BOXERS WILL GO TO SYRACUSE FOR INTERCOLLEGATES

Alumni Council Makes Trip Possible by Making Up Deficit of $100

TRAINING IS DISCUSSED

Temple Gym Meet Is Cancelled

As a good topic of debate Are Insaluble

At the meeting of the M. I. T. Alumni Council on Athletics last Monday evening, it was decided to include the intercollegiate basketball and wrestling teams in the tour. The meet is to be held in the gymnasium of the University of Syracuse, New York. The only point of difference in the record was that the team did not have the necessary equipment, but it was decided that as they were lacking only $100, this would be supplied by the council.

Captive Panel Trained

Due to the insalubrity of two of the panel members who were scheduled to take part in the discussion and the absence of a third, the meeting was postponed until next week. The panel was composed of six members, four of whom were members of the student body.

Captain Poorly Trained

Construction of the new gymnasium at the Institute is expected to be completed in time for the opening of the academic year.

The executive committee, if application is made at the

ARNOLD WILL HEAD SENIOR WEEK BODY

Executive Committee of Senior Week Organization Is Also Elected

Dwight C. Arnold 27 was elected president of the Executive Committee of Senior Week at its first meeting, which was held in the Institute Auditorium last night.

The meeting was called to order by President H. D. Whiting 27, secretary of the committee, who gave the list of committee members who were elected.

At present Arnold holds the position of assistant professor of the Technical Chemistry Association, president of the executive committee, and president of the Washington Club. He is also a member of the alumni association and the honorary society of Phi Beta Kappa, for which he was an associate member several years ago and the award was made only a few weeks ago.

Assist-Sub-Committees

James A. Lyles, president of the Senior Class, opened the meeting by introducing the members of the committee. The meeting was then opened to the floor and the members of the committee were instructed to prepare for the meeting of the Student Council by the President H. D. Whiting, secretary of the committee, who gave the list of committee members. The meeting was called to order by President H. D. Whiting 27, secretary of the committee, who gave the list of committee members, who were elected.

STEEL TREATERS WILL HOLD MARCH MEETING

Members of the敝 Tool Club will hold their meeting for the purpose of selecting a program for the evening. Dinner will be served at 6:15, and the meeting will be held in the room on the second floor of the Kendall Square Building, at which time entertainment will be provided for the members.

LARGEST AUDIENCE HEARS SINGER AT WHITCONCERT

Noted Contralto, Accompanied By Whiting at Piano, Sang Well-Known Songs

Playing to a capacity audience in room 1046 last night, Miss Mina Hager, the noted contralto, accompanied by Arthur Whiting at the grand piano, sang many well-known melodies that drew a great deal of applause from the audience. Both Miss Hager and Mr. Whiting have been members of the Symphony Orchestra, and the two have worked closely together in previous concerts. Miss Hager was born in Sweden, where she was trained in music, and she has been a member of the Swedish Opera Company for several years. She is now touring the United States, where she has given many concerts and has been well received by audiences.

Large audience attended the concert, which was held in the Student Union Building on the campus of the Massachusetts Institute of Technology. The concert was sponsored by the Musical Society of the Institute and was attended by members of the Symphony Orchestra and other musicians.

"WEST IS EAST" ABANDONS OPERA HOUSE—WILL PLAY AT CASTLE SQ. THEATRE

WEST END INSTITUTE, MARCH 2

"WEST IS EAST," the latest production of the East End Opera House, was abandoned last night and will be transferred to the Castle Square Theatre. The play, which was originally produced by the East End Opera House, was taken over by another company and transferred to the Castle Square Theatre. The play was well received by the audience and was expected to be a success.

"WEST IS EAST" ABANDONS OPERA HOUSE—WILL PLAY AT CASTLE SQ. THEATRE

Last of Three Performances Is On Thursday, When All Men Will Be In Town

OPERA HOUSE TOO HUGE

The new opera house is too large for the use of the Institute and is too small for the use of the union. The new opera house was built primarily for the presentation of the annual Spring Concert, and it will be used for this purpose only. The new opera house was built primarily for the presentation of the annual Spring Concert, and it will be used for this purpose only.

Dates Changed To Miss Recital

As a result of the change in the schedule, the recital for the evening of March 2 will be held on March 3. The recital will be held at 8:30 P.M., and the program will consist of selections from the opera "Tosca." The recital will be held at 8:30 P.M., and the program will consist of selections from the opera "Tosca."

LOVELL WILL LEAD FORUM FOR T. C. A.

Capital Punishment! This Afternoon's Subject for Discussion

Reverend Sidney C. Lovett, of the Mount Vernon Church of Boston, will speak on "Capital Punishment!" and he will address the following in the second of the series of three events which he will hold as the principal feature of the Spring Forum in the Faculty Dining Room. The forum is to be held in the morning of the first day of the spring term.

The forum is to be held in the morning of the first day of the spring term.

THE QUESTION OF HUMOR

Since the appearance of the recent February "Theatrical Number" of Voo Doo we have heard much undesirable criticism of "filthy humor" from our friends. We have directed our efforts toward the goal of seeing just how much he could get away with; rather than how clever he could be. The problem of defining the line between comedy and the "filthy humor" is one that is not as disturbing as it might appear, except absolutely filthy is not one over which we are going to concern ourselves. For the sake of getting back to positive results.

Many of our publications enjoy the privilege of being entirely run under the direction of undergraduates, consequently there is no need of faculty suppression as such as exists at many American colleges. Our editors are appointed by the President and Dean's office. News from colleges throughout the country indicates that there is little faculty censorship, there seems to be a constant chaffing among the undergraduate editors and an attempt to get away with what they please. How this ends I will leave to the judgment of the rest of the school.

The condition which has existed among the Institute publications and ourselves we are grateful to have complete charge of the issues which we publish, and we have at the same time we have a greater responsibility upon our shoulders. We do not know the characters of the students who are producing the reflection which they might bring upon the Institute.

We believe that the general character of Technology publications is above average and for the past two years we believe that Voo Doo has been a much better and cleaner magazine than many college is! above average and for the past two years we believe that Voo Doo itself would only lead to a lot of unpleasantness rather than the results that have been attained by the Voo Loungers. The possibility is far greater that the Loungers are doing something wrong.

The effects of these publications on the minds of the students may be seen in the calm and intellectual manner in which students are doing, and consequently in the character of the students.

The show contains only four parts. It is an original production, created for the stage, and the plot is not at all forced.

As We Like It

Laff That Off

"Laff That Off," one of Earl Car¬ rington's best comedies, began this week's play at the St. James Theatre.

It is the story of the effects of the good comedy—a original plot, clever lines, and new situations. The humor is both new and original, and in two or three moments of pathos, which project a deeper meaning, the fact is revealed that comedy is more evident. It is the story of the apartment life of three young men, and the one of them who is in the studio of the screen, a better person for the troubles he has gone through. A few professional models and exclusive jewelry, and a few of the sights of New York and "Gay Parisienne" come to life in the room.

This is the story of what happens when the three friends have a change of heart in the middle of the night and go to the Lounger's. They find the Lounger's rather empty, and the plot of the play and the character of the room become the subject of discussion. It is not a co¬ mical show, but a rather serious play, dealing with the serious problems of young people.

The villain of the piece is the young girl, the daughter of a rich man, and the plot is not at all forced. The plot is devoted to the efforts of the young girl to save her father.

The price of the room is right, and the piece is not at all forced.

The play is titled after "Laff That Off," and the title of the play is "As We Like It."
EIGHTS TEST NEW BARGAIN PRACTICE

Crew practice started in earnest on Saturday afternoon when six crews went out in the new large. Open water extended from the Cottage Schools to the nearly dry Henley Bridge. During the year the initial outdoor practice of the season was not until the spring. In that case of this year's early start, the coxemen should be in mid-season form when the time for the first meet arrives.

The new large enables a coach to use the first chance. The students of the individual men as he walks back and forth along the task. The Middlesex boat is a bit on the center and many had placed at 20 or 30 feet and in 10,000 to 11,000. The coxmen should be in mid-season form when the time for the first meet arrives.

Before this, the girls had been left caused by the students' dishonesty. Under this practice, the coxmen should be in mid-season form when the time for the first meet arrives.
Research at M.I.T., Leads to Improved Laundry Methods

(Continued from Page 1)

found that in the average plant it takes about 15 minutes to run 250 pounds of clothes through the washer. When the machines are used one or two changes of water, the moderates can estimate that in an ordinary wash the chances of soap and a number of other things are removed from the clothes.

Laundries

Twelfth Industry

In the winter they are removed from the clothes by casually piling them in large baskets, and waving the basket at high speed. The clothes lose their soap just enough for the bumping or tossing in the laundry to a washing machine, which makes it a little less pronounced in the laboratory. Any member of the club who has used the laboratory is convinced that the dislike of the student automobile is considerably increased by the driving. The automobile insurance companies have found that girls drivers have a smaller claim rate than boys. Although the automobile insurance companies have been called to their notice. Be-cause of the student automobile they have been taken upon the field of atomic research, and in course of time, probably it is not as pronounced as in the field of atomic research, and it is known that the automobile is a decided boon to many people, and there are probably not the number of students who would object to it.

Blanchard Presents Latest Atomic Theory in Series of Ten Lectures

Non-Mathematical Course Is Open to All Students—To Begin Tuesday

Atomic theory and the most recent developments of the structure of the atom will be presented by Dr. A. H. Blum, of the Physical Chemistry Department of the Institute, in a series of ten lec-
tures beginning Tuesday, March 3. Dr. Blum will use his own apparatus and will lecture on the atom as shown by research in radio-
activity, and atomic and allied fields of the study of the micro-
scope. The course will include the work of the student and the instructor in the field of atomic research, and it is expected that the student will gain a deep appreciation of the atom and the methods of study of the atom. This course begins to open to students of all classes. Dr. Blanchard states that the ultimate falsity lies in the atomic theory and practical methods of the study of the atom. This means that the subject of interest to engineers will be involved in those testing devices for atomic dis-
cussion.

NOTICES

OFFICIAL ATOMIC STRUCTURE

Professor Blanchard’s course in Atomic Structure (33) begins Tuesday, March 3, at 8 a.m., in Room 245. Application may be made at this hour on Tuesday and Friday mornings.

The University Junior and Senior Classes will meet Tuesday and Wednesday mornings at the usual hour.

ON-WEEK COMMITTEE

There will be a meeting of the On-W week Committee in the Committee Room at 7:30 o’clock this afternoon.

SOPH DANCE COMMITTEE

There will be a meeting of the Sophomore Dance Committee in the Committee Room of the Willard Memorial at 8 o’clock this afternoon.

WALKER COMMITTEE

Meeting of Walker Memorial Committee and all freshmen candidates at 8 o’clock on Committee Room Wednesday noon, March 5, 1927.

T. C. A.

The T. C. A. received 250 coat hangers for free distribution. One to each man may be had by applying at the office.

EMPLOYMENT BUREAU

The employment bureau of the T. C. A. has been called to the attention of the -

CONCERT TICKETS

The T. C. A. has received a limited number of student tickets (at cost) for the concert of Forza Piiich at the Music Hall at 8 o’clock Friday, March 12.

FENCING TEAM

There will be a fencing meet with Norwich in the Faculty Eating room at 2 o’clock. No ambulance will be ready at this time, and the audience is requested to come armed with a weapon.

Blanchard Presents Latest Atomic Theory in Series of Ten Lectures

DESCH OF SHEFFIELD LECTURES ON METALS

English Metallographer Speaks Today and Tomorrow

Dr. C. H. Desch, F. R. S., Dean of the Metallurgy School of the University of Sheffield, England, will deliver lectures on "Modern Views on Defects in Metals," while tomorrow he will talk on "The Fusion of Metals." All lectures are to be given in the Fogg Memorial, at 8:30 p.m. They are free to the public.

Professor Desch has devoted most of his life to metallography. He has long been known in this branch of science, particularly for his work on the structure of metals. He was educated in London, and has carried out research work there and in Germany. Professor Desch has engaged in lecturing on metallographic subjects for many years, and since 1919 he has been a member of the staff of the University of Sheffield. He is at present professor of metallography at the Royal London School of Mines, and is making a short tour of this country to inspect our universities, laboratories, and metallurgical plants.

NEW ROOMS WILL BE USED FOR RESEARCH

Changes are being made in the basement of Building 9, where the unused metallographers are being removed and the space divided up to make small rooms. This work will probably be used by the Department of Physics for laboratory researches.

The basement of Building 9 has not been used for many years and the storage space has slowly but steadily been taking possession of the floor. Present plans for research include the opening of the basement and the outfitting of the new rooms with metallographers. The new rooms are designed to increase efficiency and reduce space costs.
