WHAT DO YOU KNOW About Track?

1. What is the weight of the discus?
2. What are the three standard outdoor hurdle races and what are the lengths of the hurdles?
3. Name two limiting conditions to which a runner in a quarter-mile must be subjected.
4. Who has run the fastest mile ever timed and how do present records compare with his performance?
5. How much does a single turn allow a runner in a quarter-mile as judged by existing world’s records?
6. What is the most important technical detail in running?
7. What events compose the Pentathlon?
8. What essential difference exists between the running races in this country and those of the Olympic games?
9. What one essential point determines the legality of a successful high jump performance?
10. In what year was tenth-second timing made official in college competitions of this country?
11. In what year were the Olympic games revived, and in what year were the French Olympic Games held?
12. What is an amateur?
13. Who first exceeded 20 ft. in the broad jump and what is the present record?
14. When did the javelin throw become a recognized sport in American intercollegiate athletics and what was the reason for its introduction?
15. What field and track events have shown the greatest improvement in the last ten years?
16. What is the circumference of the discus?

Author of the "What Do You Know" Queries

Dr. Allan W. Brown, Wd. Secretary of the Athletic Advisory Committee on Athletics.
THE TECH

George Eastman, Former Kodak Head, Is Technology's Greatest Benefactor

Haa Donated Over 59 Million Dollars in the Last 20 Institutions

Seven years ago, at the annual alumni banquet, Mr. Eastman gave up to that time the largest single bequest known to the Institute. It was revealed. At the close of the address which had been marked by enthusiastic reference to "Mr. Smith" and his identity, and by the showing of pictures of those who might be the man whose real identity was unknown to even two or three officials of the Institute, it was announced that Doctor Eastman had given the sum of $59,000,000 to the Institute. It was stated that Doctor Eastman had given the sum to "Mr. Smith," a faculty member, and that the Institute was restricted to develop industrial and scientific institutions of which Technology was related to them.

This information was contained in a letter from Mr. Eastman in a letter to the Trustees of the Institute.

The letter was addressed to the President of the Institute, and was dated December 23, 1927.

It read:

"Dear Sir:"

"I have given the sum of $59,000,000 to the Institute to be used for the development of industrial and scientific institutions of which Technology is related to them."

"I have also given the sum of $59,000,000 to the Institute to be used for the development of industrial and scientific institutions of which Technology is related to them."

"I have also given the sum of $59,000,000 to the Institute to be used for the development of industrial and scientific institutions of which Technology is related to them."

The letter was signed by Mr. Eastman, who died on January 14, 1932, at the age of 78 years.

The sum of $59,000,000 was given to the Institute on December 23, 1927.

AS WE SEE THE MOVIES

FENWAY

Two moments in a career that are of great importance to the character, and in some cases to the success, of the career of a baseball player. These moments are often the turning points in a career, and are often the difference between success and failure.

In the first, the Fenway Park field is filled with fans, and the players are at the plate. The pitcher is about to deliver the ball. The batter is up to bat. The crowd is waiting for the ball to come. The pitcher throws the ball. The batter hits the ball. The crowd cheers.

In the second, the Fenway Park field is empty, and the players are at the plate. The pitcher is about to deliver the ball. The batter is up to bat. The crowd is waiting for the ball to come. The pitcher throws the ball. The batter hits the ball. The crowd cheers.

Both of these moments are important in the career of a baseball player, and both are often remembered by the fans.

PLAY STAGE

STAGE

"In accordance with the spirit of Circe, it is highly fitting and proper that the costume should be representative of the Institute. The costume should be designed to indicate the character of the Institute, and should be such as to give credit to the Institute for its educational purposes."

"In accordance with the spirit of Circe, it is highly fitting and proper that the costume should be representative of the Institute. The costume should be designed to indicate the character of the Institute, and should be such as to give credit to the Institute for its educational purposes."

So, gentlemen, you need not worry about not appearing "correct" in its field. You need not worry about not having the proper costume, or better still, to have your valet arrange for a suitable costume.

In conclusion, I want to add that your contributions of originality are also in order. You know Circe is famous for her skill in weaving wonderful fabrics and her hair and these fabrics are no longer desired.

The purpose of the table is to provide a basis of comparison between the two institutions, and to give a hint as to what will be the effect of the recent changes.
Engineer and Syracuse Squads are Expected to Fight for Second Place

Technology’s hard-hitting boxing team faces its final objectives this year when they pit their strength against four other colleges to battle for the Intercollegiate boxing title. The championship bouts are being held this year at Syracuse. All eliminations matches take place this evening. Leaving the semi-finals for tomorrow afternoon, and the present time the Navy Amateur appears to represent the class of the field. The Midshipmen have the usual strong entries and should continue with a clean victory. At this time the Navy, as has occurred in the past ten years, is usually the one team that enters the conference in the title. It would be nitpicking, surmising that the Navy will be anything but a strong contender.

College and Knack Favorites

Collegiate boxing’s title may be claimed by the fastest boxers of the collegiate ranks and should be no trouble for one of the Navy’s entries. Captain Wally Kempt of the engineer claims to have a class entry and regardless of his field is definite.

Tennis Schedule

"Round Robin" Eliminations to Decide Makeup of All Three Teams

Twenty-two candidates gathered at the tennis courts of the main campus on Wednesday afternoon, and today the place for the team is to be chosen by Manager Collier.

As in the past, there will be three singles, one doubles, and a tournament event. The early games were to be played by the Engineers due to the early season. The games will begin on Saturday afternoon, and the finals will be held on Wednesday afternoon, and the final matches will be held on Wednesday afternoon.

Tennis Schedule

The weekly tennis schedule for the fall season is as follows:

1. Wesleyan University, Middletown
2. Columbia University, Rye, N. Y.
3. Amherst College, Amherst
4. West Point, West Point
5. Brown, Providence
6. Holy Cross College, Worcester
7. N. E. L. T., University of Pennsylvania
8. Franklin & Marshall College, Lancaster
9. Lehigh, Bethlehem
10. West Point, West Point
11. Cornell, Ithaca
12. Penn State, University Park
13. Temple, Philadelphia
14. University of Pennsylvania
15. Princeton University
16. Yale University
17. Harvard University

Granger Rough Cut

Granger Rough Cut is made by the Liggett & Myers Tobacco Company

MAYBE you know some old fogy who owns one of these ultra-high hat pipes... a blotto bimbo who broadcasts a line of fogey who smokes one of these... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes... tobacco that is fine as any man ever cut for pipes and sold for pipes...
**ME and the joy-friend... Prince Albert**

When my father was in college, "Put that in your pipe and smoke it!" was considered snappy conversation. I'm ready to take this old line literally when the talk centers around Prince Albert. Because P. A. makes two of what I like in a pipe.

All wise-smoking men, P. A. is the money when it comes to deep-down satisfaction in a smoke. It’s got everything! Cool as the trail of the ice-man across the kitchen. Sweet as vacation. Fragrant as a pine forest.

Think up your own similes. You’ll write them all in the column headed "Superlative Degree" when you learn the joys of a Jimmy-pipe and Prince Albert. If you don’t know the joys of an old smoke, come around to my room and I’ll give you a load.

**What to see in ENGLAND**

You cannot afford to visit Europe without a trip to England—where the language is yours, where you will understand and be understood better than in any other part of Europe.

It is the home of fordous York—capital of the famous Minister which this year celebrates its 1,500th anniversary. Not only are there noble castles and mighty historical ruins, but pleasant modern resorts, situated in the finest parts of England’s celebrated countryside.

Then there are Cambridge, Norwich, Lincoln, Durham and other places famous in history, romance and legend. You can make a trip of it every day of your trip when you visit England.

The "Flying Scissor," the London and North Eastern Railway’s famous train between London and Edinburgh, is fast and frequent trains to all the numerous points of interest.

**DEPARTMENT HEADS DESCRIBE COURSES**

(Continued from page 2)

The second series of lectures will be given on Saturday by Professor Ross F. Tucker, who will speak on "The Making of a Building." The subject will be treated as a whole and a special lecture will be given on February 10 in honor of Engineering Day, in leopard of that department’s 75th anniversary. Professor of the Department of History of Public Health will give the work of his department at 3:30 in room 2-178. Professor Rice will speak on "A Dialogue of the ages of the course in Electro-Chemical Engineering," and the third series will be given on 3-171 and Chemical Engineering course.
