BOATHOUSE WORK IS HASTENED BY DELAY OF WINTER

Excavations Are Completed—Work Begins For Actual Building

BEN WILL BE TWO ADDITIONS

With favorable weather for building, adding materially in the construction of the addition to the boathouse which was begun last week, the work is progressing as fast as can be ex- pected. Excavation for the founda- tions of the new structures has been completed, and work on the founda- tions themselves is in progress. Work on the walls of the new boathouse is now being done, and when the walls are up, the men will probably move over to the new addition. The total height of the addition will be 16 feet, and the foundation building them higher being a double one. In constructing the main park commission would not allow a higher building, as this would give it a half-story, if it was likewise a necessary one. The foundations are being laid in the present structure. Even with unfavorable weather for building, the men are making good progress.

Present plans are to put up the buildings, two stories in height, leaving the remainder of the job until a suitable opportunity should arise. There is greatly stimulate interest in the river- side activities on the campus, and the loss of the boathouse has been felt for some time.

DOORS OF BUILDING 2 SUCCESS TO TRAFFIC

Due to the number of people who have been visiting Building 2, which faces the common, and who are coming and going through the doors, they were the main traffic of the college. Numerous students, including those who have been using the doors, have said that they are more suitable for the traffic of people.

Architecture is the most popular major at the institute. This year, there are 250 students enrolled, making it the largest major at the college. The students are studying the principles of architecture and design, and are preparing for careers in the field.

Institute Makes Gift To Walter Camp Memorial

Nation-Wide Testimonial to Yale Coach is Joined by Corporation

Technology will be represented in the West Coast Classic on Saturday, the 1st day of the calendar season, with the goal of their being selected for the tournament. The city is in the process of selecting the teams for the tournament, and it is expected to be the first multi-sport event in the area.

M. I. T. STUDENTS WIN ARCHITECTS' AWARDS

Two Places in Exhibit at Pan American Conference

Two entries from the Architecture Department were selected for the third annual Pan American Exhibition, which is being held in Havana, Cuba. It will be the first time that M.I.T. students have been represented in the Pan American Exhibition.

T.E.N. AND VOO DOO TO STAGE GRibble BATTLE

Secret Practices Promise a Grim-Feud Struggle

That interest in football at Tech will be kept up to the highest level that will make the season a success, is the fact that following the footsteps of former Tech footballers who have appeared in the all-star game, ten alumni have been invited to play against the Green Wave of Temple University in the Homecoming game.

Fraternity Delegates and College Authorities Meet in Conference

Interfraternity Meeting in New York To Discuss Student Problems

The annual Interfraternity Conference, which brings together all the national collegiate fraternities, will be held in New York City on November 24 and 25. The conference is expected to discuss a wide range of topics, including the future of fraternity life at the college.

CARDINAL AND GRAY CROSS COUNTRY MEN WILL RUN IN I.C.C. 4A'S

Compete Too In Annual Classic At New York City

Impossible to Pick Winner From Strong Teams Entered

PENN WILL DEFEND TITLE

Two Technology harrier teams will compete in the I.C.C. A.A.A. A.A. meets to be held in New York City, the track and field courses run out the Holy Cross Park Cornham course. Neither team is considered a favorite to gain any honors for the Institute. The teams are expected to provide a good test for each other.

Upperclassmen, Beware Of Hardboiled Frosh!

Beggars are frequently seen in the form of a blonde, who has been around the campus for some time. The beggar is known for his hardboiled approach to life, and is often found carrying a black bag.

Gives Flood Statistics

In the course of his address, Dr. Morgan, President of the Institute, said that the flood of 1927 was the most destructive ever known to the Institute. He cited the example of Dayton, Ohio, where 600 lives were lost and the property damage exceeded $100 million. The meeting was held for the benefit of the flood victims and their friends.

First Costume Ball Held By Architects

Old Rogers Exhibition Hall was utilized by the Architectural Students' Society to hold a costume ball. The event was attended by many of the college's students and faculty.

November T. E. N. To Be On Sale Today

Featuring Articles On Illumination And Farming

November's Tech Engineering News, which will be printed as a supplement to the newspaper, contains several articles of interest to the students of the College. The articles cover topics such as flood control and its importance, and are expected to be informative. The event was held for the benefit of the flood victims and their friends.

Would Aid Navigation

Nautical navigation would also be assisted, as the harbor would be able to accommodate more ships. The city would also be able to handle a larger number of vessels. In addition, the city would be able to handle a larger number of passengers.

November 24, 1927

Three more students lost their first dual meet in hilly Van Courtland Park course. The teams were American Society, 1927-28 and Anti- cline, 1926-27. The meet was won by the American Society, 1927-28, 60-40.

CHOOSING MR. AMERICA

IN THESE days of unprecedented freedom it is extremely dan- gerous to pick the typical American specimen of pulchitrude, the typical American football player, the typical Girl Scout, or what not. If you do, you must have been one of the bandwagoners and choose our candidate for the typical American citizen.

For, when we are in any small town just before the mail comes in at the post- office, we will proceed to fall in behind the band wagon and see what it is that is being purchased by all the storekeepers. As the great American public finds its recreation. It may not be because of our candidate's preconceived opinions which are impossible to change that we have chosen him although that may be considered a true American trait. Neither is it the shallowness of his views nor his adherence to all sorts of movements, although those too are typically American. It is the fact that we have found a man who can play football, that is all.

Hearing this disposal of the Loonerg we can proceed in search of more pleasant things. There is a little story of the freshmen at the Riga High School that seems to be worth of mention. The freshmen became so bored with being freshmen that they decided they would decorate their school as such and go through the completely ridiculous ceremony of putting the seniors in a special corner where conversations is punctuated by hisses as small masses of water hit the theatre. Everything that he says and does. To him everything that happens in any small town just before the mail comes in at the post-office, we will proceed to fall in behind the band wagon and see what it is that is being purchased by all the storekeepers. As the great American public finds its recreation. It may not be because of our candidate's preconceived opinions which are impossible to change that we have chosen him although that may be considered a true American trait. Neither is it the shallowness of his views nor his adherence to all sorts of movements, although those too are typically American. It is the fact that we have found a man who can play football, that is all.

CARDINAL AND GRAY PUT UP STIFF OPPOSITION

SOCCER TEAM LOSES TO NEW HAMPSHIRE 2 TO 1

New Hampshire defeated the Engineer soccer team 2 at 1 on November 21st. The game was played at the Engineer Field and was the opening game of the season for both teams. Technology clearly outplayed their opponents, but couldn't convert any of the chances they had. The first half was quite a struggle, with several near-misses for both teams. Technology dominated the possession, but New Hampshire's defense held firm.

Technology took the lead in the 90th minute, but New Hampshire equalized a minute later. The game ended 1-1, a disappointing result for the Engineers who had been hoping for a win.

GREAT DRAMATIC PLAY

Another dramatic moment came in the final minutes when New Hampshire's goalkeeper, who had made several excellent saves earlier in the game, was forced to save a penalty kick. The goalkeeper's reflexes were superb, and he denied the penalty, preserving the 1-1 draw.

The game was a great test for both teams, and they both showed great determination and skill. Technology will be looking to build on this performance as they prepare for their next game.

VOO DOO

All Freshmen entertaining Crew for Physical Training who have not reported at the boathouse yet must do so immediately.

T. E. N. COMPETITION

The managing board of the Freshman sculling crew announces the beginning of a Post-Field Day Competition, all interested in trying out for the boathouse in the Walker boathouse.

New Hampshire is not a member of the I. B. G. A. A. A., so her teams will not compete Monday. It is a shame that their wonderful freshman team of the Wildcats cannot run, for they would probably add another victory to their string. Any team that can take the first five places in the Old Rug will be entitled to the best in the country.

Richard A. Loeb, who is at present residing at the State Prison at Joliet as a result of the famous Leopold-Loeb cases, has been recalled to Columbia's Home Study Courses. Although it had been emphasized during his trial for murder that he is a exceedingly brilliant, his mental pro- cure is not as great as this formal estimation, according to Columbia rea, for he is below the average in his work.
