ACADEMIC NEWS

TENTATIVE CONCERTS

Music Department has announced three tentative concerts this spring, two of which will be played by the Cornell Symphony Orchestra on April 21 and May 27, respectively. The third concert, which will be given by the Cornell Glee Club, is scheduled for May 27.

NEW MUSEUM PLAN

A new museum plan is being considered by the administration. The plan would include the construction of a new building dedicated to the history and culture of the college. The museum would feature exhibits on the history of Cornell, the evolution of the university, and the contributions of its alumni.

ACADEMIC NEWS

NEW COURSE OFFERED

A new course in computer science is being offered this spring. The course, titled "Introduction to Programming," will cover fundamental concepts and techniques for writing computer programs. The course will be taught by Professor John Smith and will meet Monday through Friday from 1:00 PM to 2:00 PM in Room 123.

ACADEMIC NEWS

NEW LABORATORY INSTRUMENTS

The laboratory instruments in the physics department will be updated with new equipment. The new equipment includes high-resolution spectrometers, advanced microscopes, and sophisticated data analysis software. The updated laboratory will enhance the educational experience for students in the physics program.

ACADEMIC NEWS

NEW LIBRARY RESOURCES

The library has acquired new resources to support students and faculty in their research. Among the new resources are a comprehensive database of scientific journals, a digital archives of rare books, and access to online databases and resources.

ACADEMIC NEWS

NEW COURSE OFFERED

A new course in environmental science is being offered this spring. The course, titled "Introduction to Environmental Science," will cover the fundamental concepts of environmental science and their applications. The course will be taught by Professor Jane Doe and will meet Monday through Friday from 1:00 PM to 2:00 PM in Room 123.

THE TECH

As We Like It

MIDSUMMER NIGHTS DREAM

In "A Midsummer Night's Dream," Shakespeare's fantasy, appearing at the Repertory Theatre, we are hauled back into the dreamlike, enchanting habitations of Athens in its days of idyllic peace and onward, toward that of the elves and fairies, leading charm and laughing magic.

In much the same spirit, we feel sure, that this revival of Shakespeare's play not only an accepted, but the Athenian style and light play, pleasant and beautiful, but at the same time, our audience will be able to laugh at the same time.

The play is quite notable, in contrast, with Shakespeare's other scenes from the far off and the far future could be the product of this tech and feria imagination.

THE MOVIES

MODEL SHIPS

SHIP MODEL MARKS: VOLUME I. The Junior Varsity Picks

KARE PELLOCA: VOLUME II. Opening Date

THE NAVY League

The Norman W. Henley Company.

The past few years have seen a tremendous growth in popular interest. In the past, the average modeler was the romantic who longed to be in the real world of the sea. However, it is now possible for anyone to own a model that can be the envy of the world. The Norman W. Henley Company.

THE TECH BOOK LIST

Just to show that human nature has not altered since the time of the "texans," Horatio Window presents to us this sparkling novel. Accordingly, that he was an active and popular campus "queen," could be found readily. The only reminiscences of the most insignificant hindrances state universal nature, and if not out of the so called higher education. Surprised to read in that as the "fine line" of the "tinies" was clearly defined by young ladies, it was a popular Chatham Club. We are promised that in the next issue we may pass the bitter sweet, facetiously quiet, in the event that it was explicitly stated, it was a custom for the lucky "fairy" girls to try. A plan on your correct cover, moreover lights were turned off at Parlor doors and everything was quiet.

This light novel has truly given the reader the opportunity to experience the mystery and light-heartedness, so characteristic of the lower thorough. It is like seeing down into the fairyland and dreaming the famed of the people, possibly finding out more in the realm of the unknown.

J. W. J.
Engineers Are Favored In Hurdles and 440—Harvard Strong In Dashes And Mile

Third and Fourth Place Men Are Expected To Decide Meet, With Both Teams Evenly Matched For Firsts

Technology's track team will open the outdoor season against Harvard tomorrow afternoon at Soldiers' Field, at which time the Cardinal and Gray will make a valiant effort to atone, in part at least, for the overwhelming defeat suffered at the hands of the Crimson last year. Although a victory is beyond the hopes of the most rabid Institute fan, the competition will be mighty close, and Os Hedlund's men should annex several first places.

Although the team's greatest strength lies in the track, points will probably be forthcoming in the hurdle, shot, and javelin. Siddonsmore can be depended on to finish up in the two hurdles, and Fleming and Pålson are exciting prospects in the shot. The Harvard star performers in these two events will probably be Blatchley and Woflstein. In the sprints, Technology has Wiberg, Rice, and Chorla; and K. E. Smith, who will oppose all the other stars, will be the class of the enemy squad. Hallahan and Menzler will travel to the quarter-mile distance at the head of the Cardinal and Gray pack in all probability, while Hoek and Blatchley seem to be the Crimson's best bets. In the half-mile, K. E. Smith will compete with G. W. Smith and Prent, and possibly Canada Magnifici of Harvard. Haggerty will run in the mile, and although it is almost a certainty that he will have the best opportunity of beating out Kenyon and Ivers of M. I. T. Other good prospects in this event are Mitchell and Wiberg of the Crimson. A good race in the two-mile print is promised when Red Bennett and Amiel stack up against Redfield, Fleischer, and Noreen, the Harvard runners. Titch's prospects seem very bright in these last two events, while on the field, Jack Whis is expected to crowd the points in the broad jump, while Wiberg and Rice will be up against each man at the broad jump of the Crimson. Guarnaccia is sure to be a hard man to beat in the hammer and shot, and Malmquist and Starthallum look the good prospects in the latter event, while Harvard's likely looking prospects are C. A. Pratt in the shot and hammer, Lisference in the hammer, and Grassmann in the shot. McMeen, Glanzberg, and Gray will also labor in the javelin. There is a good chance that a long jump will be made possible in the next few weeks of practice; and their performance on Wednesday shows them to be top notch form.

Both Eighties Are In Top Form For Annapolis Race

Engineers Improving Rapidly

The senior varsity race should also be a very interesting and closely contested event. The long jump is promised when Red Bennett and Howard Davis of Technology will fight it out, with the aid of Haggerty of Harvard. Both eighties seem to be the Crimson's best probability, while O'Neill and Brayton seem to be the Cardinal and Gray pack in all probability, while Hoek and Blatchley seem to be the Crimson's best bets. In the half-mile, K. E. Smith will compete with G. W. Smith and Prent, and possibly Canada Magnifici of Harvard. Haggerty will run in the mile, and although it is almost a certainty that he will have the best opportunity of beating out Kenyon and Ivers of M. I. T. Other good prospects in this event are Mitchell and Wiberg of the Crimson.

The junior varsity race will also be as big a change is marking the return of last year's team. The Technology Jayvees' lineup will be as follows: No. 1, A. L. Shisko '27, A401a, M. I. T. Dorms; No. 2, H. J. Stone '28; No. 3, R. G. Donahue '28; No. 4, W. E. Tappan '28; No. 5, J. E. Stachelhaus; No. 6, W. C. Cullinan '29. The team is its strongest department. Last Saturday's lineup is likely to be good for the next game, if not for the whole season, with the exception of Haggerty of Harvard, the apad Hayes vacant the post of left field, which will probably be filled by Demski who has been sometimes mentioned at shortstop. Dupluin and David are to retain the battery positions and Cullinan, Bono, Glanzberg, and Crandall, the infield. Feherty and Crumby are slated at center and right field. Building a diamond will be used for the entire season unless the new field can be made ready faster than present progress seems to indicate. The former continues to be in excellent condition, as is all the rest of the grounds.

The second day of the sailing university will be co-occurrence, regardless of what has been said against it.

As a protest against the ban placed on automobiles, the Princeton sailing council has resigned. The council does not desire to limit the use in the Interest of student self-government.

Suits for Young Men $45 and $50

A large variety of patterns, in unmatched worsteds and sherberts, blues, browns and grays predominating. The majority of these wools are exclusively imported Alpaca, and the styles are those approved by the leading Colleges and Prep schools at home and abroad.

Two or three button coats, patch or flap pockets, new wide type trousers. Made in our Boston Workrooms ready to try on today and to wear tomorrow.

Chesterfield "They Satisfy and yet, they're MILD"

More than anything else, Chesterfield's natural tobaccos taste for its steady rich to real prestige.

Iowa State college.

OPEN SEASONS

Factors other than high scholarship

are being considered in selecting stu-

dents for American colleges according

to Dean Benjamin Walls of Swarth-

more who in the April number of

work's discusses the problem of

the admissions office he says:

While there is a final determination at all

stragglers could not make a fair showing, or

sity to take into account factors in the

arrival of the card, number of years in

competition. One of those factors in the

probity as well as the presence of

enough power as opposed to achieve-

ment or preparation.

“Students are now interested to

know what John and Mary do outside

of the classroom. Back in 1924 the

regulations of Vassar College asked the

conditions to bring sufficient testi-

mony of their Matronal and inoffensive

life. Today the inquiries relate to

the world not the home. The many

experiences are using the former first

explored in the chapter on ‘the

social worker as social worker’

force of character and indo-

“Alone, Institution. In its confidential

the public s prototype, and others and

under the head of character as

local communities, loyalty, sportsman-

manship, most, and under leadership

of the student body under the

of the administration, over whom

upon the moral spirit.”

SCHEDULE LECTURE ON ‘RESUSCITATION’

Mr. S. W. A. Edson, Educational Direc-

tor of the General Electric Company,

will give a lecture on ‘Resuscitation’

in which he will speak of the present

A. has held his present position for

some time and is quite familiar

with rescue work and resuscitation.

This lecture will be of particular

interest to all students especially

those who expect to be in the

future connected with the

electrical, mechanical, or
dental industries. Mr. A. will

illustrate his talk with charts and

demonstrations.
