FRESHMEN LEAD CLASSES
Failure of Drive Laid to Poor Organization. Ask Free Lances for Money

Slightly less than two-thirds of the $1100 goal of the drive of the Techological Christian Association has been realized so far, according to Mr. W. B. Munro, manager of the organization. Although complete collection of payments was not made, it was stated that the total up to Saturday afternoon was probably $9000.

The final drive effort, at 6 o'clock Friday night, that part of the afternoon drive money which has not yet contributed may do so at either front of both offices of the Association, and those students who have already contributed and wish to raise the amount of their contribution, are encouraged to do so.

The ballot box will remain in the Main Lobby over the next few days, and this box is open to all those to whom this may do any good.

Approximately 60 percent of the total amount to be contributed is pledged. The last half of the Association's drive money will be contributed, it was stated, by those who had not yet made contributions and to whom this may do any good.

Free Lances, who have not yet turned in their accounts in request to do so at either of the offices of the organization so that all the vagabonds among them may not be dispensed. The failure of the drive is held by the Association to lack of good organization of contributors, as well as the Free Lances. Many also have a contribution that has not been turned in, and this sum will be contributed, if possible, to prevent the failure of the drive being a definite one.

B. J. Jones, '28, leading "July" in the search for Free Lances, said that the fund will carry on the drive, and that this money will be turned in to the Association. At 6 o'clock Friday night, the ballot box will be the main speakers.

Robert E. Rogers and Alexander McLeod of the Free Lances, were present, and Charles A. Young, most diligent Free Lance, is present.

That the free lance drive was not up to par, or that the drive was not successful is contributed, is contributed, is contributed.

The Free Lances, who have not yet contributed, are asked to do so at either of the offices of the organization so that all the vagabonds among them may not be dispensed. The failure of the drive is held by the Association to lack of good organization of contributors, as well as the Free Lances. Many also have a contribution that has not been turned in, and this sum will be contributed, if possible, to prevent the failure of the drive being a definite one.

Negro Boy May Cease to Exist
The Student Council has been advised by the management of the Clubs that the Negro student may cease to exist if the Council does not take action to prevent it. The management of the Clubs is considering the matter, the Negro student being a matter of great concern to the management.

The Negro student has been a matter of great concern to the management, and it is stated that the management will not tolerate continued neglect of the Negro student.

Relative Merits Of College Men Are Classified

Technology Students Compared To The Base Runners Than Dancers

A recent news of the Springfield Daily News contained the following article which quoted the opinion of a local college girl regarding the relative merits of men from the various New England colleges.

"Can he play football?" is the question the college girl asks of the man she likes, though the football season is upon us.

"That isn't saying we don't enjoy a football game, but only that we have more fun with the players than we have in our own little group. The man who wants to be a football star is of course the football player all, as far as the girls are concerned. They don't care a cent how many games he wins, they can't eat this and that, he is the hero, he is the one who wins.

Are Harvard men good dancers? He says. "Harvard men are fine dancers, that's true. They have plenty of room, they have plenty of time, they can dance well.

"I think it's very amusing when they are slow dreamy waltzes and balalaika tunes. They are just as real day dreams.

"I think the ink is "Twice the Ink" Engraver. It is a pen that can match the words with a Chilton as you can with a filling pen because it holds "Twice the Ink", 81 drops vs. 38.

Edgeworth is what the well-dressed pipe will wear.
FRESHMAN EIGHT APPEARS STRONG

POOR ATTENDANCE AT TUG OF WAR MEETING

With approximately a dozen men present for the tug of war meeting held at the Hangar last Friday afternoon, the size of the crowd was disappointing. Many students who normally would attend with the appeal that a good tug-of-war contest was about to start at 5 o'clock found the number of those present less than enough to make the contest worthwhile.

Carl Bernhardt, supervising manager of the Hangar, who presided over the meeting, announced that the tug-of-war contest was postponed until a larger interest could be aroused and said that it would be held in the gymnasium Friday morning.

A temporary lineup of the first crew has been made out, being based entirely on the results of the work of small teams held before Friday. Each team was requested to have its players present, and the size of the bunches will be noted at the morning meeting.

Saturday afternoon the varsity will have a workout in one of the new boats bought especially for the varsity. In previous years the varsity has been the chief offender of the Ineligibles, but it is now getting a little more balanced and has the edge in all departments.

The varsity consists of three seniors and one junior, including one freshman, reporting for his first varsity meeting.

HARRIERS TRIALS TO BE AT WINCHESTER

With the discovery of a fine amateur cross-country course on the University of Pennsylvania grounds, there is an excellent chance to hold trials this Saturday. Coach Carl Brailsford, the chief foe of the Varsity, will have a chance to test his squad against the men used some skillful practice in the fall and will have a good chance of winning the championship.

The trials will be held at the University of Pennsylvania grounds, which are about two miles from the varsity's headquarters.

**Distinguished by a favor that places it first**

It is a natural pride that Camel feels for its triumphs. Not only did it lead the field shortly after its introduction. It passed steadily on with each succeeding year until today it holds a place in public favor higher than any other smoke ever reached. Camel is supreme with modern smokers.

Obviously, there is a quality here that particular smokers appreciate. It is indeed the myriad qualities of perfection that are to be found in the choicest tobaccos grown. And the art of Nature is aided by a blending that unfolds each delicate taste and fragrance. You will find more than like Camels. You will find a solace in them every smoking hour. Their mildness and mellowness are an endless pleasure. "Have a Camel!"
