PRAISES FRESHMAN CLASS

Returning to his desk yesterday morning, in the company of his associates, President Samual V. Stratton of Massachusetts Institute of Technology, returned after an interview of several days with students.

It was reported that the students were highly pleased with the progress being made in the construction of the dormitories and also to the improvement of the Freshman class this fall.

Stratton was sent to Europe by the United States Government, as a delegate to the International Conference of Weights and Measures, which was held in Paris during the month of September. The two other official delegates from the United States were Dr. George K. Burgess, director of the National Bureau of Standards, and Sheldon Fisher Hills.

Although the conference was held at Paris, the United States Government did not send a delegation of people to the conference.

FIELD DAY

DUE to the small number of traditional events in undergraduate life at Technology, the few that there are should be supported as actively as possible. One of the oldest and best known of these events, which originated twenty-five years ago to take the place of the cane rush in which one man lost is the Field Day program, which is well run and from year to year it would seem that it substituted considerable property damage in its early days especially in the preliminary celebrations. It seems up to the lower classes this year to protect one of the best traditional undergraduate events by proving that a successful and enjoyable Field Day can be carried off without damage to the property of others. To this end it is necessary that nothing too small should support. It is hoped that our events shall be more attractive than usual. As yet many of the classes do not seem to have the best candidates in the field. Every team in order to secure the best practice must have at least two teams to compete with one another in the practices. The best good enough put on an attractive Field Day program cannot be made in the last few days before the turn. It is a real challenge to the men of the lower classes.

Freshmen and Sophomores, you not only owe it to your class that you do your best in the Field Day competitions but you also owe it to the school as a whole in order that one of our best traditions shall not die.

THE TECH

As We Like It

CRIME

When a play is advertised as a melodrama, the New York theatrical world can scarcely expect anything beyond the impossible performance of "Crime." The play now playing at the Waverly is quite another matter. It is approach nearer to what, if it were not for the love stories and murder, the drama would be a melodrama.

One of New York's leading comic actors, who is leader is exposed to any shooting to kill, gives the best dramatic actor in the play a rapidly gripping story of love, murder, and the down of the hero. The character is, however, easily absorbed in the drama in the fact that the original is in three, on the coast, and the story of the gang, the man who is caught and punished through the efforts of a man who was a member of the group. The story that is not told and in too much detail, it is quite different from the usual personal criminal plays.

COURT OF THE MESSIAH

A woman has been found in the world that has been seen in the story of love, robbery, murder, and the down of the hero. The character is, however, easily absorbed in the drama in the fact that the original is in three, on the coast, and the story of the gang, the man who is caught and punished through the efforts of a man who was a member of the group. The story that is not told and in too much detail, it is quite different from the usual personal criminal plays.

SOCCER MEN PLAY AT NORTHEASTERN

Hard Fight is Predicted—Northeastern Team Is
Unbeaten

Technology's fast and fighting soccer team meets Northeasterner tomorrow afternoon on Northeasterner's field. The Cardinal and Gray team has been working hard all week and has perfected a number of passive combinations, but will encounter plenty of opposition in the huskies who have defeated Clark 2 to 0 and Worcester Polytechnic 3 to 0. Northeasterners will have the advantage of playing on their own field, coach Walch has done a great deal during the past week to whip the team into shape. Thursday night's fast and interesting work out was held. Recent men have already been chosen for the Varsity, but quite a few positions will be left to be decided until tomorrow. Capt. Sproule heads the list of those who are practically sure to start. Others are Thibault, forward; Oeler, backfield; Mosey, forward; Venture, inside right; Hazard, outside right, and Haddy, backfield.

When the score is made up, it will be in the hands of Shay, manager. He is fast and very good at carrying the ball, and will undoubtedly play for the Varsity plenty of trouble tomorrow. Venture scored the other goal last Saturday, and he also is a dangerous man. Team work has been improving greatly this week, as the men have become accustomed to working either or and timing their shots well. The defense has been remarkably sound, and the forward line is in the capable hands of the Varsity, who are making good progress and are considered to be one of the outstanding men's teams on the Eastern Coast.

Who says that the female sex is weaker than the male? Who denies the physical ability of young womanhood? He who needs to prove it further has only to look at the 1931 Field hockey team, and he will find that the team into shape. Thursday night a few of the men showed up for practice, and the team as a whole is ready for the season. The defense has strengthened considerably this week, as the men have been working hard all week and have perfect-

First Handicap Meet Tomorrow

Nine Events Will Be Held in Opening Contest Of Track Season

Tomorrow afternoon at 3:30 on Tech field, "Our Field" will start the first handclasp meet of the year when the Varsity team will take the field to meet the 1931 team. Nine events will be run, one for the freshmen and one for the Varsity. The returning dash will give the coach an idea of the men who will compose the 1931 Field hockey team.

Under Bill Meirs's direction two hurdle races will be run—the 40-yard hurdles and the 80-yard low hurdles. The distance of the last hurdle has been increased from 40 yards to 80 yards, and it is hoped of the meets of the Harvard record holder, Meirs, hopes to develop a few point winners.

An eastern Viennese distance man, will all be running at Worcester, the long-est run will be a 1500-yard run. In spite of material at this distance and at this point of the season, Hallahan are in shape they will make it interesting or exciting.

Field events are on the sched-ule—hurdle, high jump, high shot, javelin and discus. Brookman, Allen and Oeler, a crack freshman, are expected to do well in the high jump department. With Miss Gray, McCarth, Martin and Allen the handicap meets are.

There is quite a striking contrast between these two teams, as at the University a little over a hundred years ago, and that of this fall. In 1839 the faculty consisted of one man and two students entered the institution which consisted of only building which had cost $500 to build. This year, an auditorium is being con-structed which will be valued at $300,000.
