BEAVERS FAVORED TO WIN IN INITIAL BASEBALL CLASSIC

Heavy Hitting Will Probably Feature Foughtly Diamond Contest

M. L. T. HURLERS FAVORABLE

Baseball opens its official season on Tech Field tomorrow afternoon at 3 o'clock when the Beavers clash with Boston University. Two chances for victory in the Cesco Bowl are in the offing, for BU has not had a chance to stretch its legs this season, and they will have to face the best Beavers are going to get during the season.

The Beavers, who arrive from a spell of inter-squad games, are in top form, and will be ready for the meeting. The BU team is made up of a mixture of veterans and freshmen, and will be a hard team to beat.

The game will be played under the rules of the American League, and the winner will receive 10 points in the Cesco Bowl. The Beavers are favored to win.

Junior Promenade Will Climax Week

Willard J. Slagle '28 Chosen Head Usher For Annual Dance at Copley

Coming as the climax of Technological social season, the annual Juniors' Dance will present the pictures of the future to the gazing world. The dance will be held in the Copley Plaza, Tuesday night and 350 couples will partake of the joys of dancing in the music of the California Symphony Orchestra, which will supply the entertainment.

Announcement of the winners for the annual event was made last night at the Courtesy Club's annual banquet.

TOMORROW'S VISCOITY TEST

THE pistol shot which starts off the 1927 Technique Rush tomorrow morning marks the beginning of the annual imitation of the Franco-Prussian War. The gun is rumored to fire a bullet weighing only two grains of powder and smells of black powder.

The rush is expected to last for approximately two days. After the first morning shot, the rush continues in the form of a series of games and activities designed to simulate the war of 1870. The rush is not only for those who wish to participate in the rush, but also for those who wish to watch or enjoy the show.

The rush is expected to be a fine source of entertainment for the students of the Institute. The rush is a long-standing tradition at the Institute and is a major event on the social calendar.

The rush is open to all members of the Institute community, and is a great opportunity to meet and interact with other students.

THE INTERCLASS TRACK MEET

Technology affords few opportunities to bring the girls and interested boys together. The annual Interclass Track Meet is one of these opportunities.

This condition is peculiar to the Institute because at many colleges athletic events are the means whereby all the students get to know each other. We do not deplore the fact that the athletic events at the Institute are so limited in number and scope, but we do deplore the fact that the conditions which make for a healthy social life at the Institute are lacking.

We feel that if all students should have the chance to meet and interact with each other, the Institute community would be much more cohesive and enjoyable.

We are delighted to announce that the Interclass Track Meet will be held next Monday afternoon and evening. The meet will include sprints, relays, and hurdles, and will be a great opportunity for students to compete and to enjoy the sport.

We hope that all students will attend and support their favorite teams. The Institute community will be much richer if we all work together to make the Interclass Track Meet a success.

OPEN HOUSE NIGHT

OPEN HOUSE NIGHT is becoming more than just an event on the Institute program. Every year since the time the Institute first opened its doors to the public, this night has attracted more and more visitors, and by the end of the year the building will have been completed.

We feel that this is an impressive gesture on the part of the Institute, and we are proud to have been able to participate in this project.

We are looking forward to the Open House Night, and we hope that all students, faculty, and visitors will take the time to attend and support the Institute.

THE TECH

THE TECH BOOK LIBRARY

The following books have been added to the library during the past two weeks:

"Bodlv and Faceult-. With this point in view, we should all do our bit who desires to show who through our Institute, entertain them all and leave them with the very best that our guests be well cared for. This burden falls on the student body, who should wear their best clothes when they are on their best behavior.

Open House work--be a guide or personally direct a group of friends through the various sections, then leave them with the very best impression of the Institute.

WALKER LIBRARY

 Causes, Cures and History of Conflict Will Form Study Group

Middlebush, Mass. (New Student Service)--A course in "War: Causes and Cures" is one of the recent courses made possible by the Middlebush New Student Report, which is now available in print form.

A student poll on the advisability of the course showed that 75% of the students favored the idea. In favor of some sort of coverage of that nature, 14.5% favored the idea while 10.5% would make it a fall semester.

"The purpose of the course," the report says, "would be to give a background of the factors involved in the war as a method of setting interest between the instructor or student, that advanced student should be capable of making the history and
devise a plan for the course. He is currently teaching at the Institute. Each of the topics is to be selected by the students, and the trend of the course is to be determined by the students. The classroom is to be used as a laboratory for the course.

The course is to be taught by Mr. W. J. Great Court. The course is to be taught by Mr. W. J. Great Court.

Spring Suits for Young Men $45 and $50

Young Men's Department--2nd floor

A large variety of patterns, in unabridged worsteds and chenille, blues, greens and gray tweed combinations. The majority of these wools are exclusively imported fabrics, and the styles are those approved by the leading Colleges and Prep Schools.

Two or three button coats, patch or flap pockets, new wide trouser styles.

Made in our Boston Workrooms ready to try on today and to wear tomorrow.
after weeks of practice, the technology track team finally reaches its peak event on Monday afternoon when all four classes begin their yearly battle for supremacy. As the new year approaches, the number of spurs increases daily, bidding fair to eclipse former records in this respect. As for track records, it is very probable that several of these may fall, given suitable weather conditions. The first-class running and vaulting events, and sprints for all weight classes have been given daily attention this spring, and will be gone over carefully this week, to ensure the men the best possible chance.

whether or not mcCarthy can rule on another established record in the high jump is a matter of suspense. although most of these old competitors will be able to maintain their old records, the younger men will no doubt set new marks in the 150-pound varsity and the freshmen in an elimination race over the harvard bridge on the Charles river Wednesday. as a result of their victory over the harvard bridge in the race, the mile will be between stanley, newton, and buck. however, the harvard bridge will be between stanley's longer strides and newton's speed. buck will be at hand to ready himself in the middle and newton's both on. frank buckman will try to outpace the other two in this race. jack mackenzie, ken smith, ken roberts, and newton's will be a considerable distance behind them in this race. the outcome of the race will depend on the relative position of each of these men.

the 200-yard dash and the 100-yard dash will be among the most exciting events of the season. the 200-yard dash has been a popular event for some time, but the 100-yard dash has been neglected. capt. henry, who is in charge of the track meet, has decided to make it a popular event. the race will be run from the starting line to the finish line, and the winner of the race will receive a trophy. the race will be run in two heats, with the first heat run at 8:30 and the second heat run at 9:00.

The Tech, although several other good and Collins will provide the excitement later. Fleming, Ross, Burgess, and the spikes hit the finish line thick and fast a fraction of a second. Wieneke, Herbert will give the rest of the competitors plenty of opposition, and Herbert should give the rest of the squad some out and sign up for track. Herbert will be between stanley's longer strides and newton's speed. buck will be at hand to ready himself in the middle and newton's both on. buck will try to outpace the other two in this race. jack mackenzie, jack mackenzie, ken smith, ken roberts, and newton's will be a considerable distance behind them in this race. the outcome of the race will depend on the relative position of each of these men.

Juniors Rule Slight Favorites To Snatch Interclass Track Title

Win Right to Meet Annapolis Jays by Victory on Wednesday

C. A. Smith and Mcmillan will probably be the winners in this event. As for track records, it is very probable that several of these may fall, given suitable weather conditions. The first-class running and vaulting events, and sprints for all weight classes have been given daily attention this spring, and will be gone over carefully this week, to ensure the men the best possible chance.

APRIL 21—Wednesday 8:15 Tech Show (Castle Square Theatre)

APRIL 22—Thursday 8:15 Tech Show (Castle Square Theatre)

Twelve paddles will be distributed from the hat, at intervals of sixty sec- onds, and the only, easy fight for the coveted piece of wood is expected to be an event that will make an indelible impression on the "Prom Girl." Always has been in the past, anyway. The first four and the last paddle are good for the 'Tall Fellers,' being, naturally, autographed by the president, while the others will be autographed by the committee, and the paddles will be sold to raise money for the committee.

Every man who participates in the fight must be able to produce a re- ceipt for the full amount of the Tech- nique price before entering the capped in excellence. During the Rush, all men who desire to enter the list must be able to show the receipt, lest their names be struck from the list. Then the only requirement for the fight is that he be given a paddle, and that he give the paddle in return to the deck.

Directly after the close of the event, all men holding receipts for Tech- nique will be able to secure a ticket to the dance. The only requirement is that you be qualified and competent to drive a car. That is all.

Whether you're going for a trip of a few miles, a weekend trip or need a car for the evening occasion—you’ll find this service mighty convenient.

You come to our station—select the car you want—and off you go. It takes about two minutes. No red tape—no annoy- ing questions.

The only requirement is that you be qualified and competent to drive a car. That is all.

This introduces to University students a new and better way of getting around that has met with instant favor because of its convenience and economy.

You can now rent a fine private automobile that you drive yourself—where you like—in fact use exactly as you would a car of your own.

Walk-Over

At Your Service

Technology Branch, H.C.S.
THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY
Cambridge, Mass.

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY offers Courses, each of a four years' duration, in Civil, Mechanical, Electrical and Aeronautical Engineering; Naval Architecture and Marine Engineering; Mining Engineering and Metallurgy; Architecture and Architectural Engineering; Chemistry, Chemical Engineering and Metallurgical Engineering; Biology and Public Health and Sanitary and Municipal Engineering; Mathematics, Physics, General Science and General Engineering and in Engineering Administration. These Courses lead to the degree of Bachelor of Science.

To be admitted to the first year class applicants must have attained the age of seventeen years and must satisfactorily fulfill entrance requirements in Algebra, Plane and Solid Geometry, Plane Trigonometry, Physics, Chemistry, English, History and the electives, the requirements for which are fulfilled by the presentation of satisfactory certificates. A division of these entrance subjects between different examination periods is permitted.

Entrance examinations are held at the Institute in September. In June applicants will be examined by the College Entrance Examination Board in Boston, New York, Philadelphia, Chicago, and many other cities in America and Europe. A circular stating times and places is issued in advance by the College Board.

Graduates of colleges and scientific schools of collegiate grade, and in general all applicants possessing satisfactory certificates showing work done at another college equal to one year's work at the Institute, without examination, to such advanced standing as it is warranted by their previous training.

Graduate courses leading to the degree of Master of Science in Architecture, Doctor of Philosophy, Doctor of Science and Doctor of Public Health are also offered. Special Research Laboratories of Physical Chemistry, Organic Chemistry, Applied Chemistry and Science have been established.

Correspondence should be addressed to the Institute.

PUBLICATIONS
Catalogue: Reaffiliation of General Information, Summer Session, and Graduate Study and Research; and the Report of the President and Treasurer. Any of the above named publications will be mailed free on application.
