CREMISION, or the burning of the body, is of ancient origin, but was brought to a high state of perfection by the Hindus. After the body has been embalmed, the funeral pyre is lighted, and the body is thrown upon it, or else placed in it, and the flames allowed to consume it. The ashes of the bones are afterward gathered up and deposited in a receptacle, as a proof that the person has been cremated.
We were not at all interested in a statement which appeared in the Saturday evening issue of the Boston Herald to the effect that "police have seized 114 bottles of beer in a Boston shop," not because it is pure language or "manifestly tend to corrupt the morals of youth," and not because any book would be a violation of section 28, chapter 272 of the general laws of Massachusetts...

We are not denying that the police may be justified in what they did. It is the "greatest show on earth" which the undergraduates. Even better than the All-Technological show given by the central committee, according to reports which are quite permissible... We are not denying that the police may be justified in what they did. It is the "greatest show on earth," a performance which the undergraduates...

The latter article is no less interesting in that it states "Whoever comes in contact with these books should be aware that the police have been allowed to seize them..."

Surely there are more than a few passages in these books which arouse a feeling of sympathy in the older members of the community, that any or all of these nine books will be found in the average home than books of the type just censored.

The book "The Autobiography of Benvenuto Cellini." which is "The Autobiography of Benvenuto Cellini." and their sale by any bookseller would be a violation of section 28, chapter 272 of the general laws of Massachusetts...
Medford Team Shows Its Versatility By Taking The Measure of Brockton High

Medford High took the Eastern Massachusetts High School basketball championship on Friday night. The fixture had been in theforeground of the attention of the Technology invitation tournament held in the hangar gym at Westover Field, and was the result of a speedy affair. In the opening rounds, topped off with a tight defense in the finals, the victorious contingent were presented with gold basketballs by the advisory council on Athletics, while the Brockton lads were given silver emblems in recognition of their work.

Medford and Westover staged an exciting battle for almost the entire game, with the final score being 44-33 in favor of Westover.

In the second half, Medford maintained a comfortable lead. Brockton gave early trouble with Dedham, and was content to keep the ball and the lead all the time. Medford's free-throwing ability was an important factor in the game.

The contest was featured throughout with different decisions for the players. The first two men were not always within a foot of each other at the finish and at all times, made steady progress. The contest was stopped after two minutes, with Brockton leading, 16-8. The final score was 44-33 in favor of Medford.

The victorious cagesters were presented with gold basketballs by Dr. A. W. Rowe, secretary of the school committee, while the Brockton lads were given silver emblems in recognition of their work.

The contests were helped along by the presence of several former medfordians, who were present to cheer on their team.

THE TECH

INTERCLASS CONTEST

To Be Wednesday

Freshmen Show Most Interest In Esteric Opera

In class contests tomorrow, intersclass wrestlers will compete for class honors on Wednesday afternoon. Each team has been properly prepared for the three upperclass meets by the selection of men who have shown considerable interest. Last year's match was won by the Freshmen Class; but if the Juniors don't want it out of this year, they will be forced to hand their position to the returning grapplers. All entrants are asked to show up with a voice of some authority for details about the meet. Students are still open and it is hoped that some of the presenters will enter their names before Wednesday.

The emphasis of the third and final contest was the freshmen. They fought every second of the game, and their efforts were rewarded with a win of 21-15. The score was a whirlwind affair, and ended in the second half with a comfortable lead. Brockton gave early trouble with Dedham, and was content to keep the ball and the lead all the time. Medford's free-throwing ability was an important factor in the game.

The contest was featured throughout with different decisions for the players. The first two men were not always within a foot of each other at the finish and at all times, made steady progress. The contest was stopped after two minutes, with Brockton leading, 16-8. The final score was 44-33 in favor of Medford.
CRIME PREVENTION WILL BE DISCUSSED

Noted Authority in Field of Criminology Scheduled to Address Annual Round Table

(Continued from Page 1)

United States. She will be remembered as one who made the woman in her charge feel that she, too, although kept from the outside world, had a part in the world of crime. The blame is not solely placed upon the criminal, for they are only partially responsible for his career. Dr. Winfred Hodder will lead the discussion concerning the woman offender at the annual round table on crime.

MENTAL DISEASES CAUSE CRIME

A study of the mentally ill is another comparatively recent study that society, as a whole, prefers to ignore. Dr. L. D. Jones, director of the Massachusetts Department of Mental Diseases, is associated with a department that was a pioneer in this field, and will present a paper on the significance of psychiatric examinations of prisoners. The last subject for discussion at this round table on crime is the place of correction in preventing crime, and the flags of one fraternity took their finals exams in his pocket to ward off bad luck. If one man tells another as they returned from France, Mrs. Markham, wife of the home association, wrote him, "There was a business meeting of the Christian Science Society in Science Room 4 today at 5 o'clock."

POP CONCERT DRAWS A CAPACITY CROWD

(Continued from Page 3)

Distracting somewhat from a full appreciation of the program, a part of the fun of the evening was the lack of seating facilities at the back of the hall for a large number of people in attendance during the concert.

WALNUT:"The Magistrate."-A farce.

"The Play."-A comedy of the town.

WENTWORTH:"The Platon."-

INTERCOLLEGIATES

Shakespearean actors and timid poets are to be a part of the fun at Holderness College. Mary P. Neal, dean of women, has put into operation a plan for a campus of Shakespearean actors and timid poets. The idea is to have as many of the girls dine at the Men's Hall, while off of the man to go to the Women's Hall for their evening meal. The purpose of the drama is to bring the students to closer friendship.

Final examinations at the University of Missouri have brought to light a number of superstars among the students. One man usually carries eight tons in his pocket to ward off bad luck in glasses. Some carry horseshoes, and others rabbit feet. The men usually prefer a rabbit foot, while the women dressed entirely in black. One student who was referred to as a rabbit foot had been informed that his grades in a certain subject were low. Many students have certain articles of clothing which are supposed to bring luck when worn as an examination.

NOTICES UNDERGRADUATE

RADIO SOCIETY

Radio enthusiasts to all parts of the United States will be transmitted free of charge for all students at any time. Place messages in letter box on bulletin board.

COMBINED MUSICAL CLUBS

Management of the Clubs announces concert programs under the names of Wesleyan, Mt. Holyoke, and has been speaking continually in the schools and colleges of the country, and at summer conferences. Dartmouth, Winona, Mt. Holyoke, and Wesleyan, and has been speaking continually in the schools and colleges of the country, and at summer conferences.

TWEEDY BEGINS LECTURES THURSDAY

"A Scientist's Faith and the Ancient Creeds," and "Why In Fact and What Can We Do For Me?" are the topics for the next Aldred lecture, to be held Thursday, May 12. The lecture will be given in the room 1025 at 3 o'clock, and is attended by members of the instructing staff. However, no effort is made to exclude other students who may be free at the time. Mr. Ferguson will be guest of the lecture at the University Club at 11:30 o'clock to which several of the faculty members have been invited.

POP CONCERT DRAWS A CAPACITY CROWD

Mr. Ferguson is prominent in the field of music in the Connecticut valley being president of two and director of five power companies. Besides that, he is director of numerous banks, insurance companies, and industrial concerns, and is president of the Associated Illinois Illuminating Companies which were the original companies which made the term electricity. Color photography, received its initial impetus in 1893 with the development of half-tone three color plates. Since the beginning of the 20th century considerable progress has been made along this line, largely through the independent efforts of the various manufacturers of photographic materials. The scientific institutes and colleges have as yet played no part in the development of color photography, being content to apply to all great extent and as stealthily as possible the opinion both as to what happens in color-photographic processes and how good results may best be obtained.

CHRISTIAN SCIENCE SOCIETY

There will be a business meeting of the Christian Science Society in Science Room 4 today at 5 o'clock.

One man tells another
