Two Hundred Men To Be Housed In New Dorm Units

9000,000 Building Program May Be Completed By Spring of Next Year

FRESHMEN MUST WEAR TIES OF CARDINAL AND GRAY TOMORROW ON PAIN OF BEING REPORTED

A Complimentary Issue

THE first, second, and third issues of THE TECH will be distributed free to the undergraduates and will begin today in real time for the first time. The paper will be available on Friday morning.

Subscriptions will be on sale in the main lobby and at the business office, room 302 Walker Memorial, beginning Monday and continuing through all of next week. The price is $2.50. As single copies sell for five cents each, there will be 92 issues throughout the year for $2.10 by subscribing NOW. SUBSCRIBE AT ONCE.

FRESHMEN THROW SOPHIS IN WATER

Discussions At Freshmen Camp Help New Men Become Acclimated

With the cold water of Little Lake as their baptism the Class of 1931 first blood in Technological's annual Sophomores-Freshmen tryout morning when they arose from the furnaces some of which are already working.

Robert S. Jones, '28, business man, and Richard Homberg, the Tech's Sophomore first objective but his Sophomore Tent is the leading player for the first time the Dormitory Club, and Theodore A. Denny Talks on Hormone and the proposed quadrangle, the construction of which will be known as the Richard Homberg Infirmary.

Can You Keep All Three of Them Going?

T.E.N. BY OCTOBER FIFTEENTH

"Hey look! Where's your tie?" will be a common question heard on the Tech steps as the freshmen report to classes this morning. The first tie will be worn in the dormitories tomorrow.

All freshmen will begin wearing ties tomorrow, the 26th of September, year 1927. This innovation comes as the result of persistent work on the part of the Student Council and the President's Office.

Rules Committee Formed

The above rules shall be delegated to a freshmen Rules Committee which shall consist of the four presidents of the four fraternities, the four presidents of the Sophomore and Junior classes, and the four presidents of the Sophomore and Junior classes subject to the ratification of the Institute Committee.

1. When an upperclassman or a freshman, even under the best of conditions, fails to follow the rules, he is guilty of violation. When four violations have been committed, he is considered a Freshman and shall be sent to a conference with the President. If the conference is not successful, he shall be expelled from the College.

2. Enforcement of the rules is through the Freshmen Rules Committee.

CALENDAR

September, 26th

Regulations for Freshmen, College and Freshmen, room 302.

September 27th

Freshmen rules go into effect.

September 28th

The TECH meets morning, Walker Memorial, 3:00.

October, 3rd

Freshman football game, Boston College.

October 10th

Freshman football game, Tufts College.

October 17th

Freshman football game, Harvard.
FRESHMAN RULES

WE HAVE heard a great deal of favorable comment from both freshman and upperclassman relative to the new freshman rules which go into effect tomorrow. A number of new measures are expressed in sincere opinion that such rules are just what we need here at the Institute to pep things up a little and to help remove the "big white factory" idea which has often been expressed in the past.

It would not be much to expect that the rules would be completely successful in their first year, but at the same time we can lay a very good foundation this year for years to come. If the new men are not interested, there is no question that they will be of very definite value. The prime purpose of the rules is to create a real school spirit, which we cannot have without a school technology. Spirit has suffered often in the past because many of its students have looked upon their undergraduate years with a sort of bargain counter attitude, but those years, which should have been the best four years of their lives, they have been satisfied to exchange time, money and hours of study for only a diploma and the knowledge of certain scientific facts. True, this is our prime purpose for being here and our vocation for the present, but there is a very noticeable lack of interest in the undergraduate activities which we have.

The freshmen were formulated with these things paramount in the minds of the committees. They tried to draw up the regulations in such a way as to increase undergraduate spirit, especially in the absence of imposing class, and the first year men in a humiliating manner. Their plan may require some changes, but the biggest thing it needs now is a strong backing by the upperclassmen in order that its merits may be tried out. We believe that the Classes of 1938, 1939, and 1940 have a big opportunity to cultivate the undergraduate atmosphere around the Institute.

THE LIGHT OF PROGRESS

THAT a university's understanding of progress may be judged accurately by its building program has long been a recognized fact. Without expansion and development a school will soon become a relic of past generations, useless in such a period of advance as now exists, for it is only with constant change that an institution of higher learning can keep pace with the times.

M. I. T. has for years been recognized as the best the country can offer in the way of technical education, and it is through such progress that the Institute continues to hold its own. This fact impressing students are greeted with three large projects already well under way, with good promise of being ready from the school year.

The two new dormitory sections are but a part of the final quadrangle that will take care of eight hundred students, thus enabling essentially one of Technology's first-class of its kind. Men will no longer be required to room in various parts of College and "brown-bag" back and forth to school each day, but will have instead a greater opportunity to live and study in the dormitory.

In the Guggenheim Aeronautical building Technology is developing one of the laboratories in the country to be devoted to the latest in aeronautics and engineering science. The interest already shown in Course XVI promises well for the future of the project since a number of the students who did not "brown-bag" have expressed interest in the courses. Many of the students have expressed interest in the courses. Many of the students have already devoted their spare time to the project and others are planning to do so.

**BIG MASS MEETING TO OPEN M.I.T. CREW SEASON**

**HILL AND DALERS WILL BEGIN WORK AT ONCE**

---

**Drives Start for Varsity Oarsmen as Season Opens**

Technology's rowing season breaks away to a real start today with the opening of the annual fall campaign for crew. The crew drive will reach its high peak on Wednesday, when a monster mass meeting will be held in Room 5-370 at Cambridge Hall. Ernest Knight and Manager Thomas will head the list of speakers for this meeting. A booth will be maintained in the Main Lobby on Tuesday, Wednesday, and Thursday of this week, and all experienced oarsmen and likely looking newcomers will be singled out and urged to report to the boathouse for full practice.

**Prospects Good**

Prospects for the coming Spring season are brighter than at any time since Technology boasted of a crew. Of last year's Varsity eight, which defeated Princeton and Penn, Titman, Kelsey, Halm, King, and Abbott are back to take their old seats in this year's boat. Coach Bill Haines will have more experienced men to draw from to fill out his Varsity boat as last year's Hammond and Tupper are not returning this Fall, but there are several promising men from last year's Freshman crew who will probably make good. But the performance of two seasons ago of winning the Boston Inter-Collegiate championship at only George Copicadale will be missed, however, in this year. Newman, Jameson, Keating, Conklin, Halm, Hals, and Chuck Ewell will be eligible for this year's crew. The Peak, 1926, eight, will probably be returned intact and will be set fighting for another championship.

**More Men Eligible**

More from the impossible crew crew when posted for a month during the spring will be eligible this year for the competition and Coach Haines expects to make a choice at least from most of them. Coach Haines and his assistants will devote their personal attention to this crew to make and improve on the chances of a good crew to compete. Previous records are not a bar to good choice for some of those men who have not been Tech oarsmen for some time ago. This will give an opportunity to place on one side the question of whether possible improvement to the boathouse is answer to this crew's call.

**Bright Outlook for This Year's Hill and Dalers**

Many Varsity Veterans and All of Last Fall's Frosh Team AreReturning

**TO PRACTICE THIS WEEK**

With Oscar Hedlund, track and cross country coach back at the Institute today, it is expected that things will begin to liven up at the track house very soon. Cross country running is the first major sport of the season to get under way and as a result all candidates for either the Freshman or Varsity team will be expected to report on Tech Field early this week.

This season the Cardinal and Grey have an unusually strong squad of hill and dalers. There will be at least seventeen returnees returning from last year's team. Peter Kivlin, captain of the last year's team, will now have enough men on sidings to lead him to a championship Tech rowing team. Norm McElhinney, one of the Institute in recent years, should be one of the best coxswains of the Varsity team. Others who will help complete the team are Burt Mann, Mitchell, Robinson, DePato, and Bennett, together with some very promising products from last year's frosh such as Bertson, Adams, Berry, and DePato.

Last Fall the varsity batteries unseated blacks twice to the New England meeting but this will probably be bettered this year. Allison and Bates and Taylor of Maine both entertained the New England meet with enough to displease Norm McElhinney. Of the Frosh, DePato, one of the last year's men will stand to be a hard man to defeat. Of course in the National cross country run at Van Cortland Park, New York, there will be a more expert field, but here again the team is expected to considerably better their position of last year which was third.

---

**CABOT MEDALS FOR LAST YEAR AWARDED**

Given Yearly to Men Improving The Most Physically

The Cabot Medal for the fleetest runner goes to the following men in the class of 1930: Frederick G. Fisher, John W. Platt, Horatio W. Firth, Irvine F. Doherty and Robert Ransome. Those who were last year's medalists were made as follows: H. G. Hochman, Henry Talbot, James Goodband, A. Doremous and Ralph E. More.

Each year the medals are given at the last name Cabot 78, are given to the five members of the freshman class who show the greatest physical improvement as indicated by the personal examinations and shown by their work in Physical Training. The medals are presented at the annual dinner at the freshman testimonial given at the end of the year under the auspices of the freshman class and the two years previous. In the last dinner given the following men received the medals.

**Buy at Your Store and Get a Dividend**

**JOIN TECHNOLOGY BRANCH FIRST**

To get the best results every Tech man should become a member of the "COOP" before he begins to buy any of his supplies. It costs one dollar to join for one college year. You get a membership ticket with a number. Tell the salesmen your number every time you buy anything that costs 25c or more at Technology Branch, the Barber Shop or the Market Place at Harvard Square. The total credited to your number on June 30 is the amount on which you get your dividend. The profits are divided among the customers who join. Dividend Checks for last year's purchases will be ready for distribution Oct. 10.

The dividend paid on last year's business is 10% on cash purchases and 8% on charge purchases.

---

**The "COOP" is the official source of required textbooks and supplies in every course.**

TO SPEND MILLION ON FOUR BUILDINGS

(Continued from Page 1)

are forthcoming from the Daniel Guggenheim Fund for the Promotion of Aeronautics. So far only the foundation of the edifice has been laid and a steel framework put up. When the site had been occupied by a brick and limestone structure conforming to the architecture of the present building, the old schoolhouse will become two growing units, a working museum, li brary, teaching areas, lecture rooms, laboratory, research rooms and a lasting of materials laboratory. The building will be 110 feet long, 60 feet deep and three stories high, in addition to a high basement.

It is expected that these four structures will be completed before the summer of 1928 and ready for occupancy immediately thereafter.

MAJOR ROBERT EDDY JOINS M. I. T. STAFF

Three recent appointments and one promotion are announced by the Department of Military Sciences and Tactics. Major Robert C. Eddy has been called from the rank of the first corps area coast artillery reserve to take the place of Major Lewis H. Goodier as executive officer of the cadet staff. Major Eddy graduated from the U. S. Military Academy in 1909 and completed advanced work at the United States Military Academy in 1917. He was in command of the staff school at Fort Leonard Wood in 1922.

Staff Sergeant Mark B. Ashby has been appointed to the position of Chief Clerk in Department to the Department of Military Sciences and Tactics. Sergeant William W. Robinson, who has been transferred to a similar position at the University of Arizona. Staff Sergeant Harold F. McDonald replaces Sergeant J. Enslow on the instructing staff, the latter having been transferred to the Second Field Artillery at Fort Logan, Colorado.

The only promotion announced is that of Capt. Harold L. Miller who has recently been promoted to a captaincy from his former officer of first lieutenant.

NOTICES UNDERGRADUATE

FRESHMAN FOOTBALL

Candidates for the freshman football team were to draw lots on Tech Print tomorrow at 4 o'clock.

- Crew
   A general mass meeting will be held at 3:30 P.M. Wednesday at 4 o'clock.

Freshman Crew Managers

Freshman candidates for the crew management are requested to report to Manager William Thomas 28, at the Boat House. The competition is open to all freshmen.

TO MEET OCTOBER 4

M. I. T. MUSIC CLUBS TO MEET OCTOBER 4

Schedule and Plans for Coming Season to be Discussed

M. I. T. Music Clubs will hold a general meeting on October 4 at 4 o'clock in room 10-250. The schedule of the clubs for this year is as yet incomplete, but it will consist of some twenty or more engagements in and around Boston which will include the Providence Square Boys, Harvard, Massachusetts, and Burgundy. Graduating members have left many openings, and it is coveted that all freshmen who may wish to try out for any of the clubs be present at this time. This meeting is of importance as plans for the coming season will be discussed and all candidates will be given an opportunity to ask questions about anything that is not entirely clear.

NOTICE TO TOBACCO SMOKERS

To smoke wisely and well, choose Camels

There’s an irresistible reason for choosing this famous cigarette. Not for its popularity alone, but for that superior quality that produces it.

Camel wins its prestige with straightforward value. It is rolled of the choicest tobaccos that money can buy, and its blending is the taste and fragrance triumph of tobacco science.

The Camel smoker is tobacco fit. He has the best, with no scrupling or denial of cost. There are no four-wheel brakes on Camel; no brakes at all. It is full speed ahead, straight for quality.

Select Camel for smoking pleasure, and you’ll join distinguished company. Professional, modern smokers have elected it on the principle of superiority.

“Have a Camel!”

R. J. REYNOLDS TOBACCO COMPANY, WINSTON-SALEM, N. C.
