MIRTH AND MUSIC PREDOMINATE AT CLIMAX OF YEAR'S SOCIAL SEASON

Beaver Nine Loses First Game Of Season To Terriers

B. U. NINE COMES FROM BEHIND TO TAKE GAME 11-9

Beavers' Early Five-Run Lead Wiped Out in Final Innings

RALLY IN NINTH FAILS

Rhoads, Crandall, Fehay, Farm Nucleus of Squad's Battling Strength

In the first of several baseball games to be played at Tech Field this year, 350 fans were on hand Saturday afternoon for the opening B. U. versus Tech game. The Corning Technical Rush. The lines were drawn as usual for a Tech-Frosh game. B. U. won.

The pitching of Duplin for the losers in the eighth inning, and the batting of the Beavers, were apparently free of 'stage fright'! These, without doubt, will be inadequate for the term, as they will be lacking.

The pitching of Duplin for the losers was superior to any offered by the Beavers in the eighth inning, and the batting was poor. The man was not in top form, and was an apparent lack of 'stage fright'! These, without doubt, will be inadequate for the term, as they will be lacking.

B. U. in the eighth inning, and the batting was poor. The man was not in top form, and was an apparent lack of 'stage fright'! These, without doubt, will be inadequate for the term, as they will be lacking.

FEMALES AND ROLLER SKATES

SOURGITY girls at the University of Minnesota and at the University of Illinois have taken to roller skating so enthusiastically that the campus walls which have attracted huge crowds. We wonder if our Technology College girls would not also take to the sport, and if they did, why it has not attained the favor which it has among our friends of the opposite sex. We have long felt that it is a great defect of the world that women have not taken a more active part in sports. And this is certainly one in which they could excel.

THE PROM THAT THE GIRLS MADE

REPORT by G. J. Hume, E. W. Bruce and E. A. Verbono.

GIRLS is to the left of us,
GIRLS is to the left of us,
Girls behind us,
Girls in front of us.

Toasting and laughing;
Swaril at with lips and eyes,
When they come to the ladies,
On each and all.

Who have been so careless of their character in these twenty years,
Grow up to girls despised,
Now grown so strong.

Loved and adored.
Why must their presence fade?
And the wild thrill they've made?
That we all feel,
Honor the Polo's they've made;
Honor this Girls' Brigade, Kissed and adored.

"Hail M.I.T.", Composed by Alumnus, Has Military and Catchy Tune

1927 PRIZE SONGS SCORE BIG HIT

MARTIAL TUNES OF SONGS ARE RARELY HEARD IN COLLEGES

Enthusiasm For Prize Songs Is Shown at Rehearsal by Clubs

MAY REPLACE STEIN SONG But Must Meet With Student And Alumnus Approval Before Adoption

Two alumni were the winners of the 1927 contest and both chose stirring martial as the basis for the Alma Mater song. In direct contrast to the long prize songs of previous years, this year's winning pieces are short and beautiful, and, according to the authors, have the rhythm and rhythm that will satisfy the demands of the student in Germany. I used to enjoy it greatly. I therefore have taken the melody and the music and the words of both songs used the Alma Mater spirit of the men to a high pitch and according to the opinion of many, the selection bid fair to replace the Stein Song on more appropriate and worthy alma mater songs.

"The original melody was inspired by the song written by Goodwin and a student in Germany. I therefore have taken the melody and the music of two together and a harmony of the Stein Song and the present day speaks for its inspirational qualities. As I wrote the words of the song, thought of the Cambridge side of the Charles hardly conjured up before the mental eye the outstretched arms of Alma Mater calling her sons to her bosom."

Statement by Kennison

Karl R. Kennison, designing engineer of the Metropolitan Water Commission of Boston and author of "Hail M. I. T." said how he came to compose the song. He said, "A day was spent in the train on a recent business trip to Toronto, I read in the current Technology Review that the student of Boston and author of "Hail M. I. T." told how he had come to compose the song. He said, "A day was spent in the train on a recent business trip to Toronto, I read in the current Technology Review that the time limit for submission of songs was not yet reached: and the destination of Boston and author of "Hail M. I. T."

"Lucky Co-Winners of $200 Prize in Song Contest—Wrote Compositions in Off Moments for "Fun of It"

But Must Meet With Student And Alumnus Approval Before Adoption

Technology students displayed a great deal of enthusiasm when the 1927 Prize Songs, "Mens et Manus" and "Hail M. I. T." were rendered last night at the Musical Clubs Spring Concert. The inspirational qualities of the melodies and words of both songs moved the Alma Mater spirit of the men to a high pitch and according to the opinion of many, the selection bid fair to replace the Stein Song on more appropriate and worthy alma mater songs.

Phosphorus Deserves Laurels, Say Prescott and MacDuffie, In Voo Doo From Issue Review

By Professor Winward C. Prescott and Malcolm A. MacDuffie, of the Chemistry Dept.

When in the most of events due to the Voo Doo from the Tech has been filled up it was selected as the only feature reviewer of the Press Voo Doo, but through long association with such review the former has become more as acclimated to the Voo Doo, and the latter a fact that a fresh eye and an older hardiness susceptibilities that minute would result from this fact.

For the most known reason I praised the reviewer of the Voo Doo from the Tech, it consists in the floor shades of English and History. Since it is a recent graduate, once stood at the helm of the Techonique and on the right side of the Gym team, and is critical in taste and of the Voo Doo as it should be reviewed in head of the offices would like to see it reviewed. So here it is.

Phosphorus may well be called a far less familiar element than some of its neighbors on the periodic table, yet it is one of the most fascinating and yet, at the same time, one of the most dangerous elements known to man. It is only in recent years that the properties and behavior of phosphorus have been studied in detail, and its role in various chemical reactions is still being discovered.

Professor Winward C. Prescott

MANY PLANS PREPARED FOR OPEN HOUSE DAY

Institute Life Will Be Shown to Public on April 30

Rent a Fine Car In 2 Minutes

I f you want a car in a hurry—whether you are known at our station or not—we’ll have you on the road in about two minutes.

It’s how easy it is to rent a car. No red tape—no annoying questions. You go where you like—and you’re the driver.

There’s one big advantage in this service—one that has made it tremendously popular with students everywhere. This is the low cost of renting a car. And you’re welcome to the use of a car either for a few miles of driving, a trip of an hour or two, a day, a week or a month.

The only requirement is that you be of legal age and competent to drive a car. That is all.

We especially invite students to use our cars. You'll like the friendly spirit here—the fine service—the exceptionally moderate rates.

Ride in Groups and Split the Cost

It costs no more for five to ride in one of our cars. Plus a trip with three or four others—cheaper the bill—and the cost to each is as small as you’ll never miss it.

JEFFRIES

 Keeps your pipes clean

GROUP OF STUDENTS WILL VISIT RUMANIA

Under the auspices of the Institute of International Problems of Columbia University and the Carnegie Endowment for International Peace, arrangements are being made for a party of twenty students and professors to visit Rumania this summer.

The party will journey to Rumania by way of Paris, Vienna and Budapest, landing in Kiev on June 15th. From there, the group will go to Bucharest where they will join the party for the American tour of Rumania. The total cost of the trip will be $200 per person.

The Lounger is positive that this trip will be educational and of great benefit to all those who participate.

To defray the expenses of the group, the Student Board of Directors has decided to hold a dance. The proceeds of the dance will be used to cover the cost of the trip.

The Lounger urges all students to attend the dance and support this worthy cause.

Good Publication Printing

Is the Means of Increased Revenue

And when we say good printing we mean just that. The appearance of a publication has much to do with the financial success of the publication.

Many newspapers are printed on inferior grade paper, that deteriorates quickly under the effects of weather and time. But a well-printed publication that is durable and attractive is more likely to be read and recommended to others.

The use of good publication printing can significantly increase the revenue of a publication. It can attract more readers, who are more likely to become subscribers or advertisers.

Annual Conclave To Be Held In New York At Waldorf Astoria Hotel

By Orville B. Denison '14

Secretary of the New York Alumni Association

Upon reaching the State Saturday morning—and what a glorious morning it was, thanks to the smiling sun, the happy resurrection of the season after the long winter's sleep of more than three months—by this time several alumni everywhere have planned reunions of their own undergraduate events any day that they are free. I know one that will be held at Auto Monday and another that will be held at the time of repetition.

Right here I wish to express in the name of the Alliance our best wishes to all the graduates for the most successful Junior Week.

In an effort to find whether the west coast is the scene of any activities, I have written to a number of ministers and superintendents of institutions of higher education in that section of the country where we have local alumni chapters, and have received replies from many telling of the late commencement of the year and the possibility of having a group of graduates at the time of repetition. This, in addition to the fact that many graduates are in direct charge of the publicity work in the various schools, makes it possible that we may have a number of chapters with active programs.

I wish to express my appreciation to all who have helped me in the preparation of this announcement, and to all the graduates who are planning their reunions at this time of the year.

EVEN "EAGLE-EYE" FAILS TO FIND A COUGH IN A CARLOAD OF OLD GOLD CIGARETTES

Not content with the enormous liquid consumption of the undergraduates, the old-timers of the Institute are now attacking the cigarette habit. This is a small amount of coffee in comparison with the giant mounds of coffee in the student shop. It appears that the ladies are not very critical of the static students.

A Longfellows' club has been formed at the University of California. It will include men and women folk as well.

"It is a year now since I first went in search of a cough in an Old Gold Cigarette, and I have yet to find it."

"Yes, he said, "I have smoked many Old Golds and I'm through. For the moment in my capacity as a detective, I've failed to get my man."

"Still made a great discovery. . . . that you can't blow Old Golds for smoking satisfaction, and that they won't irritate even the sensitive throats of opera singers."

Page 8x
First honors in the interclass track meet held on Tech Field Monday afternoon went to the class of 1928 by a comfortable margin, but a few inches of breasting Worthen and, after cutting down a lead of several yards, an audience of approximately three thousand people were forced to bow to defeat at least thirty minutes later.

The interfraternity relay was won by Alpha Tau Omega for a clean sweep of several events. At several of account making the Phi Upsilon winners was the meet, which was a comparatively large crowd for interclass meet, and conditions were almost ideal for competitive running. The meet was a thorough success, and the officials from the Tech track club were very happy over the way the meet turned out. Morning pictures of the meet were taken for a Technology yearbook.

A hard fight developed between Allen and Zigler for first honors in the high jump. These two foug in for over seven jumps, after the rest of the entries died and dropped from competition. Both cleared the bar at five feet seven, and after raising it two inches, came within a few inches of breasting Worthen in the attempt.

BROWN CUBS Trounce Engineer Freshmen
Cardinal and Gray Yearlings Lose Opening Game 17-2

Technology's freshman baseball team was completely outplayed by the Brown University nine in their opening game of the season on Saturday at Providence, where the visitors came out on top, 17-2. The Cardinal and Gray yearlings could not seem to dig their claws in the box, getting only four base hits to their opponent's twelve. M. E. T. started off well putting a couple of runners to the bases in the opening inning. In their first time at the plate, the Beavers were never in the running, the Providence team scoring in every inning but the last. The ball drift of the Providence team was the deciding factor in the game. McHugh, the starting shortstop, was unable to field the ball and in the efforts passed 11 men. This coupled with the hitting of the Beavers put the game out of reach. For the visiting team, pitcher Haines had a good day at the mound, while McLean and Haynes were the outstanding stars for Brown.

Dr. Max W. Westenhofer, professor of Pathological Anatomy at Boston University, made the unusual statement that "monkeys have originated from human beings." Whether they have or not, the learned professor does not say.

Fins have been made by the city of Chicago to have a fourteen mile course as part of the public school system.
