

WILL SELL SEASON TICKETS TO COVER BASEBALL BUDGET

Drive Starts Today at Noon—
Continues Until Thursday
Afternoon at 5

NEED 12 NEW UNIFORMS

Institute Committee Sanctioned
Plan When Proposed at
Last Meeting

Candidates for the Beaver baseball team will call on the student body of Technology, beginning this noon, to support the newly reorganized sport by buying season tickets to all home games. In this way the men hope to cover all expenses of this year's season, because the money now available is not nearly sufficient to meet the team's budget.

To lead the way, the Sophomore Dance Committee has given \$100 from the profits of the recent dance towards the team's funds. This is part of the private profit of the committee, since their budget, which had first been approved by the Budget Committee, was later repudiated, and the ten Sophomores went through with the affair at their own risk. They gave the remaining \$75 to the class.

Need New Uniforms
At present the most urgent need for money is to purchase twelve new uniforms for the team. Those having the suits left from the Beaver team of two years ago have been requested to return them but as yet only two have been brought in. To prevent the recurrence of this situation, the new uniforms which are bought will not be given to the men, but will merely be loaned, and next year will be passed on to the members of that team.

This plan of finance was read before the Institute Committee by James A. Lyles '27, acting chairman, at the meeting yesterday, and was approved by a motion of the Committee. Owing to the wide interest in the Beaver baseball team which is felt throughout the entire student body, the management feels that the men will back up the sale of season tickets fully. If the financing of the team (Continued on Page 4)

Freshman Class To Hold Formal Dance On May 13

Doc Eisenbourg With Seven
Piece Orchestra to Furnish
Music for Couples

Following a report from the Dance Investigation Committee, that enough tickets could be sold in the freshman class alone to run a dance, the section leaders have definitely decided that the Class of 1930 will give a dance on Friday, May 13. Admission will not be restricted to members of the class.

Bids for several orchestra leaders including "Bert" Lowe of the Hotel Statler, Jack Renard of Lido Venice, and George Tyne have been considered. However, Doc Eisenbourg was selected because, the leaders felt that of the group he was the best known to Technology men. Eisenbourg is a graduate of the Institute, and plays regularly at Sheppard's Colonial Restaurant. For the past few years, he and his ensemble have been broadcasting regularly over the radio. In addition "Doc" has guaranteed that he will be present all the evening to direct his "Symphonians" personally.

As yet the hall for the affair has not been chosen, but the Committee has now the information concerning the small ballroom of the Hotel Somerset, and the hall at Alden Park Manor. The dance will probably be held at one of these two places.

The committee of ten which is in charge of the dance is composed of the following freshmen: Gregory Smith, chairman, Allen H. Stone, Robert W. Reynolds, D. Tullis Houston, George E. Kloote, Frederick A. Sommers, Edward P. Dean, George Lawson, Joseph W. Devorss, Roy W. Ide. The tickets, which will be distributed next week, may be obtained from any of the section leaders for \$2.

Senior Week Blanket Ticket Will Cost \$8

Senior Week revelers will be assessed \$8 to cover the cost of all the events excepting the Senior Prom, according to the decision of the Committee on Wednesday. An additional charge of \$9 will be made for the Prom making it considerably more expensive than last year's dance. The rise in price is due to the fact that, whereas last year the Senior Prom was held in Walker the Committee has decided to use the Main Ballroom of the Copley Plaza Hotel for the 1927 Prom.

G. H. DE THIERRY TO LECTURE HERE

Is Professor of Hydraulics At
Technical University at
Charlottenburg

Coming to the United States through the special invitation of President Samuel W. Stratton, George Henry de Thierry, Professor of Hydraulics at the Technical University of Charlottenburg, and probably the foremost consulting engineer on the continent of Europe, arrived in Boston Wednesday night to deliver a series of lectures on hydraulic engineering problems at the Institute.

These lectures will depict the work which is being conducted in the research laboratories of Germany and will be illustrated by means of slides and moving pictures. The initial lecture of the series is scheduled to take place in room 1-190 today at 11 o'clock and will be followed by a lecture in room 5-330 Monday at 2 o'clock and two lectures in room 5-226 on Tuesday and Thursday at 11 o'clock.

Our River Problems Neglected
Although the United States is confronted with many hydraulic problems such as the filling in of the Mississippi River and the periodic overflowing of the same stream both of which cost the country millions of dollars annually very little has been done with respect to hydraulic research in this country in order to cope with these problems.

Germany, on the other hand has proven herself foremost in regards to hydraulic research and has constructed in her technical laboratories models of the troublesome streams of that country and thus has gained much valuable knowledge as to the proper method to adopt in order to gain the desired results.

It is with the intention of constructing at the Institute a hydraulic research laboratory of this type in the near future that Professor de Thierry was invited to Technology. Among the practical hydraulic problems solved by Professor de Thierry was the regulation of the River Weser so vessels of 20 feet draft could reach the port of Bremen, 42 miles inland instead of only those of 6 foot draft as was previously the case.

STRATTON ADDRESSES ALUMNI OF CHICAGO

After making a dash to Chicago with Professor Samuel C. Prescott '94, Dr. Samuel W. Stratton, President of the Institute, addressed the annual banquet of the Technology Club of Chicago at the University Club there recently. Professor Prescott is the president-elect of the Alumni association, and attended the banquet in that capacity.

In his speech, President Stratton pointed out the need for co-operation between the alumni and the Institute in regard to the selection of freshmen, from both a professional and an academic point of view. He stressed the need of interesting the right kind of men in the work done at the Institute, and also explained the purpose and the plan of the new system of Regional Scholarships which the Institute now offers to freshmen from the Alumni centers. These co-operate with the Institute in choosing the desirable men. The banquet was arranged by Thomas M. Lothrop '95, President of the Technology Club of Chicago.

ABOLISHMENT OF ANNUAL CIRCUS IS RECOMMENDED BY INSTITUTE COMMITTEE

TECH SHOW GIVES PERFORMANCE AT SMITH TOMORROW

"West Is East" Will Give Two
Performances In The
Academy of Music

ADVANCE SALES HEAVY

Leaving for Northampton by rail tomorrow morning at 9:15 Tech Show 1927, "West Is East" will give two performances for the especial benefit of the fair maidens of Smith College at the Academy of Music tomorrow. There will be a matinee and an evening performance of this year's musical comedy hit, as has been the case in the past. This is the last trip which the Show will make this season as all the other performances of this year's dramatic presentation will be in Boston.

A special car has been arranged to take \$3 men who comprise the cast, chorus, and staff of the Show to Northampton, and while there they will be quartered at the Harper Hotel. The Show has been widely advertised in that part of the state, not only in Northampton, but at Amherst and Williams Colleges, which will supply many of the patrons of the Show. It is expected that seats will be selling at a premium for both performances. Many tickets have been sold here in Cambridge to men who are migrating to Northampton over the week-end.

Boston Performances Popular
It has been announced that the seat sale for the Boston performances has (Continued on Page 4)

PROM REDEMPTION DRIVE ENDS TODAY

Admission Will Be Fourteen
Dollars Thereafter

Approximately 100 students have failed to redeem their Prom Signups as the signup redemption and ticket sale campaign enters the last day of the drive. After today the cost of admission to the annual event will be \$14 although those who failed to sign up may still purchase their tickets for \$12 until the stand closes this afternoon.

With the payment of the required price of admission the Prom committee is giving an admission ticket, a favor ticket, a dinner ticket and an invitation. The preliminary dance orders are expected to arrive in the near future and will be distributed to ticket holders.

Beaver Nine Bows To Tufts By 9-2 In Practice Game

Unlucky Fourth Inning Fatal
To Technology's Hopes
Of Victory

After one week of practice, the newly organized Beaver baseball team went down to defeat at the hands of the experienced Tufts College nine by the score of 9-2 in the six inning informal game played yesterday on Tufts Oval at Medford. In spite of their inexperience the Technology ball tossers kept abreast of their rivals until the fatal fourth inning when six runs were scored against them.

In the opening frame the Beavers got off to a good start. Jim Fahey after working the pitcher into a tight hole was advanced to first when a wild pitch struck him. Crotty, the next batter lined out a fast ball that the second baseman could not quite hold. As a result Fahey reached second and Crotty was perched safely on first. Deke Crandall then poled a long one to right field that Herman caught. With two out Marsh David hit a hard drive that went far over the third baseman's head. On the play Fahey and Crotty scored but David in attempting to steal third was caught, retiring the side.

Tufts Ties Score
Tufts then came to bat eager to tie up the score. Ellis, the first man up, drew a pass. Leonard hit a long one to right field that was safe all around. Herman, then sent two tallies across on another long outfield hit. The next batter flied out and the following pair hit weak infield balls that were easily smothered.

Crosby led off for the Beavers in the second, but was put out on a short fly. Cullinan drew a pass, but the side was quickly retired when Bell and Vic Duplin struck out. Coming in for their half of the inning the Jumbos lead-off man flied out. McCloskey and Smith each hit safe ones to the outfield. With men on first and second Ellis fanned. Leonard scored McCloskey on a nice single, but the side was retired when Herman flied out.

The third inning was scoreless for both teams, only seven men coming to bat. For the Beavers the fourth was quite similar. The Jumbos, however, in their half sent a barrage of ground balls between third and short that resulted in six runs, making the score 9-3. The remaining two frames were scoreless.

For the Beavers, Deke Crandall, David, Fahey and Duplin were the outstanding performers. Vic Duplin pitched very good ball for three innings holding the opposition to three runs.

PROPERTY DAMAGE HAS GROWN EACH SUCCEEDING YEAR

Committee Approves of Drive
For Money to Finance
Baseball Team

PRAISES CIRCUS OFFICIALS

Extreme disfavor of continuing the Technology Circus was registered last evening by the Institute Committee in their regular meeting when they passed the motion that the Institute Committee go on record as favoring the abolishment of the annual affair.

Although the majority of the members of the executive body were decidedly in favor of discontinuing the Circus it was the consensus of opinion that the option of having a Circus next year should be left to the decision of the following Institute Committee and this was done by simply registering disapproval rather than passing a motion abolishing the Circus as was done in the case of Tech Night some years ago.

In the lengthy discussion which took place in regard to the Circus it was pointed out that the undergraduates have been more unruly at each succeeding affair and to prevent the possibility of turning the annual celebration into a riot some action was necessary.

Property damage reached a high water mark this year since Daniel C. Metzger '27 reported that approximately \$85 worth of destruction had been committed in the armory and booths. (Continued on Page 4)

Last Series Of Course Lectures Given Yesterday

Work of All Courses Outlined
By Department Heads
For Freshmen

Technology freshmen have recently been given an opportunity to learn about the type of work given by the various departments at the Institute, by a series of descriptive talks given by the several course heads.

In these talks which were, on the whole, descriptive in nature, the speakers outlined the type of work given in their respective courses, the work to which the courses lead and the opportunities for professional success. These talks were informal in nature, and an opportunity was given after each lecture for the members of the audience to ask questions on any doubtful points.

The last series of talks was given yesterday afternoon, when the courses in Electrical Engineering, Chemistry, Architecture and Architectural Engineering and General Science were outlined. Professor Dugald C. Jackson, head of the Department of Electrical Engineering, advised the freshmen to choose their course with a view to following the branch of engineering in which they are most interested, rather than with a view to financial or other considerations. The courses in Electrical Engineering, he said, deals with the basic principals of natural phenomena and their interrelations. This course stresses the development of scientific curiosity and inquiry which is alone responsible for the advancement of the sciences.

CALENDAR

Friday, April 8
3:00—Last Ball Lecture, Room 10-250.
5:00—Meeting of Freshman Dance Committee, Room 10-275.
5:00—Sedgwick Memorial Lecture, Room 10-250.
8:00—Hindu Students' Social—Bates Hall, 312 Huntington Ave.
Saturday, April 9
3:00—Handicap Meet, Cinder Track.
Tuesday, April 12
5:00—Meeting Christian Science Society, Room 1-132.

PROGRAM FOR JUNIOR WEEK

APRIL 16—Saturday

2:15 Technique Rush (Great Court)
2:30 Baseball (Beavers vs. B. U.)
3:00 Corporation Tea Dance (Walker Memorial)
3:00 Crew Race

APRIL 18—Monday

2:00 Track Meet (Interclass; Tech Field)
4:00 Activities Tea Dance (Walker Memorial)
9:00—3:00 Musical Clubs Spring Concert and Dance
Concert, 9:00 to 10:30 (Hotel Statler)
Dance 10:30 to 3:00 (Imperial Ball Room)

APRIL 19—Tuesday

2:30—3:30 Inter-Fraternity Tea Dance (Somerset)
8:00 Tech Show (Castle Square Theatre)
10:00—4:00 Junior Promenade (Copley Plaza Hotel)

APRIL 20—Wednesday

8:15 Tech Show (Castle Square Theatre)

APRIL 21—Thursday

ABOLISHMENT OF THE CIRCUS

LAST evening at a regular meeting of the Institute Committee the following motion was passed: "This Institute Committee goes on record as favoring the abolishment of Technology Circus."

Future Institute Committees can reinstate the Circus at the Institute, but before they do so they will have to consider the situation very thoroughly in the light of the action of the present Committee.

Since the establishment of the Circus at Technology three years ago each succeeding year has brought more disorderliness and lack of co-operation from the undergraduates attending.

We believe that the action of the Institute Committee is entirely justified. It was our opinion previous to the Circus this year that the affair did serve the purpose of getting the undergraduates together in an informal way and was thus well worth while.

The management of the past 1927 Circus was very efficiently handled; no criticism could be made of their efforts. They also had much better support from the Dormitory Circus Committee than previous committees had enjoyed.

THOSE SIGNUPS AGAIN

WITH the arrival of spring winds and sight-seeing tubs on the Charles River Basin, the student body has once more lapsed into that laconic state of procrastination so often referred to in the past.

Here are the facts. The Prom Committee has voiced the opinion, based upon the number of redemptions received during the first two days assigned for making final reservations, that in future years Junior Promenade will have to be made a much smaller affair unless better support is received.

Technology has few occasions in which to make merry and forget about problems and reports, yet students who continually lament this fact do not hasten to take advantage of the opportunities presented with the advent of Prom Week.

Junior Promenade must have your support. If you have procrastinated, there is still an opportunity to attend. Today is the final day for redemptions at the first price set by the committee.

The Prom Committee promises you good music, good food, and a most enjoyable evening. The rest is up to you!

THE TECH BOOK LIST

A TREASURE HUNT

THE CITY IN THE SEA, by H. de Vere Stacpoole. New York: George H. Doran Company. 300 pages. \$2.00.

Writers of fiction, when tired of expounding upon war, class hatred, and passionate love-making, invariably resort to treasure hunts. Too often these treasure hunts lead to the blood-and-thunder variety of hypothetical pirates from the Spanish Main or heroes after the pattern of a Horatio Alger thriller.

The plot of the book concerns itself with the promotion of a secret expedition to the island of Hyalos by Behrens, a wealthy dealer in antiques. Robert Lestrage, an ambitious author, is chosen leader, while Miss Hare and an old colleague of Lestrage are the remaining members of the treasure hunt.

Intercollegiates

The woman students of the University of Colorado have again adopted the ankle length of dress. It is estimated that more than 305 women at the last all-school party wore long dresses.

Another student at some western college has taken his own life by gas poisoning, thus making a total of 19 suicides. From the last indications, 17 out of the 19 students were attendants of co-ed colleges.

Photographs of students in the School of Geology at the University of Oklahoma are to be kept in file in order to establish the identification system for use in making recommendations.

The glee club of Oberlin College, on a recent tour, sang before a body of 2243 prisoners at the Mansfield reformatory. Appropriately enough, one of their selections was the "Prisoners Song."

A unique co-operative plan has been started at the Business College of the University of Wichita whereby the men are divided into two groups, one of which attends classes while the other works. The groups alternate every few weeks.

Enrollment in the University of Nevada has nearly tripled in ten years. This year there are 1000 students, and a class of 107 will graduate.

Latest reports favoring the radio addict, comes from the University of Alberta, where a radio program is broadcasted every evening.

As a mark of distinction, the seniors of Brigham Young University will wear blue cords, ranger hats, blue blazers trimmed with white, and blue canes.

Violation of a rule against the use of curling irons in Vassar, nearly endangered one of the largest dormitories in the college. An electric iron was left turned on near a series of busts and paintings of famous men and women.

Biology Department Publishes Form For Making Survey of School Health

Has Attracted the Nation-Wide Interest of Health Authorities

Once more the Institute Department of Biology and Public Health forges to the front in United States public health work. This time Professor Claire E. Turner of the department, with the aid of many assistants, has compiled in one pamphlet a tentative appraisal study of school health work entitled "M. I. T. School Health Appraisal Form."

This work has already gained nation-wide recognition. Orders for copies of the pamphlet have been received from every health center of the country. One health director of a Kentucky city writes that the form has already proved invaluable and consequently fifty copies have been ordered by him.

Malden Schools Supply Data
Professor Turner, who is now in Cleveland engaged in systematizing the school health organization of that city, with the assistance of many health authorities and Institute students, drew most of his data from several years' experimentation in the public schools of Malden, Massachusetts.

In the introduction, the following uses of the appraisal form are suggested. First, it may be used by the principal to study the existing program in health work in an individual school in order to find out which of its phases need strengthening in developing a well-rounded health program.

Uses Scoring Plan
A scoring plan devised by the compilers makes this guide especially valuable in the way that the health supervisors may easily check up to see if the work is functioning smoothly. An example of the scoring system can be

seen from the following extract: I. Health protection—total points 350; under this general topic is A. Sanitation of school plant—100 points; B. Examinations (physical)—125 points; C. Communicable disease control—125 points. The second general subject is II. Correction of defects and conservation of health among defectives—250; A. Special classes—50; B. Clinics—30; C. Follow-up service (nursing service and methods of securing corrections, etc.)—70; Results of corrective program—100 points. And the third topic deals with Health promotion—400 points; A. Hygienic arrangement and administration of program; B. Physical activities and provisions for them; C. Health instruction and motivation. Under these sub-titles a complete explanation of each point is given with the result that if the suggestions are faithfully adhered to, an increased school health work efficiency will result.

The first graduates of a chemistry commerce course in the United States received their diplomas from the University of Wisconsin last June.

BOXERS COMPLETE DIFFICULT SCHEDULE

Institute Crew Will Concede 8 Pounds To Navy

Beavers Have Great Hopes For Success in Tech Shells At Annapolis

When the Tech Varsity Crew lines up against the Navy at Annapolis on April 23, they will be outweighed by about eight pounds to the man. The average weight of the Beaver oarsmen is 177 pounds while the Navy is an unusually heavy crew, averaging 185 pounds.

With the present line-up, the Tech varsity has only one veteran from last year's crew, Captain Ernie Knight. The Navy is composed of four veterans including the coxswain from their last year's varsity eight. What is lacking in weight and experience among the Cardinal and Gray oarsmen is made up in spirit for the men are confident that rowing in their own boat they will be able to spring a surprise on the middies.

The rough water on the river during the last week has given the crew a chance to become accustomed to the kind of course that they will probably encounter on the Severn. Coach Haines is putting the finishing touches on the crew during their morning and afternoon rowing in preparation for their departure for Annapolis on the evening of the seventeenth. For the five days preceding the race the Beavers will be guests at the Naval Academy.

Jayvees and Freshmen to Race

Coach Haines has announced that the other crew to go down to Annapolis with the varsity will be determined by a race between the 1st Freshmen and the Junior Varsity on next Wednesday afternoon. This will give the Freshmen something to work for and will also encourage the Junior Varsity to put forth their best efforts. Two years ago a similar race was held between the 150's and the Jayvees. The 150's won with the result that they made the trip to Annapolis.

Work on the rerigging of the new Oxford shell has been delayed because of the necessity of securing new rigging. Pat Manning, the rigger, has practically finished the resetting of the seats. The work is now waiting for the new locks to arrive. Coach Haines is planning to let the Junior Varsity use this boat.

Prospects Bright For Next Year With Nearly Veteran Team Returning

Yale Freshmen	1	5

By Louis Verveer '30

Technology's boxing team closed its recent season by losing a close meet to the newly organized Harvard team, thus ending a season without a single victory, but with several close decisions against it. Defeats by the Navy, New Hampshire, and Harvard, with a tie in a return meet with New Hampshire were topped off by taking third place in the New England Intercollegiate. Although no victories were chalked up during the course of the season, Tommy Rawson's men provided a lot of tough battles for the young collegiate mittmen of the vicinity, and as only three men will be lost to the squad next year, it is expected that a winning team will wear the Cardinal and Gray next winter.

The first meet came early in February, against the Navy at Annapolis, where three knockouts and four decisions were sufficient to sink the Engineers. Of the four decisions, however, not a one was by a decisive margin, and there was some doubt in the minds of the spectators as to whether the Cardinal and Gray was not entitled to several of the bouts. By judgment of the officials, the Navy was given all the decisions, and the Technology squad had to be content with a whitewashing.

Against New Hampshire in the next encounter, the Engineers put up a good scrap, and were awarded two bouts out of six. As usual, all the matches were fast and hard-fought, with the Wildcats holding a slight advantage. In a return meet, Rawson's men managed to take three matches, and thus gained a tie. The opinion of those who witnessed these two meets was that the two teams were so closely matched that it was practically impossible to concede either a victory.

At the Intercollegiate, Technology stood in a very fair way to place in the heavyweight division, when O'Malley reached the semi-finals in this class. He took the first two rounds of the semi-final bout by a wide margin, and was leading in the final stanza, when he made a mis-step, tripped over his opponent's foot, and fell, striking his head on the floor outside the ring. He was out for over five minutes, and therefore lost by a

knockout, although his opponent's mitt had nothing to do with his journey into dreamland. Captain Kwauk also lost his bout in the semi-finals. Flynn survived the semi-finals in the 160-pound class, and was looking good for a victory in the finals, when he held his own for two rounds. He was unable to maintain the pace in the closing round, and lost by a slight margin. The team placed third in the team scoring.

Harvard was the final opponent to be met, and the up-river team took a 4-3 victory in this first outside engagement for the Crimson mittmen. The Cardinal and Gray made a great effort to humble their ancient rivals in other lines of sport, but it seems that Harvard was fully prepared before the Technology team was challenged.

Next season will see all this year's squad back with the exception of Captain Kwauk, Flynn, and Marshall. Coach Rawson will build his team around O'Malley, Peatfield, Aldrich, Conroy, Keith, and Joyce, from this year's Varsity, and probably Jamieson and Bolanos, freshmen. The management has been under Barrett Weston this past season, with J. F. McGrath as assistant, who will be eligible for the managership next year.

The frosh had only one outside meet during the season, as the removal of boxing from the P. T. substitution list had a disintegrating effect on the squad. Yale freshmen took five of the six bouts from the Technology yearlings, but in spite of this lone setback in as many encounters, the majority of the men continued to report regularly for practice, and Coach Rawson expects a lot from his 1930 battlers when another season comes around.

Long Entry List For Season's First Handicap Meet

Fast Competition Should Be Feature of Handicap Events Saturday Afternoon

Starting the season early the first handicap meet of the spring will be held Saturday afternoon, when all the common events will be run off. It should be interesting in lieu of the following list of events.

Three different dash events will be run. In the 75 and 150 yard dashes there is a long list of fast men. Some of the best are Berman, Kauzman, Edlund, Henderson, and Dahl. Meagher Halahan and F. A. Ladd ought to run a fast 400 yard dash.

At the longer distances, there will also be three events. The 660 yard, three-quarter mile and mile and a half runs offer quite a program. Close competition should feature the 660 with Smith, Mitchell, and Fay running.

Two hurdle races, the 75 yard high hurdles and 150 yard low hurdles have three good men entered in Steinbrenner, Collins, and Hall.

All the ordinary field events will be seen. The high jump, broad jump and pole vault all have a good list of men entered. A flock of weight events including the shot, hammer, discus, and javelin throw will also be held. Some of the best men are Allen, Pease and Farwell in the high jump; and Martini, Stackelhouse and McCarthy in the weights.

TENNIS TOURNAMENT LASTS THREE WEEKS

Final Rounds Will Determine Varsity and Frosh Teams

Candidates for the Varsity Tennis squad now number twenty-two, and those for the freshman, fifteen. An elimination competition is in progress for the purpose of deciding, during Junior Week, what players will compose the team.

Seven men are to be selected to represent the Varsity in the first tournament of the season and will encounter Milton on April 28. The following day, they will travel to New York to meet Columbia and Stevens. Since the Round-robin is only in its early stages, there is but slight evidence of whom the first string will be composed. Day, Jordan Kuki, Kononoff, Hinck, Kwauk, Arana, Polo, Davier, Hagedorn are today the ten ranking competitors.

Freshman team aspirants are playing-off a duplicate of the Varsity tournament, likewise to determine the members of the future team. Three men have been added to the original contingent but so far these have not overtaken the top-notchers: Maskell, Wigglesworth, Spruill, Gallinani, Beahner, Giller, Waite, Vint, and Perkins.

FAVOR ABOLITION OF ANNUAL CIRCUS

Institute Committee Leaves It To Next Year's Committee To Make Decision

(Continued from Page 1)

Although a considerable number of the students who took part actively in the destruction are known it was deemed advisable for the Committee itself to assume the financial loss.

"The unfortunate features of this year's Circus are in no way due to the Circus Committee, and the chairman and his associates should be complimented for the excellent work they performed in arranging the affair," said James A. Lyles '27 in commenting on the situation.

Other action taken by the Committee consisted of passing the motion that all student organizations holding dances under the jurisdiction of the Walker Memorial Committee be required to present written preliminary reports to that body at least a week in advance of the dance or be subject to a five dollar fine. The Committee also approved the proposed drive of the Beaver baseball team to sell season tickets. Absentees from the meeting were Rand B. Jones '28, Charlton P. Whittier '27, and Charles C. Ladd '30.

SEASON BASEBALL TICKETS TO BE SOLD

Beavers May be Varsity Next Year if Well Backed

(Continued from Page 1)

is successful, and the season is carried through with good student support, it is hoped that possibly next year, baseball will be recognized as a varsity sport.

These season tickets may be obtained in the Main Lobby or at any of the principal entrances from members of the Beaver squad for the price of 25 cents. There will be men selling tickets during all school hours, and in addition there will be several men canvassing in the corridors.

TECH SHOW TRAVELS TO SMITH TOMORROW

(Continued from Page 1)

been exceptionally good, as the entire orchestra is now sold out for Tuesday, while all the other performances and sections of the house show a corresponding popularity.

However, there are still seats vacant for the special Thursday evening performance which has been arranged for men who leave the city during the vacation. The tickets will be on sale in the Main Lobby every day until the end of next week from 12 to 2, although the Spanish patio booth will be removed tonight to be used in Northampton. It was also announced that all men who have had tickets reserved for them, but who have not as yet paid for them will lose the preference unless payment is made by Monday noon.

JACKSONS GIVE LAST TEA OF YEAR SUNDAY

On Sunday afternoon Professor and Mrs. Jackson are holding the last of their monthly teas this year for Electrical Engineering Seniors, Graduates and members of the Department. Invitations to attend from 4:00 to 6:00 o'clock in the Jackson home at 5 Mercer Circle, Cambridge, have been mailed as on previous occasions.

NOTICES

OFFICIAL

Representatives of the American Telephone and Telegraph Company and its associated industries, including the Bell Telephone Laboratories, the Western Electric Company, and the several operating companies, will be at the Institute from April 4 to 9 inclusive for the purpose of meeting seniors and graduate students. Interviews will be held in Room 10-303 every day from 9 to 5.

PHYSICAL EXAMINATIONS

The Medical Department is desirous of making a physical examination of every Senior before he graduates and it is hoped that every Senior will avail himself of this opportunity to ascertain his physical condition. Appointments for this examination may be made in Room 3-019 of the Medical Department.

UNDERGRADUATE

OPEN HOUSE COMMITTEE

There will be a meeting of the Open House Committee in the Office of the Combined Professional Societies at 4:30 o'clock today.

JEWISH STUDENTS

Jewish students who will not be able to return home for the Passover holiday and who would like to be the guests of an orthodox family for the "Seder" services should communicate at once with Mr. Samuel Marcus, 62 Brunswick St., Roxbury, it was announced by Julius Speert G.

FRESHMAN DANCE COMMITTEE

There will be a meeting of the Freshman Dance Committee in room 10-275 this afternoon at 5 o'clock.

SENIOR ENDOWMENT

All Seniors who were examined during the first week of the Insurance campaign may get their policies at room 10-203 today.

MATH CLUB

The M. I. T. Math Club will hold its regular weekly meeting this afternoon in room 10-275 at 5 p. m. All are invited.

CREW COMPETITION

The manager of Crew announces the reopening of the competition for freshmen managers. All freshmen interested should report to the boat-house any afternoon at 5 o'clock.

ADDRESS HONORS

LATE PROFESSOR

Dr. Emerson, Noted Health Expert, Comes From Geneva To Give Lecture

Dr. Haven Emerson, Professor of Public Health Administration at Columbia University, has just arrived in this country from a visit to the League of Nations at Geneva. He will deliver the William Thompson Sedgwick Memorial lecture in room 10-250 today at 5 o'clock.

Dr. Emerson's subject for this year's address is "Public Health Diagnosis." The lecture is expected to have special interest here because of a recent health survey made in Boston by Dr. Emerson at the request of Mayor Nichols. The lecturer has been away at Geneva, Switzerland, for the past few weeks where he was called as an expert in connection with activities of the Health Division of the League of Nations.

In this afternoon's lecture which is being held in honor of the memory of the late William T. Sedgwick, founder of the Institute Department of Biology and Public Health, Dr. Emerson will discuss the relative values, methods, and results to be obtained by careful and adequate public health surveys of municipalities, taking into account the organization of health departments, and the activities of unofficial organizations such as the tuberculosis and district nursing associations. In this connection he is expected to speak on the work of organizing such agencies after making studies of existing conditions in the community, density of population and racial characteristics. The public is invited to the lecture.

Reverend Roberts

Gives Last Talk Of T.C.A Program

This Season's Schedule Has Been the Most Ambitious Ever Attempted

"There is an inherent thrust toward the infinite in man and a corresponding thrust from the infinite to man," said Reverend Richard Roberts in the first of his series of lectures on "The Race Between Religion and Chaos" in Room 10-250 Wednesday afternoon. His subtopic for the afternoon was "The Religious Fact."

Rev. Roberts, who is a Welshman, and is a graduate of the University of Wales, has served the Baywater and Crouch Hill Church of London, the Church of the Pilgrim in Brooklyn, New York, the American Church of Montreal, and the Shearborn United Church of Toronto, where he at present has the pastorate. He is the author of several books and has also done some notable work in Biology.

The conclusion of this series also marks the end of the speaking program of the Technology Christian Association for this year. Five fora, led successively by Prof. Clarence R. Skinner of Tufts, Sidney C. Lovett of the Mt. Vernon Church, Dr. Raphael Demos of Harvard, Prof. Kertley F. Mather of Harvard, and Dr. D. Brewer Eddy, have provided opportunity for student discussion of social, religious, and philosophical problems, and there have been three series of addresses by nationally-known men, of which yesterday's was the third. The other two were given by the Honorable J. Stitt Wilson and Dr. Henry H. Tweedy of Yale. This program has been the most ambitious that the T. C. A. has ever attempted.

BALL GIVES FOURTH TALK ON EDUCATION

Tells of Provisions Made for Exceptional Students

"The College System of Education, Explaining Facilities Arranged for Exceptional Students" is the topic of the lecture to be given by Robert S. Ball '91 in room 10-250 at 3 o'clock this afternoon. Though intended primarily for graduate students, Seniors and members of the faculty, this lecture will be open to all interested.

This completes the series of four lectures given at the Institute by Mr. Ball during the past week. The speaker, who for some time has been a member of the faculty of engineering of the University of Cambridge, England, has made an extensive study of English colleges during his residence in England, and in his lectures here he has dealt with the systems and general principles of education in use in that country particularly with reference to engineering institutions. It is expected that this afternoon he will reveal some of the radical advances made in educational methods in European universities, especially regarding provisions made for students of exceptional ability.

BASEBALL

Freshmen wishing to try out for Assistant Baseball Managers are requested to report on the field afternoons during practice.

Everything's going to be all right

THAT'S the way P. A. talks to you in the bowl of a pipe. This great national gloom-chaser stabs the darkest clouds with a ray of sunshine. Buy a tidy red tin of Prince Albert today and see. Tamp a load of this friendly tobacco into your jimmy-pipe and light up.

Cool as a sub-cellar. Sweet as the breath of fresh-cut violets. Fragrant in the tin and fragrant as you smoke it. Never a tongue-bite or a throat-parch. So mild you can hit it up from sun-up to sun-down, yet with a body that satisfies completely.

There's more philosophy in a pipe-load of P. A. than in the average Doctor's thesis. No matter what brand you are smoking now, you don't know how much your jimmy-pipe can mean to you until you pack it with good old Prince Albert. Get started now.

PRINCE ALBERT
—no other tobacco is like it!

P. A. is sold everywhere in tidy red tins, pound and half-pound tin humidors, and pound crystal-glass humidors with sponge-moistener top. And always with every bit of bite and parch removed by the Prince Albert process.
