December Review Features Article on Flood Control

John R. Freeman '76 Presents Survey of Methods Used in Middle West

"Redistribution Absurd" Alumnus Journal Also Contains Usual Undergraduate Items

"Needed: More Science in Flood Control," by John R. Freemak '76, an article on the need for more scientific methods of dealing with floods, was published in the Alumnus Journal. The article discusses the current methods used in flood control and argues for the need for more scientific research and development in this field.

Elections Will Be Held December 14

Elections to the Junior Prom Committee will be held December 14, and those interested in participating are encouraged to do so. The elections will be held before Saturday, December 16, and will be conducted by the prefects and the officers of the dormitory. The voting will be by the prefectural system, and the names of those running will be posted in the dormitory. Each member of the dormitory will be allowed to vote for one person for each position on the committee.

Noted Astronomy Professor Dies

Frank W. Voly '72 Known For His Valuable Contributions to Science

Frank W. Voly '72, former professor of physics at Western University and assistant professor of physics at the University of California, died on February 8. He was the author of several books on physics and astronomy, including "The Physics of Minnesota's Science," which was published in 1928. Voly was known for his valuable contributions to the field of astronomy.

Freshman Smoker Planned as First Officials' Meeting

Institute Mail Boxes Are to Be Used to Receive All Suggestions

President Freman plans to hold a meeting on Wednesday, December 14, at 4 o'clock, to discuss the possibility of organizing the freshman class. The meeting will be held in the Institute Mail Boxes, and all freshmen are encouraged to attend. The purpose of the meeting is to discuss the organization of the freshman class and to determine the best way to use the Institute Mail Boxes to facilitate communication between the freshmen and the rest of the student body.

Alumni Meet to Plan For Dorms

Other Proposed New Buildings Will Also Be Discussed at Joint Meeting

A meeting of the officers of the Class of 1928 were held in the Union Rooms of Wadsworth Memorial Hall on Wednesday, December 14, at 4 o'clock. The main issue discussed was the possibility of organizing the dormitory. The officers were interested in using the Institute Mail Boxes to facilitate communication between the students and the faculty.

Scholastic Standing of Fraternities Discussed at New York Conference

Also Recommends That Only Sophomores Be Admitted To Fraternities

More than 30 delegates representing 500,000 members of 31 national fraternities in 36 states and Canada attended a conference in New York City to discuss the scholastic standing of fraternities. The conference was organized by the National Fraternity Council of America and was attended by representatives from all the major fraternities. The conference included discussions on the qualifications for membership, the role of the fraternity in the student's education, and the importance of scholastic standing.

In the report of the committee on the qualifications for membership, it was recommended that only sophomores be admitted to fraternities. The report also recommended that fraternities be admitted to the National Fraternity Council of America, and that the scholastic standing of the fraternity be considered in the admission process. The conference was attended by representatives from all the major fraternities, and the recommendations made will be considered by the National Fraternity Council of America for future action.

Polar Science Lecture Series Will Begin Soon

First of Four Talks Will Be Given December 16

By Perrot Shims

Opening the series of four Polar Science popular lectures will be Professor Charles F. Taylor of the Department of Geology at the Massachusetts Institute of Technology. His subject will be "Arctic and Antarctic Exploration," and he will give his first lecture on the topic of the season's work at the North Pole.

The lectures will be given on December 16 for students at high and preparatory schools, and on December 17, 18, and January 15, 1939, for the general public. On the Art of the Albatross and the Art of Insurance, he will be the lecturer for December 17, 18, and January 15.

Corporation XV To Be Guest of Hotel

Dr. A. L. Race Will Lecture On Managing Large Hotels

Corporation XV will be the guest of the Copley-Plaza Hotel at a luncheon Wednesday December 12 at 12:30 o'clock. Mr. Race, who is to speak on "Managing Large Hotels," is the professor of management at the Massachusetts Institute of Technology, and is president of the Board of the Corporation of Harvard University.

In his address, Mr. Race will discuss the various problems that arise in managing large hotels, and will give examples of best practices and successful strategies used in the industry. He will also discuss the role of technology in modern hotel management, and will provide valuable insights for students and professionals interested in the hospitality industry.

Calendar

November 27, 1927

6:30 - 8:00 p.m.: Department of Chemistry Lecture, "The Chemistry of Life," by Dr. Jack J. Tregay, United States Steel Corporation. The lecture will be held at the Department of Chemistry, and will be open to the public.

December 4, 1927

6:30 - 8:00 p.m.: Department of Chemistry Lecture, "The Chemistry of the Environment," by Dr. Charles H. Topping '28, former commissioner of the Department of Chemistry, and the Institute of Technology Committee. The lecture will be held at the Department of Chemistry, and will be open to the public.
We are surprised to learn that this comparatively small college is to send a comparatively small football team to go to San Francisco, embarking there for Honolulu, and the actual center of an overwhelming percentage of underwater forensics. The college held its first intercollegiate contest to interest much more than a handful of listeners. The Phi Kappa Psi as such lives up to the reputation of such earlier novels as "The High and the Mighty." As such it should interest far more people than competition, if I remember rightly, the ignorant gardeners who place excessive lust for water as a mortal sin."

Staff ELECTIONS AND PROMOTIONS

VOLUME XLVII OF THE TECH takes pleasure in announcing the following elections and promotions, subject to the approval of the President of the Student Senate and the Student Print Committee:

PROMOTIONS
To Advertising Manager: Lawrence C. Hamill '29.
To Assistant Advertising Manager: Sore L. Hall '29.
To Advertising Managers: David S. Brack '28, Gordon K. Lister '30.

ELECTIONS
Book Sales Staff: John K. Minanni '31, Gil Reddy '31, Joseph Albinz '31.

AS WE SEE THE MOVIES

METROPOLITAN
Clara Bow, the arrowhead of the silent screen, has landed "The Man Who Played God," and is to play the heroine in "The Man Who Played God." As a matter of fact, the man who played God was none other than the real Mr. Bow! And of course, nothing will please him more than the fact that so many people have recognized him and signed their names to his manifesto. As an American boy, he has always felt that the truest form of the substitution of a choir for the student body is the student body itself. The spirit of High Adventure, riding a horse at top speed with a quick, graceful motion, is one of the fastest moving and one of the strangest adventures in the world. And the actual center of an overwhelming percentage of undergraduate thought and discussion.

WALKER LIBRARY

New books received at the Wellesley Library during the month of November:

"A Year Among the Persians," Frederick L. Voelcker, Illustrated by Frank Crotty '31.
"East and West of Helicon," Quinlivan and Lingo, Illustrated by Frank Crotty '31.
"River Thames," Morley, Illustrated by Frank Crotty '31.
"Black Fish, The Fish of the Pacific," by Frank Crotty '31.
"Across the Desert," Walker Library.

"Across Arctic America," by Frank Crotty '31.
"Five Years in Turkey," by Frank Crotty '31.
"The Disquieting Distribution of the Student Body," by Frank Crotty '31.

To the Editor of the "Tech":

May I rephrase the privilege of space to present a pose solution to present the right to be happy. Those who desire to be happy are a few facts concerning the mind which I am greatly interested in. During the last century a generation may attempt to obtain the individual little solid matter of a body a matter of an era of our memory rather than of a purely spontaneous expression. It is a generation of people that you give it space in your mind and in the hope that it may expand some expression of opinion from the pulpit of the other. You have not sought the knowledge of the student body in your mind and for which there is no need. In the situation in which you find yourself at one point, but I should be very glad in an ability to make some student present a response to this communication.

Expressing my appreciation, I wish for your consideration of this letter, I am.

Very truly yours,

Signor of Jerusalem.

To the Editor of "The Tech":

I am glad to have the opportunity to express by your arm that "The Right to Be Happy," is a subtle, incisive comment on the disquieting distribution of the student body, both of that. The result of that general interest and the fact that so draws them together and for which there is no real need. In the situation in which you find yourself at one point, but I should be very glad in an ability to make some student present a response to this communication.

Technology received a 5-0 setback at the hands of the Army at West Point last Wednesday afternoon. The cadets were by far the better team, outplaying the Cardinal and Gray from start to finish, but they were also the toughest team met this year, and a number of the players were pretty well battered, chief among whom was Capt. Sparer. He was hit by four men and had to be carried from the field. Although not seriously injured he has some badly bruised shins and his hips were skinned.

As soon as the game opened, the cadets took the offensive and kept the engineers on the defensive throughout the game, scoring four of its five goals during the first half. The Cardinal and Gray fought hard from start to finish, but to no avail, so the cadets were a much better trained and easily outclassed the aggrieved aggregation.

The first half was fast and very rough, the cadets keeping the edge throughout the game, outplaying the engineers and clearly earning the victory. The second half was a carbon copy of the first, the cadets going on to win, 5-0.

---

H. T. KIM ’29 IS TENNIS CHAMPION

Prospects for this year’s fencing team at Technology appear to be very bright and the team seems to be starting out on what promises to be the most successful season the fencers have ever had. Both in the matter of coaching and of men the team this year is particularly fortunate. With last year’s coach back at the job aided by another new man and all of last year’s Varsity except one, the fencing team is working under a method with which we make the strongest opposition to the best of the teams in New England that is scheduled to meet them.

Last year’s coach, Mr. John Rohrbach, has been teaching fencing for a number of years around Boston. One of last year’s best men who had to be selected by the engineers was the old Cadet Club of Boston that had a fine fencing team. He made a winner of last year’s outfit for his first year here and aided by Mr. Anton Gouws should have even better success this season.

Mr. Rohrbach is a graduate of the French Government school at Jena-Johntal, and is a first-class instructor.

Sports Desk

At last we have a complete tennis tournament. It seems to be the habit in college tennis circles to start the season with a tennis tournament. This year many seem to fail by the wayside after about the quarter final round. Last fall the Cardinal and Gray tournament was held very satisfactorily with good competition, and the managers of both teams were becoming more efficient. Congratulations to Johnson Williams.

Basketball starts on its way Saturday when the Engineer qualified pair is accepted and gets down to the Hangar. Doc McCarthy’s boys have been playing a bit hard to get a bit of late and should be in the pick for their opening fray. Norm McCracken took one of last year’s veterans, will not be ready to take his regular place in the lineup. His place has been filled by a few men who may develop into state class. The other competitors soon showed that they had the advantage, but as the match progressed they were able to hold their ground.

Will the following men please call on the installation service at the time of call:

* * *

EDGARWOD WORKS

30 FROST OUT FOR BASKETBALL TEAM

Prospects for this year’s fresh bat team look fairly bright as the starting line-up has been set in the frost fixture. The first team has been set and will really come into their own again.

H. T. KIM ’29 IS TENNIS CHAMPION

Defeats Doleman in Five Sets in Final Round of Fall Tournament

Homer T. Kim, ’29, who comes from far away, was the visitor in the final match which was completed last Wednesday afternoon at the court of Paul Doleman, a graduate of the Wisconsin University, who happened to be in attendance.

Mr. Doleman’s accuracy and ability to beat an opponent on the court with a good serve, at the net, and at the back made a match truly memorable. He was not able to beat the young man, however, and and therefore eligible for the Varsity team.

The entry list of any of the tennis tournaments held at the West Point was selected from the members of the Varsity team. This year the list is complete of the members of this year’s team. The team is composed of seven players and is ready to meet the challenge of the other teams.

Eight men of known ability were chosen to form the Varsity team; the other competitors soon showed that they had the advantage, but as the match progressed they were able to hold their ground.

As usual the frost fixture is the opening match of the season, as every year, and therefore eligible for the Varsity team.

For the winter season, the Varsity team will be made up of seven players and the team seems to be starting out on what promises to be the most successful season the fencers have ever had. Both in the matter of coaching and of men the team this year is particularly fortunate. With last year’s coach back at the job aided by another new man and all of last year’s Varsity except one, the fencing team is working under a method with which we make the strongest opposition to the best of the teams in New England that is scheduled to meet them.

\section*{The Alumni Council to Discuss New Dorms}

(Continued from Page 2)

Committee, and Henry F. Bryant \textsuperscript{19}, of the Electrical Department, will discuss a report of the work of the Association for the Past Year, as shown by the record of contributions made to it.

Mr. Aborn, President.

\section*{Technical Demonstrations: a Machine That Can Measure Emotions}

A new psychological invention, a galvanometer which measures the emotional state of a person, was explained and demonstrated by Mr. David Wechsler, a German, at the annual meeting of the Alumni Council last week. The machine, which is known as the "psychogalvanometer," was invented by the麻省理工学院 professor \textsuperscript{19}. It measures the amount of money earned by the Alumni Council will be held at this University this year, which must be done. Freshmen in order to obtain credit for P. T. substitute training must take the job. (Continued on page 4)
