

410 SENIORS TO RECEIVE DIPLOMAS TODAY PRESIDENT WILL AWARD TWENTY SPECIAL HONORS

AWARD TRAVELING FELLOWSHIPS TO THREE STUDENTS

Fifteen Resident Fellows Will Also Be Created For Research Here

AWARDS BY PRESIDENT

Announcement of the more notable scholastic honors will be made today by President Samuel W. Stratton at the Commencement Exercises in Du Pont Court.

Travelling fellowships for study abroad will be awarded to three students in recognition of high scholastic attainments, John B. Drisko '27, in Hydraulic Engineering; Robert C. Dean '26, in Architecture; and Eli Lurie, Research Associate in the Department of Chemistry, recipient of the newly created Moore fellowship.

Frank Massa '27, who recently delivered a paper at the Student Convention of the Northeastern District, American Institute of Electrical Engineers, will be awarded a Gerard Swope Fellowship of \$1000 as the Honor Group student with the highest record of the Seniors in the Electrical Engineering course. Elwood A. Church '27 will receive the second award of \$500. In the Department of Physics, the fellowship of \$1000 will be received by David G. C. Luck '27.

Automotive Engineering fellowships will be received by the following students pursuing fundamental researches in this field, Charles S. Stark '26; Harold Heins '27; Victor C. Smith, Research Assistant, Department of Chemical Engineering; and Augustus R. Rogowski, Sheffield Scientific School, Yale '27.

Rotch Prizes for the best academic record throughout the four years' course in Architecture and for the best record of a special student in Architecture are to be given Ira D. Beals '27 and Thomas H. Dreihls '27 respectively.

Other resident fellowships to be awarded to graduate students pursuing Courses leading to the Doctor's or Master's degree in recognition of high scholarship and ability to carry on research are: Julian Werner Hill, Susan H. Swett Fellowship; Robert Jewell Horn, Fuel & Gas Engineering Fellowship; Ralph Blake Johnson, Verges Fellowship; Hans Oskar Kundt, Edward Austen Fellowship; Campbell Rogers McCullough, James Savage Fellowship; William Joseph Sweeney, Du Pont Fellowship; Ralph Francis Tefft, Richard Saltonstall Fellowship; and William Albert Zisman, Malcolm Cotton Brown Fellowship.

Was First Marshall At Class Day Exercises

Raymond F. Hibbert '27

Requests Promptness In Arriving at Prom

An especial request to the men who are to attend the Senior Prom tonight was made by Raymond F. Hibbert, First Marshal of the Senior Class. He said, PLEASE ARRIVE ON TIME!! The Prom will start promptly at 9:30 o'clock in the Grand Ball Room of the Copley-Plaza Hotel. Hibbert stressed very emphatically the necessity of arriving early, as the first course of the supper will be served very shortly after 9:30, and it may embarrass the girl to miss half her supper by procrastination and tardiness on the part of the gentleman alumnus.

Made Presentation Of Class Gift to M. I. T.

James A. Lyles
Senior Class President

WILL AWARD 163 HIGHER DEGREES TO GRADUATE MEN

President Stratton and Faculty To Head Procession In Great Court

ALDRED TO ADDRESS MEN

With a simple yet dignified ceremony, in accordance with the traditions of the Institute, 573 degrees will be awarded at the Graduation Exercises in DuPont Court this afternoon at 2:30 o'clock. Of this number, 410 are those of Bachelor of Science, awarded to members of the Class of 1927.

Of the 163 higher degrees which will be awarded today are eight Doctors of Philosophy, four Doctors of Science, one Doctor of Public Health, six Masters in Architecture, 31 Masters of Science and Bachelors of Science, in Course VI-A, 114 Masters of Science, and one Certificate of Public Health.

Perhaps the best-known candidate for a Doctor's degree is Gleason W. Kenrick, who has been an instructor in the Electrical Engineering Department since 1924. He has been known to Course VI men chiefly as the composer of baffling and heart-breaking problem sections in the course in Principles of Electrical Engineering. Mr. Kenrick has presented to the faculty a thesis for the Degree of Doctor of Science in Mathematics, entitled "A New Method of Periodogram Analysis, with Illustrative Examples."

Stratton Heads Procession

Heading the academic procession around the Great Court to DuPont Court will be President Samuel W. Stratton, accompanied by the commencement speaker, John E. Aldred, who is the founder of the lecture series at the Institute which bears his name. Following these two dignitaries will be Bishop Lawrence, Major General Preston Brown, the members of the Faculty, and then the Candidates for degrees, with the Doctors of Philosophy at the head, and the Bachelors of Science at the rear of the line.

The Right Reverend William Lawrence, Bishop of the Protestant Episcopal Diocese of Massachusetts, will open the exercises with an invocation, following which the address to the graduates will be given by Mr. John E. Aldred. The subject of this talk has not been definitely announced, but it is known that he will discuss certain practical aspects of engineering, and the every-day problems which confront the technical man of today. This address will be in keeping with the practical nature of the Aldred Lectures which have been given at the Institute since 1923.

Major General Preston Brown, commanding the First Corps Area will address the graduates. (Continued on Page 4)

Alumni Will See Talking Movie of Technology Life

Sounds as well as the familiar scenes of college life were faithfully recorded on a strip of film at Massachusetts Institute of Technology June 1 in what is believed to be the first talking moving picture of its kind ever taken. This combination process of filming and sound recording has been developed by the Fox Film Corporation and the Western Electric Company.

The first showing of this new idea in talking moving pictures, which will take their college to thousands who cannot come to it, will be at the All-Technology Convention and Reunion in New York on June 10 and 11.

Dr. Samuel W. Stratton, President of Technology, was filmed at his home on Charles River Drive with members of the faculty as they moved about, talking of affairs of the Institute which would interest former students.

Colorful scenes of student life were taken in the dormitories, class rooms, on the campus, and at the boat house where Coach "Bill" Haines had his crew carry out their shells and row away while he gave instructions.

The Glee Club sang while the camera clicked, and members of the cast of the recent Tech Show staged some of the popular scenes of the play and sang the song hit.

One of the most interesting events filmed was the welcome of the Alumni Association to the Class of 1927. There were brief speeches of presentation and acceptance from the president of the Alumni Association and the president of the senior class, who received the class banner from representatives of the alumni body.

Elaborate Program For 1927 Alumni Convention Surpasses Past Events

To Show Talking Pictures And Radio Newspaper At The Final Banquet

A record attendance of the Class of 1927 is expected to be present at the National All-Technology Convention and Reunion to be held this Friday and Saturday at the Waldorf-Astoria in New York, it has been announced by the Alumni secretary-treasurer, Orville B. Denison '11, where their initiation into the alumni ranks will take place amid a great deal of merriment and activity.

Modern Institute activities and proposed future activities will be the subject of Friday morning and afternoon sessions of the Technology Clubs Association. Dr. Samuel W. Stratton, president of the Institute, James P. Munroe '32, secretary of the M. I. T. Corporation, Professor Samuel C. Prescott '94, the newly elected president of the Alumni Association; Gerard Swope '95, President of the General Electric Company, and Isaac W. Litchfield '85 will be the

main speakers at the gatherings today, and will present to the alumni vivid pictures of Technology today and the Technology of tomorrow. Of especial interest and probably the most important subject that will be discussed at the Convention is that of the National Technology Center. Friday night, alumni and their wives will indulge in an old-time lovers excursion when they leave at 6:15 o'clock on the "Chauncey M. Depew" from the Hudson River Day Line pier at the foot of West 42 street, North River, for a twilight trip up the Hudson. Supper will be served on board soon after the steamer shoves off from the pier. Music, dancing, a bridge tournament and other entertainments will be on tap for the entire evening up to the hour the boat docks, at 10:45 o'clock. Those who are safe from becoming moon struck during the trip will no doubt be overcome by the spectacular view from the steamer of the Palisades at twilight and, later, by the skyline of New York City and New York Harbor at night. As the New York committee says in its program. (Continued on Page 3)

INCOMING CLASS TO BE REGULATED

Primary Purpose is Promotion Of Class Spirit Among New Freshmen

Next year's freshmen at Technology will experience the newly drawn up freshmen regulations. These have been originated and revised by the combined action of the Institute Committee and the Rules Committees of the class of 1930. Their primary purpose is to promote class spirit among the incoming first year men. This action marks a new step in Technology life and is expected to improve and strengthen undergraduate relations. The rules are as follows:

1. All freshmen should wear regulation ties, four-in-hand, with cardinal and gray stripes. These should be worn when on the Institute grounds from the day classes begin until the beginning of Junior Week. These ties are to be sold on registration day by the Freshman Rules Committee, and after that by the Coop.
2. Freshmen are expected to speak to all members of the faculty and to tip their hats to the President of the Institute and the Dean.
3. Freshmen are expected to say "Hello" to all students they meet on the Institute grounds.
4. Freshmen should not loiter around the Main Lobby, or sit on the benches in the Lobby. If the freshmen win Field Day, this restriction shall be abandoned.

Rules Committee Formed

5. Administration of the above rules shall be delegated to a Freshman Rules Committee which shall consist of the vice-president of the Institute Committee as ex-officio chairman; two Juniors, one of whom shall be the president of the Junior Class; four Sophomores one of whom shall be the president of the Sophomore Class; two freshman section leaders. The Junior and three Sophomores shall be appointed by the vice-president of the Institute Committee, the presidents of the Sophomore and Junior Classes subject to the ratification of the Institute Committee.

6. When an upper-classman or a freshman sees another freshman violate the above rules, he shall immediately inform the Freshman Rules Committee by dropping a card or a slip of paper in an Institute mail box, stating the rule violated, and the date of violation. When four violations have been reported against one freshman, he shall be sent a summons to appear before the Committee.

7. Enforcement of the rules is at the discretion of the Freshman Rules Committee.

Stratton Appointed To Sacco-Vanzetti Board

President Samuel W. Stratton has recently been appointed a member of a committee which will advise Governor Alvan T. Fuller in his course of action in the Sacco-Vanzetti case, it was announced a few days ago by the metropolitan press. The President is one of a committee of three appointed, the others being President A. Lawrence Lowell of Harvard and Judge Robert Grant.

It was stated at Dr. Stratton's office that this appointment was very reluctantly accepted, for not only has the President not had experience with criminal law procedure, but he has not been following the case at all in the newspapers. It is thought by some that this very fact may result in an entirely unbiased review of the case, which might not be possible had he followed the case closely.

Graduation Exercises

2:30 P. M.

DuPont Court

CEREMONIAL PARADE
Music, 101st Engineers Band.

GRADUATION EXERCISES
Invocation, Right Reverend William Lawrence, D.D.
Address to the Graduating Class, Mr. John E. Aldred.
Music.

Address, and Administration of the Oath of Office in the Officers' Reserve Corps. (Those not taking the oath of office are requested to remain seated.)
Major General Preston Brown, Commanding First Corps Area.

Announcement of Honors and Presentation of Degrees and Commissions. Samuel Wesley Stratton, Ph.D., D.Sc., LL.D., President, Massachusetts Institute of Technology.

BON VOYAGE!

THIS afternoon your Class of 1927 passes from undergraduate life into the world of business and industry as a new alumni unit of Technology. You have today achieved the aim toward which you so humbly directed your efforts as freshmen four years ago when you first began to study the mysteries of Physics, Chemistry, Mathematics and English. We who still remain students are proud of you and we look to you for big accomplishments in years to come.

Next fall we shall miss your familiar faces in the corridors and in the activity offices. Your places have been hard to fill, and we want you to realize that we as your juniors appreciate the work you have done—in a scholastic way and for the betterment of Technology.

You are going out on a new voyage and it is not going to be an easy one. The degree which you receive today and which you have striven toward for four years may not mean a great deal on this voyage of yours. We want you to be proud that you are Technology men, that you have studied the scientific method of thinking and working, because we believe this training will be of supreme value to you in the world of industry. Yet at the same time we feel that it is an obligation of yours that you do not be too boastful of your accomplishments. Recently a certain employer was asked his opinion of Technology men and he replied: "I think they are fine engineers, but they are especially valuable after they have been out of school about two years, for by that time they have forgotten to boast about their alma mater."

Congratulations, 1927, on your scholastic success—your preparations and training are now complete for your journey through life, and we wish you Bon Voyage!

OUR PARENTS MAKE COLLEGE BRED

LAST year at a graduation banquet of a large mid-western university, to which parents of the Senior Class were invited, the class president was called upon to make a speech to the parents who had made possible the commencement of his class. In concluding his talk he said: "You see us tonight as graduates of this great institution, but we want you to know that we realize that it is you who have made our graduation a reality, for the dough which you have supplied for our four year loaf has now been baked into college bred."

We are certain that the four year period of loafing does in no way apply to the rigid curriculum requirements which Technology sets before its undergraduates, yet at the same time we feel that we owe our parents a great deal more for their assistance without which it would have been impossible for most of us to even start our classwork. To you parents who are here today we wish to extend our note of thankfulness for what you have done. Through your efforts a new group of embryo engineers has been given to the world to increase its knowledge, help build its buildings and bridges and further enlarge its arteries of trade and transportation.

1927 AT THE NEW YORK CONVENTION

THE graduating class this year is afforded a most unusual opportunity because of the fact that the National Technology Convention is being held on Friday and Saturday of this week. This convention is being sponsored by the Technology Clubs Associated and will be held at the Waldorf-Astoria Hotel in New York City.

Thomas C. Desmond '09, President of the Clubs, has requested that we convey to the Class of 1927 a blanket invitation to attend the convention en masse. A rough schedule of the convention events for the two days includes Friday morning and afternoon business and discussion sessions, Friday noon club and fraternity luncheons, and in the evening a boat trip on the Hudson on a specially chartered steamer with a picnic supper, smokes, and dancing. Saturday morning and afternoon are to be spent viewing the points of engineering interest in and around New York City, with the final closing banquet on Saturday night.

The Lounger notices with much glee the brave attempts which Major Smith and his army have made to promote the rapid growth of some grass on the newly graded portion of the Great Court in time for Commencement. A recent rumor stated that Bursar Ford had made a fairly large wager (for him) that grass could be grown on the area in five days. The Lounger wishes now that he had been around to take up the wager because the Major has already nursed the plot for over a week and nary a blade has yet appeared.

There is one thing about the system of things around the Institute which gives the Lounger a sincere

pain!!! That thing is the way in which the records office delights in keeping the secret of graduation from the seniors until the very last minute. Before press time yesterday the Lounger was talking with several seniors who at that late date had not been informed whether they were going to graduate or not, and that is the day before commencement with ar-

rangements made, parents coming, cap and gown bought, and invitations sent out. There may be excuses for this condition but there are certainly remedies for it as well.

The Lounger feels certain that the Commencement exercises could be pepped up considerably were they to be held at Pemberton. (?)

STEINBRENNER HAS BRILLIANT SEASON

Once again Technology has produced a nationally famous athletic star, this time it being in the person of lengthy Hank Steinbrenner, captain of the 1927 Institute track team. Hank has just brought to a fitting climax his Senior year by carrying off the National I. C. A. A. A. low hurdle title in the recent games at the Penn Stadium.

M. I. T.'s track team was literally built about Steinbrenner. Tracing his record throughout the season, he is by far the leading scorer on the squad. While 10 points is considered unusually good for an individual to account for on the cinders, the Cardinal and Gray leader surpassed even this mark by winning both hurdle events as well as the 220 yard dash in the dual meet with Holy Cross.

Hank started off the outdoor season well by walking off with first places in the high and low hurdles in the Harvard meet. Shortly after this at the Penn relays he led the field in a special 120 yard hurdle race. At Cornell he won the low hurdles easily but met his first defeat in topping the high timbers by losing to Caruthers. He outdistanced all opponents in the New Englands winning both of his favorite events and taking 2-5 seconds off the old record in the low hurdles.

Rules at the University of Cape-town, South Africa, require all freshmen to wear stiff collars three inches high with bright green ribbons for ties. And they must bow when passing upperclassmen.

Alumni Reunion This Week Will Eclipse All the Previous Functions

(Continued from Page 1)

"You and your wife will remember this delightful Technology summer evening on the water for the rest of your lives. It is rumored that a number of recent New York debutantes will be on board and the younger and any older Technology graduates who are still susceptible are advised to think twice before attending this particular convention event."

A quiet summer evening will be followed by a busy morning and afternoon on Saturday. In the morning an excursion will leave the Waldorf-Astoria at 9:30 for a conducted trip through several sections of the new Eighth Avenue Subway now under construction. A party of those planning to make this tour, will assemble at the Board of Transportation office, Central Park West between 63rd and 64th Streets at 10 o'clock. Another excursion will also be made to the New York Stock Exchange on Broad and Wall Streets where a complete explanation of the operation of a stock exchange will be given the visitors by Mr. Jason Westerfield, Director of Publicity of the New York Stock Exchange. In the afternoon, a party will leave the Waldorf-Astoria at 2:30 o'clock for an inspection trip to two New York Edison electric generating stations at Hell Gate, 134th and Locust Streets and East River.

As a fitting climax to an All-Technology Convention that will go down in Technology Alumni history as one of the best, the closing banquet Saturday night will not only bring together in one room notable alumni but also greeting "flashes" from alumni all over the world who are unable to attend. With the aid of Richard H. Ranger '11, inventor of radio photography, and with the co-operation of the foreign correspondents of the New York Times, a continuous "M. I. T.

Radio Newspaper" will be published at the dinner which will picture on three large screens photographic news and interviews with world celebrities radioed from London, Paris and other European capitals. This unique scientific demonstration, never attempted before on such a grand scale before the public, will focus in the dining hall of the Waldorf-Astoria messages from all over the globe. It is expected that this feat will rival, if not exceed, the brilliance and magnitude of the Phantom Radio of last year.

Alumni will refresh their memories quite a bit when they view and hear the talking moving pictures taken at the Institute last week especially for the Convention. These will be shown following the "radio newspaper" and will bring to those gathered at the dinner a faithful telescopic photograph of

colorful scenes of student life in classrooms, in the dormitories and on the campus.

INSURANCE OF ALL KINDS

A Cordial, Friendly Car Rental Service

YOU'LL find it a genuine pleasure to rent a car at this friendly institution. Our desire is to see you on the road in the car of your choice without loss of time, red tape or annoying questions.

You rent a car here whenever you want one, days, evenings or week-ends. And the cost is so reasonable—the convenience so great—that we know you'll find many uses for our cars.

You drive. You use our cars exactly as you would your own. And you're welcome to the use of a car either for a few miles of driving, a trip of an hour or two, a day, a week, or a month.

The only requirement is that you be qualified and competent to drive a car. That is all.

Going somewhere tonight or this week-end? Add pleasure to the occasion. Go in one of our cars. You'll like the service.

Ride in Groups and Split the Cost

It costs no more for five to ride in one of our cars. Plan a trip with three or four others—divide the bill—and the cost to each is so small you'll never miss it.

YOU
The Graduating Seniors
Are facing the question
of
"WHAT TO DO
NEXT"

Some of you are well fixed; you have a family business to work with. It will be to your interest to think about the new development, Group Insurance, which will be a factor of increasing importance in the relations of your business to its employees.

Some of you have a decided bent, and are going to follow it. One way of making sure that you will finish the course of life you have chosen is to take advantage of Annuity, Endowment, and Straight Life Insurance.

Some of you have worked for your education and must earn as much money as you can, as quickly as possible. The selling of Life Insurance gives the most and quickest return for hard work; it also offers the greatest freedom for original enterprise. It is not a push-button job. The John Hancock is looking for men like you and would like to hear from you.

Write to us in regard to any of these points. We shall answer your inquiries without any obligation to you. Address the INQUIRY BUREAU.

John Hancock
LIFE INSURANCE COMPANY
OF BOSTON, MASSACHUSETTS

197 Clarendon St., Boston, Mass.

If your policy bears the name John Hancock, it is safe and secure in every way.

PRESIDENT STRATTON TO ANNOUNCE HONORS

(Continued from Page 1)

dress the gathering, particularly the candidates for commissions in the Officers' Reserve Corps. The administration of the oath of office by the General to the men who have fulfilled the requirements for the Officers Reserve Corps will then take place.

Then, as the final event on the program, President Samuel W. Stratton will announce the academic honors which will be bestowed and will award the 573 degrees to the successful candidates, as well as 96 degrees which were awarded in January. Following this there will be a reception at Walker Memorial; for the members of the graduating class, recipients of higher degrees, and their friends. This will conclude the official sendoff to the men who have completed their requirements at the Institute.

SENIORS CELEBRATE FINISH OF STUDIES

(Continued from Page 1)

the occasion of much applause and merriment on the part of the graduating students and their friends. Music, was furnished by the Boston Symphony Orchestra with Alfredo Cassella conducting.

During the second intermission Samuel C. Prescott '94, president of the Technology Alumni Association, Orville B. Denison '11, James A. Lyles, the Senior Class president, and John D. Crawford '27 all came on the stage wearing comic hats. At this time, Prescott presented the class banner to Lyles, but due to the uproar created by the crowd, their speeches were all but inaudible. Following that, the Saxophone Quintet of the Musical Clubs took the stage, and rendered a few selections. While this was going on the Committee in charge had been passing around circus hats, huge paper ties, streamers, and balloons to the audience, and in a short time the affair was turned into masquerade party.

At the conclusion of the program, David A. Shepard '26 led the singing, which was followed by a performance by "Denny," and concluded by the Stein Song.

On Saturday night, the Seniors assembled at the University Club to partake of the class banquet planned for that evening. It was an extremely informal affair even down to the occasional tossing about of rolls. As the speaker of the banquet, professor Robert E. Rogers gave one of his humorous talks.

The baccalaureate service was held in Trinity Church on Sunday afternoon, the sermon being preached by Bishop Slattery of Massachusetts. The building was crowded due to the large number who were eager to hear Bishop Slattery's first sermon since his recent appointment to the Bisophric.

Class Day exercises yesterday morning were opened in the Main Dining Hall of Walker when James A. Lyles as master of ceremonies welcomed the parents of the men to the affair. To begin the program, the class history was given by Raymond F. Hibbert '27, the first marshal. Following this some class gossip was given by Hunter Rouse '29, a ventriloquist, or rather by his puppet "Reginald." The address to the class was delivered by Professor Harry W. Tyler, head of the Mathematics Department. The last event was the presentation of the class endowment gift to the Institute by the Senior president, Lyles. Dr. Samuel W. Stratton accepted the gift for Technology. According to custom, the singing of the Stein Song formally concluded the exercises.

Walker again buzzed with activity that afternoon when the Tea Dance was going on in North Hall. The place was filled to overflowing and, as the couples swayed to the music of the Tunesters, there were many complaints about the heat.

The Coop Technology Branch

A prime favorite on the campus

IN ANY group of regular fellows, you'll find Prince Albert. It belongs. It speaks the language. You get what we mean the minute you tamp a load of this wonderful tobacco into the bowl of your jimmy-pipe and make fire with a match.

Cool as a northeast bedroom. Sweet as a note from the Girl of Girls. Fragrant as a woodland trail. Prince Albert never bites your tongue or parches your throat, no matter how fast you feed it. You'll smoke pipe-load on pipe-load with never a regret.

Buy a tidy red tin of P. A. today. Throw back the hinged lid and breathe deeply of that real tobacco aroma. Then . . . tuck a neat wad into the business-end of your jimmy-pipe and light up. Now you have it . . . that taste! That's Prince Albert, Fellows!

P. A. is sold everywhere in tidy red tins, pound and half-pound tin humidors, and pound crystal-glass humidors with sponge-moistener top. And always with every bit of bite and parch removed by the Prince Albert process.

PRINCE ALBERT

—no other tobacco is like it!

WHERE YOU FIND GROWTH AND EXPANSION THERE YOU FIND OPPORTUNITY

The great organization of Remington Rand, Inc., compassing practically the entire field of office systems and appliances, presents tremendous possibilities for young men from 22 years of age who are mature in mind and are willing to learn and to work. To such men is offered a training period of seven to nine months, including a month or more of resident school instruction. There is a salary during the training period, which is continued and progressively increased if increasing ability is demonstrated.

Remington Rand representatives are engaged in the highest type of sales work. They are daily meeting the executives and business administrators of the great organizations of the world. They are devising and installing office systems for handling and protecting records in every department of every business.

You must decide soon where opportunity lies. We know that there is great opportunity here.

We'll be glad to explain it to you, if you'll write to us.
