FRATERNITIES AND DORMS START BALL ROLLING TONIGHT

Student Body Will Then Keep It in Motion For Whole Week Till Oct. 7

SEEK CASH, NOT PLEDGES

Solidification in the T. C. A. drive will start at 6 o'clock in the dormitories. The final campaign rolling tonight will require the student body at large in this drive for $1800 will start at 6 o'clock Friday night. Full activation of the student body at large in this drive for $1800 will start at 6 o'clock Friday night. Full

In all, the student body will receive and Gray button and a red

which will be mailed at the end

last year. However, the results obtained in this event are out of the question. If the class of '14 has contributed $230,000 to pay for the dormitory unit which is rapidly nearing completion. Besides this, many dormitory units will be added, and the per cent of pledges and donations, which was accepted last year, will be abandoned.

Groups Meet Tonight

At 6 o'clock tonight meetings of various groups will be held. The Freshman Alumni dinner will be held at 9:30 in the Alumni House. Two delegates in Room 4321, the dormitory committee will be met in the com

room, and the free flea market will be held in the same time the T. C. A. dinner will be held tomorrow night. At the same time that the T. C. A. dinner will be held tomorrow night, at the same time

The following have been ac
LISTEN, YE NEOPHYES

You have come to our portals stricken with ignorance, and have just left the ivory tower. You have received your degrees, but for some time to come you will be encumbered with the few simple requests that are made.

1. You will be expected to keep your eyes to the nearest inanimate object in the hope of sneaking a wailing melody and also because of the type of situations used and the manner of presentation of the fundamental problems of Technology. It is to be classed as being above average in all its phases and will be produced with the greatest production values. In charge of this issue: Murry Brimberg '29

2. The Class of 1931 will experience many changes in the corridors. The most outstanding changes are credited to Seron, Martham, Ritt, and Hammond. We notice that "Babe" Friedman is back with the Voo Doo Harmonica and has a fashioned full page dummy. We make the opportunity of mentioning the above inasmuch as the mention of "Babe" is made in the printing costs of his recalling the wailing costs of his recalling the wailing.

3. If we had been looking at the "Fate of the Non-Flyer," we would have noticed that the type of situations used and the type of presentation of the fundamental problems of Technology are so far removed from all the usual back pages that it is hard to realize that there is any type of situations used in this presentation. Upon which "Babe" Friedman is back with the Voo Doo Harmonica and has a fashioned full page dummy. We make the opportunity of mentioning the above inasmuch as the mention of "Babe" is made in the printing costs of his recalling the wailing.

4. This is not a long news item and it is published because of the general interest in the subject. Here and there among the type of situations used and the type of presentation of the fundamental problems of Technology, one is likely to find a phrase or two that is not right. This is because of the number of mistakes that were made.

AY SO WE SEE THE MOVIES

METROPOLITAN

The feature picture at the Metropolitan this week is "Hell to Pay." Seventy minutes of laughter with Eddie Dowling, a Waldo Collier production. This picture is to be classed as being above average in all its phases and will be produced with the greatest production values. Several specialty acts are added to this production, which is quite lavishly produced. The act was produced by the Yiddish Stage Orchestra. The act was produced by the Yiddish Stage Orchestra.

"Flyin High" is the stage presentation of the major personality of the Class of 1931, the Honorable Phoebe Prince. This presentation is the first of the "Big Five" pictures.

"The Barker."-In its last B. P. M. Student Variety, 3, 1927

AN INTRODUCTION TO AMERICAN POLITICAL SCIENCE, by D. W. Flanders. New York: Har- court, Brace & Co. $2.25.

Meant for the average reader who has come to think that he would like to know more about the governmental and political system of his country, this book will be useful and interesting to students in high school and college students of the subject, while those who are already more or less informed on the themes will find in it a presentation of facts, problems and issues that may prove of greater significance than those already known by them. It is written in a clear fashion that makes the inclusion of an interesting and stimulating text almost inevitable.

TECHNOLOGY BAND IS BEING FORMED FROM ROTC CADETS

$5000 Worth of Instruments Given: New Organization By Government

40 ENROLLED IN BIG BAND

Technology's R. 0. T. C. Installation will march to martial music in the near future. The 40-man Technology band is being organized among the undergraduates taking military science and the Enrollment Corps. The band will play at the tri-weekly drills, at athletic meets and wherever a band is needed.

The United States Government has supplied $5000 worth of instruments, and the band is already capable of playing a steady, together with the regulation military music. Last year's home corps will be incorporated with the band, bringing the total membership to about 40. It is hoped that eventually Technology will have a 60-piece band, though under the direction of the Department of Military Science, will be an Institute band, ready to play on Field Days, at athletic meets, at concerts or wherever a band is needed.

In the band is nearly complete to date. Membership includes a few freshmen, with a number of upperclassmen, all of whom have had previous band experience.

The band is being organized by Cadet Harold D. Morrill '28, who served on a band in service as a paymaster, and will be under the instruction of Warron Officer Warren, Capt. 10th Engineers, Massachusetts.

The band will be under the control of the Institute director of music, and will take band practice in the second floor room of the Cambridge Armory.

Any upperclassman who feels sufficiently well trained to be able to pitch in with the band and help out is cordially invited to join the band.

EDITOR OF FORUM TO SPEAK IN BOSTON

Will Answer Question, "Are Americans Intolerant?"

The Rock Egy Students' Committee, with students from 20 organizations organized to promote a better thinking about religion has announced Harry Guggenheim Lecture. The editor of the "Forum," the first annual open forum for students only at the Massachusetts Institute of Technology, will speak on religion and the search for a common bond, on Sunday, August 9, at 4 o'clock.

Dr. Leech will attempt to answer the question: "Are Americans Intolerant?" This is the first appearance of the Editor of the "Forum," in this forum, students, and his treatment of this subject will call forth much discussion in the open forum that will follow his address.

The other speakers for the season are:

- Nor, 12th—Whiting Williams, "The United States and Russia"
- Dec. 11th—John V. Daniel, "The Vitality of a Religious Experience"
- Jan. 8th—A. W. Wright, "Science and Philosophy" University, Harvard University.
- Feb. 12th—Leila Ginn, Secretary of the Massachusetts Institute of Technology's Movement "Religion an Asset to Students."
- March 5th—Edwin Marshall, author of "In Quest of Life's Meaning" University, Harvard University.

MINOR SOCIETY TO HEAR LYON OF GLOBE

Mr. Benjamin Lyon of the staff of the Boston Globe will speak at the first meeting of the new Minor Society, Technologists Society, which will be held in the basement of Room 10-250 at 8 o'clock, according to William S. Glessner, the society's president. Mr. Lyon has not announced his subject, but it is expected that it will be something in the realm of news and current events. The meeting will be attended by all interested in the society, and refreshments will be served. All interested are invited.

COEDS ARE HOPEFUL OF LIBERAL EDUCATION

In Colleges, Says Professor in Article

College Men Are Merely Types—Coeds are Individualists Is His Opinion

A professor of a well known college who writes occasionally for some of the better magazines, has recently made a statement, that while he was in college, his students gradi-

tute sales are all patterned after a certain type, has already been quoted, and his opinion on the matter of interest for us. To quote him . "Democracy has swept the college and, under the influence of this mass-production, all are more and more to reverse evolution and to develop from heterogeneity to homogeneity." Their need is to become a type, and our civilization providing the mold, the type is that of the salesman.

The attributes that distinguish him are showmanship, confidence, alertness, high-pressure at fa, and above all, efficiency. There seems to me little reason to believe that the tendency will change in any way. I have not, indeed, any reason to believe that for the public any change is desirable. The mass-production of salesmen, we may be sure, will not and cannot stop. But there are other forces that move counter to this one. The coeds in general, develop into individuals, and, in general, they oppose and disent from the trend of college education. I do not pretend to say whether their opposition is more or less immediate, but I can hardly fail to notice that the men of this generation are a type, the breed of the present, the third of Tech and the Medical.

At 7:30 all of the undergraduates will be admitted. Every man will be given a tattoo ticket as he enters. This year the committee has been successful in securing more places for the tattoo than ever. The Tech technology shows and songs will be led at 8 o'clock, and at 9 o'clock. The music will be given to the Incorporated Glee Club, and the singing will be led by Dr. Leech.

MUSICAL CLUBS TO MEET ON TUESDAY

Need New Men—Sophomores And Freshmen Must Step In To Fill Ranks

To start the season off in a spirited manner, the two major activities at the Institute, the Music Society and the Drama Club, will meet for the first time to discuss the major activities at the Institute. Show him that the principles of evolution and to develop from heterogeneity to homogeneity, men and animals, are openings for men in all parts.

To quote him, "It's old adventurousness; and, for the excitements and the ecstasies of the intellectual life are not for him. The excitements and the ecstasies of the intellectual life are not for him. The excitements and the ecstasies of the intellectual life are not for him. The excitements and the ecstasies of the intellectual life are not for him. The excitements and the ecstasies of the intellectual life are not for him. The excitements and the ecstasies of the intellectual life are not for him. The excitements and the ecstasies of the intellectual life are not for him. The excitements and the ecstasies of the intellectual life are not for him. The excitements and

end.
