Dramatic Appeal of Aviator

In aeronautical engineering at the Institute is more than double that of any other department.

Building Construction Course

Increased 64 percent, and architecture increased 25 percent.

Freshman Rules a Success

Three hundred forty tickets were sold for the Freshman Dance, the highest number ever attended, according to the planning committee. The orchestra, under the direction of Miss Ada E. Smith, performed a variety of music.

Sophomores Make Good Showing at Meeting of Class

Field Day Teams Will Start Their Practices At Once

Over 100 prospective candidates for the various Field Day teams respond in enthusiastic enthusiasm.

Students in the department of physics increased 51 percent, while those in the department of aeronautical engineering increased 64 percent.

Dramatic Appeal of Aviator

The increase is attributed to widespread interest in aviation, while Technology is preparing for another branch of engineering in which students can specialize.

The program of expansion is already under way at the Guggenheim Aeronautical Laboratory, which was established in 1923.

Students on their way to the first meeting of the year.

Freshman VOO DOO To APE TUESDAY

Congratulations, one of the highlights of the school year.

Scissors are not needed for the event, and will be taken care of by the scissors.
ATTENTION UPPER CLASSMEN!

LAST year the Institute Committee sanctioned certain pro-

posals for Freshman Rules. These Proposals have become

the law and it is up to the upper classmen to see that the law

is enforced. If each upper-classman appoints him-

self a committee of one to see that the rule is enforced we will

have no more trouble than the Law.

the freshmen. You have showed your

willingness to comply with regulations imposed upon you for

your own good. Now, the rule states that during the second

term Professor Roberts tried it out with

the freshmen, on their engineering work.

He has signified his interest in-

continuous work this year.

The Institute undoubtedly

contains many men who have their own ideas and who

realize that the living of life is more than the following of a score

of printed rules. We think that these men are the ones who

have striven their interest in the Option and believe that they

will do more than anyone else to make the Tech the

cool of creative work in fields which are normally outside the limits

of their engineering work.

One week from tonight, Oct. 7, is the date set for the All

Tech Picnic. It is one of the best picnics that Tech has ever had. 

freshmen underclassmen have the opportunity of getting to

gether and having a good time. We know that everyone keeps October 7 free because of the success of the event
ded last year. The turn out that will attend.

Committee has undertaken plans to make this year's affair

as successful as the last. We do not order this to be imperious that the upperclassmen give their best heart-

support.
**FROSH OUTNUMBER UPPERCLASSMEN AT CREW GATHERING**

Bill Haines Urges All Men To Come Out and Train

YEARNINGS GO ON RIVER

One of the largest groups ever present at a crew in a military camp, appeared at the opening of the season on Wednesday afternoon in room 311. It was estimated that executives of the freshmen and Sophomore relay teams, as well as others together, had made men and freshmen. It was not possible to count the number of freshmen present, as they were too crowded to stay in the room alone.

Ronald Youngson of last year's freshman ranks could still stand a little more training. Bill Kirwin, Norm Mcintosh, Chuck Wigglesworth and others were all of whom are strong men. All the frosh who are The Varsity should have a strong team, Ladd, an excellent prospect, is a real freshman year along the line.

It is the purpose of the meeting to get all possible candidates out for the freshman and Sophomore relay teams, as well as to get together the freshmen for the Sophomore and Sophomore relay teams. The Frosh are very eager and legible of the type that the coaches demand.

More Candidates Needed For Field Day Relay Teams

Opportunity For New Men On Both Sophomore and Frosh Teams

Sophomore and Freshman candidates for the Sophomore and Frosh Relay teams have been working out under the direction of Coach Osborn D. Eastman, and a meeting will be held Thursday, April 10, at 3:00 p.m., in the basement of the Engineering Building.

There is a sufficient number of candidates for these teams to form a nucleus for some of the teams that are to be formed in the near future.

The Sophomore teams need a nucleus of twenty-four men, and the Frosh need a nucleus of twelve men. The Sophomore teams will be divided into four teams of six men each, and the Frosh teams will be divided into two teams of six men each.

Students who wish to try out for any of these teams should report to Coach Osborn D. Eastman in the basement of the Engineering Building before Monday, April 10.

**RALLY OPENS SOPH FOOTBALL SEASON**

In an appeal for a squad of twenty-three men, the Sophomore year is considered the most important season for the Sophomore year. The Sophomore year has been chosen as the most appropriate season for the Sophomore year. The Sophomore year has been chosen as the most appropriate season for the Sophomore year, and the Sophomore year has been chosen as the most appropriate season for the Sophomore year.

The Sophomore year is considered the most important season for the Sophomore year. The Sophomore year has been chosen as the most appropriate season for the Sophomore year. The Sophomore year has been chosen as the most appropriate season for the Sophomore year.
Edward P. Warner will Address Air Meeting Tonight

Aviation Conference Is Being Held in Boston During Aero Show

(Continued from page 1) into a separate course, say, as Course XVI.

Warner graduated from the Institute in 1917 with the degree of Mas-

ter of Science. He had previously re-
tained the degree of Bachelor of Arts

from Harvard University. During the

World War he was employed as aero-
space engineer for the Air Service in

connection with research, and also

as instructor in the military course in

aeronautical engineering at the Insti-

tute.

During the war he was also detailed

on Technical Assistance for the

Navy Department, where he

supervised the training courses of a large num-

ber of corpsmen. Warner represented the Insti-

tute at the organization of the aeronautical

engineers association of the Navy.

T. C. A. HAS 500 BOOKS ON DISPLAY

In the past few weeks the Book

W. R. S. CHERRY

of the Technology Student

Association has sold $389.06 worth of

used books to the students. There

are still around 500 books on the

shelves and others coming.

As in former years 1000 leatherbound

and paper indexed books, were

printed. A total of 732 of these were

delivered to the Institute as a result of

the examinations in Science and in Bio-

logical Science. The other books

were distributed.

The next two or three

weeks will be devoted to

the work of the Library

on Monday.

All 3000 books printed this

year were passed out during the first

two days of school.
