

Hoopsters Leave For New York Battlefield

BOOKED TO MEET 3 STRONG OPPONENTS

Technology Favored Over Pratt
Institute—Manhattan
Team Powerful

EXPECT HARD FIGHTS

Leaving the South Station this morning on the ten o'clock train, the Cardinal and Gray basketball team will journey to New York to play Pratt Institute, Stevens Tech and Manhattan.

Tonight the Engineers will have their first battle with the Pratt Institute five and Coach McCarthy's squad will make every attempt to annex the initial game because Pratt defeated the Institute five on the same court last year. Sizing up the two teams by comparative scores the Engineers are favored over the New Yorkers.

Tomorrow night the squad will play Stevens Tech on the latter's court. Stevens always has a better than average court team and always puts up a hard fight but Coach McCarthy is letting nothing slip by that will stop the Institute aggregation in giving the best that is in them.

Play Manhattan Monday

Monday night the Cardinal and Gray five meets the last of the teams on the trip when they take the floor against the strong Manhattan five in the Manhattan gym. In the game with the Manhattan court team Coach McCarthy will have a hard proposition on his hands in tackling the Manhattan team as they have yet to taste defeat this season. Manhattan has swept all opposition aside in a surprising manner including an overwhelming defeat over Dartmouth.

The Technology delegation will leave New York Monday night after the Manhattan game to return home. The following men will take the trip, Coach Henry P. McCarthy, Captain Ernie Hinck, Manager Ackerman, Estes, McClintock, McDowell, Meyers, Mock, Allen, and Brockelman.

FACULTY AND STAFF HOLD ANNUAL PARTY

Drop Professorial Dignity in Evening of Dancing

Members of the faculty and instructing staff, graduate students, their wives and sweethearts, took over Walker Memorial last evening for an annual party held under the auspices of the Faculty Club.

Promptly at 6:30 o'clock, a dinner was served in the Faculty dining room to about 140 guests. Later in the evening a demonstration of sleight-of-hand was provided by Edward R. Schwarz, instructor in Mechanical Engineering, followed by several reels of movies. A student orchestra supplied music for dancing in the main hall from 8:00 o'clock to midnight.

Those preferring other diversion, layed cards at tables along the sides of the hall or sought the bowling alleys and pool tables in the basement. More than 200 guests attended the party in the course of the evening.

Athletic Association Reopens Campaign

Competition for freshman managers in the following sports has been announced by the M. I. T. A. A.

Basketball Gym
Boxing Hockey
Fencing Swimming
Wrestling

Candidates will please report to the A. A. office any evening at 5 o'clock.

CLUBS GIVE CONCERT AT SARGENT TONIGHT

Sargent School of Physical Education will join with the Combined Musical Clubs in a concert at the Sargent gymnasium Friday night. The concert will begin at 8 o'clock with the Techonians furnishing music for the dancing which will follow until 12 o'clock.

For their part in the concert the Musical Clubs will offer two numbers by the Glee and Instrumental Clubs and a single appearance of the Banjo Club. Sargent will also present five numbers together with several specialties acts.

Students to Hear Three Addresses By J. Stitt Wilson

T. C. A. Speaker Will Talk on Modern Educational Problems

As the first speaker in the group of three nationally known men who will address student groups, the Honorable J. Stitt Wilson will deliver talks in Room 10-250 on Monday, Wednesday and Thursday at 4 o'clock. Subjects have been announced as "The Failure of Modern Education," "The Soul and the Coal of History," and "The Technique of Creative Personality."

An orator, publicist, and politician, Mr. Wilson has held the office of Mayor of Berkeley, California, now occupied by Will Rogers, and has lived in that city for 20 years. He twice resided in Great Britain, and took a prominent part in the affairs of the British Labor Party while there. He has, indeed, devoted much of his life to the study of labor questions, and is regarded as an authority on that subject.

Visited 200 Colleges

Mr. Wilson is remarkable for his ability to get in close contact with students. He was graduated from Northwestern University, of Evanston, Illinois, with A.B. and M.A. degrees about 25 years ago, but has maintained intimate contacts with students ever since. In six years he visited more than 200 colleges and universities, speaking on social, industrial, international, and religious problems.

It has been said of him that as a speaker "He is stimulating, suggestive, critical, and at the same time constructive and scientific." All who have heard him declare he is unorthodox as an orator, but his unorthodoxy is refreshing.

Will Speak Over Radio

During his stay in Boston, Mr. Wilson will speak to several student groups informally. He is also scheduled to give several talks at Boston University, and tonight he may be heard from radio station WMCA in New York City at 5:30 o'clock.

This speaker is the first of three who have been secured by the Meetings Division of the Technology Christian Association, the other two being Dr. Henry H. Tweedy of Yale, who spoke here last year, and the Reverend Richard Roberts of Canada.

INSTITUTE IS HOST TO PLUMBERS' ASSN.

As a means of fostering closer cooperation between theory and practice 450 delegates from the Massachusetts Association of Master Plumbers and other sections of New England were guests of the Institute at a two-day conference which ended yesterday.

Professor Richard G. Tyler '10, head of the Sanitary Engineering Department, under whose auspices the meeting was held, was in charge of arrangements. Papers and demonstrations on subjects of common interest were delivered by members of the faculty, followed by discussions.

Among the speakers were Dr. Samuel W. Stratton, Professor Edward F. Miller '86, Professor Samuel G. Prescott '94, and Professor Robert P. Russell '22. The delegates pronounced the convention an unqualified success and hope was expressed of its being made an annual event.

FRESHMEN DISPLAY NEW ENTHUSIASM AT CLASS SMOKER

Savran, of Boston Traveler
Gave Chalk Talk in Place
Of F. B. Collier

CLASS BAND A SUCCESS

Directed by D. A. Shepard,
Men Sing Heartily—Learn
New Songs

Approximately 200 freshmen displayed a degree of enthusiasm which was extraordinary for the supposedly indifferent student body of Technology at their class smoker which was held in the Main Dining Hall of Walker on Wednesday at 7:30 o'clock. Professor Henry G. Pearson and the heads of activities were among the guests present.

After rather a late start, the program was preceded by several selections by the freshman orchestra. Allan H. Stone, president of the class, then took the floor and formally opened the program. He made a short talk of welcome to the yearlings acknowledging the large attendance, and he concluded by introducing the other class officers.

Following Stone's talk, Abe B. Savran, cartoonist for the Boston Traveler, entertained the audience for about an hour with a humorous chalk talk. He took the place of Franklin B. Collier, who was scheduled to give the talk. In addition to his regular program, Mr. Savran made caricatures of David A. Shepard '26, song leader at the smoker, Allan Stone, and Robert W. Reynolds '30, the cheer leader of the freshman class.

Between each of the events several cheers, directed by Reynolds, were given and the men indulged in the group singing which was led by Dave Shepard. Several of the guests present at the smoker expressed the opinion that Shepard's song-leading was one of the most successful aspects of the affair.

Taking the floor again, Stone then presented the prizes for the winners of the poster competition. George M. Houston '30, who drew the "Baby Poster" was awarded the first prize of \$25, and David W. Gurton '30 received \$5 as the second prize. The first prize was offered by Professor William Emerson of the department of Architecture. At this time, Stone read letters of good wishes from Orville B. Dennison '11, and Dean Henry P. Talbot '85.

As the last of the entertainment features of the program, two moving pictures were shown. The first was an unusual comedy whose scene was laid in Scotland, which was obtained through the courtesy of the Central Square Theater. The second picture which portrayed Technology life, strangely resembled the one shown at the All Technology Smoker and thereupon produced many laughs from the audience. Refreshments completed the evening's program.

Owing to the success of this smoker President Stone stated that the class officers would now be able to carry out their proposed program of other smokers or some kind of class entertainment once a month during the remainder of the spring term.

INTEREST LACKING IN SENIOR NOMINATIONS

Time Limit Extended Until Tomorrow Noon

Due to the lack of interest of Seniors in filling Senior week nomination blanks, Robert G. Kales '28 has announced that the time limit will be extended until Saturday noon. At present, but 27 names for the 25 officers have been turned in.

Members of the Class of 1927 will be proposed as candidates for the three offices of Marshall, and the twenty-five members of Senior Week Committee. The nomination blanks of those nominees for Marshall must be signed by at least 25 men while the blanks for Committee nominations need only have five signatures. Only men who are members of the graduating class may be nominated for membership on the Senior Week Committee.

Results of the nominations will be announced on Monday, and the elections will follow on February 23. As is the usual custom these elections will be carried on in booths in the Main Lobby.

Give Aldred Talk

Edward B. Craft

PRESIDENT LEAVES ON WESTERN TOUR

Dr. Stratton to Talk at Alumni Banquets on "Human Side" Of Technology

On a whirlwind trip to the middle west in the interest of the Institute, President Samuel W. Stratton, will address alumni groups in Pittsburgh, Cincinnati, and Saint Louis, tonight, tomorrow night and Monday night, respectively. These alumni meetings will take the form of banquets in each of the three cities, and the President is expected to take "The Human Side of Technology" as his general topic.

In Pittsburgh, the "Presidential Banquet," as the affair is designated, will be held in the Ball Room of the University Club, and is being arranged by the Technology Club of Western Pennsylvania. Dr. Frederic L. Bishop '98, Dean of the Schools of Engineering and Mines at the University of Pittsburgh will act as toastmaster.

To Return On 23rd

Fred W. Morrill '07, President of the Technology Club of Cincinnati, is in charge of the arrangements in that city, while in Saint Louis the guiding factor is Lloyd B. Van deLinda '18, the secretary of the Technology Club of that region. The Hotel Coronado will be the scene of the St. Louis function, and the President is expected to stop at the same place. He is expected to arrive at the Institute on the 23rd of this month.

This trip which Stratton is making follows closely on the recent trip which was made to Cleveland, where he attended an alumni gathering at a luncheon meeting on February 5. On the 11th he made a hasty trip to Washington to attend a meeting of the Board of Regents of the Smithsonian Institution to discuss policies. He also was present at the funeral of Charles D. Walcott, one of the officers of the Institution, and was an honorary pallbearer.

Dean Henry P. Talbot '95 will also be away from the Institute for a short time. He is going to Baltimore and Charleston to visit relatives.

AERO SOCIETY WILL HEAR PROF. WARNER

All members of the Aeronautical Engineering Society and all students enrolled in Course XVI are invited to a talk by the Honorable Edward P. Warner '17, Assistant Secretary of the Navy in Charge of Aviation, in Room 3-270 Monday at 4:15 o'clock.

Professor Warner has just returned from a tour of inspection to all the national air service stations in the United States. He will likely discuss operations and future expansion plans of this service and various aspects of the Naval Air Force.

WILL DISCLOSE INSIDE FACTS OF TALKING MOVIES

Subject Of Speech To Be "The Romance Of Research In Industry"

Present-day trend of research as related to industry, with examples drawn from the electrical communications field, will be the general theme of the Aldred Lecture this afternoon. Mr. Edward B. Craft, executive vice-president of the Bell Telephone Laboratories, Inc., has been secured as the speaker, and has announced his topic to be "The Romance of Research in Industry."

As has been customary in the past, the lecture will be in Room 10-250 at 3 o'clock, and is open only to Seniors, Graduates, and members of the instructing staff. Immediately following the lecture, the speaker will be a guest at tea in the Emma Rogers Room, to which the prominent activity men and class leaders have been invited. This will necessarily be rather short, as Mr. Craft will take the Merchants Limited to New York at 5:05 o'clock from Back Bay. Besides this, the speaker will be entertained at a luncheon at the University Club at 1:15, to which several professors in the Physics Department have received invitations.

Talk To Be Extemporaneous

Mr. Craft, in a recent letter, has stated that his talk is to be mostly of an extemporaneous nature, and will in general consist in telling the human side of the recent developments in the communication art, that is, the romance of the research involved. He will deal not only with cold facts, but also intends to inject a bit of the inspirational element in his talk.

He is expected to describe the methods and schemes of organization employed in modern industrial research establishments, and will tell the stories connected with the development of such communication systems as the Transatlantic Telephone, Telephotography, and Talking Movies.

Craft a Western Electric Man

Following the completion of his scholastic training in the schools of Warren, Ohio, Mr. Craft entered the employ of the Warren Electric and Specialty Company, in the capacity of superintendent of the lamp department, holding this position from 1900 to 1902. In 1902 he went into the engineering department of the Western Electric Company in Chicago, and was made Chief Engineer in 1922. When the Engineering Department of the Western Electric Co. was detached from the Company and incorporated as the Bell Telephone Laboratories, in 1925, Mr. Craft was made executive vice-president, which position he now holds.

During the war, Mr. Craft was connected with the army in connection with the communications systems, serving as captain from March 1917 to December 1917, and as major in the Signal Corps from December 1917 to May 1918. Following this he was Technical Advisor for the United States Navy in London, from June to October 1918.

The speaker is a member of the American Institute of Electrical Engineers, and the Society of Automotive Engineers, and is a Fellow in the Institute of Radio Engineers. He is also the vice chairman of the Division of Industrial Research of the National Research Council, and is a member of the council of the American Institute to Weights and Measures.

CALENDAR

Friday, February 18
12:30—League of Nations, Luncheon Meeting, North Hall.
3:00—Aldred Lecture, Room 10-250.
Saturday, February 19
6:00—Boston Bacteriological Club, Dinner Meeting, Faculty Dining Room.
Monday, February 21
4:00—T. C. A. Educational Lecture, Room 10-250.
Wednesday, February 23
4:00—T. C. A. Educational Lecture, Room 10-250.
6:30—Catholic Club, Supper Meeting, North Hall.
Thursday, February 24
4:00—T. C. A. Educational Lecture, Room 10-250.
5:00—Institute Committee Meeting, Faculty Dining Room.
Friday, February 25
6:00—Alumni Council, Dinner, Faculty Dining Room.

A TECHNOLOGY INFIRMARY

PARENTS of Technology students have often asked why it is that a college of this size does not have an infirmary. When we hasten to answer the question by saying that we have a clinic which is capable of treating the majority of the ills inherent to the Institute students, we are reminded that little or no provision has been made for those who require more than an occasional visit to the doctor.

In reply to this question we have advanced the argument that Boston contains a number of excellent hospitals where the sick may be taken care of and, in turn have been given the irrefutable answer that the average college student will have to be very ill before he will go to such public hospitals.

The number of students living in fraternity houses, boarding houses, and dormitories is surely of sufficient magnitude as to deserve more consideration. As matters stand now, the sick man must either get well by his own efforts or depend upon the ministrations of a few friends who are willing to expose themselves to infection.

Technology has been fortunate in not having had an epidemic of a serious nature but no one can tell when such a thing will come to pass. If a member of a fraternity or a man in the dormitories were to have either scarlet fever or diphtheria the chances are that he would go for several days before either seeing a doctor or even knowing that he had a serious illness.

Hundreds of schools and colleges containing a far smaller enrollment than does the Institute have provided infirmaries to help check the spread of infectious diseases. There is no sense in locking the barn after the horse has been stolen and we feel that the Institute should give the situation more attention.

A SECRETARY OF EDUCATION?

THERE is a certain class of people who think that all manner of questions and problems of national importance can be settled by appointing commissions and committees, secretaries and under-secretaries. The latest of these ideas takes its form in the proposal for the creation of a Secretary of Education.

There are many reasons why such a scheme should be carefully considered by thinking people; but the first and most important one is that the establishment of such a Secretary of Education, if he were to have the power and authority associated with such an office, would be contrary to the rights of the several states.

However this is but one reason for condemning the idea. There is a more practical one: that which attaches itself to the purses of the people. Everyone is acquainted with the cost of running this country of ours. With all the advantages of the democratic form of government, there is one thing it cannot claim to have,—and that is, that it is the cheapest form of government.

To unnecessarily extend that vast army of "staffs-for-this" and "staffs-for-that" would only serve to make Washington more complicated, and sap the finances of the entire nation. We believe that the problem of education is one which requires local administration to meet local problems.

As We Like It

ALIAS THE DEACON

"Alias the Deacon," the presentation that the Keith-Albee Players are offering this week at the St. James Theatre, gave us as hilarious an evening's entertainment as we can remember.

The construction of "Alias the Deacon" has one fault—it is obviously a one-man play, revolving around a small part of the history of a professional card-shark, who is, of course, the Deacon.

His supporting cast is good, particularly Charles I. Schofield, the director of the production, who has the part of "Bull" Moran, a prize-fighter, and William Gerald, who plays most entertainingly the part of Jim Cunningham, a hard and grasping "villain."

E. A. B., Jr.

MOZART

Boston theatregoers who this week pilgrimage to the Opera House to see, and hear, Yvonne Printemps in Mozart have a real treat in store and will find a type and quality performance seldom appearing in Boston.

Written by Sacha Guitry for his noted wife, Yvonne Printemps, the play is designed primarily to bring out the talents of the French actress and both the part and the music accomplish this.

The play is a light, fantastic, drawing-room comedy, ideal for a small theatre, but rather lost in the heavy setting of the Opera House. Madame d'Epinau's Parisienne salon is the scene of the three acts.

F. E. A.

Intercollegiates

Believing that not enough attention is paid to men's upper lip, the Stanford Chapparral, humor magazine of Stanford University has inaugurated a whisker-growing contest that will last for two weeks.

National University of Mexico, the oldest university on the North American continent, will install a modern journalism department modeled after the journalism department of the University of Wisconsin.

YOUR HOUSE: May throw the meanest parties of any of the fraternities, but in between times you have to have a little relaxation from the books, too. That's where a big evening at the Brunswick Egyptian Room fits in to perfection.

THE TECH BOOK LIST

THE PLUTOCRAT

THE PLUTOCRAT. By Booth Tarkington. New York: Doubleday Page. \$2.

Any book by Mr. Tarkington is important if for no other reason than that he is probably the leading American novelist of today. However, his latest book deserves consideration on far more important grounds than this.

Whether or not he wrote the book for this reason is a thing that Mr. Tarkington alone can tell, and he has chosen to remain discreetly silent.

Among the passengers is one of "nature's noblemen" in the person of a Mr. Tinker, a gentleman from the Middle West, who has all the attributes of a successful Rotary Club member.

After decidedly damning these Westerners in the first part of the book, Mr. Tarkington cleverly shows that in the end it is they who are the really worthwhile class.

There are many who think that this is the most important story he has ever told. Without wishing to deny or confirm this statement, we nevertheless think that it is undoubtedly the most important book of fiction published this year.

A. P. M.

THE OPEN FORUM

Editor's Note: The following letter was sent to THE TECH by the Technology Club of Western Pennsylvania. It is a copy of an announcement of the appearance of President Stratton at the Club's 1927 annual banquet and is evidence of the spirit in the organization.

Last year "Too Many Brothers" came from Cambridge to Pittsburgh and many loyal Alumni turned out to meet them. This year one

Brother—President Stratton—comes on February 18 for the big banquet at the University Club at 6:30. Many of you saw "Too Many Brothers,"—all of you should hear Dr. Stratton.

"The Human Side of Technology" is his subject. Did you know that it had a human side? It does, and Dr. Stratton will tell us about it.

Many of you know Dr. Stratton only as president of the Institute. Did you know that he created the United States Bureau of Standards—the leading organization of its kind in the world; that he is known internationally as one of the leading men in applied science?

This is a real opportunity for service. Your presence will be an inspiration to President Stratton and a help to the Institute.

Cordially yours, L. S. Winchester, '09, F. E. Wilmot, '26, G. M. Tapley, '24, F. L. Bishop, '98, Banquet Committee.

Students of Marquette University are investigating the sand dunes on the shores of Lake Michigan where Father Marquette is supposed to have been buried, and are searching for records that will throw a light on the final resting place of the missionary-explorer.

At the University of Capetown, South Africa, the freshmen are required to wear stiff collars three inches high with bright green ribbons for ties. To make matters worse, every time a freshman meets a senior he must bow to the ground.

In a recent election at the University of Washington, the Glee Club voted by wire, owing to the fact that they were touring in the East at the time.

Specialized Tuxedos for Young Men \$50. Young Men's Dept.—Second Floor. We have developed for young men a Tuxedo that is far out-of-the-ordinary in quality and value. The styles are distinctive—smart—yet fully conforming to the accepted standards of good form, at home and abroad. The choice fabrics are mainly fine herring-bone and dull finished worsteds—the coats full silk lined to hang perfectly—trousers, the correct width braid trimmed. Welcome everywhere—never a question of quality. Scott & Company LIMITED 336 to 340 Washington Street, Boston

BEAVERS FAVORED OVER NORTHEASTERN

BERMEN SUBSTITUTE B.U. FOR DARTMOUTH

New University Club will be the one of the Institute-Boston University swimming meet, Tuesday afternoon at 2:30. Impracticability of making a long trip to Hanover, to take part in one dual meet, caused the technology team to alter their schedule. A second clash, with McGill, had been contemplated for a part of the journey, but no mutually agreeable date could be arranged.

Boston University promises one of the closest battles of the year, but by virtue of past records, the Engineers rule slight favorites. The Cardinal and Gray won from West Point and Brown. The Terriers lost to Wesleyan 38-24. Yale beat Wesleyan by a greater score than that by which the outpointed Technology.

INTERFRATERNITY BOWLING RESULTS

Last night the Chi Phi defeated the Beta Chi by the close score of 954-952.

Kirwin, Smith, and Fay Are Big Favorites In Tomorrow's Dual Meet

With the crack of the starter's pistol tomorrow afternoon, the first dual track meet of the Cardinal and Gray's 1927 season will begin when Coach Hedlund's charges take on the fast Northeastern team on the board track in back of the hangar gym. Because of their strength in the distance runs, M. I. T. is a favorite to win.

In the thousand yard run the Engineers are particularly strong. Ken Smith, holder of the board track record, should have little difficulty in coming in first, while his team mate Mitchell is expected to take a second. Stewart, the strongest Northeastern entry, will be a strong contender for this place, however.

Pete Kirwin would pull a real surprise if he failed to take a first in the mile. He has turned in such good times for his event that he will be

almost a "sure thing winner. Thompson of Northeastern will perhaps take a second with either Red Bennett or Worthen coming in third.

Another heavy Technology event will be the 600 where Fay is a ruling favorite. Cy Meagher should take second, with either Thompson or Charley Hunt of the Huntington Avenue school third. In the 300, either Jack Hallahan or Ike Stephenson should lead the pack, with Captain Breen of Northeastern looming up as a potential second place man.

Field events are the weakest point of the Engineer's armor, the high jump in particular where N. U. should take the first three places. The shot put is not quite so bad. Glantzberg has a chance for a first, and if he fails, will be certain of second. Captain Hank Steinbrenner should lead the timber toppers with little difficulty. A probable score of the meet is about 35-30 with the Beavers on the long end.

M.I.T. Grapplers Oppose Norwich At Hangar Gym

Engineers Slight Favorites to Win From Old Rivals Tomorrow Night

Tomorrow evening the Engineers take on the Norwich wrestling team at the Hangar gym. After a week of strenuous workouts the Technology grapplers are all set to win and make up for the disastrous defeat at the hands of Yale last week. Coach Green is satisfied with the showing of the men, and looks forward to a victory.

Captain Franks is of course the outstanding star of the Engineers and should come through with a victory if he enters in his regular class, the 175. Should he switch to the unlimited, however, he will not be so certain of victory. Jim Cullen in the 115's is another one of the leading men on the squad who should register a win.

It is not yet certain whether Harris will go in the 145 or the 158 pound class. At the present time he is slightly over weight for the former and unless he makes the 145 limit by weighing in time he will be obliged to enter the heavier class. Mattlage is scheduled to start in the latter class, and will unless Harris is overweight.

Rabinovitz, in the 135's has been doing very good work lately and is expected to come through tomorrow evening. Johnson will enter in the 125, while Cline will go unlimited provided Franks wrestles in the 175.

The Engineers have never yet lost to match to Norwich, and it is hoped that this season will prove no exception. Last winter the Cardinal and Gray was on the long end of a 22-3 score in the meet with them. Tonight Norwich takes on Tufts and the results of this encounter should give an approximate idea of the Engineers chances as they already hold a 19-8 verdict over the Jumbos.

Already plans are getting under way for the race of the century out in Los Angeles. Various athletic clubs on the coast are trying their best to get Charley Paddock, the world's fastest human, and Charley Borah, the sensational sophomore runner of Southern California, into an exhibition race this year for another crack at the 100 yard record.

Gym Team Schedule For 1927

February 25 Penn at Penn
 February 26 Navy at Annapolis
 March 5 Army at West Point
 March 7 Princeton at Princeton
 March 12 Open
 March 19 Dartmouth here
 March 26 Intercollegiate at Princeton

BOXERS TAKE ON U. OF N. H. TOMORROW Engineers Primed for Scrap With Upstate Outfit

After a two weeks rest the Technology boxing team again gets under way over the week end when they take on the strong University of New Hampshire leather pushers at Durham, New Hampshire. This will be the second match of the season, the first having been against the Navy which resulted in a defeat for the Cardinal and Gray.

Coach Tommy Rawson's boys have been working out faithfully at the hangar gym every afternoon, and according to all reports have improved remarkably both in hitting power and foot work. The up state team is reported to be strongest in the heavier divisions, and should have a consid-

erable advantage in this field. Captain Wallie Kwauk appears to be the logical winner in the 125 pound class. He is one of the cleverest mitters that have ever worn the Institute colors. Lou O'Malley in the heavy division should give any opponent plenty of trouble, as should Marshall in the 155 pound class. Johnny Joyce, fighting in the 115, is also expected to make a good showing.

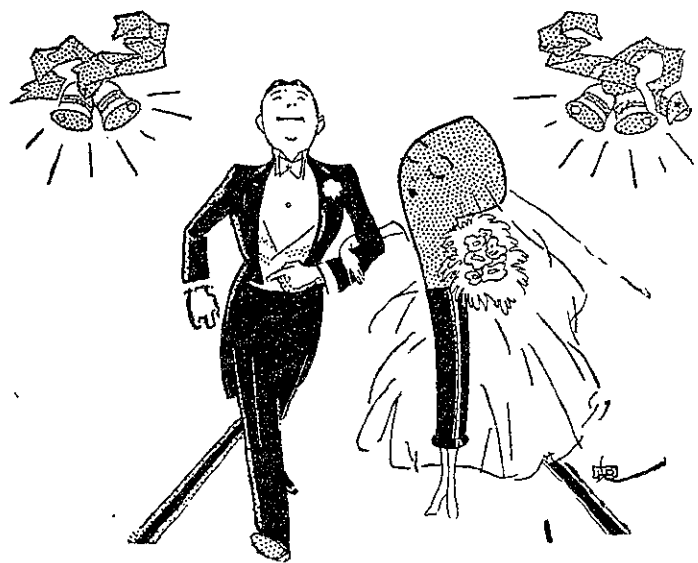

In order to get every man into athletics the University of Idaho is holding an all-college boxing and wrestling tournament.

CERULEAN BLUE—Stuart at Dartmouth St.

A place of distinction. Unusually delicious food. Decidedly different menus.

Tel. Kenmore 6520 Just back of the Cooley Plaza

And they lived happily ever afterwards!

ONCE UPON A TIME there was a man whose life's ambition was to take unto himself a pipe. Time and again his heart was set on some particular pipe—but poor fellow, his dreams never came true. . .

Until one day a friend, experienced in such affairs, gave him a few pointers. He took his friend's advice; he got some Granger Rough Cut. . . It worked! In a few weeks' time he was solidly wedded to a wonderful pipe. . . sitting pretty, fixed for life!

Indeed, but for Granger many a man would never know the joy and comfort of a pipe! Granger is so mild, so mellow, so cool! Ripe old Burley tobacco, mellowed Wellman's way. And cut in rough flakes that burn slow and smoke cool. . .

Granger's mission in life is to see that no man ever experiences a pipe disappointment. . . Just stick to Granger and your old pipe'll be a perfect pal—right through the years. Forever!

GRANGER ROUGH CUT

The half-pound vacuum tin is forty-five cents, the foil-pouch package, sealed in glassine, is ten cents.

Made for pipes only!

GERMAN HYDRAULICS EXPERT TO LECTURE

Professor G. de Thierry of Berlin is coming to Technology to give a course of lectures on hydraulic engineering, according to an announcement made by Professor Charles M. Spofford, head of the Department of Civil Engineering. He is noted in Germany for his work on hydraulics and was a contributor to a work recently published on the steam flow laboratories of Europe. These lectures will be given under the auspices of the Civil Engineering Department and will begin about April 6, if the present plans go through. They are open to all students but it is especially desired that the students in hydraulics attend. Further details will be announced later when arrangements are to be completed.

LOST

Mr. Savran, entertainer at the Freshman Smoker lost a hexagonal, white gold Waltham wrist watch in the Men's room of Walker Memorial on Wednesday. Finder please return to the office of the Superintendent of Buildings and Power.

Men and Women Should be Frank Together States James C. Rettie

Willamette Representative to Milwaukee Conference Gives Opinions

Can men and women be frank together? Yes, they should be because "youth can only be free by knowing the truth" is the opinion of Willamette representative at the Milwaukee Conference held recently in that city. Quoting from the Christian Century for January, Mr. James C. Rettie, the representative, remarks, "The ethics of sex were not discussed in student conferences a decade ago. The emergence of this topic is a sign of the times; the sex question is being faced more frankly on the part of the newer generation. Whatever the perils of this new candid feeling, they are more than balanced by the greater measure of sincerity with which young men and women face the problem of establishing a wholesome family life." Mr. Rettie goes on to state that the entire student generation is questioning the whole conventional moral code, because he thinks they have a right to. Youth is handicapped because society, including the church and the educational system, treats the whole subject of sex relationship with taboo. Society says that youth must come through the period of adolescence while tremendous forces are awakening within their physical bodies;—yes, come through that in the dark of helpless ignorance, or in the suffocating stench of street stories, and still be pure in body and mind. Mr. Rettie summarizes present day thought as follows: "While passing through this period many have made mistakes; how could it be otherwise? In every case society harshly tramples on the victim and with un-Christian malice

places a moral stigma on the person committing a wrong. There will always be a double standard until men and women face the facts together. "The older generation condemns automobile rides, dress, petting, and desire for freedom. These, they say, are dangerous and immoral. Modern youth is in revolt. The search is for beauty, truth, and goodness, and no doubt with the proper stimulus it will be found. Modern youth must know the truth and the truth shall make it free."

ARMORY TO BE USED FOR THE 1927 CIRCUS

The plans for the 1927 Technology Circus are now getting under way. The committee in charge has been working hard under the direction of Daniel C. Metzger '27 and will probably announce the details of the event in the near future. The 1926 Circus was a great success and was held in the Cambridge Armory. The committee has decided that the Armory shall be employed again this year, since it is the most logical place and will insure plenty of room for the various events.

CALUMET CLUB WILL HOLD COMPETITION

By the authority vested in the Calumet Club by the Advisory Council on Athletics, a competition for a group of cheer leaders will be run under its direction. According to a resolution adopted by the Council, the cheer leaders will be given awards suitable to the results of their work and upon the recommendation of the Calumet Club. In the final selection, the head cheer leader will be a junior while his assistants will be two sophomores.

NOTICES OFFICIAL

Reports on experiments performed in the Dynamo Laboratory during the first term of this year (or previously) may be obtained at the Instrument room (10-028). Reports not called for by February 28 will be destroyed.

UNDERGRADUATE FRESHMAN FOOTBALL

Members of the Freshman Field Day Football Team will care to report to Notman's Studio at 8:30 on Monday, February 21, to have their picture taken for *Technique*.

READINGS

Mr. M. R. Copithorne will resume his readings in Walker Memorial Monday at 5 o'clock.

MATH CLUB

All men interested in any branch of mathematics and the future policies of the Math Club are asked to call at 10-270 today at 3 or 4 o'clock.

GYM TEAM

Competition for freshmen and Sophomore Gym managers began Wednesday. Any man interested in a managerial position is urged to come out. Information may be obtained from the Gym team manager who will be in Walker gym every day from 5 to 6 o'clock.

MUSICAL CLUBS

Tickets for the Musical Clubs' Concert and Dance at Sargent's School, February 13, are now on sale at the Clubs' office, Room 310, Walker Memorial. Price is \$.75 each.

CREW

All Varsity crew candidates are to report at the boathouse immediately.

T. C. A.

Students who wish to dispose of text-books for this term's subjects should bring them to the front office of the T. C. A. immediately.

SENIORS

Those Seniors who have not as yet filled out their *Technique* Portfolio blanks should do so immediately at the *Technique* office.

RADIO SOCIETY

Radio messages to all parts of the United States will be transmitted free of charge for all students at any time. Place messages in letter box on bulletin board outside room 10-280.

INSTITUTE PROFESSOR ADDRESSES OIL MEN

Modern Fuel Subject of Talk By Charles F. Park '92

Professor Charles F. Park '92, addressed the Independent Oil Men's Association of New England on the subject of modern fuels and engines in Room 3-370 on Wednesday. The lecture title was "The Fuel to Fit the Engine and the Engine to Fit the Fuel." In his talk, Professor Park took up the latest developments of anti-knock material and the latest methods for keeping down detonation. He also touched on the distribution of fuel in multiple cylinder engines without pre-heating, lubrication problems and crankcase oil distribution. Professor Park completed his lecture by discussing a solution of the late fuel situation and the adaption of engines to our present day fuel. Following the meeting, the seventy-five men attending took an inspection trip through Technology.

In order to join a fraternity at Heidelberg, a student must fight seven duels, and at the conclusion of the last, whether victorious or not, he is allowed to carve his name on one of the tables in the drinking room, thereby becoming a full-fledged member.

College students are impervious to the appeals of "Reds," according to a

dispatch in the Minnesota Daily, as a result of the attempt of Albert Weisbord, a leader of the Communist party, to incite student opinion favorable to his cause.

I don't have to limit my smokes anymore

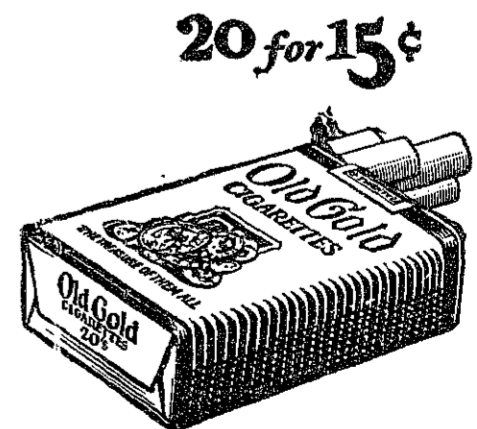

OLD GOLD is so friendly to my tongue and throat

"I used to have to go easy with my morning smokes . . . for fear of that 'heavy feeling' or that morning 'tongue-tickie'."
"But that was before I met O. G."

"Here's a cigarette as easy on the throat as a Scotchman on his wallet. Yet with all the punch a he-man smoker hankers for."

"Smoke 'em early . . . smoke 'em late. They're O. K. all the way . . . without a K. O. to tongue or throat."
