

WALKER MEMORIAL COMMITTEE HOLDS ANNUAL ELECTION

**Frederic D. Riley, Jr. '28 Will
Head Walker Memorial
Executive Group**

WAS SWIMMING MANAGER

**John B. Ellsworth '29, Herman
P. Meissner '29 Selected as
Junior Members**

Frederick D. Riley Jr., '28, Course XV Junior from Atlantic, Massachusetts, was announced last night as the new chairman of the Walker Memorial Committee. Other elections announced were those of John B. Ellsworth '29 and Herman P. Meissner '29 as Junior Members of the Walker executive group for the coming year.

Riley prepared for Technology at Exeter Academy and entered the Walker Memorial Committee competition in his freshman year. In his freshman and Sophomore years he played on the Field Day football team and since that time has served as Assistant Manager and Manager of the Technology swimming team. He is also a member of the Theta Tau and the Beaver Club.

"The main purpose of the Walker Memorial Committee is one of student service, and that will be the policy of the committee during the coming year," said Riley last night. Among the innovations which he has already made plans to install are an open file of all Institute activity men and an arrangement with the New York, New Haven and Hartford railroad to have a representative at the Institute during the week before vacations to enable students to make railroad reservations with greater convenience.

Butler Speaks On Wild Mongolia at Freshman Smoker

**Flynn Outboxes Marshall For
Entry in 150 Pound
Intercollegiates**

Freshmen to the number of about 175 were present at their second smoker which was held in the Main Dining Hall of Walker on Wednesday evening at 7:30 o'clock. An address on Mongolia, three boxing matches and moving pictures were the features of the program.

After the men had assembled in the Main Hall and had been brought into the spirit of things by a few songs led by Orville B. Denison '11, the freshmen retired to Walker Gym where the boxing bouts were scheduled to take place. In the feature match, George A. Flynn '28 won a decision over Donald Marshall '28 for the 150 pound championship of Technology in a close fight marked by some fast, heavy hitting.

Upon conclusion of the boxing, the freshmen returned to the Dining Room to hear Lieutenant Frederic B. Butler of the U. S. Engineers speak on "Explorations in Untraveled Mongolia." Illustrating his talk with lantern slides, Lieutenant Butler gave his audience a vivid account of the experiences which the Walter C. Andrews expedition encountered in pushing their way through the untraveled wastes. Of special interest were the accounts of the methods used in discovering fossils, and the crude, strange customs of the natives of Manchuria. The talk was followed by a motion picture comedy.

"Rubber Stamp" Gets 66 on Track Quiz

A very prominent member of the M. I. T. A. A., when confronted with today's questionnaire on track which is published elsewhere on this page scored a mere 66. Considering the marking system now in force at the Institute, this is barely a passing grade and would give the man a "P." In Monday's issue of THE TECH the rating scored by Coach Hedlund of the track team will be given, together with the correct answers to the questions.

Circus Band Opens Drive For Members

Men able to perform upon instruments of wind, reed or percussion are urged to join the All Technology Circus Band which is scheduled to lead the noon day parade in its march about the environs of the Institute on April 1.

David A. Shepard '26, leader of last year's aggregation of Circus Day musicians has been secured to assume the same position for the Circus Band of 1927. The Musical Clubs are sponsoring the band and have announced that all members of last fall's Field Day Band and as many others as possible come to the first rehearsal which will be held in North Hall Wednesday at 5 o'clock.

DEPARTMENT HEADS DESCRIBE COURSES

**Outline The Work of Their
Departments in Series
Of Short Talks**

Lectures on Courses I, II, and XV, telling of the work they cover and the opportunities to which they lead, were given by the respective department heads yesterday afternoon in room 3-270. This was the first of a series of lectures to familiarize freshmen with the character of the courses given at Technology.

Professor Charles M. Spofford '93, head of the Department of Civil and Sanitary Engineering, began the lectures at 3 o'clock, giving a summary of the options offered in his department, the engineering training given in these courses and the opportunities for professional success. The

(Continued on Page 4)

TECHNIQUE SALES WILL END TODAY

**Campaign for Redemption of
Signups for Yearbook
Closes at Two**

Although four out of five days of a five day campaign for the redemption of *Technique* signups have passed, less than half of the men who signed up for the year-book have redeemed their pledge, it was announced last night. Today is the last day which the stand will be maintained in the Main Lobby for the convenience of students, and it is stated that this will be open as usual from 11 to 2 o'clock.

After today, it will be necessary for the men who desire to redeem their signups to climb to the third floor of Walker, to the *Technique* office, to dispose of the three dollars necessary for securing the ticket which entitles the holder to a copy of the annual, following the *Technique* Rush in April.

If the signup is not redeemed before Thursday, March 31, it automatically becomes void, and the original binder of one dollar is forfeited. For the benefit of those who did not purchase a signup during the previous campaign, these will be offered at a price of \$2.00, thus making the ultimate cost in these cases \$5.00.

INVITE 1911 ALUMNI TO CIRCUS APRIL 1

"Make Me a Kid Again Just for Tonight" will be the cry of the Class of 1911 when they meet at their stag party the evening of April Fool's Day for a round table discussion at Walker and entertainment at the Third Annual M. I. T. Undergraduate Circus. According to Orville B. Denison, General Secretary of the class, about fifty alumni are expected to attend this informal get-together.

Secretary Will Defy Ptomaine For Love

Although freed from the drudgery of cooking in her new home, Miss Viola A. Harrington, secretary in the Mimeograph Service office will be in constant danger of ptomaine poisoning when she marries the son of the chef of the Walker Memorial Dining Service, Harry D. Casalou, Jr. Young Casalou is employed as an assistant to his father in the Walker kitchen, and is noted for his proficiency as an amateur boxer, having won several prizes in meets.

Open House Night two years ago furnished the setting of the meeting of the couple. Following their marriage on April 16, the couple will probably make their home in Arlington.

DEBATERS DEFEAT U. OF MAINE 2 TO 1

**Support Cancellation of War
Debts—Meet Fordham on
Same Question Today**

Scoring their second victory of the season last night, the Technology debaters were successful in upholding the affirmative of the question: "Resolved: that the United States Government Cancel Its Inter-Allied War Debts." The vote of the judges was 2-1 for M. I. T.

As the team will debate Fordham today on the same question, the arguments of the Institute team were not made public. The Institute team was made up of Paul V. Keyser '29, Solomon Horwitz '29, and Bolick J. Shadrake '27, with Ralph T. Jope '28 as alternate.

SOPHOMORES WILL HOLD THEIR FIRST DANCE TONIGHT

**Nature of Tech Show Specialty
Act Announced—Ponies
Will Dance**

TWO ORCHESTRAS TO VIE

**Dance Will be Held in Statler
—Few Tickets Left in
Main Lobby**

Holding the first dance of its career, the Class of 1929 and its guests will disport themselves tonight in the Georgian room of the newly-completed Hotel Statler. Judging by the sale of tickets, the affair promises to be a financial as well as a social success, according to Paul H. Gill '29, President of the Class.

At last the nature of the Tech Show entertainment which was promised by the committee has been divulged. There will be a specialty eccentric dance by Charles E. Richheimer '28 and George B. Thacher '27, and five of the ponies, Huyler B. Ellison '28, Lawrence A. Foster '27, Charles F. Holdrege '29, William S. Hutchinson Jr. '29, and James M. White '28, will give a dance.

Costumes for the dance of the ponies will be the same Charleston dance costumes that caused such favorable comment in New York, but the dance itself will be a special one composed for the occasion. Music will consist of selections from the Show, and there will be a special orchestra to play it. Two spotlights will be used to illuminate the act.

Dancing will start promptly at 9 o'clock, the dance committee has announced, and will continue until 11:45, when Tech Show will put on its act. At the conclusion of the latter there will be continuous dancing till 2 o'clock. The Tunesters will play exclusively for the earlier part of the program, but they will alternate in duel of music with the Technicians when the continuous dancing starts.

The committee has taken extra care to see that there is no "gate crashing," and has made all possible arrangements for the comfort of those attending. The entire mezzanine will be exclusively reserved for the merrymakers. Dress will be formal.

So great was the demand for tickets yesterday in the Main Lobby that

(Continued on Page 4)

Nominations For T. C. A. Officers Are Made Public

**Chamberlain, Carlisle, Jessup,
Or Pearsall Will Be
President**

Nominations for officers of the Technology Christian Association have been decided on, and will be voted on by the entire staff March 30, according to a statement made yesterday by Wallace M. Ross, Executive Secretary of the T. C. A. There are 30 eligible voters.

Presidential nominees are: William H. Carlisle '28, John W. Chamberlain '28, Harlan R. Jessup '28, and Alva H. Pearsall '28. There are no nominees for Vice President, but the three unsuccessful candidates for the former office will automatically become eligible for the latter office. The treasurer will be either Gilbert H. Hathaway '28 or Morris T. Klegerman '28. The Nominating Committee consisted of Dwight C. Arnold '28, Chairman, E. Robert deLuccia '27, and Ezra F. Stevens '27.

All remaining members of the staff will be appointed by the officers between April 1 and April 14, acting on the recommendation of present incumbents. It was also decided at the recent Cabinet meeting, Mr. Ross announced, that there would be an installation dinner April 14 for all members of the staff, at their own expense.

CALENDAR

Friday, March 25
8:00—Debate, M. I. T. vs. Fordham, Rogers Building.
9:00—Sophomore Dance, Hotel Statler.
Tuesday, March 29
4:00—T. C. A. Forum, Faculty Dining Room.
Friday, April 1
1:00—Circus Parade.
8:00—Circus, Cambridge Armory.

WHAT DO YOU KNOW About Track?

Author of Today's "What
Do You Know" Queries

Dr. Allan W. Rowe '01
Secretary of the Alumni Advisory
Council on Athletics.

1. What is the weight of the discus?
2. What are the three standard outdoor hurdle races and what is the height of the hurdles in each?
3. Name two limiting conditions to be complied with in the shot put.
4. Who has run the fastest mile ever timed and how do present records compare with his performance?
5. How much does a single turn slow down a runner in a quarter-mile as judged by existing world's records?
6. What is the most important technical detail in relay racing?
7. What events compose the Pentathlon?
8. What essential difference exists between the running races in this country and those of the Olympic games?
9. What one essential point determines the legality of a successful high jump performance?
10. In what year was tenth-second timing made official in college competitions in this country?
11. In what year were the Olympic games revived, and where?
12. What is an amateur?
13. Who first exceeded 25 ft. in the broad jump and what is the present record?
14. When did the javelin throw become a recognized sport in American intercollegiate athletics and what was the reason for its introduction?
15. What field and what track events have shown the greatest relative improvement in the last ten years?
16. What are three of the conditions which must be met for a running record to be accepted?
17. How are distances measured on a track with turns?
18. What is a handicap and upon what basis is it determined for the individual?
19. What American athlete held three world's records in three different events at one time and what were they?
20. What weight event takes place in a circle the diameter of which is not 7 ft.? What is the diameter?
21. What is meant by seeding a race that is to be run in heats?
22. What difference exists in the method of starting in scratch races and those in which time handicaps are allowed?
23. What is the technical difference between walking and running?
24. How are cross-country races scored?
25. What is a Medley Relay?

This is the second of a series of questions concerning various phases of Institute life. The answers to Wednesday's questions are on page 4 of this issue.

A "HELLO RULE" FOR FRESHMEN

ONE BEGINS to hear early each fall term the numerous pros and cons of the freshman hazing question, but it usually happens that all the constructive suggestions which are bound to come into existence are not conceived or resurrected until the old order is too far under way to begin anything new.

It is evident that many of the minor varieties of hazing tend only toward the teaching of humility to first-year men, while others train them in the tradition and custom of the college life; but the nearly universal system of requiring each freshman to speak to every man he meets on campus is undoubtedly the most potent factor in the creation of a unified student body.

From all appearances, the Class of 1930 is assuming a responsibility for future unified undergraduate spirit that has never before existed at M. I. T. But their object cannot be attained through confining their efforts to their class alone.

To what extent the incoming classes are subjected makes little difference, provided that the enforcement does not become a farce. Freshman caps and similar customs would have their purpose, but by far the most important one would be the institution of the "Hello" habit, without which all other rules would be futile.

OLD CLOTHES

THE TIME slips by, the day approaches when all Technology will join in the mammoth Circus. It has been customary in the past to proclaim Circus Day as Old Clothes Day as well.

"In accordance with the spirit of Circi, it is highly fitting and proper that the costume should be of a mendicant type. This trend in modern dress is probably due to the fact that so many itinerant gentlemen of leisure have settled down to the quiet life of the city.

So, gentlemen, you need not worry about not appearing "comme il faut." Do not forget, make note on your calendars, or better still, have your valet arrange for a suitable costume.

Incidentally, it might be well to add at this point that your contributions of originality are also in order. You know Circus Day is famous the world over as a day when age sets aside the cares of sophistication and once more becomes a child.

No sooner had the Lounger gotten so that he could pass a derby on the street without knocking the thing out from under it than along comes the thing's brother with apparently every effort to make the staid and sleepy Institute hop to its feet in amazement.

But whatever piquant puns the Lounger may use to conceal his inner thoughts, he is in reality wringing his hands in consternation over the positive lack of all masculine decency among our undergraduates—a decency supposedly the pre-eminent trait of Technology men.

May the Lounger commend somebody on the care with which the east side of Walker is strewn with orange peelings, tinfoil, and and whatever else have you? The idea doesn't sound so good, but the thing looks so darn colorful, and the strewer strews so conscientiously that at least some praise is due him.

AS WE SEE THE MOVIES

FENWAY

Two mediocre pictures featured by good character portrayals and an abundance of feminine pulchritude are the offering of the Fenway Theater for the latter part of this week.

Lewis Stone, as a millionaire respectably in love with Billie Dove, a Follies girl, who is separated from her husband, played by Lloyd Hughes, presents his usual polished performance for the gratification of the audience in "An Affair of the Follies."

George Eastman, Former Kodak Head, Is Technology's Greatest Benefactor

Has Donated Over 59 Million Dollars to a Total of 20 Institutions

Seven years ago, at the annual alumni banquet, the identity of the "Mr. Smith" who had given up to that time more than ten million dollars to the Institute was revealed.

Technology Plan Aided
The gift of four million dollars in 1920 was given for the Technology Plan for industrial co-operation and research.

At that time Mr. Eastman granted his first newspaper interviews. In these he stated that in his opinion the three requisites of a college are a good faculty, a student body, and money.

His interest in the Institute arose almost entirely from his contacts with Tech men in industry especially among his employees. Mr. Eastman himself never attended the Institute or any other college, in fact he was never even graduated from grammar school for it was necessary for him to begin work at the age of fourteen as an office boy.

In December 1924 Mr. Eastman gave fifteen million dollars to various educational institutions of which Technology received an unrestricted gift of \$4,500,000, the largest single contribution ever made to the Institute.

that the depreciation of the stock that would occur if it were necessary to liquidate his estate after his death would result in decreasing the benefits to the various institutions; and last, because the disposition of his stock detached him definitely from money making.

This last gift was effected by sell- (Continued on Page 4)

Engineer and Syracuse Squads are Expected to Fight for Second Place

Technology's hard-hitting boxing team faces its final objectives of the season tonight and tomorrow when they pit their strength against four other colleges to battle for the Intercollegiate boxing title. The championship bouts are being held this year at Syracuse. All elimination matches take place this evening, leaving the semi-finals for tomorrow afternoon, and the finals for the evening.

At the present time the Naval Academy appears to represent the class of the field. The midshipmen have their usual strong entries and should emerge with a clean-cut victory. In the first match of the season the Annapolis lads trounced the Engineers, though Coach Rawson's mittmen have greatly improved since then. It is doubtful if they will be able to stop the Navy.

Both Syracuse and Penn State have fairly good teams this season and both

are expected to show to good advantage at the meet. Pennsylvania is not as strong however, having been smothered 7-1 by the Army recently. Yale, one of the strongest teams in this section, is not entered in the championships.

It would be not altogether surprising to see the Engineers finish in second place. They have been practicing very hard during the past two weeks and Coach Tommy Rawson is quite satisfied with their showing. Both of the New Hampshire meets as well as the one with the Navy, were featured by very close decisions in the various bouts. These verdicts may well be reversed in the battles to-night and tomorrow.

Collins and Kwauk Favorites
Captain Collins of the midshipmen should retain his intercollegiate title in the 115 pound class. He is one of the fastest boxers in the lighter divisions of the collegiate ranks and has a long string of knockouts to his credit. Weintaub, also of Annapolis, is a good prospect in the 125 class, but Captain Wally Kwauk of the Beavers is at least his equal and will perhaps take the decision.

Technology will enter Albert Carey in the 135, and Flynn in the 160. Marshall will start in the 175, with Lou O'Malley reserved for the unlimited class. These latter three entrants are particularly strong. Flynn and Marshall are both hard hitters and at the same time can stand more than a few hard blows. O'Malley is a powerful hitter who may upset the dope and take the title for his class.

The Institute team left last night for Syracuse and should be ready to go, at the opening bell this evening. Lieutenant William Kurtz, who acted as an assistant to Tommy Rawson earlier in the season will be one of the judges of the bouts. Due to the fact that so many of the matches have been featured by poor refereeing this season, special pains have been taken to secure only very competent officials.

MANY REPORT AT TENNIS MEETING

"Round Robin" Eliminations to Decide Makeup of All Three Teams

Twenty-five candidates gathered at the first tennis meeting of the season held on Wednesday afternoon, and heard the plans for the season as discussed by Manager Collier.

A few prospective candidates were unable to attend, and these are expected to report at the A. A. office as soon as possible.

As in the past, there will be three teams selected, including a Varsity, second Varsity, and a freshmen outfit. Each will be chosen by means of Round Robin elimination matches which are scheduled for the near future. The Varsity will probably include some of last year's second Varsity and freshmen players as well, of course as Captain Huck, number one on the 1926 team.

Ten matches are, to date, lined up for the first team and will be followed by participation in the New England Matches at Longwood. Contrary to usual custom, a five match schedule has been outlined for the seconds and will probably embrace several contemplated additions. The freshmen are to meet eight competitors among which are the yearlings of Brown and Harvard.

Only four matches are to be played on the home courts none of which are by the freshmen. The season promises to be one of the most interesting that the Beavers have ever had since they are to compete with the leading colleges of the East, and will require the teams' best efforts to come out on top.

INTER-FRATERNITY BOWLING RESULTS

(Final Round)

Phi Mu Delta 1150
Delta Kappa Epsilon 1114

Raids made by the police on 40 fraternity and sorority houses at the University of California netted about 500 miscellaneous signs, a cemetery sign, more than 100 lanterns, three fire axes, two barber poles, and many other strange articles taken from the city streets.

Undefeated Navy Gym Team Heavy National Favorite

Annapolis Lads Have Had Victory Margin During Last Ten Years

After a week of strenuous practice, Technology's gymnasts are finally prepared to complete their season tomorrow afternoon at Princeton in the Eastern Intercollegiate. Dartmouth, Princeton, Navy, Army, Temple, and University of Pennsylvania are the other entrants in the meet.

The Navy is a top-heavy favorite to take the title. The middies have not tasted defeat in a dual meet for ten years, and have won every championship that they have entered a team in. Next to the Annapolis squad, Dartmouth looms up as being very formidable. The Big Green has only been downed once this year and then at the hands of the Navy. Princeton and Army are two other strong competitors.

Manager Dick up to last night had not definitely decided who the Cardinal and Gray entrants were to be. Captain Waller will of course compete in the tumbling and Stevenson will try the horizontals but the third position is a toss up among Luck, Moore and Fairchild. Luck has done very good work in the tumbling events while Moore and Fairchild have come along rapidly during the last three weeks.

No matter how high-hat a pipe may be . . .

MAYBE you know some old fogey who owns one of these ultra high-hat pipes. . . a blotto bimbo who broadcasts a line of "broad-A" lingo: "cawn't enjoy tobacco that costs less than two bucks the ounce" . . . Well, paste this bit of news in the old boy's stove-pipe:

In picking pipe-tobacco forget price ENTIRELY. . . draw your own conclusions through the stem of your trusty pipe. Draw deep from a bowlful of grand old Granger Rough Cut and learn that there's ONE truly fine tobacco that DOESN'T cost a fortune.

Here's tobacco as fine as any man ever packed in his pipe. . . Granger is made for pipes and cut for pipes—it SMOKES like a million dollars! But the pocket-package is a foil-pouch (instead of a costly tin) and so, it SELLS at just ten cents.

It's tobacco worthy of the "dawgiest" meerschaum or calabash. . . tobacco worthy of any pipe in the world!

GRANGER ROUGH CUT

The half-pound vacuum tin is forty-five cents, the foil-pouch package, sealed in glassine, is ten cents.

Made for pipes only!

Granger Rough Cut is made by the Liggett & Myers Tobacco Company

FRATERNITY AND CLUB PARTIES

DEPARTMENT HEADS DESCRIBE COURSES

(Continued from Page 1)
second talk was given by Dr. Davis R. Dewey, in charge of Course XV. "The courses in Business Administration," said Dr. Dewey, "are designed for students interested in obtaining executive positions with companies where some technical education is essential for success." Professor Edward F. Miller of the Mechanical Engineering Department gave the last talk of the series. The course in his department he stated, dealt with the design and construction of factory and power equipment. Several elective and optional courses are offered in the senior year.

The second series of lectures will be given on Tuesday when Professor Ross F. Tucker will speak on the course in Building Construction at 3 o'clock in room 3-270, and at the same hour the course in Geology will be outlined by Professor Waldemar Lindgren, in charge of that department, in room 4-340. Professor Samuel C. Prescott of the Department of Biology and Public Health will describe the work of his department at 3:40 o'clock in room 4-270. Professor Harry M. Goodwin, in charge of the course in Electro-chemical Engineering will speak at the same time in room 4-370, and Chemical Engineering will be described by Dr. Warren K. Lewis, in charge of that Department, at 4:15 o'clock in room 4-270. The remainder of the courses will be described in similar talks on Thursday, March 31, and on Tuesday, April 5, the time and place to be announced shortly.

EASTMAN HAS GIVEN INSTITUTE MILLIONS

(Continued from Page 2)
ing stock to the Institute at half the market price. The installments in this payment covered sufficient time so that the income from the stocks would pay the cost. No conditions of any sort accompany the gift. The stock may be kept by the Institute or disposed of at any time that the Corporation wishes, and the fund may be used for any purpose that the Corporation deems wise.

"Technology is all prepared to make use of these additional funds" as it is "the greatest school of its kind in the world, with an eminent faculty of scientific men, a splendid body of students and alumni, a great equipment, and an outstanding board of directors to determine its policies," is Mr. Eastman's opinion.

To a total of twenty-two institutions Mr. Eastman has given a total of about fifty-nine million dollars. The beneficiaries of his gifts have included many educational institutions, hospitals, parks, state and municipal research bureaus, and the employees of the Eastman Kodak Company to whom many shares of stock have been distributed to be paid for out of the dividends on the stock.

Answers To Questionnaire By President Samuel W. Stratton

1. M. I. T.'s charter was granted in 1861 by the Massachusetts Legislature.
2. The three integral parts provided for were a Society of Arts, School of Industrial Science, and Museum of Arts.
3. The Society of Arts was established in 1862. The School of Industrial Science was opened in the fall of 1865. As yet the Museum of Arts has not been established.
4. The first class was graduated in 1868.
5. The past presidents of the Institute in order of succession, excluding acting presidents, were William Barton Rogers, Francis Amasa Walker '93, James Mason Crafts, Henry Smith Pritchett, Richard Cockburn MacLaurin, and Ernest Fox Nichols.
6. The first Institute classes were held at the Mercantile Building, 16 Summer Street, Boston.
7. The Institute was moved to the present site in 1916.
8. William Welles Bosworth '89 was the architect of the present building.
9. Stone and Webster, Inc., were the builders.
10. The height of the library dome is 150 feet above the present level of the Great Court.
11. The approximate area of the first floor of the main group of the attached educational buildings is 152,460 square feet.
12. The faculty is constituted of the professors, assistant professors, associate professors and certain designated instructors.
13. The recognized departments of instruction are Civil and Sanitary Engineering, Mechanical Engineering, Mining, Metallurgy and Geology, Architecture, Chemistry, Electrical Engineering, Physics, Chemical Engineering, Naval Architecture and Marine Engineering, Economics and Statistics, English and History, German, Romance Languages, Mathematics, and Military Science and Tactics.
14. The Department of Electrical Engineering has the largest enrollment.
15. The offices of academic administration are Dean of Students, Assistant Dean of Students, Dean of Graduate Students, Director of Industrial Cooperation and Research, Librarian, Assistant Librarian, Medical Director, Assistant Medical Director, and Secretary of the T. C. A. in Charge of Student Employment and Lodging.
16. The offices of business administration are Bursar, Assistant Bursar, Manager of Division of Laboratory Supplies, Registrar, two Assistant Registrars, Superintendent of Buildings and Power, and his Assistant.
17. Any alumnus of the Institute is eligible for membership to the Alumni Association. Also any person who has attended the Institute at least one year may become a member by having a petition accepted by the association.
18. The Institute grants the following degrees: Bachelor of Science, Master of Science, Master in Architecture, Doctor of Science, Doctor of Philosophy, and Doctor of Public Health.
19. Charles W. Eliot, late President Emeritus of Harvard University, was once member of the Institute's instructing staff.
20. Daniel C. French '71 is a noted sculptor.
21. Edwin H. Blashfield '69 is a noted painter.
22. George E. Hale '90 is a noted astronomer; Charles G. Abbott '94 might also be an answer to this question.
23. The "Institute Committee" is constituted of three members of each class, a representative from each of the Group A activities, and a representative from each of the following organizations: Combined Professional Societies, Walker Memorial Student Council, Architectural Student Council, Budget Committee, Elections Committee, Point System Committee, and Dormitory Committee.
24. The principle duties of the Corporation are to safeguard the finances of the Institute, to secure an adequate teaching staff, to put into legal effect the educational policy of the Faculty, and to grant degrees upon the recommendation of the Faculty.
25. Many of the duties of the Corporation are carried out by its Executive Committee.

Note: These answers did not originate from President Stratton, but are believed to be correct.

BASEBALL MANAGERS

Managers are needed for each of the four inter-class baseball teams, all candidates for the respective managerial positions should get in touch with Carl Bernhardt '28, in the M. I. T. A. A. office any time between 5 and 6 o'clock any afternoon next week.

Me
and the joy-friend...
Prince Albert

WHEN my father was in college, "Put that in your pipe and smoke it!" was considered snappy conversation. I'm ready to take this old line literally when the talk centers around Prince Albert. Because P. A. makes two of what I like in a pipe.

All wise-cracking aside, P. A. is the money when it comes to deep-down satisfaction in a smoke. It's got everything! Cool as the trail of the ice-man across the kitchen. Sweet as vacation. Fragrant as a pine forest.

Think up your own similes. You'll write them all in the column headed "Superlative Degree" when you learn the joys of a jimmy-pipe and Prince Albert. If you don't know this grand old smoke, come around to my room and I'll give you a load.

PRINCE ALBERT

—no other tobacco is like it!

P. A. is sold everywhere in tidy red tins, pound and half-pound tin humidors, and pound crystal-glass humidors with sponge-moistener top. And always with every bit of bite and parch removed by the Prince Albert process.

What to see in ENGLAND

The first college of Cambridge University was founded in 1284. Seven centuries of history and development have endowed this old-world University with scenes and traditions that are intensely interesting to American students.

You cannot afford to visit Europe without a trip to England—where the language is yours, where you will understand and be understood better than in any other part of Europe.

It is the home of wondrous York—city of the famous Minster which this year celebrates its 1,300th anniversary. Not only are there noble castles and mighty historical ruins, but pleasant modern resorts, situated in the finest parts of England's celebrated countryside.

Then there is Cambridge, Norwich, Lincoln, Durham and other places famous in history, romance and legend. Something attractively different for every day of your trip when you visit England.

In addition to the "Flying Scotsman", the London and North Eastern Railway's famous train between London and Edinburgh, there are fast and frequent trains to all the numerous points of interest.

Send for free booklets now. Begin to plan about the places you want to see. Write to H. J. Ketcham, General Agent, London & North Eastern Railway, 311 Fifth Avenue, New York.
