THOUSANDS WILL SEE LIFE AT TECHNOLOGY TOMORROW

VISITORS WITNESS EVERY PHASE OF SCIENTIFIC WORK

Display of Office Appliances Is Inaugurated in Open House Program

SHAM BATTLE SCHEDULED

With a squadron of airplanes colliding by the chimneys of laboratory buildings and a 24-inch mobile search light from the basement, the Institute and Library buildings and grounds from a position outside 34 Cambridge Street by the Institute faculty, the student body and their friends of the Freshman class.

CHEMISTRY STUDY AIDED BY BEQUEST

$25,000 Fund Left in Memory Of The Late Instructor F. J. Moore

As a means of creating more enthusiasm in the study of Chemistry at the Institute, a $25,000 fund has been bequeathed to the Institute in memory of William F. J. Moore, late instructor in Chemistry.

PRINT ONE STAGE OF SENIOR SUPERHEATER

As an official announcement of the recognition of Field Day, the freshman superheater made its appearance today on the Avenue of Science, on the east side of the building. The piece, from the summit of the dome, was lowered to a point 30 feet above the ground.

INSTITUTE COMMITTEE TAKES MEASURES TO CONTROL FIELD DAY

NOTED SCIENTISTS TO GATHER HERE

Erthquake! To Be Discussed At Seismological Society Meeting Next Week

Erthquake, earth and effect, from violent tremors that only the earth fails to rise, will be discussed by the members of the Seismological Society at a meeting of the section of the American Geophysical Union at the Massachusetts Institute of Technology next week.

REMEDY SUGGESTED BY SUB-COMMITTEE IN LENTHY REPORT

Would Forbid Demonstrations Outside of Institute

CONTROL LOWER CLASSES

At the Institute Committee meeting yesterday afternoon, the report of the Committee on Student Government was presented. The report of the administration, which was received by the committee, consisted of the following names: B. R. H. H., Z. S. L., L. S. B., and B. H. D. The report of the committee was then approved by the committee, and the report of the administration was received by the committee.

BOOK COLLECTION IS DONATED TO LIBRARY

A collection of books, the gift of the late Mr. W. H. B., has been presented to the Institute Library by the late Mr. H. B. B., of the Institute.

REMEMBER THE INSTITUTE COMMITTEE AND ITS DUTIES

This committee is the backbone of the institute, and its members are the key to the operation of the institute. They are the ones who make the decisions that affect the daily life of the institute. They are the ones who keep the institute running smoothly. They are the ones who make sure that the institute is a success.

HISTORICAL NOTES

The Institute Committee was founded on April 29, 1827, with the purpose of promoting the advancement of science and the arts. The committee was composed of seven members, including John Quincy Adams and John Harvard. The committee was charged with the responsibility of overseeing the operations of the institute, and it remained active until 1837, when it was dissolved due to lack of funds. The committee was then reconstituted in 1839, and it remained active until the present day.

College Head Hits Professionalism Existent in American College Sport

Says He Would Rather Publicly Admit Amount Paid Each Star Athlete

"If American colleges will not live up to their high ideals, which they profess, or publicly adopt in the case of their students, then I submit that no college that does not live up to their ideals risks the chance to take part in future athletic activities." This was the statement of Mr. W. A. Benjamin, President of the Institute, at the recent meeting of the Institute Committee. (See page 4.)

FIELD DAY MINUS THE "RIOT"

The regular meeting of the Institute Committee held last evening the complete report of the Field Day Committee was accepted along with each of the four separate resolutions which were made as a result of the riot. The object of the Committee in proposing these resolutions was to solve the problems of undergraduate conduct in regard to Field Day, and to continue the progress of the day to certain events which under control could be erected.

This action was taken by the Institute Committee because they realized that the undergraduate governing body was responsible for the conduct of all student gatherings such as Field Day. In the past, it is true, athletic events of the Day have been under student control, but there has not been a governing body with sufficient power to successfully control the additional off-campus enthusiasm which has brought only discredit to the Institute.

This action was taken by the Institute Committee because they realized that the undergraduate governing body was responsible for the conduct of all student gatherings such as Field Day. In the past, it is true, athletic events of the Day have been under student control, but there has not been a governing body with sufficient power to successfully control the additional off-campus enthusiasm which has brought only discredit to the Institute.

The acceptance of the recommendations included in the Field Day Committee report of the Institute Day Committee is thus essential. First, it limits the time of the official program. Second, it sets up a governing committee with power absolute and responsibility. Third, it places the conduct of all the affairs of the two lower classes of the opening of the school to the final examinations in the hands of this governing committee. And finally, it requires the President of the Institute to render these offenders who give insufficient explanation and put them personally liable for any damage they cause.

Congratulations are due the Field Day Committee for a splendid job of work. It is the belief of the Institute Committee that they have drawn the line of responsibility within which they have power and influence, and that this line is well delineated, including student concerning his personal welfare. This committee has wisely chosen to leave to the new Field Day Committee to determine the job of registration. The additional official events Field Day shall have—events which shall serve as "keeps" for undergraduate participation—will be determined by the Institute Committee.

THE TECH takes this opportunity to welcome suggestions from its readers as to what the nature of these events shall be.
Seven Cardinal and Gray Runners Will Compete In Track Classic Tomorrow

After running time trials to determine the men who will compose the Cardinal and Gray one-mile relay team, last Wednesday, Coach Oscar Heidt has announced that the following men will take the baton at the Penn Relays: Jack Hallahan, Marshall Ryan, A. Smith, and Cy Meagher. Individual entries from Technology are Captain Cy Meagher and the hardhurld Jack Waile in the broad jump and J. A. McCarthey in the javelin throw.

The Central Institute man to compete will be Steinhommer who runs in the preliminary today. There is a very large entry list, over fifty men, in the hurdles, and it will probably be necessary to run quite a few heats. The first tomorrow will bring together in the middle distance an equal number of runners from the East and the West. The squad has shown and is confident that the Cardinal and Gray aggregation has an equal chance of taking a place.

Captain Hallahan has been striving to build up his team for the meet this spring, and so far has had but two practice sessions. The first was held last week, and the second on Wednesday at the Harvard Traffic Training Station. The squad, however, has been working out at the University track recently with the Harvard men and they are quite solid and dependable. The boys have been using the track for the finishing of the spring meet, and are in excellent condition for the big competition which they will meet next Tuesday.

Left to Right: Jack Hallahan, Hank Steinhommer, Ken Smith, and Cy Meagher.

The mile relay team is composed of four freshmen, three of whom are Yale graduates and the three others are Harvard graduates. The team is selected by Bill Haines, who has been Actung Captain for the team since the start of the season. However, Coach Smith is very satisfied with the team as it now is, since it has improved in skill and speed since the start of the season.

Tennis Team Will Oppose Columbia In Match Today

Engineers Journey to Stevens Institute for Second Meet Of Season

Meeting Columbia today in the tennis team's first meet of the season, Technology will be represented by H. C. Black '27, playing on the Varsity for the third season. He has had plenty of experience and proved a steady player. Last season he played at number one and two positions and represented Technology in the New England doubles with Peck as his partner.

Hold the other experienced man on the team first played with the Varsity last year. Competing in positions four and five he made an excellent showing and won the majority of his matches. Roosevelt and De and the other two men, are both strong players. Day, the runner-up in the fall tournament, should play in one of the posts in this year's season's success. He would not mind playing anywhere, but he does not want his time spent for his connection's interest.

Tacking two fast teams onto the No. 1, the No. 1 is on Thursday and the No. 2 on Tuesday. The Varsity played Columbia today. The Varsity Institute of Technology is unknown today. From those played at both teams for strength the Engineers should make a very creditable showing.

What to see in BRITAIN

When you travel through Britain on the London and North Eastern Railway you explore some of the most historic and romantic spots in all Europe. Over this historic highway lie the ancient cities of Ely, Lincoln, Norwich, York, Edinburgh and many old-world towns embellished in romance and legend. Added to the attractions of natural beauty and such places are literary and historical associations, mighty castles and lovely hamlets famous in American lore.

You will understand and be better understood in England and Scotland than anywhere else in Europe. You can play the popular games of the world famous courses at St. Andrews and the other links in the land of the game.

In addition to the "Flying Scotsman," the famous express between London and Edinburgh, there are fast and frequent trains to all the important points of interest.

LONDON & NORTH EASTERN RAILWAY

The MATH CLUB will hold its regular meeting this afternoon at 1 o'clock in room 2176.

RICHARDS CUP RACE will be on May 18

On May 18 the annual Richards Cup race will take place. This event is for class crews and must not include any of the members of the regular varsity crew. The first 1st pound will receive the Richards Cup, the second place winner will receive a silver trophy, and the third place winner will receive a bronze trophy. The winners will receive their numerals and bronze medals emblematic of victory in all their classes.

The Math Club will hold its regular meeting this afternoon at 1 o'clock in room 2176.
