**Chinese Upheaval Finds Technology Graduate Leader**

William Moy-Ding ’20 Now Active in Nationalist Rebellion

William Moy-Ding ’20, a graduate of Cousiu E11, is now chief clerk to the Chinese Nationalist army, under General Chiang Kai-shek, known as "General Chiang Kai-shek," as he was called in his college days, was engaged in an interview in the vicinity of China. Two years ago he took a teaching position at a college in Canton, China, where he had made arrangements to work for an English educational correspondent.

About this time the war between Chinese and Japanese forces began, and Moy-Ding, with his wife and children, returned to his home in the United States. He was an instructor in the Massachusetts Institute of Technology, and was detailed by the Chinese government to assist in the training of Chinese soldiers.

During the war Moy-Ding completed the Reserve Officers Training Corps, and is now serving in the Chinese army. He has been through several battles, and has been wounded in several engagements.

In the current war in China, Moy-Ding has been appointed a captain in the Chinese army, and is now serving in the capacity of a military engineer. He has been through several battles, and has been wounded in several engagements.

Smith College Women Adopt Rowing; Girls Employ Novel Seating Plan

Miss Gorman, Head Coach, Says Methods are Developing Muscles

Again the field of masculine sport was invaded when Smith College recently accepted a team of girls to participate. Of what is believed to be the first crew on the Connecticut River under the direction of Miss Kathleen Gorman, the coach, and is in compliance with the basic philosophy of the school's desire to build both the junior and senior classes at Smith, develop a true team spirit and prepare the girls for the day when they shall be becoming adept at using the oars.

A new feature will be introduced in the shells and rowing machines, that of avoiding the seats so that the grip instead of slides as the ordinary arrangement does. The reason for this change is to enable the girls to obtain a firm seat instead of rounded shoulders.

"We are trying to ape the men," declared Miss Gorman, "and that is the fundamental technique that is all. Our method does not overdevelop the girls' muscles and give them that manish appearance. It employs a general healthy exercise of all the parts of the body with the shell. Members are trying to be on the water and out of doors as much as possible.

As a further advantage, the girls have been taught the technique of rowing, and in their practice, they are kept interested. The interested song hits featuring "Ride 'Em Cowboy" and Lya De Putti it is certainly not a case of "boys will be boys.

The days of muscle-bound chorus girls has had its day, and "blondes are better in the kitchen," and this will not be a new slogan in the coming spring. The method of seating the girls in the shells seems to be an improvement over what was formerly, and the young girls as it is seen is going to go out for the crews now.

"The training in coordination is unanswerable," said Miss Gorman, "and the same is true of the excellence of the ordinary first, best working group is also an unusual feature in this connection because the women judge the basic steps and vice versa for the third year girls.

An innovation in the organization of the Institute Glee Club this year is that of pivoting the seats so that they may be easily turned. This feature of this act is a tumbling stunt in associating with other parts of the theme of the act. The Institute's Glee Club is a very fine group, and Lya De Putti is certainly not a case of "boys will be boys."

The glee club is a very popular and long-established organization, and has achieved a wealth of material and much success. It employs a wealth of unusual stage settings and effects. The feature of this act is a dancing stunt." (Continued on Page 4)

THE OPEN FORUM
To the Editor of The Tech:

In answer to your tender for the most enjoyable and satisfactory days in Detroit Men and Women's Baseball, I believe that this is a satisfactory one. I was recently at the Detroit game and was impressed with the enthusiasm and sportmanship of the Detroit fans. I believe that our team can be competitive and I am looking forward to the game with great anticipation.

Engineers Take Fourth In Intercollegiate Two Mile Championship

Technology failed to win a race at the B. A. A. Games on Saturday, but the mile team gave Harvard a real battle in the traditional contest. The two mile team gave Technology a good race, while the yearlong team finished last in its heat of the intercollegiate four-mile relay.

As in previous years the Harvard relay team was up against a close contest. C. M. McLaughlin, back from his trip to Great Britain, and Gary put the impetus on Harvard and held the lead until the last quarter. Hurtyman made several attempts to pass the Engineer, but McLaughlin always had enough in reserve to stave off his efforts. On the last leg McLaughlin lost his lead and handed over a lead of almost ten yards to Jack Hilborne.

Hilborne was up against a real opponent in Peet of Harvard and despite his own efforts he lost the lead by two yards on the first corner and maintained the lead for the last quarter. This race made McLaughlin make another attempt to get by Peet at the start of the second lap, but he was last in the three, as they were paced to Harvard and a half mile later by Hurtyman.

The Harvard team was fairly flying and drew away to a ten-yard lead.

A. Smith, running anchor for Technology, was pitted against Al Ollin on the last leg of the race. Ollin made a valiant effort to take the lead, but the Harvard man was too good and there was a space of almost 140 yards between the runners at the end of the race.

Peter Riley started the two mile intercollegiate relay for Tech ten days ago, with the first he had taken in 100 years, and a man whom he had never forgotten; Philip O'Neill on the last leg of the race. The Technology team pulled away and held the lead, but they were second to the final leg and a half mile later by Hurtyman.

In the intermediate mile freshman Elmore after the Technology teachings were outclassed and finished behind Harvard, Dartmouth, and Holy Cross. Pete Rubach moved up about the last man of the three, but he had enough in reserve to win the third place, followed by Marshall.

In the intermediate mile freshman Lenny after the Technology teachings were outclassed and finished behind Harvard, Dartmouth, and Holy Cross, Pete Rubach moved up about the last man of the three, but he had enough in reserve to win the third place, followed by Marshall.

Lenny Clinches Bishop Cheverus '600' Trophy

George Leness '26, former Tech. Varsity wrestler, now national star gained permanent possession of the Bishop Cheverus trophy for the 600 yard mile relay last week when he defeated a quartet of latch dogs of the Yale team to win the final match of the season.

The Yale team was never headed and took his old record time of 1:17 which he made last year.

At the finish of the race Mulvihill was his nearest opponent with the second and third and Ray Dodge of the Illinois A. C. finished third, and the illustrious George Leness took third place.

Winning the third place, John Bovard, 3rd and Ray Dodge of the Illinois A. C. finished third, and the illustrious George Leness took third place.

Don't give up the ship. Plenty pipe-lookers are on the same boat.

Just shoot an a. o. to G. R. C., for Granger Rough Cut is a life-saver to pipes in distress. It's rich and spicy—and mellowed by the old "Wellman Secret" it's so mild you can stoke-up and fire away at full sail.

If you've sailed the seven seas searching for perfect pipe pleasure. Maybe you've tried oceans of tobacco without running into one you can anchor to... but don't give up the ship. Plenty pipe-lookers are on the same boat.

Sufferin Cats

Did it ever occur to you
THAT the majority of cats
LIVE in one place for
GREATER part of
THEIR nine lives without
EVER knowing anything
ABOUT the other
PARTS of the world?
ARE you going to be just
ONE of these ordinary
CATS with a one
TRACK existence and
NEVER a thought for the
REST of the cats?
DON'T be an ordinary
FELINE.
EVEN an alley cat
GOES from back yard to
BACK yard in search of food
OR perhaps just to find
OUT what the rest of the alley
LOOK like.
FOR your own sake don't
BE contented to stay in your
OWN alley throughout your
STAY at TECH—set out for an
ACTIVITY.
ONE of the best chances to get ahead
IS offered to you on THE
TECH—If you are interested in
BUSINESS drop around to Room 302
WALKER, and if you clamor to
TRY your hand at the news end
Of the game—then Room 3.
