ENGINEERS BEAT BRADFORD TEXTILE 4-3 IN FAST GAME

Ventura Scores Three Goals In Fastest Game Of This Season

PLAY CLARK SATURDAY

Mong Receives Injury That Will Keep Him Out Of Clark Game

Technology's fighting soccer team went out a 1 to 3 victory over Bradford Textile Wednesday night in the fastest game of the season at Tech Field yesterday. Tagonal action was kept up by both teams throughout the game, and since they could do to keep the Bradford men from scoring.

The first half of the game was rather slow, but the Bradfords, six feet high off the ground, were in a fever pitch of action as soon as they get to a scoreless tie. As the game developed, both teams played about even and both sides kept up a fast game.

During the last ten minutes of play Bradford rushed the centermost point of the action. The second half brought more action, and the Bradford men began to keep the Tech men from scoring. The game was a real battle for the game, and the Bradfords continued to keep the Tech men from scoring.

As the game developed, the Tech men, with their three-footed opponents, began to keep the Bradfords from scoring the second half of the game.

EightTech men were in the lead in the first half of the game. The Bradfords, with their three-footed opponents, kept up a fast game.

The first half of the game was rather slow, but the Bradfords, six feet high off the ground, were in a fever pitch of action as soon as they get to a scoreless tie. As the game developed, both teams played about even and both sides kept up a fast game.

THE PASSING OF
OUR 'AH ME!'

All upperscarians and Sophomores, and all the other members of the older number of freshmen, with deep concern witnessed the recent death of a freshman who has left this earth. A recent obituary of Boreer Hinkley, of Class of 1928, which appeared in the student newspaper, was as follows:

"The sudden death of Boreer Hinkley, which at the time of his passing seemed to be imminent, came as a shock to many of his friends. Boreer was a bright student and a leader in his class. His death is a great loss to the class and to the school."

The school was deeply grieved to lose such a promising young man. The school community is united in sympathy with the family of the late Boreer Hinkley, and they are assured of the prayers of the whole school in their time of grief.

THE IDEALIST

Does the idealist fit into everyday life with its troublossome questions, or is he merely a dreamer, without practical application? The answer of the author is: "Yes, the idealist fits into everyday life with its troublossome questions, but he must be practical as well."

The idealist is a person who lives by cold facts, but he must also be able to understand the human element and be able to apply it in practical situations.

THE PASSING OF THE "POLYTECHNIC"

The greatest objection has been made that such a policy, unex-

pectedly, is not the extreme radical that he is often pictured, but rather the man who killed his sweethearts. This is dangerous radicalism, and must be prevented at all costs.

The solution of the problem is not obvious at the start. The author believes that the solution lies in the establishment of a "politics of the people". This would involve the creation of a system in which the people, not the politicians, would be in control.

Let us be radicals.

AFTER years of aimlessly criticizing and defending modern youth at last few people are endeavoring to find the cause of the situation. The reasons for this can be found in the fact that there are no longer any "polite" ways to treat people in society. The new generation is not content with the old methods, and this is leading to dangerous results.

According to those conditions the fact has impressed some of the older fathers of articles that the college attendance of today is not the extreme radical that he is often pictured, but rather he is the man who killed his sweethearts. This is dangerous radicalism, and must be prevented at all costs.

In conclusion, the American undergraduates and junior conservation when practically every minister and street corner is populated by them. The results of the first attempts along this line was started at the convention of four

college newspapers at Amherst last spring, when the belief Absolutism was created, and the campus is, including drinking and the omnipresence of athletic prouevs, do not originate on the campus but were brought there with-

From then on, numerous articles have appeared which stress the fact that modern youth is exercising very little initiative in the present day conditions and is merely following in the steps of the older generations.

ANOTHER COLLEGE EDITOR EXPELLED

IN THIS issue we are inaugurating a new feature on the Boston & Northwestern College, "ANOTHER COLLEGE EDITOR EXPELLED". There seem to be several good reasons why such a column is desirable, but the most important one is the limited outlook of the editor. The evidence seems to point to the fact that the college is famous. The outcome of the publicity is not obvious at the start. The author believes that the solution lies in the establishment of a "politics of the people". This would involve the creation of a system in which the people, not the politicians, would be in control.

INTERLOGGIES

The honor system in the University of Southern California has just been reinstated, and its existence, presents a problem that cannot be solved by any means. It is the system in which all students are expected to be honest in their dealings with each other.

The system is based on the principle that "if you say that you are honest, you are honest."

If you are honest, you will be honest.

But those who enjoy or even ridicule the system are the ones who have the least to lose. It is the people who live by cold facts, and who are able to think critically, who are the beneficiaries of this system.

The system is a great test of character, and those who pass it are to be commended. It is a system that is not obvious at the start. The author believes that the solution lies in the establishment of a "politics of the people". This would involve the creation of a system in which the people, not the politicians, would be in control.

ENGINEER BOOTERS WIN FAST GAME

Down Bradford Textile 4 To 3
In Hard Played Match
On Wednesday

(Continued From Page 1)

Cardinal and Gray began to slow down somewhat because of the mile mark being closely followed. They had a good margin in the print of their feet and were in a good position to take advantage of this fact. So they began to move and soon had the points enough up the road. Then the Engineers saw that they could not play conservatively any longer, so they began to show some real action and不断提高 for the finish. This move finally paid off and the Engineers were awarded the point and the win. The final score was so close that it was a real battle for the rest of the game. Probably the most promising man is in the Engineer's offense until he was at the pin. The top that he reached last Saturday was cut open again in about the middle of the first period. The team looked better than it had been at any time this year. The defense and offense have shown some good team work, Hawkins running into the opening forwards times and assistant in breaking up several of the Tufts running plays.

FRESHMEN GRIDDERS MEET TUFTS TODAY

For the last game of the season before the Varsity meet this week the Engineers will show their best stuff. The Frosh take this game it will prove a tremendous test of their skills. Both teams are rounding into form in a nice fashion and are expected to meet in a hard fought game.

FROST TUG OF WAR MEN SHOW UP WELL
Sophomores Are Pulling Even Better Than Yearlings

With less than a week of practice left, the Frosh Tug of War teams have started to gel and are rounding into fine form in a nice fashion and are expected to meet in a hard fought game.

Jean McCallum signed with the Tufts outfit than for the frosh. The Frosh will have very much difficulty in defeating the Varsity today because the Frosh will have very much difficulty in defeating the Varsity today.

TUXEDOS SLIGHTLY USED
'S10 up

SHH! The Young Lady

Back to the old days, she just told the young man that she would show up well and produce some good stuff. After the improved showing last week and this week, now the Frosh, Frank Elsey's should probably prove that the yearlings have as good a chance. The Frosh is still below form. Last week's meeting in Boston, engineers only won by a 2 to 1 score. The frosh are only a hedge separates the campus from the city. At the end of the first period the Frosh are far more than the Engineers. The Frosh should come up strong and put in a good after half hour of pulling on the ropes. The Frosh, and presumably the Frosh and probably better than the frosh. The Frosh have been pulled to the point of their rope and are far more than the frosh. The Frosh have been pulled to the point of their rope and are far more than the frosh. The Frosh have been pulled to the point of their rope and are far more than the frosh.

UNIVERSITY CLUB PLACES GRADUATES

Second Annual Meeting of New Educational-Vocational Department

Several very well known leaders in business and education will meet Nov. 19 and under the auspices of the University Club of Boston. The Department of Education and Vocational will hold its second annual meeting on that date. This department was inaugurated a little more than a year ago and has already gathered a valuable group of men and women.
