Tech Show program cover, a display is being shown in the main lobby to advertise "Too Many Brothers." Zareh M. Sourian '27 is the builder of the display, as well as the designer of the program cover.

## PROM VOO DOO TO APPEAR TOMORROW

Volume Contains Work Of  
Many Artists and Writers

Phosphorous announces his supreme effort of the year in the form of a 72 page Prom Number to appear in the Institute tomorrow. It combines the literary efforts of many writers and marks the final effort of the Board of Volume VIII.

Containing ninety illustrations, of which fifteen are full page cuts, and the work from the pens of Charles D. Gibson and M. R. Crosby, both of whom are known to "Life" and other publications, the issue is the largest ever put out by the comic. In it the board of Volume IX will be announced. The issue contains work of some of Voo Doo's female contributors, whose efforts are known to readers of the "Girl's Number."

As is the usual custom, copies will cost thirty-five cents, and may be mailed for ten cents if deposited in the United States Mail bag placed in the main lobby. Otherwise mailing charges amount to fifteen cents. A review will appear in the Prom Number of THE TECH, written by Professor Winward Prescott.

## CHEMIST DISCUSSES NATURE OF MATTER

Says Liquids and Solids Are  
Due to Chemical Affinity

What holds matter together was discussed in a paper presented by Professor Theodore W. Richards, Director of the Wolcott Gibbs Memorial Laboratory of Harvard University and a Nobel Prize winner, at a meeting of the North Eastern Section of the American Chemical Society in North Hall Friday evening.

Dr. Richards' paper on "Internal Pressures, Chemical and Cohesive, which Determine the Existence of Solids and Liquids" was an account of his thirty years work on this subject. The old idea was that gravitation was the principle force in holding matter together in liquids and solids but Dr. Richards has shown by experiment that there are other forces operating to achieve this result.

## LOOMIS TO ADDRESS GEOLOGICAL MEETING

Professor Frederic B. Loomis of Amherst College will be the speaker at the Boston Geological Society meeting which will take place in the West Lounge of Walker tonight at 8 o'clock. The subject of his discourse is, "The Physiographic Development of The Connecticut Valley." At 6:15 o'clock a dinner will be held for Professor Loomis in the faculty dining room of Walker Memorial.

## Technology Track Man Died Yesterday

Aymer T. Mercer of Andover, Mass., a junior in Course XV-2, died of spinal meningitis yesterday afternoon at the Massachusetts General Hospital. An operation after a sudden attack failed to save him, as he was weakened by a recent siege of the grippe.

Mercer, who lived in Runkle, entered the Institute as a freshman, having been graduated by Phillips Exeter Academy. He was a quarter-miler on the track squad during his three years at Technology.

## GRADUATE RECEIVES RESPONSIBLE POST

Paul W. Litchfield '96, pioneer in the tire industry, was recently elected president of the Goodyear Tire and Rubber Co., Akron, Ohio. Mr. Litchfield, formerly vice-president of this concern, succeeds the late George M. Stadelman. Graduated in the class of 1896 from Course X, Mr. Litchfield has been associated with the tire and rubber industry since the advent of the motor car, having superintended the building of the first automobile tire at the Goodyear factory. He delivered an Aldred lecture to seniors and graduates January 16, 1925.

## FRESHMEN TO HEAR COURSE LECTURES

Aeronautics and Architecture  
To Be Given Today and  
Tomorrow

Professor Edward P. Warner '17 will outline the course in Aeronautical Engineering today in room 10-275 at 1 o'clock to interested Freshmen. Thursday, Professor William Emerson will describe Course IV.

Aeronautical Engineering is a new course at Technology and previous to its installation, students interested in aeronautics could take that subject only as a graduate course. Many graduates have reached prominent positions in the aeronautical field.

Thursday, Professor Emerson will talk on Course IV. The curriculum and methods of instruction employed have been selected not merely to prepare the student for the future practice of his profession, but to supply a training which shall be educational in the broadest sense. Two options are offered, one in Architecture and one in Architectural Engineering. The former lays stress upon design and art, while the latter lays greatest emphasis upon structural design and engineering with enough of the history of architecture to give the student a broad education.

Several scholarships are offered by this course, including the Traveling Fellowship, and two scholarships entitling the students to study at the School in Fontainebleau, France.

On Friday, Professor Jack will give the last talk before vacation on Marine Engineering. Further announcements will be made after vacation.

## WILL SOON PUBLISH VI-A ANNUAL, SPARKS

All copy of SPARKS, the VI-A annual, has gone to the printers and it is now certain that it will be out on the contract date, May 14. It is possible that it will be brought out a day early and be issued at the annual General Electric banquet to the graduates. Alumni or undergraduates wishing extra copies may obtain them by sending one dollar to the circulation manager, room 10-203.

This year a page of informals has been collected, the graduate personals will be longer, and the cover will be changed. Departing from the gray toned covers of previous years, this issue will have a sage green color. In order to get interesting personal writeups, one graduate from each group was appointed to divide the graduate class into pairs, each man writing up the other. The writeups, which are supposed to be confidential, are then sent to the general manager. This system gives a personal touch that would not be obtained otherwise. The general manager says that occasionally they are much too personal and have to be toned down, but most of them are printed as received.

## PROM COMMITTEE MAKES REDUCTION ON STAG TICKETS

Announcement Made Yesterday  
Of a \$2.00 Cut On  
The Single Tickets

NOT TO INCLUDE SUPPER

"Olie" Ahern, Specialty Entertainer  
Will Appear  
With Band

Announcement of a reduction in the price of stag tickets for the Junior Promenade of the Class of 1927 from \$6.00 to \$4.00 was made yesterday by the Prom Committee. This action has been taken in an effort to encourage the attendance of a greater number of stags at the Junior event next Tuesday evening at the Copley-Plaza. The stag tickets which will be sold at \$4.00 do not include the Prom supper which is \$2.00 extra and is included in the stag tickets previously sold for \$6.00.

Seating arrangements have been almost completely assigned at the present time as there remain yet only 30 who have indicated no seating preferences. All seats at the Prom supper will be definitely assigned by Thursday evening and it will be assumed at that time that those who have not indicated their preference are willing to let the Prom Committee assign them as they see fit.

Specialty Entertainer  
As an addition to his eleven piece orchestra which will furnish the Prom music Mal Hallett is bringing a specialty entertainer, "Olie" Ahern, who has gone with the orchestra previously as a co-entertainer and who has proven as popular on Broadway as the orchestra itself. Hallett's orchestra has done a great deal of phonograph work recently having made records for four different phonograph companies.

During the war and for a period after Mr. Hallett played in the United States Navy Band, and after returning to Boston, where he lives, he started an orchestra of his own which has come to be recognized as one of the very best dance orchestras in the country. For the past three years the organization has played during the winter months at the famous Million Dollar Arcadia Ballroom in New York City.

Letters of the alphabet will be used as last year to assist the dancers in meeting each other for exchanging partners. These will be placed in various positions around the hall in order to divide the crowd. Flower decorations will be furnished by Penn for the table decorations and for the matron's corsages. The Prom Committee requests that the men attending the Prom refrain from giving their partners flowers in order that the expense of the function may be kept as low as possible.

## 'THE MORNING AFTER' TO BE T. C. A. TALK

"The Morning After" will be the subject of the usual Thursday noonday meeting, which will be held tomorrow in the East Lounge of Walker at 12:30 o'clock. Rev. Newton C. Fetter, the student pastor of the First Baptist Church of Boston, will be the speaker.

Mr. Fetter is a graduate of the University of Michigan, and is a specialist in work with young people. The Students Club of the First Baptist Church, of which the speaker is the head, is the largest organization of its kind in the city, the average attendance each Sunday evening being about 150.

These talks each Thursday noon are a regular part of the program of the Technology Christian Association, and these meetings will be held each week until the end of the term.

## CALENDAR

Wednesday, April 14

4:00—Alpine Mountain Climbing movies, room 10-250.  
5:00—T. C. A. Installation Service, Faculty dining room, Walker.  
6:00—Boat Club Dinner, Walker Grill Room.  
8:00—Boston Geological Society meeting, West Lounge, Walker.

Thursday, April 15

12:30—T. C. A. Noonday meeting, East Lounge, Walker. Subject: "The Morning After."  
4:00—Freshman Lecture: "Marvels of Snowflakes and Water Forms," room 10-250.

A Record of Continuous News Service for 45 Years

Official News Organ of the Undergraduates of Technology

THE OPEN FORUM

To the Editor: Is there something the matter with E. E. E.? When a certain student can go to Tech for 4 years, carry a full schedule, pass every subject the first time and then fail in E. E. E. is it because he is dumb?

When on knowing the text book practically by heart and doing all problems in the back, a student writes the test and gets it wrong, is it all his fault?

When a fellow who has studied electricity at another school, repaired, wound, connected and tested dozens of A. C. and D. C. motors, passed the house wiring exams, worked and studied telephone circuits in a central office for more than a year, passed a movie operators' exam, and did not pass E. E. E., is the system of instruction right?

(Signed) '26.

As We Like It

THE ROTTERS

"The Rotters," a tale of a respectable family, by H. F. Maltby, is the vehicle offered by the Copley Theatre this week. It has an amusing story and is well done—Mr. Clive is to be commended for his excellent choice.

Another title to this farce might be "Nobody Loves Father." Father is a magistrate who wants to be mayor of his town, so he raises a respectable family to do him credit. But—he tried the wrong sort of chauffeur. The chauffeur tries to help father's language, loans money to the son, takes the daughter Winnie out riding, and makes the mother feel romantic. The youngest daughter, expelled from a most respectable school, is aided by the chauffeur to hoodwink father. Then the fun commences: Youngest daughter is found out when the mail arrives; Son is reported in jail after the "Bobbies" raid a "pub"; Daughter Winnie is found by father in the arms of the obliging chauffeur. Father is most irate. Then his first wife, alimony-hunting, calls. Father subsides from his respectable pose, and submits to the family. . . . End it yourself.

It is a pleasure to report a well balanced performance. Each person taking part did well with it, which is saying quite a bit.

Play Directory

- COLONIAL: "Ben Hur."—An excellent movie.
COPLEY: "The Rotters."—Reviewed in this issue.
HOLLIS: "Seventh Heaven."—One of the best of the war plays.
MAJESTIC: "The Big Parade."—Exciting and humorous.
NEW PARK: "Easy Come Easy Go."—Farceical comedy.
PLYMOUTH: "The Judge's Husband."—War between the sexes.
REPERTORY: "The Wild Duck."—Ibsen, which is to say GOOD.
SHUBERT: "Captain Jinks."—A very attractive chorus.
TREMONT: "The Dove."—Good, especially if one knows Spanish.
WILBUR: "Aloma of the South Seas."—The lure and the danger of the tropics.

CLASSES VERSUS COURSES

TECH Engineering News in its recent issue, recommends that the present undergraduate administrative structure based upon dividing the student body into classes be abandoned. In its place would be substituted an organization in which the undergraduates are divided by courses. We do not think that the substitution is desirable, both because the class functionings and because the Alumni organization is based almost entirely on class groupings. There are other executive objections which we have not the space to voice.

Anything that will accentuate the professional aspects of Technology undergraduate life will be a contribution toward the very undergraduate indifference which T. E. N. would eliminate. There is our principal objection to the proposal. Already, we hear too much of courses; we are members of courses instead of members of a student body. Everywhere we go, our professional obligations are emphasized without regard for our place as human beings in the community. We are engineers, we know our mathematics, and we are equipped to solve industrial problems, but we are likely to be misled into believing that the profession is all there is in life.

Life after graduation from Technology cannot be a twenty-four hour round of engineering problems—not if we are to enjoy it. We must have social contacts and we must learn to cultivate them while in college. One of the principal functions of a class organization is to provide that social contact, and if the function is not fulfilled it is not the fault of the system but of its administrators. Course organizations would inject a professional atmosphere into Technology, but in so doing, Technology would become the factory which a few misguided folk now believe it to be.

MORE ABOUT FRESHMAN RULES

IN consequence of the recent editorial on the subject of Freshman Rules, many inquiries have been made as to just what "Freshman Rules" are. For the benefit of freshmen and others who may be in this position, it may be well to tell in a word or two what they are.

In a general way "Freshman Rules" may be defined as the restrictions which Sophomores impose upon the freshman class for the purpose of having fun, acquainting the new men of their responsibilities, teaching them the customs of the college, and inculcating a keen sense of class spirit. In a way, the first consideration is the most important; for it is only because of the pleasure gained that the system has been able to survive the tests of time at colleges where it is in force.

Therefore it is this point which we want to impress; that if the Sophomores at Technology were to place some restrictions on the incoming freshmen it would do a great deal toward promoting class rivalry which is so essential to class spirit. There is no doubt that it is fun for the Sophomores to make the freshmen wear green hats, and perform antics, and the consensus of opinion among men who have been freshmen at other colleges is that it was fun for them, too. Indeed there are many who say that there is more fun in the freshman year than all the others combined.

This, then, is the primary reason for promoting some sort of "Freshman Rules" at the Institute: to contribute fun to the years which many call a grind.

JUNIOR WEEK

WITH the advent of Junior Week, we are all given an opportunity to prove that Technology is not the place that it has been painted. To the average outsider, we appear to be a group of "grinds" lacking everything that pertains to culture—devoid of all appreciation of social activities. No doubt there is an element in the student body which gives evidence in that direction. However, the fact remains that we are human and being human we are appreciative of the opportunities which are offered to us as any other representative group in college life.

We are then removing the "dust" from the eyes of the "unbeliever" if the outward appearance of Technology can be modified. The correction of that appearance is a problem that cannot be solved by any one man or any small group of men. Every member of the student body should take an interest in its solution. The faculty and the alumni have done their bit toward enlightening all the United States with information about the Institute. They have taken every opportunity to stress its good points. We must do our share.

Surely a few moments can be devoted to a cause which will not only benefit the prestige of the Institute but everybody. Let us do our best to sell Technology.

## Engineer Tennis Squads Receive Year's First Cut

### Practice on Concrete Courts Continues as Oakley Club Prepares Grounds

Manager Art Connell announced Monday the first cuts which were made in the Technology tennis squad. The present number retained on the squad is 24 out of the original fifty. Ten men were kept on the freshman squad and fourteen on the Varsity. However there is still an opportunity for anyone to try out for the squad by challenging the last five men on either the Varsity or the freshman lists. Practice is being continued on the concrete courts, but it is expected that the courts at the Oakley Country Club will be available for practice next week and part of the Varsity squad will practice there.

## KWAUK TO CAPTAIN BEAVER RING TEAM

We-tuh Kwauk, Tech's fighting 115 pounder, was elected to lead next year's boxing team, at a banquet of the squad Sunday night. Kwauk has one of the best boxing records ever turned in by a Tech leather-pusher, having five victories and only one defeat. As a reward for his remarkable record he was awarded a straight "T."

"Benny" Austhis, well known referee, and Coach Rawson kept the party amused by their humorous and unique stories of how they boxed in the "olden days." E. L. Weston has been elected manager for next year. The following members of the squad have been awarded bT's for their work this year: M. B. Epstein '26, C. L. MacLaughlin '27, R. R. Peatfield '28, J. J. Conroy '28, G. A. Flynn '27, K. L. Keith '28, and D. M. Moore '27, manager.

## Interclass Track Meet Predicted to Be One of The Closest in History

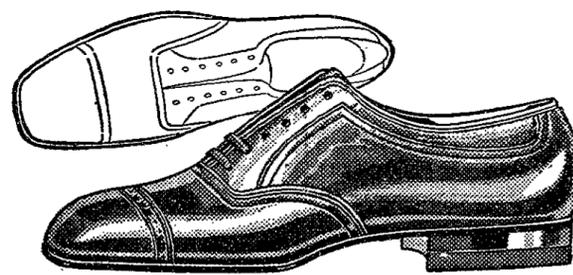

With the cinder track in good shape and the weather man promising that Monday will be a typical spring day everything is already in readiness for a record breaking Interclass Meet. The classes are turning their men out in much greater numbers than they did for the winter interclass meet. Basing our opinion upon the score of the winter meet Monday's clash should be one of the closest in track annals. In the winter the Juniors defeated the Sophomores by a scant two points. An abundance of second places is what kept the Class of '28 in the running in the last meet and if they can succeed in changing a few of these seconds to firsts their winning of the meet is quite probable. The number of men which they had in the meet was also an important factor in their pointgetting as they had no particular star, annexing their score by several men getting a few points.

CLASS BASEBALL  
Junior vs. Sophomore game scheduled for yesterday afternoon has been carried over until next week.

TODAY the HOTEL KENMORE welcomes you to Boston's newest and finest hotel. Ideally located, luxuriously appointed and superbly serviced—the Kenmore ranks with the notable hotels of Chicago and New York. Yet rates are moderate for the superior accommodations it affords.

THE Main Lounge is artistic yet home-like. The magnificent Empire Dining-Room affords cuisine and service of the highest type. The cozy Coffee Room is a favored rendezvous for breakfast, luncheon and afternoon tea. And the Crystal Ballroom is New England's most attractive social suite.

The Kenmore is an investment of many million dollars, to make your Boston visits more enjoyable. The stately, fireproof French Renaissance building overlooks Charles River and Fenway Park. Away from the noise of the down-town district—yet the leading department stores, smart shops, theatres, schools and colleges are but a five-minute ride from our door.

Four hundred rooms—each an outside room; spacious, sunny and cheery. Four hundred baths—each snowy-tiled; equipped with shower and tub. Panelled walls; deep, soft rugs; twin beds; writing-desks. And such unusual features as circulating ice-water, bed-head lamps—and the morning paper at your door.

More than a hotel—the Kenmore is a brilliant criterion of New England hospitality. To know its charm, to enjoy its comfort, to experience the personal touch of its courteous service, is to make it your home when in Boston for business or pleasure.

Management: BRADBURY F. CUSHING
