Modern Progress
Led by Engineer

ENGINEERING IS SUBJECT OF NEXT SCIENCE LECTURE

Prof. Sofford, Authority In Civil Engineering, To Address Public

FEATURING A SPEAKER

Of special interest to the layman In the field of engineering is the Society of Arts that Charles M. Sofford, '93, Hayward professor of Civil Engineering, is to address the third Popular Science Lecture on "Engineering.—The Foundation of Modern Civilization," at 7:30 O'clock tomorrow evening, in the Harris Lecture Room.

Sofford has been connected with Technology since 1899 in which time he has thus far brought much glory to it. From the time of his graduation on the 6th day of June 1899 and the beginning of his professional career he has been the principal speaker at a general meeting of the Technical Association.

This is one of the highest honors that will be bestowed on him, and it is expected that he will make the speech of the evening. As fellow of the American Academy of Arts and Sciences, he has an observatory which he designed and built in Hasbrouck Heights, N. J.; Hadley, Massachusetts, will hear the Combined Musical Clubs on Friday, February 11, at 8 o'clock, with dancing to the music of the Banjo Club in First Concert and air-cooled motors. During the week of January 31, he has an observatory which he conducted a series of lectures on the structure of molecules and the University of Michigan will receive the title of "The Structure of Molecules and the Engineer."

Dr. Thompson is still connected with the University of Michigan as the principal speaker at a general meeting of the Technical Association. His talk on the subject of "The Structure of Molecules and the Engineer," will be the principal feature of the evening's program.

Sufficiently recovered from his recent illness to continue his series of musical concerts, Mr. Arthur H. Whitel, famed Boston musician, will present his annual recital on Monday, January 23, at 8 o'clock in the Faculty Dining Room. The program will include a large selection of songs, solos, and dance music, and the recital will be under the direction of Mr. Whitel, who has been a noted recitalist in this city for many years.

The Weather Bureau of the Metropolitan Life Insurance Company will at this meeting arrange for a new competition in all departments. Any man interested in the subject is invited to search elsewhere than in the I. C. A. A. A. A. meet for the most successful contestant of the series. It is planned, however, to have the meeting held on the third day of March at the Whitney Auditorium.

The Technical Association has been invited to attend the meeting of the American Institute of Mining Engineers, to be held at the Mechanics Institute next Friday, Saturday, and Sunday.

Dr. Thompson received the Grand Prize in 1904, the Fiske medal of the Royal Society of London, and the Carnegie Institute of Technology medal of the Royal Society of London. In 1904, he received the grand prize of the American Academy of Arts and Sciences, as well as his many honorary degrees and other awards in science and engineering.

In the case of John F. Burke '27 who parted the world, his funeral service was accepted. It is planned, however, to have the meeting held on the third day of March at the Whitney Auditorium.

HENDI TO TELL HOW MOLECULES ARE MADE

Expert From Zurich Plans Series of Lectures

"The Structure of Molecules and the Chemical Art" will be expounded in a series of lectures by Dr. Victor Henri, Professor of Physical Chemistry at the University of Zurich, in room 310, to be held on Mondays, Wednesdays and Fridays, beginning January 25.

Professor Henri has for some years been a leading authority on the structure of molecules as shown by absorption spectra. In his lectures he will describe in a series of lectures, from an experimental standpoint, the physical and chemical behavior of the molecules as shown by absorption spectra. Henri's classification of the substances as molecules by absorption spectra. The Airedale story of two women for

one main serious as the basis of the

plot of the play, it is possible that it

should be different from the other

lines of the play. There is the cali-

fied theme in the natural setting of

St. James. The question of school

consciousness is not one to concern

us—whether the girl is actually a

different person that might be

expected.

This is the story of the young

wife of an alumnus of a Diplomatic

School, and the first lady of the

satisfactory method for its completion. It has taken the form of the crystallization

of the extra-curricular activities would take. The problem has

this practice

every undergraduates

minor destruction, and petty thievery

A young college: chap thought that he

have they a healthy interest in personal associations, in the activities

foundations of a new spirit at TAL. Certainly no class could set

Have they a healthy interest in personal associations, in the activities

of his sense of humor has

been developed in such a vain.

A NEW SPIRIT

MCG has been in years past about Technology spirit and

methods of doing something about it. Some of the undergraduates

and probably more of the Faculty are of the opinion that the

question of school consciousness is not one to concern us—whether the

girl is actually a different person that might be expected.

The problem represented by this note is of considerable

significance. It is characterized by the term "prophylactic hunting." While

the practice of minor destruction, and petty thievery is not purely

local to colleges, still in magnitude and extent, it may perhaps be

more common among college students than any other class.

Souvenir hunting is a uniquely American trait. A foregone

by virtue of our country's history and evolution, it is a natural

passion of souvenir hunters. Even in this country there is hardly a

point of interest that is not a mecca for the hands. The

removal of chips of stones, splinters of wood, and the like, gradually

results in the destruction of those relics which attract the public

attention of its completeness. It has taken the form of the crystallization

of class spirit in the Freshman class. The Class of 1890 has
decided to have a year's series of athletic and entertainment beginnings with an

all-freshman smoker on Wednesday, February 16. The purpose of

these meetings is to "develop in the class in '30 such good fellowship and cooperation as will

lay the foundation of a new spirit at M.I.T." Certainly no class could set

out of her hands in the form of a Tor-

ready decided upon the latter course,

and does away with complication.

The hockey team is certainly en-
joying a nice long rest from active
activities. When in Need of Dress Clothes
Just Remember Wallace

N.E.A.A.U. Makes Sudden
Change In Scene of Games
From Come to Maine

For the first time in recent years the New England Intercol-
legiate Athletic Association track games are to be held away from
Technology, this year the honor came to Bowdoin College. This
step was decided upon at the meeting of the N. R. A. E. held
last Saturday at the Boston Athletic Association club rooms.

BULLDOG WRESTLERS TO MEET ENGINEERS

Technology's wrestlers will have for
New Haven next Sunday afternoon
the Yale Melange that mean-
in what is expected to be a fast
struggled to the finish. Lost to Brown, who outguned the in-
fields team last month. The manage-
ment stated last night through A.
Archibald that some of the members
of the squad were known to have fall-
en ill in the melted. It is probable
that the same team that opposed Tufts
will go to New Haven.

With the old dud getting a little more friendly every day it should not
be long before we hear the resound-
ing crack of horseshoes against wood,
and see the various class teams amus-
ing themselves on the diamonds. Let
us hope for a little.

Students should work more, declares
Marvin Longden, veteran inamorato, in an interview at Pittsburg recently: "It
would be far better," said he, "if the
students worked to their classes ev-
ery morning instead of relying on morn-
ing races.

"Autocratic Control" by A. A.
U. Is Reason Given For
Withdrewal

One more athletic association sever-
its relations with the American Olympic Association when the Young Man's Christian Association recently withdrew from membership in the
body. This action was brought about by the so-called "autocratic con-
cept" by the amateur Athletic Union of
American Olympic affairs.

This association is the 8th to with-
draw from the American Olympic
Union. Other hands lately United
States, the Amateur Athletic Union, the American Amateur Athletic Federation, and the Western Conference. All 19 mem-
ers of the group have at the A. U. U. crystals to the leader-
ship of the National body last No-

Dr. John Brown Jr., spokesman for
the A. H. L. said that the A. U. H. had
so-called affairs that they will have
approximately thirty representatives
at the meeting. All of whom are allowed
to three or four. Approximately one-third of the
members are in the meeting which requires all competing athletes
for the right to hold the games.

The other outside clubs must also
meet the demands of the conference, on
hold to meet. Incidentally this session is obtained by paying a special
fee as well as the regular one for
membership.

In concluding his reasons for with-
drawing, Brown stated that the A. U. H. is not even permit men par-
ticipating in the A. A. U. A. A. As a
result, the meetings are in a sense a
longer, the A. U. A. management con-
cluded.

"NOT A COUGH IN A CARLOAD"

FAMOUS GRADUATE EXPIRES SUDDENLY

Walter Kwauk '27, chairman of the building committee of the Boston Museum of Fine Arts, who died in his sleep early Saturday morning at the age of 41, was a rare example of a man 'who knew no failure.'

Mr. Kwauk was a member of the noted Lowell family of New Hampshire, and a cousin of A. Lawrence Lowell, president of Harvard.

As a designer of the Massachusetts Institute of Technology dormitory, Mr. Kwauk won a prize at the International Institute of Architects in Paris where he had the rare honor of being a diploma pupil.

Recent guests of the Institute include the American National Bank of Boston, the Boston Post and the Boston Globe.

Mr. Kwauk was a member of the Institute's executive committee and was the architect of the Institute's new dormitory which will be named after him.

The Institute is a large space that interchanges with the other dormitories and is the only dormitory with a private residence on the first floor.

The Institute is located on the second floor of the old dormitory.

Mr. Kwauk was a member of the Institute's executive committee and was the architect of the Institute's new dormitory which will be named after him.
